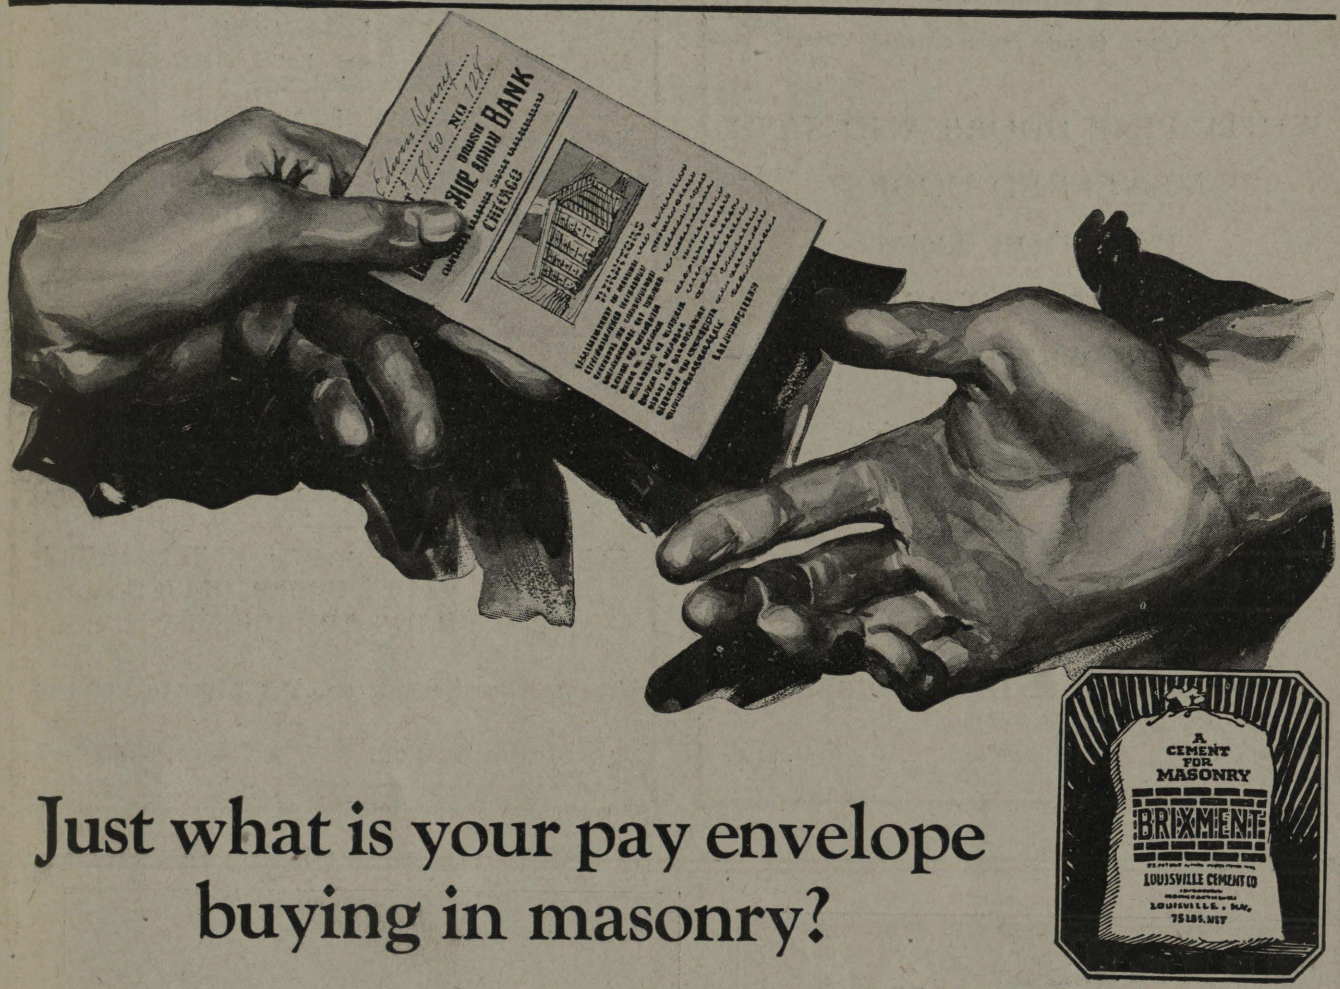
BETTER MASONRY AT LESS COST



Just what is your pay envelope buying in masonry?

What kind of masonry and how much is your pay envelope buying for you?

The best mason can produce so much and no more with the regulation lime and cement mortar. But give him smooth, plastic, easy-working BRIXMENT and you automatically increase the *amount* of work he can do and insure a uniformly better *quality*.

No lime. No slaking. No waiting for the mix. One part BRIXMENT; three parts sand. Can be used immediately after mixing. No scaling. No popping. Easier, quicker, more durable joints. Can be re-tempered.

BRIXMENT is made according to a scientific, unvarying formula, that produces a dependably uniform mix and a bond as strong as the brick itself. *Sold through dealers*. If not available in your town write us at once.

INDIANA SOCIETY OF ARCHITECTS TO HOLD ANNUAL MEETING AT INDIANAPOLIS, JUNE 28

Election of Officers Among the Features On the Program

Preparations are once more under way for the annual meeting of the Indiana Society of Architects which will be held in Indianapolis, Saturday, June 28. As now planned there will be a meeting of the Board of Directors at 10 a. m., a noon luncheon for all architects attending the annual gathering, then a regular business session for the membership in the afternoon with a banquet in the evening.

One of the most important features of the affair will be the annual election of officers, nominations for which are now being made. There will be two tickets in the field and these will be printed in the Recorder probably next week. In addition to the regular officers to be voted upon there will be five directors to be elected for varying tenures of office, the constitution now providing a progression according to the vote cast, those receiving the highest number of votes to hold the longer terms thus providing a board several members of which will hold over and thus be in intimate touch with the Society's affairs when new officers and some new board members assume office and take up the administrative reins. In connection with the election it might be added that under the present constitution no member who is delinquent in dues over sixty days prior to the election will be entitled to vote or be eligible to hold office.

Secretary Harrison who has just recently returned from Washington, D. C. where he attended the annual convention of the American Institute of Architects as a delegate from the Indiana Society of Architects announces that it was a most interesting gathering, the discussions developing many practical and helpful points. A comprehensive report on the national convention will be made by Mr. Harrison, the substance of which will bring out the thought expressed by prominent architects of the country as regards the architectural profession and practice. Just as an aside, the writer would like to say that, from what he heard from the secretary regarding the Washington meeting, the report to be made June 28th should prove of more than ordinary interest to Indiana architects.

If present plans carry Mr. F. R. Walker of the architectural firm of Walker and Weeks, Cleveland, Ohio, who planned the War Memorial to be built at Indianapolis, will be on the program for the annual meeting with plans and studies for an informal discussion of the development of the War Memorial and Plaza scheme.

The banquet in the evening is to be a real treat with a program on a plane such as was carried through at the February meeting which marked one of the most enjoyable periods in the history of the Society's social functions. Though definite details have not been completed the probability is that the meeting will again be held at the elegant new home of the Indianapolis Athletic Club.

This is merely a preliminary announcement to apprise the Indiana architects of what is under way for the annual session of the I. S. A., the latter part of this month that they may realize what is in store for them and have plenty of time to arrange their affairs so they may be in a position to visit Indianapolis on the day scheduled.

HEARD AT A. I. A. CONVENTION

Expressions Advanced by Prominent Architects of the Country

Lack of originality in present day architecture was bemoaned by Architect H. Van Buren Magonigle, who, at the Washington A. I. A. presented a paper on "What is Precedent Doing to American Architecture?" The points he brought out strongly were: Why is it that plagiarism in literature is not countenanced; that no great artist copies the works of another; that no sculptor takes for his model the product of the sculptors who have gained fame; that great musicians develop new melodies and strains and only condemnation follows him who would purloin parts from another musician and put his composition out as his very own, and yet, architects are prone to follow in the footsteps of the members of the profession who have gone before, copy from plates for design and otherwise imitate rather than develop new work of their own?

Architect Ralph Adams Cramm, another noted architect, in referring to American architecture, said, "Architecture is an expression of the people who inhabit a country or a given locality, thus it was that he accounted for what is to be found in American structures. He held that American architecture is merely a "jazz" conglomeration expressing the wide and diversified types of people who are gathered here from all corners of the globe. He further contended there can be no real distinctive American type of architecture until there is a pure distinctive American civilization.

PENCIL SKETCHES

Ability—is the skill we think we have, and about which other people are in doubt.

It beats business how thunder keeps up—why not make a little noise for new I. S. A. members?

Success—is the culmination of hard work.

Peg—a square pin so many are trying to fit in a round hole.

Much has been written about efficiency—why not show some of it for new I. S. A. members?

Pocket Book—most architects these days don't need one.

The Wedge of disparage is used by some men to put a competitor on the skids.

One day is as good as two for him who does everything in its place.

Keep I. S. A. squarely before the public if we want its attention and respect.

The man who does nothing says nothing and thinks nothing—is not likely to make many mistakes.

Over-worked—a common subject between men who think their firm is not giving them a square deal.

ORGANIZATION AND CURRENT NEWS

CONTRACTOR WILLING TO THROW THIS JOB TO SOME OTHER FELLOW

Whole Thing Purely Conditional

An Indianapolis contractor, of long experience, found the following general conditions on his desk Monday morning with the word that plans are to come later. Well, since things are a little quiet he took out time to read over the chance for a prospective job and since digesting the manuscript has concluded to turn the proposed job over to any other Indiana contractor who may wish to figure it, announcing leather medals will be given as a bonus to those who will undertake the work if carried through in strict accordance as herebelow set forth:

General Conditions

GENERAL:

The plans and specifications are to be taken together. Anything shown on the plans and not mentioned in the specifications and anything mentioned in the specifications and not shown on the plans, is to be considered as both shown and specified, implied and required, and shall be provided by the contractor without expense to anybody but himself.

If he can do the work without expense to himself, the work shall be taken down and done over again, until the expense is satisfactory to the architect.

ARCHITECT:

The term "Architect" herein appearing shall be understood to mean the architect or any uncivil and unsanitary engineer that he foolishly but courteously employs to assist in making trouble for the contractor.

PLANS:

The plans are to be considered diagrammatic, and are to be followed only where space conditions make it possible to avoid so doing. Coincidence between the plans and executed work shall not be considered a claim for extra compensation. The architect is not required to recognize coincidence.

Anything that is right on the plans is to be considered right; anything that is wrong on the plans shall be discovered by the contractor, and shall be made right without telling on the architect or on the bills.

Anything that is forgotten or missed out of plans and specifications but which is necessary and required for the comfort of the owner and convenience of the owner, shall be provided by the contractor, to the satisfaction of everybody (except the contractor) and in full accord with the evident intent and meaning of the specifications, without extra cost to anybody but the contractor.

RULES AND REGULATIONS:

The work throughout shall comply with all rules, regulations, caprices and whims of all city, county, state and international departments, bureau, and officials having, or not having jurisdiction.

MATERIALS:

All materials throughout shall be the best of their several kinds; the contractor is expected to know and provide the best, irrespective of what is specified in detail. The architect reserves the right to change his mind about what is best. Any necessary changes to make the work and materials fit to the mind of the architect and owner shall be made by the contractor without extra cost.

PERMITS:

The contractor shall obtain all permits and shall pay all fees, annual dues, assessments and subscriptions to masked balls, organizations, etc.

GUARANTEE:

The contractor shall guarantee and hereby does guarantee that he will keep in complete working order anything that the architect asks him to attend to, so long as there is more work in sight in the architect's office.

ARBITRATOR:

In case of any disputes arising as to the nature, character or extent of work shown, specified or implied, the matter will be decided by referendum and recall; after which the decision will be set aside and reversed by the architect.

PAYMENTS:

Payments, if any, shall be made on the architect's certificates. Architect's certificates shall not be considered negotiable nor are they legal tender. When once issued the architect assumes no responsibility for further usefulness. Partial payments shall be made as the work progresses in the amount of 85 per cent of the value of the work done, as judged by the architect. In no case shall the judgment of the architect cover more than enough to pay the laborers every Saturday night. The material men must take the necessary chances. The final payment, if any, shall be made when everybody is satisfied and the owner is ready. The contractor shall accept and hereby does accept, the conditions appearing, for himself, his ancestors and progenitors, his family, heirs, executors and assignees and stranger within his gates.

ADDED CONDITION:

As the contractor's time is of absolutely no value to anyone, the said contractor shall stand ready at all times to figure any job for the architect's personal friends.

Calumet District

HUGE EXPENDITURES FOR BUILDING IMPROVEMENTS BEING MADE BY CALUMET STEEL INTERESTS

New Business Structures and Residential Work Follows

Expenditures of more than $100,000,000 by steel companies in the Calumet district and along the Illinois-Indiana border have been authorized, indicating that the southwestern shore of Lake Michigan within a few years will be the greatest steel producing center in the country. This expansion of the steel industry will necessitate a huge home building program for the residential zones of the district and the development of new business districts in the Calumet area.

A summary of the building program of the steel companies shows this work either under way or contemplated:

The United States Steel corporation's subsidiary, the National Tube Company, is engaged in the construction of a great tube mill at Gary at an estimated cost of $35,000,000.

The Youngstown Sheet and Tube company, following its absorption of the Steel and Tube company of America, is now enlarging its Indiana Harbor mill at a cost of $4,500,000 and has intimated that its future construction expenditures would be confined practically to the west.

The Inland Steel company, at a cost of $7,500,000 is increasing the production and finishing capacity of its plant at Indiana Harbor—also in the Chicago district.

The Jones & Laughlin Steel corporation of Pittsburgh has purchased 1,200 acres bordering Wolf lake, part of which lies within Chicago.

These construction activities in the Chicago district which are all in the Calumet territory, together with the projected $40,000,000 Jones & Laughlin mill and other projected plants, mean an estimated expenditure in that district alone of over $100,000,000 for new construction.

Need of Better Houses

The greatest need in the district at present lies in suitable homes, according to one Calumet real estate man. Employes of the plants now demand better houses than the shacks in which they lived before prices advanced and wages got on a higher level. This home demand is being met, and in addition there has been a considerable volume of com-

mercial and mercantile building construction work going on to meet the growing business interests of cities located in the Calumet District.

BUILDERS AGAINST DISCRIMINATORY TACTICS EMPLOYED BY LATHERS

Would Protect B. T. E. A. Member From Threat to Remove Him From Local Field

The General Contractors Council held a meeting Monday, June 2nd at which further attention was directed to the situation that has developed since the lathers' union went on a rampage and has sought to tangle things up. At the meeting it was decided to call for a joint session with the Building Trades Council that a protest might be registered against the discrimination that the lathers' organization has been exercising against a certain B. T. E. A. member.

The general contractors have taken the stand that they will not stand for any unfair or underhand tactics and if such are practiced they will take a hand in the lathing embroglio in order to bring about a spirit of fairness that the association contractor in question may get a square deal.

The union lathers seem bent on crowding Mr. Zeygy, the B. T. E. A. lathing contractor, but of the field, in fact, they have informed him that after June 5th he will not be allowed to contract work and will be expected to work for one of the other lathing contractors if he expects to follow his trade in the Calumet field. Mr. Zeygy says he will not be dictated to and does not intend to cease contracting. The general contractors who have found this man's work to be satisfactory and reasonable in price can see no reason for the "crowding" tactics that are being used to railroad him from the local field and are standing back of him in his effort to continue in business.

CALUMET BUILDING PROGRESS

Hammond architects report new business rather quiet. There are plans on the boards but prospective work and inquiries have shown a tendency toward a lull. Home building work progresses at a fair pace but speculative operations are far below the standard of this time a year ago. Labor agitation and increased difficulty in negotiating building loans has had a decided effect in slowing things up to an appreciable extent.

Lady Luck's first cousin, Miss Fortune, took advantage of Decoration Day to decorate C. S. Rhoads, well known Hammond contractor. First some one took a liking to his favorite hunting dog and lured it away, and later a speed cop slipped up along Charles to tag him.

E. E. COLE.

EVANSVILLE

FAVORABLE ACTION BY COUNTY COUNCIL ALL THAT IS NEEDED TO GET HOSPITAL PROJECT UNDER WAY

Big Tuberculosis Hospital in Contemplation

If the appropriation for $665,000 requested by the board of the Boehne Tuberculosis hospital, and approved by the county commissioners is granted by the county council plans for the work of enlarging and remodeling the sanatorium will go forward at once.

The present equipment, which has been added bit by bit from a very small beginning some fifteen years ago, is considered very adequate to the needs of such an institution.

It is the desire of the directors to have several of the older buildings torn away, and changes made in others to bring the entire establishment to a point where it is a thoroughly modern tuberculosis sanatorium. The location, high on a group of hills, separated by deep picturesque ravines, and with large native trees growing thickly over the entire hospital grounds, makes an ideal situation for a tuberculosis hospital.

Children's Hospital

A feature of the large building scheme that is arousing much interest is the plan for a children's hospital, to be entirely separated from the other buildings. Under the present conditions the children's wards are so situated that the young patients must go through the wards of adults in order to get outside. This places them constantly in touch with the more advanced cases with the result that their recovery is delayed, so it is held.

Included in the new building program will be women's and men's open air pavillions, hospital improvements, sun parlors, recreation open air auditorium, new servants' quarters, and a school building.

FT. WAYNE

LOCAL BUILDING VOLUME HOLDING CLOSE TO 1923 RECORD

May Permit Figures Total $1,850,020, Highest Monthly Record So Far This Year.

The total estimated valuation of new building construction for the month of May in Ft. Wayne showed a $240,408 increase over that for April and proved to be the highest local monthly building figures recorded so far in 1924. The 406 permits issued involved an estimated expenditure of $1,850,020, or $166,525 more than the March total the best record made till the May performance was completed.

There were 79 more permits issued in May, 1924, than in May, 1923, but the estimated valuation for the corresponding period last year ran up to $2,166,085, 14.6% in excess of the past May figures.

Residential work continued strong, accounting for 181 permits out of a total of 406. The largest permit taken out during the month was for the Trinity English Lutheran church, Wayne and Ewing streets, at a cost of $450,000. Many of the permits issued during May were for the remodeling of residences.

The building construction of the city started since January 1st, this year, had up to June 1st, reached a total estimated value of $6,116,027, a figure that exceeds former yearly volumes a few years back and yet it is $255,768 in arears of the 1923 record for the first five months' period. The fact that this year's operations have compared favorably with those of last year and are only slightly behind the 1923 heretofore unheard of local volume is most gratifying as many had predicted a decided let down this season.

INDIANAPOLIS

MAY BUILDING AT INDIANAPOLIS EXPERIENCES A DECIDED CHECK

Slump Noted When Comparisons Are Made

After making an encouraging pickup in April when permits for new building construction showed an estimated valuation of $2,492,173, lending encouragement to the hope that at last building operations at Indianapolis were really

INTERSTATE CLAY PRODUCTS CO.

taking on a worth-while activity, along came May and an easing up again resulting, at the end of the month, in a decided falling away in the volume of new work as compared with that of the preceding month. The decrease in May as against the April building business was 21.1%. Extending the comparison further to the corresponding period in 1923, figures show that building in May was far in arears of that of last year, the deficit amounting to $839,270.

A year ago in May there were 1,809 permits issued involving an estimated investment of $2,805,011, while during the month just recently ended there were only 1,754 permits issued while the estimated valuation for the entire lot only ran up to $1,965,741.

Had it not been for residential work for which 224 permits were issued amounting to $871,547 or 44.3% of the entire volume of building, Indianapolis would have made a poor showing indeed. There was but one single permit issued for a project of any consequence and that related to a $200,000 industrial building. As for the other work it was small and covered a wide range of structures with repairs, alterations and additions making up the bulk of the work.

An analysis of the new building work for May as compiled at the city building inspection department is as follows:

Kind	No.	Valuation
Accessory Buildings	277	$103,285
Business Buildings	23	284,775
Industrial Buildings	1	200,000
Public Buildings	1	3,000
Residences	224	871,547
Tenements	3	135,000
Repairs	904	260,808
Miscellaneous Work	321	107,326
Total	1,754	$1,965,741

Sealed Proposals

NOTICE OF SALE OF SCHOOL BONDS

Notice is hereby given that the undersigned, Trustee of Jefferson School Township, Wells County, Indiana, at the office of said trustee in the school building at Ossian, Indiana, and the Advisory Board of said Jefferson Township, Wells County, Indiana, at the hour of three o'clock P. M. on Saturday the 28th day of June, 1924, and from day to day thereafter until sold, will offer for sale an issue of One Hundred Thousand ($100,000.00) Dollars of Bonds of said Jefferson School Township, each of said bonds calling for the the principal sum of Five Hundred ($500.00) Dollars with interest thereon at the rate of Five Per Cent Per Annum, paybale annually on the 10th day of July of each and every year until paid, as evidenced by appropriate coupons attached thereto, said bonds are numbered consecutively from 1 to 200, payable at the Farmers' State Bank, at Ossian, Indiana, and become due and payable as follows, to-wit:

Bonds Nos.	1 to	10,	Inclusive, July 10th, 1925,
Bonds Nos.	11 to	20,	Inclusive, July 10th, 1926,
Bonds Nos.	21 to	30,	Inclusive, July 10th, 1927,
Bonds Nos.	31 to	40,	Inclusive, July 10th, 1928,
Bonds Nos.	41 to	50,	Inclusive, July 10th, 1929,
Bonds Nos.	51 to	60,	Inclusive, July 10th, 1930,
Bonds Nos.	61 to	70,	Inclusive, July 10th, 1931,
Bonds Nos.	71 to	80,	Inclusive, July 10th, 1932,
Bonds Nos.	81 to	90,	Inclusive, July 10th, 1933,
Bonds Nos.	91 to	100,	Inclusive, July 10th, 1934,
Bonds Nos.	101 to	110,	Inclusive, July 10th, 1935,
Bonds Nos.	111 to	120,	Inclusive, July 10th, 1936,
Bonds Nos.	121 to	130,	Inclusive, July 10th, 1937,
Bonds Nos.	131 to	140,	Inclusive, July 10th, 1938,
Bonds Nos.	141 to	150,	Inclusive, July 10th, 1939,
Bonds Nos.	151 to	160,	Inclusive, July 10th, 1940,
Bonds Nos.	161 to	170,	Inclusive, July 10th, 1941,
Bonds Nos.	171 to	180,	Inclusive, July 10th, 1942,
Bonds Nos.	181 to	190,	Inclusive, July 10th, 1943,
Bonds Nos,	191 to	200,	Inclusive, July 10th, 1944.

Said bonds will be dated July 10th, 1924, and will be sold to the highest bidder therefor, and for not less than par value and accrued interest.

Each bidder will be required to file with his bid a certified check for $7,500.00, payable to George W. Todd, trustee of Jefferson School Township, conditioned that in the event the bidder is awarded said bonds, that he will pay to said trustee of Jefferson school Township, of Wells County, Indiana, not later than the 10th day of July, 1924, the amount of his bid for said bonds, and in the event the bidder fails or refuses to pay the amount of his bid for said bonds by the 10th day of July, 1924, said check and the amount represented thereby shall be and become at once the absolute and unconditional funds and property of said Jefferson School Township for the use of the special school funds of said school township, not as a penalty, but as agreed and liquidated damages for his failure to pay the amount of his bid and take up said bonds.

Said bonds are to be issued and sold in pursuance of orders of the Advisory Board of said Jefferson Township, made and entered of record at a special meeting of said Advisory Board, regularly held on the 21st day of May, 1924, authorizing said bonds to be issued and sold for the purpose of providing funds for the payment for the construction, erection and building of a high school and elementary school building in said Jefferson Township, according to the plans and specifications therefor, now on file in the office of the trustee of said township.

The right is reserved to reject any and all bids. Said bonds being sold subject to approval of State Board of Tax Commissioners of Indiana.

GEORGE W. TODD,

Trustee of Jefferson Township and Ex Officio Trustee of Jefferson School Township of Wells County, State of Indiana.

JOHN O. DAILEY,
RUFUS C. MAHNENSMITH,
MARTIN HENLINE,

Members of the Advisory Board of Jefferson Township, Wells County, State of Indiana.
May 31st-June 7th-June 14th, 1924.

PIPE COVERING CONTRACTORS
Let us relieve you of the worry of estimating and erecting the pipe covering you require. Write, wire or phone us at our expense.

Indiana, and the advisory board of said township will receive bids, at the trustee's office in the school building located and situated at Ossian, Indiana, until 1:15 o'clock P. M., on Saturday, June 21st, 1924, for the construction of a new high school and elementary school building, and for the installation of heating and ventilating system and plumbing and drainage system and for electric wiring, all for said proposed building.

All bids shall include all labor, material and supplies necessary for complete construction or installation of that part of the work bid on, and shall be strictly in accordance with the plans and specifications provided therefor, which have been properly accepted and approved, and are now on file in the office of said trustee in said school building at Ossian, Ind., and also in the office of Everett I. Brown, architect in the Studebaker Bank building at Bluffton, Ind.

Said proposed school building is to be located, and erected and constructed on the new site for such school building, at Ossian, Indiana, in section 15, township 28 north, Range 12 east in said Jefferson township.

All bidders will be required to file their bids on forms required by the Indiana State Board of Accounts, and to accompany such bids with proper affidavits, or such bids will be considered as irregular, and each proposal or bid must be endorsed on the envelope giving the bidder's name after stating the class of work bid upon.

The estimated cost of said building is $100,000. Bidders will submit their bids as follows:

(1) For the complete construction of such school building according to the plans and specifications therefor (general contract).

(2) For the installation complete of each the heating, ventilating system, plumbing and drainage system.

(3) For the installation complete of electric wiring.

(4) For the construction as a whole or any combination of contracts, as provided for by the plans and specifications therefor. All bids and contracts to be subject to approval of the state board of tax commissioners of Indiana.

All bids must be sealed. Each bid on the general contract shall be accompanied by the certified check of the bidder for $2,000.00. Each bid on the heating and ventilating system and plumbing and drainage system shall be accompanied by the certified check of the bidder for $1,000.00.

Each bid on the electric wiring shall be accompanied by the certified check of the bidder for $200.00.

Each bid for complete construciton or for any combination of contracts shall be accompanied by the bidder's certified check in an amount equal to the total amounts required for the contracts included in the bid if the same had been bid for separately. All checks shall be payable to George W. Todd, trustee. The proceeds of the certified check accompanying the bid of each successful bidder shall become the sole property of said Jefferson School Township in the event such successful bidder shall fail to enter into a contract and execute and furnish an acceptable bond within ten days after he has been notified that his bid has been accepted. All certified checks of unsuccessful bidders will be returned to them.

The successful bidder or bidders will be required to enter into a written contract or contracts and to execute a bond or bonds with sufficient surety or sureties to be approved by said trustee in an amount equal to the amount of the contract or contracts and conditioned for the faithful performance of the same. It being expressly understood that said trustee and advisory board reservies the right to hold the lowest and best bid open until such time as they are able to close contract on the sale of bonds to cover the cost of said school building, and they reserve the right to reject any and all bids.

HOOSIER GIANT BRIX

GIVE BETTER BUILDINGS AT LOWER COST

The chief object in any building project today is to secure better buildings at lower cost. The public demands economy without the sacrifice of quality. Architects and contractors are meeting this demand with HOOSIER GIANT BRIX, the ideal material for high grade, economical construction.

Homes of HOOSIER GIANT BRIX

In residence construction, whether for outside veneer or solid walls, HOOSIER GIANT BRIX offer all the advantages of brick construction and yet save 25% over the cost of brick. HOOSIER GIANT BRIX can be laid up in a small fraction of the time required for other construction, thus making big savings in labor cost. In beauty they match fine quality tapestry brick. They equal brick in strength and load-bearing capacity. HOOSIER GIANT BRIX are five-walled, vitrified, mat-face fire-clay units, and are adaptable for any construction where brick can be used.

For INDUSTRIAL BUILDING

HOOSIER GIANT BRIX and HOOSIER Building Tile are adaptable for every type of industrial buildings, such as schools, gymnasiums, churches, factories, garages, stores and other fireproof structures. This material insures big savings on construction cost and makes a building unsurpassed for beauty and serviceability.

Architects and contractors are invited to send for samples and illustrated literature describing HOOSIER GIANT BRIX and Building Tile. Let us submit estimates on your specifications.

STATE SOCIETY OF ARCHITECTS ISSUES CALL FOR ANNUAL MEETING

Effort Being Put Forth Heid Panacea for Many Evils That Assail the Profession

Two weeks from today, on Saturday, June 28th, to be exact, the Indiana Society of Architects will once more hold one of its regular annual meetings, an occasion that will afford the architects of the State an opportunity to gather together. There will be, it is true, some routine business matters of the Society to consider such as reports and other items relating to the condition of the organization and such features as are vital to carrying forward the aims, purposes and functions that the state architects' body seeks to achieve. These things must, of necessity, be attended to and are interesting to the extent that they indicate the pulse and vitality of the Society.

However, as important and essential as the foregoing are, there is a deeper and more potential interest involved in these annual meetings, the value of which lies in the opportunity offered the members of the profession to come in closer contact with each other, to interchange ideas gained from personal experience and to be in a position to become better acquainted. Such situations should afford a composite estimate of the profession of which each architect is a part. While the estimate arrived at may not measure up to the theoretical ideals some architects may cherish, nevertheless, this co-mingling should be conducive to a better understanding of the conditions that work to influence the professional practice of architecture in Indiana.

Only recently at Washington, D. C., at the convention of the American Institute of Architects, it was advocated that, to overcome certain, apparent and acknowledged evils that have grown up to beset the profession, the architects should make every effort to do the very thing the Indiana architects have been doing through the medium of the Society, that is get together and through mutual understanding work out plans that will have for their purpose the elimination of the besetting evils. When men get together the understanding gradually there are personalities that inject themselves, but these in time reduce to a mincomes, not without effort at first for imum in practically every instance under the desire for the betterment of the whole.

Since the national organization of architects has realized the value of such work as the I. S. of A., is doing, and since the I. S. of A., through its efforts has proved by achievement the wisdom of such procedure, it would seem that the state body of architects is deserving of the support of all Indiana architects who really and truly have the interest of their profession at heart.

There is no better way to evidence that support than by lending your presence to the meeting, June 28th.

EVENLY BALANCED INFORMATIVE ARCHITECTURAL NEWS COPY ASSURES DESIRED PUBLICITY

Only Essential, Public's, Not Architects' Interests Alone Must Be Kept In Mind

Every now and then in discussions of matters architectural one frequently hears the plaint that what the profession needs, should have, and seldom gets, is publicity. There seems to be somewhat of a misunderstanding on the subject of publicity, many thinking that almost any sort of copy dealing with architecture, particularly that eulogizing the profession, should be acceptable to the daily press, and because such ideas are entertained the much desired publicity is not forth coming. The trouble lies in the fact that the copy submitted is lopsided, it is too architectural, too puffy in the interest of the profession rather than possessing the essential attribute, news value to the public.

But architects are not alone in a misconception of that which constitutes "good copy," other interests, too, are continually at sea because they believe they are neglected by the press, but they flounder around even more, employ publicity men who write reams and reams of copy which flood in upon busy managing and city editors who quickly sense the one angle slant and divert the misspent torrent to the waste-basket.

However, publicity is obtainable through rightly directed effort of a news value and this applies to architectural matters. One of the best examples of the success to be accomplished in such endeavor is that which has crowned the effort of the Small House Service Bureau controlled by the American Institute of Architects which is conducting what is called "The Home Builders Clinic," a newspaper home-building editorial service which in serving up pertinent news matter attractive to the prospective builder is enabled to stress, indirectly, upon the advantages to be obtained from real architectural treatment. There are eighty-one newspapers in twenty-nine states now using Small House Service Bureau news items and articles affording a combined weekly circulation of 4,000,000 for this material.

HEARD AT A. I. A. CONVENTION

In a plea for a greater observance of utilitarian features in buildings rather than mere style and ornamentation Architect W. R. B. Willcox referred to the development of the automobile which though of beautiful lines has never lost the theme for comfort and convenience. He termed the automotive designer a "vehicular architect," who sought to please his client, the purchaser. When the latter wanted an arm rest in a certain kind of car it was placed there nor was he told it couldn't be done because it would be an intrusion upon the style and type of design.

Further, the "vehicular architect" put all the utilitarian accessories in the most advantageous place, on the dash board, rather than conceal them under the hood or some other out of the way place for fear they spoil a cherished ideal for ornamentation.

It was this practical utilitarian development that has made the automotive industry what it is today, said Mr. Willcox, and the same idea should not be lost sight of in the practice of architecture if it is to serve the best interests of the public.

ORGANIZATION AND CURRENT NEWS

Indiana Contractors Who Met in Conference at Terre Haute

Front Row—Left to Right: First, C. C. Pierson, Indianapolis, Secretary State A. B. C.; Sixth, Max Irmscher, Fort Wayne, President State A. B. C.; Seventh, H. A. Toelle, Terre Haute; Tenth, Frank Burget, Secretary, Terre Haute A. B. C.

Second Row—First, T. J. O'Hara, Indianapolis; Second, Phil Kessler; Third, W. W. Wise, Indianapolis; Fourth, Henry Aumann, Fort Wayne; Fifth, O. A. Toelle, Terre Haute; Eighth, J. C. Kreidt, Fort Wayne; Ninth, George Roehm, Terre Haute; Tenth, James Hodgson, Sr.

Third Row—First, C. J. Rozelle, Anderson;; Second, Wm. Noffke, Terre Haute; Fourth, O. T. Smith, Evansville; Fifth, M. M. Bonewitz, Indianapolis.

Fourth Row—Third, Ben Diehl, Evansville; Fourth, J. H. Owens, Indianapolis, Field Representative, State A. B. C.; Fifth, S. Kirk, Vincennes; Seventh, E. H. Hyman, South Bend; Eighth, G. J. Vollmuth, Terre Haute; Ninth, E. L. Danner, Kokomo; Tenth, J. W. Freitag.

Back Row—Second, Guy Brill, Terre Haute; Third, Wm. Caton; Fifth, Wm. Toelle, Princeton; Sixth, George Schack, Fort Wayne; Seventh, Harry Fenton, Indianapolis, Counselor State A. B. C.; Eighth, Henry Knauth, Vincennes.

The above group of forty-nine Indiana builders, representing ten of the principal cities of the state met in Terre Haute recently to attend the regular quarterly conference of the Associated Building Contractors of Indiana, at which general conditions in the entire state building field were gone into and discussed at length. Reports on labor matters and current wage scales were made from each city, the prospect for building discussed and ideas suggested for the increasing of the function and influence of the State Contractors' Association. The Terre Haute contractors' organization entertained the delegates at a banquet at the Elks' Club in the evening.

The Terre Haute conference was one of the best ever held and the visitors were loud in their praise of the manner in which the local contractors handled the affair. The next conference will be held in August at a city to be named later.

THE OBLIGATION IS THERE REGARDLESS OF ATTITUDE

Organization Benefits No Individual—Rather All Encompassing as Regards Contracting Fraternity

There lived a man, if he really lived, whose farm joined the home of our boyhood, who by some slacking device of those times escaped being drafted in the Civil War but who never succeeded in living the stigma of it down. Do what he would, go where he pleased, it followed him. He was a marked man. Men shunned him, women despised him and we children looked on him with fear and awe and ran and hid when he tried to make up to us. He was a Civil War slacker but he was no coward, he was a good neighbor and had the war not come would have been an honored man in his little world. He did not believe in fighting and he would not fight for his rights nor others. We can see now that he was a conscientious objector—more to be pitied than blamed. Where and how shall we class those building construction contractors who are able in every way to support their builders' association but who for one reason or another refuse to do so? Are they to be blamed or pitied? Enjoying as they do all their is to enjoy, benefited by all there is that benefits, profited by all that is done that profits, and yet, standing aloof—refusing or neglecting again and again calls for their assistance, seemingly indifferent to any demand, impervious to any call, careless of the future yet taking with ready hand every advantage, every victory, every improvement, the results of persistent struggle on the part of their fellows, in price concessions, conditions of labor, development of ethical considerations, with a get all, take all, give nothing attitude which in some instances it does not seem possible could be deliberately assumed and most assuredly cannot be maintained by any argument in reason and logic.

In a sense do not such as these become marked men and the unconscious objects of a certain aversion on the part of their fellow contractors that takes years to wear off and that loses for them much in the way of fellowship and association with their own fellow workers? It will scarcely be disputed that every man owes something at least if not his all to his country. Why then does not every contractor, in this day of organization, owe something to the collective efforts of his fellow contractors who, often less favored, give something of their time and means to the accomplishment of much needed improvement? How in contrast with all this are the words recently spoken by an orator on presenting a wonderful landscape painting to the retiring president of a contractors' association at the end of three successive terms:

"For three years he gave to this association willingly and unstintingly of his time, his effort and his thought—at tremendous sacrifice to himself and his associates in business.

"He never once permitted his personal interests to influence his action. He was actuated at all times by the very highest motives. Never once did he fail his association.

"He was ever guided by impulses of fairness and justice."

(The Master Builder, Portland, Ore.)

Calumet District

COURT RULES IN FAVOR OF CONTRACTOR

Enjoins Enforcement of Unions Working Rules

There is such a thing as going too far which usually leads to trouble. That is the thing that some of the painters have bumped up against, a condition that has been theirs for the second time within the last few months. This latest reverse came with a decision rendered by the Supreme Court of the District of Columbia which ruled against certain provisions contained in the working rules of the Brotherhood of Painters and Decorators.

The working rules in question contain a stipulation providing that contractors from another city operating within the jurisdiction of the Local Union must pay the scale of wages that rule in his home city even though they may be higher than the local scale, in other words the highest wage scale must be paid on his job. It so happened that a New York contractor secured a contract to build a project in Washington, D. C., and his mode of operation was different from the Local Unions in that he sought to pay the painters the local scale which was lower than the one paid in New York City.

His action, or intended action, soon brought things to a focus and he was politely informed by the local union that he would be refused men unless he would pay the New York scale. Then things happened. The contractor brought suit in the court at Washington to prevent the local from interfering with his work and in the end the court issued an injunction enjoining the Union from enforcing the higher wage scale as provided for in its working rules.

EVERYTHING LOVELY NOW

Lathing Fuss Settled

Things regarding the lathing industry in the Calumet District have taken a more promising turn. Representatives from the Contractors' Council met with the Building Trades Council recently and an agreement was reached that puts a quietus on the recent controversy. As an outcome of the conference Mr. Zygey, the lathing contractor under whom it seemed certain parties desired to place the skids, will continue to contract work as heretofore.

WHAT WILL THEY DO THEN?

Building Trades Council Would Make Chicago an Air-Tight Closed Shop Proposition

The Building Trades Council of Chicago instead of demanding an increase in wage scales took another tack, and at a meeting, June 6th, voted to devote its energy to bringing about closed shop conditions. After going into the wage scale matter it was unanimously agreed not to ask for an increase in wages, but, it was thought to the best interests of the men to work out a plan that will eventually have for its purpose the tying up of the city to closed shop principles. A committee to work out such a campaign has been appointed and has announced that meetings will be started at once at which to work out details for the new line of campaign.

PLUNGED TOO HEAVILY

Flat Building Campaign Carried to the Extreme

If reports are true it would seem that the building of flat buildings in Chicago had been overdone. The latest word from the big city by the lake is to the effect that there are some 30,000 empty apartments eagerly awaiting tenants and that in some instances owners are offering attractive inducements to prospective renters and owners if they will move in. On the other hand, single residences and bungalows are said to be in big demand.

OH HOW IT RAINED.

Event at Hammond Recalls a Certain Song

The new sewage pumping plant was put to a severe test on the 7th and 8th, when torrential rains swept over Hammond to engulf the whole city. Though all the pumps were kept going at full capacity they were hardly equal to the emergency resulting in many cellars being flooded. The fields out in the surrounding districts were completely inundated and are still under water. An investigation has been proposed to locate the man who wrote that popular song, "It ain't gonna rain no more," to learn how he came to hold out such a false hope.

CALUMET BUILDING PROGRESS

The contract for the construction of the new flat building at 148th St. and Forsythe Ave., for Dr. Bicknell, has been awarded to Rufus Danner & Co. The structure will contain 31 apartments.

George P. Pearson & Son, were the successful bidders on the contract to erect the Paxton building at 667-69 Hohman St. It will be 2 stories, 50x130, and will contain a large sales room on the first floor with offices above. The estimated cost is $40,000.

Architects J. T. Hutton & Son, Hammond, will receive bids to 7:30 P. M., June 26th, for the construction of the Sobeiski School, Calumet City.

J. H. McClay, was the low bidder on the general contract for the Odd Fellows Building. His bid was $46,600.

Calumet City, Ill., our little new neighbor to the west is getting quite ambitious. Architect E. Frederick Beck, Chicago, Ill., is preparing plans for a substantial addition to the Wentworth School. The new work will consist of eight grade class rooms, auditorium and gymnasium.

E. E. COLE.

EVANSVILLE

OHIO RIVER BRIDGE SANCTIONED

Government Move Encouraging to Evansville

While not a building project, at the same time there is a construction proposition now in prospect for the Evansville territory that will mean much to the future development of the city. It has to do with the construction of a new bridge across the Ohio River and will involve the expenditure of $3,000,000 to $4,000,000. When completed Evansville will have a direct highway outlet to the South, and this together with the new bridge completed recently over White River at Hazelton, Ind. will place the city on a through North and South traffic channel.

The Ohio River bridge agitation has been going on for years gaining momentum slowly but steadily. A bill was passed by Congress and signed by President Coolidge last week giving consent to Indiana and Kentucky to bridge the Ohio river at Evansville and guaranteeing that the government will defray one-half the cost of the structure.

With the signing of the bill, the last governmental obstacle has been removed and the structure will become a reality as soon as the Indiana and Kentucky state highway commissions can meet and develop plans for the bridge, and ways and means for the two states to pay approximately $750,000 each as their respective shares of the total cost of the bridge can be found.

With the last governmental obstacle removed, the Evansville Chamber of Commerce bridge committee and the Henderson Chamber of Commerce, will get together soon to inaugurate a definite plan for getting the project underway. A joint meeting of the two state highway commissions will be the next step, and it is believed some definite program will be adopted within the next month or six weeks.

QUIET MARKS EVANSVILLE BUILDING FIELD

No Big Work Appears

Building construction operations in Evansville still show a tendency to be backward. The bulk of the work being presented at the city building inspection department pertains to repair and remodeling plans with now and then a new residence appearing, all of which is making for a very quiet building season no large work having showed up so far and little prospect for any in the future.

Last week there were but 45 permits issued; all the work being small involving but an estimated cost of $55,000.

Nice progress is being made on the projects under way and the local architects have plans on the boards for new work, the most of which deals with buildings to be erected outside the city, in southern Indiana, Illinois and Kentucky.

FT. WAYNE

LACK OF LABOR TROUBLE HAS KEPT LOCAL BUILDING AFFAIRS UP TO A GOOD PACE

Building Business Good

Activity in Ft. Wayne building circles is continuing brisk with business good. Few new contracts have been let in the past few weeks but the architects are busy on new plans with the prospect for considerable figuring in the near future. The work to be estimated shortly consists of school work, apartments, stores and several good residences.

As for actual construction work now going on there is a fair sized volume underway upon which rapid progress is being made. Labor at the disposal of the contractors is in plentiful supply thus causing no delay on that score. There seems to be more skilled mechanics available this year than in quite some few years past and this has a tendency to speed up the work which is of a good caliber. The union and non-union craftsmen are going along side by side causing no trouble whatever. The men all seem to realize that work this year is not as plentiful as under the 1922 and 1923 rushes and all of them are out to hold their jobs thus producing and facilitating matters for the building trades employers who are enabled to keep their projects moving along nicely toward completion.

BANK RETURNS SHOW BUSINESS INCREASE

An Encouraging Sign

Bank activities in Fort Wayne last week showed a big increase over the previous week as well as over the corresponding week last year, according to the statement of the local clearing house. Saturday. There was only one day, Saturday, when the clearings did not exceed $400,000, and on Thursday they mounted to well over the half-million mark.

The clearing house figures were:

Last Week	$2,629,632.25
Previous Week	2,069,175.62
Corresponding Week, 1924	2,504,228.72

Sealed Proposals

NOTICE TO CONTRACTORS
SCHOOL HOUSE

Notice is hereby given that the undersigned trustee of Shelby school township, Ripley County, Indiana, will receive sealed bids at the office of said township trustee at New Marion, Indiana, at 1 o'clock P. M. on

MONDAY, JULY 7, 1924

for the furnishing of all the material and performing all of the labor for the construction and completion of the Shelby Township Joint High School and Elementary School Building at New Marion, Indiana. Such construction and installations shall follow the plans and specifications approved by and now on file in the office of the State Board of Accounts, the office of township trustee, John G. Meisberger, New Marion, Indiana, and the office of the architect, Karl P. Henkel, 108 Heinemann Building, Connersville, Indiana.

Copies and plans and specifications will be furnished any contractor applying for same on deposit of the sum of $15.00 to be held in escrow for the return of said plans and specifications to the architect on or before seven days after the opening of the bids, after which date all checks on deposit will be cashed and no refund made.

All bids shall be made and submitted on forms 96 bidding blanks. Each bid shall be accompanied by certified check upon a solvent bank made payable to John G. Meisberger, trustee in the amount of not less than three per cent of the total amount of their bid, tendered as a guarantee that the bidder will, if awarded contract, enter into a bona fide agreement with the said school township of Shelby for the contract, and furnish sufficient bond equal to one hundred per cent (100%) of the contract price.

If, for any reason whatsoever, the bidder shall fail to enter into proper agreement or fail to execute a proper bond, the full amount of the certified check shall be retained by the school township as liquidated damages. The estimated cost of the building complete is $31,440.00.

The undersigned trustee and advisory board reserves the right to reject any and all bids, and waive any defects or informality, if deemed in the interest of said Shelby school township.

Dated June 2nd, 1924.

JOHN G. MEISBERGER,
Trustee of Shelby School Township, Ripley County, Indiana.

LEONARD E. PAUGH,
GEORGE KIEFFER,
MATT ECKSTEIN,
Advisory Board.

June 14th-21st-28th.

SCHOOL HOUSE
NOTICE TO CONTRACTORS

Notice is hereby given that the school city of Terre Haute, Indiana, by its board of school trustees will receive sealed bids until 2 P. M. on July 1, 1924, at the office of said board in the Administration Building at Terre Haute, Indiana, for repairs and remodeling work in connection with the present Gerstmeyer Vocational School located at Thirteenth street and Locust street, Terre Haute, Indiana.

Separate bids will be received for general construction and for heating and ventilating and plumbing systems. The total estimated cost of such remodeling and repair work is $80,000.00.

All bids must be on bid form as furnished by said Board of School Trustees, and must be accompanied by certified check for four per cent of amount of bid, guaranteeing that the bidder will, if contract is awarded to him, enter into a contract for work bid upon and give satisfactory bond for the full amount of the contract.

Plans and specifications of said building work are on file at the office of said Board of School Trustees, and additional plans and specifications may be obtained for individual use of bidders from said Board of School Trustees or from Johnson, Miller & Yeager, No. 30 North Fifth Street, Terre Haute, Indiana.

The said Board of School Trustees reserves the right to reject any or all bids.

Dated June 10, 1924.

School City of Terre Haute, Indiana.
By M. T. KIDDERS, Secy.

June 14th, 1924.

M. on Saturday the 28th day of June, 1924, and from day to day thereafter until sold, will offer for sale an issue of One Hundred Thousand ($100,000.00) Dollars of Bonds of said Jefferson School Township, each of said bonds calling for the the principal sum of Five Hundred ($500.00) Dollars with interest thereon at the rate of Five Per Cent Per Annum, paybale annually on the 10th day of July of each and every year until paid, as evidenced by appropriate coupons attached thereto, said bonds are numbered consecutively from 1 to 200, payable at the Farmers' State Bank, at Ossian, Indiana, and become due and payable as follows, to-wit:

Bonds Nos. 1 to 10, Inclusive, July 10th, 1925,
Bonds Nos. 11 to 20, Inclusive, July 10th, 1926,
Bonds Nos. 21 to 30, Inclusive, July 10th, 1927,
Bonds Nos. 31 to 40, Inclusive, July 10th, 1928,
Bonds Nos. 41 to 50, Inclusive, July 10th, 1929,
Bonds Nos. 51 to 60, Inclusive, July 10th, 1930,
Bonds Nos. 61 to 70, Inclusive, July 10th, 1931,
Bonds Nos. 71 to 80, Inclusive, July 10th, 1932,
Bonds Nos. 81 to 90, Inclusive, July 10th, 1933,
Bonds Nos. 91 to 100, Inclusive, July 10th, 1934,
Bonds Nos. 101 to 110, Inclusive, July 10th, 1935,
Bonds Nos. 111 to 120, Inclusive, July 10th, 1936,
Bonds Nos. 121 to 130, Inclusive, July 10th, 1937,
Bonds Nos. 131 to 140, Inclusive, July 10th, 1938,
Bonds Nos. 141 to 150, Inclusive, July 10th, 1939,
Bonds Nos. 151 to 160, Inclusive, July 10th, 1940,
Bonds Nos. 161 to 170, Inclusive, July 10th, 1941,
Bonds Nos. 171 to 180, Inclusive, July 10th, 1942,
Bonds Nos. 181 to 190, Inclusive, July 10th, 1943,
Bonds Nos, 191 to 200, Inclusive, July 10th, 1944.

Said bonds will be dated July 10th, 1924, and will be sold to the highest bidder therefor, and for not less than par value and accrued interest.

Each bidder will be required to file with his bid a certified check for $7,500.00, payable to George W. Todd, trustee of Jefferson School Township, conditioned that in the event the bidder is awarded said bonds, that he will pay to said trustee of Jefferson school Township, of Wells County, Indiana, not later than the 10th day of July, 1924, the amount of his bid for said bonds, and in the event the bidder fails or refuses to pay the amount of his bid for said bonds by the 10th day of July, 1924, said check and the amount represented thereby shall be and become at once the absolute and unconditional funds and property of said Jefferson School Township for the use of the special school funds of said school township, not as a penalty, but as agreed and liquidated damages for his failure to pay the amount of his bid and take up said bonds.

Said bonds are to be issued and sold in pursuance of orders of the Advisory Board of said Jefferson Township, made and entered of record at a special meeting of said Advisory Board, regularly held on the 21st day of May, 1924, authorizing said bonds to be issued and sold for the purpose of providing funds for the payment fo the construction, erection and building of a high school and elementary school building in said Jefferson Township, according to the plans and specifications therefor, now on file in the office of the trustee of said township.

The right is reserved to reject any and all bids. Said bonds being sold subject to approval of State Board of Tax Commissioners of Indiana.

GEORGE W. TODD,
Trustee of Jefferson Township and Ex Officio Trustee of Jefferson School Township of Wells County, State of Indiana.

JOHN O. DAILEY,
RUFUS C. MAHNENSMITH,
MARTIN HENLINE,

SCHOOL HOUSE

NOTICE TO CONTRACTORS

Notice is hereby given that the undersigned, trustee of Jefferson township and ex officio trustee of Jefferson School Township of Wells County, Indiana, and the advisory board of said township will receive bids, at the trustee's office in the school building located and situated at Ossian, Indiana, until 1:15 o'clock P. M., on Saturday, June 21st, 1924, for the construction of a new high school and elementary school building, and for the installation of heating and ventilating system and plumbing and drainage system and for electric wiring, all for said proposed building.

All bids shall include all labor, material and supplies necessary for complete construction or installation of that part of the work bid on, and shall be strictly in accordance with the plans and specifications provided therefor, which have been properly accepted and approved, and are now on file in the office of said trustee in said school building at Ossian, Ind., and also in the office of Everett I. Brown, architect in the Studebaker Bank building at Bluffton, Ind.

Said proposed school building is to be located, and erected and constructed on the new site for such school building, at Ossian, Indiana, in section 15, township 28 north, Range 12 east in said Jefferson township.

All bidders will be required to file their bids on forms required by the Indiana State Board of Accounts, and to accompany such bids with proper affidavits, or such bids will be considered as irregular, and each proposal or bid must be endorsed on the envelope giving the bidder's name after stating the class of work bid upon.

The estimated cost of said building is $100,000. Bidders will submit their bids as follows:

(1) For the complete construction of such school building according to the plans and specifications therefor (general contract).

(2) For the installation complete of each the heating, ventilating system, plumbing and drainage system.

(3) For the installation complete of electric wiring.

(4) For the construction as a whole or any combination of contracts, as provided for by the plans and specifications therefor. All bids and contracts to be subject to approval of the state board of tax commissioners of Indiana.

All bids must be sealed. Each bid on the general contract shall be accompanied by the certified check of the bidder for $2,000.00. Each bid on the heating and ventilating system and plumbing and drainage system shall be accompanied by the certified check of the bidder for $1,000.00.

Each bid on the electric wiring shall be accompanied by the certified check of the bidder for $200.00.

Each bid for complete construciton or for any combination of contracts shall be accompanied by the bidder's certified check in an amount equal to the total amounts required for the contracts included in the bid if the same had been bid for separately. All checks shall be payable to George W. Todd, trustee. The proceeds of the certified check accompanying the bid of each successful bidder shall become the sole property of said Jefferson School Township in the event such successful bidder shall fail to enter into a contract and execute and furnish an acceptable bond within ten days after he has been notified that his bid has been accepted. All certified checks of unsuccessful bidders will be returned to them.

The successful bidder or bidders will be required to enter into a written contract or contracts and to execute a bond or bonds with sufficient surety or sureties to be approved by said trustee in an amount equal to the amount of the contract or contracts and conditioned for the faithful performance of the same. It being expressly understood that said trustee and advisory board reservies the right to hold the lowest and best bid open until such time as they are able to close contract on the sale of bonds to cover the cost of said school building, and they reserve the right to reject any and all bids.

You can't beat Celotex

FOR satisfaction to the men on a job you can't beat Celotex. It works easily, rapidly and without waste. It is easier to handle than wood sheathing and paper. It makes a stronger wall.

As plaster base it is ideal—forms a strong bond and makes no stains, rust spots, nor lath marks.

For roof insulation, Celotex is unequaled for convenience to the builder, for effectiveness to the owner.

When a prospective home owner talks with you remember the selling points of Celotex. Insulation that will cut usual fuel bills a fourth to a third. Smooth stainless plaster. Stronger walls. Inexpensive because Celotex generally costs less when in place than the materials it replaces.

Celotex is a strong, rugged, weather-proof durable building lumber made from the long, tough fibres of cane. It is better than wood sheathing—equals cork for insulation.

Celotex is used for sheathing instead of wood; for plaster base, roof insulation, sound deadener and exterior finish.

Stock sizes: Thickness 7/16 in.; width 4 ft.; lengths 8 ft. to 12 ft. Weight about 60 lbs. per 100 sq. ft.

Write for complete information to Dept. V-6, The Celotex Company, 645 No. Michigan Ave., Chicago, Ills. Branch Mill Representatives, The Indianapolis Celotex Co., 205 East Ohio St. Phone, Main 7089. William J. Ryan, Mgr.

CADIDATES NOMINATED FOR OFFICES AND COMMITTEE LEADERSHIPS

To Be Voted Upon June 28

The time has come once more for the members of the Indiana Society of Architects to give heed to the question as to whom they would have guide the administrative affairs of the organization during the ensuing year, dating from June 28. Hence, the annual election of officers will be one of the main features at next Saturday's meeting. Two tickets have been placed in the field and are here named for your thought and consideration:

President

Harry E. Boyle, Evansville.
Walter Scholer, Lafayette.

First Vice-President

Rodney Leonard, Frankfort.
August C. Bohler, Indianapolis.

Second Vice-President

Wilson B. Parker, Indianapolis.
J. W. Gaddis, Vincennes.

Secretary

Merritt Harrison, Indianapolis.
Merritt Harrison, Indianapolis.

Treasurer

J. E. Woodard, Indianapolis.
L. A. Turnock, Indianapolis.

PROSPECT FOR I. S. A. ANNUAL MEETING HOLDS OUT INVITING LURE

Able Speaker on the Program

Those having arrangements for the annual meeting of the I. S. A. in charge have been busily engaged for the past few weeks in getting things in shape to assure an interesting and enjoyable affair when the state architects assemble in Indianapolis, Saturday, June 28th. Even at this time all details have been completed, though the affair is still a week distant, and all that remains to make the event a complete success is the arrival of the members of the profession.

These meetings stretching back periodically over seven years have each marked a mile stone of progress not only for the Society but for the state architectural profession at large, also for the building industry of Indiana. It was from the personal contact afforded at such gatherings that a closer relationship has been established among the individual architects, a spirit engendered that has brought broader understandings and made it possible for a co-operation that has made for actual achievements, achievements that some years back would have been considered impossible. But the end is not yet; the work has just begun and the effort being put forth is worthy of the support of every architect in Indiana. To lend your support is to attend the meeting, June 28, and get in step with the Society.

In keeping with the high standard set at recent meetings a fine program has been arranged included in which is an address by the Hon. M. E. Foley, of Indianapolis, a gifted orator, who always has a real and thrilling message to impart. Many other features are also incorporated in the plans for the day that will prove most attractive.

The official program as it now stands is:

All meetings in Lincoln Room, 14th floor.

10:30 A. M. Meeting of Board of Directors.
12:30 Noon Luncheon.
2:00 P. M. Business Session.
3:30 P. M. Discussion and display of studies, drawings and plaster models of the Indiana World War Memorial, at the Chalfant, No. 506 North Pennsylvania Street.
By Mr. F. R. Walker, Architect, Cleveland, O.
6:30 P. M. Stag Steak Dinner.
Entertainment
Mr. Claris Adams, Indianapolis, Toastmaster
Address: Hon. M. E. Foley, Indianapolis, Attorney.
Dancing—Spanish Tango, Bonito
Miss Catherine Jenne and Miss Marcie Dirnberger.
Accompanist—Mrs. Robert Jenne.
Musical Program—Arranged by Miss Hazel Silvey, soprano.

DRAFTSMEN'S CLUB AROUSING MUCH INTEREST AMONG YOUNG MEMBERS OF THE PROFESSION

Weekly Luncheons Popular

The Indianapolis Architectural Club, composed of the draftsmen employed in the city architects' offices has shown a healthy growth and increased spirit since its inception. The weekly luncheons held Tuesdays at the Board of Trade are quite popular and are largely attended.

Tuesday of this week Merritt Harrison made an interesting report on the recent A. I. A. Convention at Washington, D.C., and on Thursday evening, following a 6 P. M. dinner at the Hoosier Athletic Club, a five reel movie was given by a prominent asbestos products manufacturing company showing asbestos materials production from mining of the raw material to the completed goods ready for the market.

The club members are planning a motor trip to the Indiana Stone Region in and around Bloomington and Bedford in the near future.

ORGANIZATION AND CURRENT NEWS

Calumet District

PLUMBERS OUT FOR A RAISE AND A FIVE-DAY WEEK

Regular Weekly Reduction Breaks Forth at Hammond

The life of a Building Construction Contractor is just one round of upsets, surprises and bumps, that is if he happens to be located in a community where Union Labor is strongly entrenched and has a desire to do some sniping. For instance, in Hammond, except for the recent unpleasantness with the organized lathers, contractors generally were of the impression that Labor wrinkles had all been ironed out and that there would be no further differences until possibly next winter when it came time to again take up the matter of negotiating new wage scales for the next season.

It really did seem that a period of rest from annoying aggrevations with labor had passed, but, one can not always tell. Lo and behold, the festive, vivacious, ambitious plumber, in order to let the people know that he is still on the job and must be reckoned with, has taken off his hat, whirled it around his head several times and tossed it into the ring in the way of a notice to the master plumbers that he can not continue to work, live and enjoy life unless his wages are raised to $1.62½ per hour on and after July 1st. The plumber craftsmen further stipulate that in addition to the advanced wage scale they shall demand a five-day week. They contend that, since they have to work so hard for a period of about seven hours per day, they are entitled to Saturday off.

One is led to believe from their argument that they want the sixth day off so they can spend their money without exerting themselves, for, no self-respecting plumber cares to put himself to too much exertion, even when it comes to spending money.

As is said in the barber shop, "Next!"

BACKED UP

Structural Iron Workers Quick to Take Their Cue

The structural iron workers at Chicago sought to insert a new thrill into the building field up there by threatening to go on a strike unless they were granted a 25 cent per hour wage advance, an increase that would have shot their pay up to $1.50 per hour. However, after the caisson diggers went on a strike for $1.25 per hour and their places were quickly filled by many men who were desirous of working at the current scale which soon caused the strike to be called off, the iron workers saw the handwriting on the wall, concluded perhaps it was best to let well enough alone, and at a meeting, June 16th, voted not to demand an increase in wages. It surely looks as if they decided wisely.

LATHERS HATE TO GIVE UP THE CENTER OF THE STAGE

Try to Start More Trouble

Gee! The Business Agents are busy bodies. Just when everything appeared to have been straightened out in the lathers' controversy as a result of a conference between the representatives from the Union and the delegates from the Contractors' Council, in stepped that specimen known as the business agent, raised another point for contention, and blooey went the settlement. It means now that we must go through another series of meetings and discussions. Somehow it is a difficult matter to get the lathing crowd to stick after being staid put.

CALUMET BUILDING PROGRESS

The remodeling of Dr. D. Cash's residence has been awarded to Witter Bros., of Whiting. The job is estimated to cost $15,000.

E. E. COLE.

INDIANAPOLIS

WELL-KNOWN INDIANAPOLIS CONTRACTOR FATALLY STRICKEN BY PNEUMONIA

Long Connected With Local Building Affairs

Following a short illness of pneumonia, Max Schumacher, 50 years old, one of the most prominent building contractors of Indianapolis and secretary-treasurer of the John A. Schumacher Company, 822 East St. Clair street past away June 18, at his home, 2416 Central avenue, after a short illness caused by pneumonia.

Mr. Schumacher had under contract several new public school buildings in Indianapolis at the time of his death, among these being schools No. 30, 70, 75 and 76.

He had been engaged in the contracting business for many years, as had his father, John A. Schumacher. He constructed the Liberal Arts building, the Arsenal Technical schools and buildings in other cities.

He was a member of the Zion Evangelical church, the Altenheim Building Contractors' Association of Indianapolis, Mystic Tie Lodge F. and A. M.; the Scottish Rite, Mystic Shrine, the Columbia Club and Indianapolis Lodge No. 56 Knights of Pythias.

Surviving are the widow, his mother, Mrs. Augusta Schumacher, a son, John Albert Schumacher, and two brothers, William M. Schumacher and Alexander Schumacher. Funeral services were to be held at the home Saturday afternoon, June 21, at 2:30 o'clock. Burial will be at Crown Hill.

NEW FIRE ESCAPE LAW AT INDIANAPOLIS

Legislation Passed by City Council Now in Effect

The following building ordinance has recently gone into effect at Indianapolis:

GENERAL ORDINANCE NO. 29, 1924

AN ORDINANCE providing for the installation of smoke tower fire escapes in buildings in Indianapolis providing for the construction thereof, providing a penalty for the violation of the provisions thereof and declaring a time when the same shall take effect.

Be It Ordained by the Common Council of the City of Indianapolis, Indiana:

Section 1. Every building hereafter erected, altered or enlarged in the City of Indianapolis, which is three (3) or more stories in height above the Basement shall be provided with smoke fire scapes herein described as follows:

(a) For buildings that have a floor area between fire walls up to and not exceeding six thousand (6,000) square feet shall be provided with one (1) smoke tower in addition to one (1) enclosed fireproof stairs; placed as far remote from each other as possible.

(b) For buildings that have a floor area between fire walls of six thousand (6,000) square feet and not exceeding fifteen thousand (15,000) square feet shall be provided with two (2) smoke tower fire escapes in addition to two (2) enclosed fire-proof stairs; placed as far remote from each other as possible.

(c) For buildings that have a floor area between fire walls in excess of fifteen thousand (15,000) square feet shall be provided with three (3) smoke tower fire escapes in addition to two (2)

enclosed fireproof stairs; placed as far remote from each other as possible.

A smoke tower fire escape shall be constructed entirely of incombustible material with the stairs located within the main walls of the building and entirely closed off from the building by un- in thickness. This enclosure shall be known as a smoke tower.

No flight of stairs in the smoke tower shall rise to a greater height than eight (8) feet without a lasding equal in width to the width of the stairs. The minimum width of such stairs or landing shall be three feet six inches (3' 6"). The lesser dimension of any landing shall always be equal or greater than the width of the stairs. Such stairs shall be continuous from the top story to the street level and shall have hand rails on both sides thereof.

There shall be a stair landing at each story height or intermediate story height on an exact level with the same.

At each story height there shall be provided an approved metal or reinforced concrete runway three (3) feet in width provided with approved railings of metal located at the exact level of each story or intermediate story and fastened on the outside of the building with approved metal brackets.

At each story height there shall be provided two (2) approved doors not less than two (2) feet eight (8) inches in width, said doors to open directly onto the metal runway in an approved manner and with the egress. One door shall open from the main floor area of the building onto the metal or reinforced concrete runway. One door shall provide egress from the runway to the smoke tower, one of the said doors shall be at each end of the runway. All doors shall be equipped with approved panic hardware.

All windows within fifteen (15) feet of the metal runway located on the outside of the building shall be provided with metal sash and wire glass if not already so required by the Building Code, also the windows in the smoke tower provided for lighting of the stairs.

Such smoke tower fire escape shall be so arranged that egress onto a public highway or fireproof passageway to a public highway can be easily and readily accomplished without any entrance into the basement. Egress doors from the basement or cellar shall be so arranged that they will open with the egress.

The Commissioner of Buildings shall have full discretionary power in the enforcement of the regulations regarding smoke towers. Enclosed fire-proof stairs may be substituted for smoke tower fire escapes upon approval of the Commissioner of Buildings.

Section 2. This ordinance shall be an addition to the building ordinances of the City of Indianapolis, Indiana, and shall be subject to all the regulations thereof.

Section 3. Any person or persons or member of any firm or corporation who shall violate any of the provisions of this ordinance shall be deemed guilty of misdemeanor and shall be fined upon conviction Ten ($10.00) Dollars and not to exceed Five Hundred ($500.00) Dollars.

Section 4. This ordinance shall be in full force and effect from and after its passage and due publication as required by law.

NATIONAL BUILDING BODY ISSUES PERTINENT REPORT

Advises Close Watch Be Kept on Pulse of the Industry—Takes Rap at Unsound Financing and Inferior Workmanship

The American Construction Council has just made public a statement prepared at a meeting of the Board of Governors, held in New York City recently. It will be recalled that last year the Council issued a warning to the building public to curtail all unnecessary construction as far as possible. The Board of Governors, however, feels at this time that such a warning is not needed. The Council recommends that investors and all others interested in construction watch developments closely, particularly for the next few months. If any appreciable slackening up takes place, an effort will be made to bring out maintenance and repair work which has been temporarily held in abeyance.

A considerable part of the report is devoted to inferior construction and unsound financing. Considerable work of this character is being done at this time throughout the country, especially in housing, and it is estimated that the depreciation on this class of building will be so great that in ten years time it will be practically worthless. Every element in the industry has groups that contribute to this condition.—(National Bulletin Building Trades Employers' Association.)

15,000 sq. ft. of ½" Flax-li-num applied over concrete under built-up roof.

When Does a Building Material Become an Insulation?

In modern buildings — Insulation, of course! But what is insulation? Every building material stops some heat and cold. And, therefore, any material can adopt the name "insulation." Lumber can be called "insulation," so can plaster board, wall board, brick, concrete block or stucco. They all stop some heat and cold.

But there are other materials, like Flax-li-num, that keep out as much cold as many times their thickness in wall board, stucco or brick. These are the materials that, when built into homes, reduce fuel bills by 30 to 40 percent and bring comfort both summer and winter. These are the materials that, in industrial buildings, prevent condensation of moisture under concrete roof decks, cut down the footage of radiation and save thousands of dollars annually in fuel money.

There can be no clouding the issue. Wall boards, stucco, plaster boards and building papers are not true insulation because they cannot save any real amount in fuel nor otherwise perform the true functions of an insulation.

Flax-li-num is insulation. It serves no purpose except to stop heat, cold and noise. It is not a wall board nor a plaster base. And because Flax-li-num is a one-purpose material it performs that one function better, longer and more efficiently than other materials which have to cater to multiple uses.

Only four factors are considered by the makers of Flax-li-num. They are heat transmission, durability, freedom from cracking, warping or puncturing, and ease of application. When you use or recommend Flax-li-num you may be sure of high efficiency, quick and easy application, freedom from any structural fault that might impair roofing, plaster or sheathing, and durability as great as the roofing or the lumber itself.

Write today for samples and prices.

NOTICE OF BOND SALE

Notice is hereby given that on the 11th day of July, at two o'clock P. M., the School Trustees of the city of Mooresville, Morgan County, Indiana, will offer for sale at the office of the Board in said city, an issue of $11,750.00 bonds of said city, for the construction of a new power plant for the Mooresville schools.

Said bonds will be twenty in number; ten bonds of $500.00 each, and ten bonds of $675.00 each, dated July 1, 1924, with interest thereon at the rate of Five Per Cent Per Annum, payable annually as follows: One $500.00 bond and one $675.00 bond, to be paid on the first day of January, 1926, and in equal amounts and denominations each year thereafter until all have been paid, payable at the First National Bank of Mooresville, Indiana.

Said bonds have been issued in strict compliance with the laws of the State of Indiana, and pursuant to an order of the Trustees of the city schools of Mooresville, made and entered of record on the 16th day of June, 1924, authorizing said bonds to be issued for the purpose of providing funds for the erection of said power plant building, and for the heating equipment for the said Mooresville schools.

Said bonds will be sold according to law to the highest and best bidder for not less than their par value.

The right is reserved to reject any or all bids.

Date June 20th, 1924.

School City of Mooresville,
By C. B. COMER, Secy.

June 21st-28th-July 5th, 1924.

SCHOOL BUILDINGS

NOTICE TO CONTRACTORS

Sealed bids will be received by Edgar Beatty, trustee of Barton School Township, Gibson County, Indiana, at the Somerville Bank, Somerville, Indiana, until Saturday, July 5, 1924, at two o'clock p. m., and then opened, for the following:

The remodeling of the Somerville School Building; also for the heating, wiring and plumbing, all in accordance with the plans and specifications on file at said bank in Somerville and at the office of the County Superintendent of Schools, at Princeton, Indiana, the estimated cost of which improvement, including the heating, wiring and plumbing is Fourteen Thousand ($14,000) Dollars.

Bids for the improvement of said building and for the heating, wiring and plumbing will be received separately, or bids for all the work as a whole will be received.

All the bids must be submitted on Blank Form No. 96 prescribed by the State Board of Accounts. Each bid shall be in a sealed envelope, with writing thereon plainly indicating the character of the work to which the bid relates, as for example: "Bid for heating the Somerville School Building."

Each bid must be accompanied by a certified check for two (2) per cent of the minimum bid. The check must be drawn payable to the order of Edgar Beatty, trustee of Barton School Township, Gibson County, Indiana.

In case a bidder whose bid shall be acceptable shall not within five (5) days after notice of such acceptance comply with his bid by entering into a written contract with said Trustee in accordance with his bid and the provisions of the plans and specifications, his certified check and the proceeds thereof shall be and remain, the absolute property of said township as liquidated damages for such failure, it being impossible to estimate the amount of damages such failure would occasion to said township.

The contractor shall execute a contract meeting the approval of said trustee. The right is reserved to reject any and all bids.

Dated this 12th day of June, 1924.

EDGAR BEATTY,
Trustee Barton School Township, Gibson County, Indiana.
John T. Ballard, Atty.
June 21st, 1924.

POWER PLANT

NOTICE TO CONTRACTORS

Notice is hereby given that the school city of Mooresville, Indiana, by its board of School Trustees, and Brown school township of Morgan County, Indiana, by its Trustee and Advisory Board, will receive bids until 2 P. M., 11th of July, at the office of the township Trustee, at Mooresville, Ind., for the erection and installation of a new power plant for the Mooresville schools, including changes necessary to connect up the new plant with the present buildings, and flooring and plastering the present boiler room in the High School building.

Bids on the work will be received as follows: A separate bid will be received for the brick stack, one for the boilers and the installation and connecting up to the present buildings as per plans and specifications, including a hot water system for showers and lavatories, and one bid for the building, wiring and the plumbing shown on the plans and in the old building.

The estimated cost of said improvement is $25,000.00. All bids must be on the regular form as required by law, and must be accompanied by certified check equal to 3 per cent of amount of bid, guaranteeing that the bidder will, if contract is awarded to him, give satisfactory surety bond for the full amount of the contract, and enter into a contract for the work bid upon.

Plans and specifications of said building and heating plant, are on file at the office of the school Board of Mooresville, and the office of the Trus-

NOTICE TO BIDDERS

GYMNASIUM EQUIPMENT, BLEACHERS, STEEL LOCKERS, BOWLING ALLEYS

Sealed bids will be received by the Board of Trustees of the Indiana State Normal School at 2:30 P. M., July 8, 1924, at the office of the Eastern Division of the Indiana State Normal School at Muncie, Indiana, for the following items of equipment for the gymnasium and the Science Hall:

Item 1. Gymnasium equipment as per specifications.
Item 2. Knock down bleachers for gymnasium as per specifications.
Item 3. Steel lockers for gymnasium as per specifications.
Item 4. Steel lockers for Science Hall as per specifications.
Item 5. Four bowling alleys complete as per specifications.

Copies of specifications for these items may be secured from the office of the Dean of the Eastern Division of the Indiana State Normal School, Muncie, Indiana, from the office of the Registrar of the Indiana State Normal School at Terre Haute, Ind.

Bids must be made on Form 95 prescribed by the Board of Accounts of Indiana and must be accompanied by a certified check for 5 per cent of the amount of the bid.

Separate bids must be made for each of the five items but alternate bids may be made on any group of items.

BOARD OF TRUSTEES OF THE INDIANA STATE NORMAL SCHOOL,
Helen C. Benbridge, Secretary.

June 21st-28th-July 5th, 1924.

NOTICE TO CONTRACTORS SCHOOL HOUSE

Notice is hereby given that the undersigned trustee of Shelby school township, Ripley County, Indiana, will receive sealed bids at the office of said township trustee at New Marion, Indiana, at 1 o'clock P. M. on

MONDAY, JULY 7, 1924

for the furnishing of all the material and performing all of the labor for the construction and completion of the Shelby Township Joint High School and Elementary School Building at New Marion, Indiana. Such construction and installations shall follow the plans and specifications approved by and now on file in the office of the State Board of Accounts, the office of township trustee, John G. Meisberger, New Marion, Indiana, and the office of the architect, Karl P. Henkel, 108 Heinemann Building, Connersville, Indiana.

Copies and plans and specifications will be furnished any contractor applying for same on deposit of the sum of $15.00 to be held in escrow for the return of said plans and specifications to the architect on or before seven days after the opening of the bids, after which date all checks on deposit will be cashed and no refund made.

All bids shall be made and submitted on forms 96 bidding blanks. Each bid shall be accompanied by certified check upon a solvent bank made payable to John G. Meisberger, trustee in the amount of not less than three per cent of the total amount of their bid, tendered as a guarantee that the bidder will, if awarded contract, enter into a bona fide agreement with the said school township of Shelby for the contract, and furnish sufficient bond equal to one hundred per cent (100%) of the contract price.

If, for any reason whatsoever, the bidder shall fail to enter into proper agreement or fail to execute a proper bond, the full amount of the certified check shall be retained by the school township as liquidated damages. The estimated cost of the building complete is $31,440.00.

The undersigned trustee and advisory board reserves the right to reject any and all bids, and waive any defects or informality, if deemed in the interest of said Shelby school township.

Dated June 2nd, 1924.

JOHN G. MEISBERGER,
Trustee of Shelby School Township, Ripley County, Indiana.
LEONARD E. PAUGH,
GEORGE KIEFFER,
MATT ECKSTEIN,
Advisory Board.

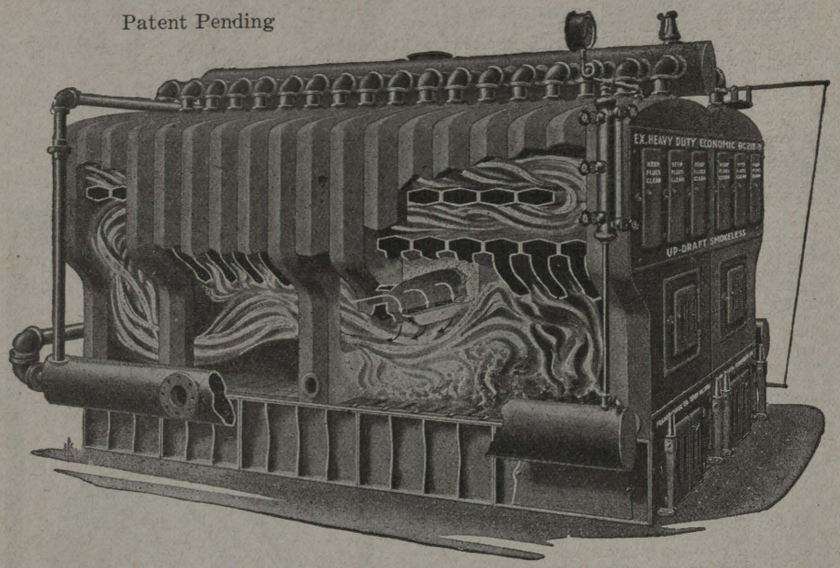
"BC" Series Up-Draft Smokeless Boiler

Patent Pending



"Prox Boilers are equipped with a top header, which is a positive steam separator, assures dry steam carrying maximum number of B. T. U's. Water boiling up will not go into main and cause water knock, no matter how hot a fire may be in any part of boiler. A side connection to this header with natural drain to rear of boiler discharges all water and condensation to side headers. This is only one of the many superior features of Prox Boilers."

PROX UP-DRAFT SMOKELESS BOILERS

Burns all grades of fuel, such as bituminous coal, lignite, coke, oil, gas, wood.

Capacities - 1750 sq. ft. to 22,800 sq. ft. steam

HOOSIER GIANT BRIX

GIVE BETTER BUILDINGS AT LOWER COST

The chief object in any building project today is to secure better buildings at lower cost. The public demands economy without the sacrifice of quality. Architects and contractors are meeting this demand with HOOSIER GIANT BRIX, the ideal material for high grade, economical construction.

Homes of HOOSIER GIANT BRIX

In residence construction, whether for outside veneer or solid walls, HOOSIER GIANT BRIX offer all the advantages of brick construction and yet save 25% over the cost of brick. HOOSIER GIANT BRIX can be laid up in a small fraction of the time required for other construction, thus making big savings in labor cost. In beauty they match fine quality tapestry brick. They equal brick in strength and load-bearing capacity. HOOSIER GIANT BRIX are five-walled, vitrified, mat-face fire-clay units, and are adaptable for any construction where brick can be used.

For INDUSTRIAL BUILDING

HOOSIER GIANT BRIX and HOOSIER Building Tile are adaptable for every type of industrial buildings, such as schools, gymnasiums, churches, factories, garages, stores and other fireproof structures. This material insures big savings on construction cost and makes a building unsurpassed for beauty and serviceability.

Architects and contractors are invited to send for samples and illustrated literature describing HOOSIER GIANT BRIX and Building Tile. Let us submit estimates on your specifications.

MEMBERS OF I. S. A. IN ANNUAL SESSION TODAY

Early Indications Pointed to a Big Meeting

Acceptance received from the architects of the state in response to return postals sent out announcing the annual meeting of the Indiana Society of Architects and asking that reservations be made by those contemplating attending indicated a good meeting for Saturday, June 28th, at Indianapolis.

The program for the day provided for a board session in the morning at 10 a. m., a noon luncheon for all architects at 12:30 p. m., with a business meeting starting at 2 p. m.

The afternoon was to be featured with the annual election of officers and a talk on the Indiana War Memorial development by F. R. Walker of the architectural firm of Walker & Weeks, Cleveland, the architects for that project. Reports were also scheduled from the various committee chairmen.

The annual banquet was set for 6:30 p. m., at which Claris Adams, former prosecutor of Marion County, was to act as toastmaster, and an address was to be made by Michael E. Foley, Indianapolis attorney. Then, too, quite an entertainment of a vaudeville nature was arranged for the evening banquet.

INDIANAPOLIS ARCHITECT RETURNS FROM ENGINEERS' CONVENTION

Acts as Delegate From Indianapolis Chapter to A. A. E. Annual Meeting

After a fine trip through the West L. A. Turnock, of the architectural firm of Harrison & Turnock, Indianapolis, has returned home to sing the praises of "The Land of the Rockies and Beyond."

He was honored as a delegate from the Indianapolis Chapter to the annual convention of the American Association of Engineers at San Francisco at which gathered some two hundred and fifty delegates from the various chapters from all over the country. It was a fine representation of the members of the engineering profession who put across a convention program that breathed of a spirit of harmony out of which is promised constructive policies that are expected to instill a new progressiveness in the national association to the general advancement of the engineering profession.

Mr. Turnock at Chicago joined a number of other delegates and there the crowd left in two special cars for the convention city over the Sante Fe stopping off at the Grand Canyon and other points of interest. The Los Angeles chapter entertained the delegates during a day's stop-over and then the crowd moved on to San Francisco. Other chapters who entertained were those of the convention city, Oakland and Salt Lake City. On the way returning Mr. Turnock and a number of other delegates came back East by the northern route visiting Feather River Canyon, Salt Lake City, the Royal Gorge, Colorado Springs, Pike's Peak, the Garden of the Gods, Cheyene Canyon, Seven Sisters Falls and Denver.

INDIANA MEMBERS OF A. I. A. HOLD SEMI-ANNUAL MEETING

Hear Reports From Convention Delegates

The sefi-annual meeting of the Indiana Chapter, American Institute of Architects was held at the University Club, Indianapolis, Friday evening, June 27. being ushered in by a 6:30 p. m., dinner after which a business meeting was held and officers were elected for the ensuing year. Fermor Cannon, Robert Frost Daggett and Herbert Foltz, delegates from the Indiana Chapter to the recent Washington convention of the A. I. A., made reports on that affair and set forth also their individual personal observances and experiences gained during the discussions that took place at the convention. Other business taken up covered reports on the year's activities and the shaping of new policies for 1924-25.

PRE-ELECTION DOPE

Suspicious Letter Unearthed

How about a campaign fund expenditure report by candidates for office in the I. S. of A.? It might be well to amend the by-laws to that extent.

We don't know a whole lot about Evansville politics but are inclined to be a wee bit suspicious after reading the following:

Dear Merritt:

Set a price on your vote as I am in the market.

Also tell L. A., I need an election boss and I know of no one better suited than he.

I will greatly appreciate the support of you both.

Am headed for Indianapolis, Saturday, June 28th, and hope to bring my gang with me.

Best wishes,

Signed, HARRY E. BOYLE.

Up to press time we had not been able to locate the above architect's headquarters but were expecting momentarily to receive a bundle of press agent's "stuff" and an invite to drop over for a first-page interview.

PENCIL SKETCHES

Personal contact with men of high attainment is the stepping stone to bigger things.

Why hold back those new I. S. A. applications? Send them to Laporte.

It's not hard to believe we are all weavers in this life when we watch the traffic cop sending autos, like shuttles, on their way at some busy corner in a large city.

Don't be backward in coming forward with a new I. S. A. application.

The architect who helps a draughtsman in his office to a better understanding of the profession is a worthy citizen.

Don't kick the underdog because he is small—he may grow and bite back.

Let's change the saying for a while. Let Harry do it (send them in, boys).

ORGANIZATION AND CURRENT NEWS

THE LABOR SITUATION

General Observances Indicate More Favorable Conditions Than in Several Years Past

Outside of a few scattered strikes called on the first of April and the first of May, the construction industry of the country has enjoyed a peaceful year to date. No serious tieups have been reported except in one or two cities where the workers remained out several weeks. In practically every large city where closed shop conditions prevail, new agreements, some of them extending for two or three years, have been negotiated.

In most instances the new rates are higher than the old ones, but when due consideration is given to the fact that during the rush season of last year bonuses were paid t omost of the trades, whereas this year the rates are very generally being adhered to, it becomes apparent that labor costs have not increased as much as might be supposed from a casual glance at the 1924 scales as compared with 1923.

Many contractors report that there has been a noticeable increase in production during the past few weeks. Common labor is reported as being plentiful in most cities while the supply of skilled labor is apparently equal to the demand in practically all of the trades with the possible exception of bricklayers and plasterers. (Bulletin National Assn. of Building Trades Employers.)

INSTALLATION OF LABOR-SAVING MACHINERY TO REDUCE PRICE OF COMMON BRICK

At Least That Is Word Issued by Brick Manufacturers

Common brick will be cheaper in the future according to the Monthly Digest of the Common Brick Manufacturers Association, because the manufacturers are installing labor-saving machinery, thereby reducing production costs. A ready market for their product during the past three years has enabled the producers to make money, and profits are now being put back into the plants by way of improved machinery. It has been estimated that through the use of the latest plant methods, the average brick manufacturer can operate with about 25 per cent of the labor required in a plant not equipped with modern manufacturing devices.

Calumet District

THE WAY SOME MEN SEE IT

Fail to "Get" the Big Thing That Association Work Involves

Some men have a very queer conception of the real function and office of association purpose and endeavor, they get it into their heads that an association is formed merely for the purpose of actually putting dollars into the pockets of the members and in amounts that will mean big first hand dividends in return for the nominal dues they are expected to pay in for the support of the association. It is regretable that it must be stated there are many many such men who fail to entertain that broader conception wherein big things of an intangible nature are possible through close association of men and gradually work out to maturity almost imperceptibly. However, they do work out, and when they do everybody profits through the collective effort that has unselfishly been exerted.

The Builders' Bulletin very aptly states the case as follows: Says one contractor when approached, "Yes, I shall be glad to join your association when you all succeed in getting a better price on materials from the dealers for the contractors." Then another builder announced, "I will join up with you when your association reaches the point that it can control and eliminate the contractors who bid so low and take contract work out of which they can't make decent living wages."

Here is two examples of actual types of contractors with whom association endeavor meets, men who are actuated solely by mercenary motives and only place an association on a dollars and cents basis. These men can't see beyond their noses, and in their avarice and smallness fail to realize that in striving for big things the association only asks of its members dues that amount to the price of three doughnuts and a cup of coffee per day. They don't get the great fact that real benefit to be derived from organization lies not in mere organization and its definite activities but in the closer association of the members which brings them together and to a point of understanding and an unconscious harmony that makes for unity.

The things that brings men together. acquaints them the one with the other and affords the opportunity of actually knowing the true worth of a fellow competitor is the big thing above all, and it is this feature that is deserving of support, the support a man gives when he links up with an association. It is out of the mutual understanding engendered that only close association can afford that spring all the worthy things that in the end eccrue to the individual benefit of each member. Any other conception of association work is as nothing, and the man who goes into it with such an idea of getting a whole lot for a few dollars, is not willing to put effort into it is going to get nothing, for nobody in the world can get something for nothing, it just don't work out that way in the order of things.

GENERAL CONTRACTORS TAKE MATTERS IN HAND

Grow Tired of Methods Used That Delay Building

At the meeting arranged for June 17th, by the Contractor's Council of the Calumet District for a conference with the Lathing Contractors in an endeavor to adjust the differences existing between the general contractors and union lathing contractors there was nothing doing as the latter failed to put in an appearance. The general contractors, however, did adopt a resolution wherein it is agreed that the general contractors will furnish the necessary scaffolding material, but, they refuse to pay any amount in excess of 14c per yard for work done, another provision stipulates that the lathing contractors will have to arrange for the carrying in of the lath for the job. If the lathers refuse to accept or abide by the resolution arrangements will be made by the general contractors to take care of their own lathing.

The attempt put forth by the Union and the lathing contractors to intimidate the lathing contractor who was being backed up by the association contractors succeeded to the point where said contractor absolutely refuses to have anything to do with a Union job.

GOING BIG NOW

Hammond Adoption Speeds Growth of Little Suburban Town

Annexation is not without its fruits. Ever since Hessville was taken in and made a part of Hammond it has shown a new and virile growth. Dwellings to the number of over a hundred have been erected in the new territory at Hartman's Gardens subdivision. This work is being given an incentive by the fact that the city has put in water mains and is now awarding numerous contracts for sewer construction and street pavement.

There are several larger projects about to be started. Henry Ahlborn has contracted to erect a new brick block on Kennedy Ave., for Mike Bosz, East Chicago, which when completed will give to Hessville a new banking room, store rooms and an up-to-date motion picture theatre. The Home Lumber Co. of Hammond has purchased a site on Kennedy Ave. in the new annexed territory and will erect a building for a new lumber yard over there as soon as a switch can be installed by the Nickle Plate R. R.

ALL WORKED UP ABOUT IT

Vagaries of Weather Have Calumet Folks At Sea

It begins to look as if there was but one thing to do as regards the weather, just grin and bear it. First the Calumet District was surfeited with cold, ice and snow till it seemed the winter would never end. When we were all set to enjoy the balmy breezes of Spring along came the rain clouds with a continuous deluge that just about swamped us all. That's that, and summer is here. Oh well, it seems that summer is going to be as contrary as the other seasons for it has descended with a vengeance and last week we got a scorching blast that sent the mercury up to 92 degrees in the shade and then the heat must have given out in the upper regions for down came a hail bombardment that surely smashed things up. The hail stones were the largest that were ever seen in this section. Now everybody is asking, "What next?"

CALUMET BUILDING PROGRESS

Having successfully negotiated the moving of the old Central High School Building in toto several blocks from its original location Contractor Friedstedt is now preparing a greater stunt. He has the contract to move back a half a block of buildings 20 feet to take care of the widening of S. Hohman St.

Woods-Martin Co. have opened a large sub-division along the Little Calumet River. It will be a restricted residence section for fine homes. There are to be boulevard parkway streets and a golf ground adjoining the territory.

Though much water in the ground, requiring a constant pumping, delayed the building operations on the new hospital addition, the contractors have completed the foundation and are now ready to start the superstructure.

E. E. COLE.

EVANSVILLE

GOOD WEEKLY BUILDING RECORD POSTED LAST WEEK

Residence Work Saves the Day in Absence of Large Projects

Home building construction in Evansville last week again jumped to the fore and far out-distanced all the other combined structural construction work in the way of the amount of money involved. There was approximately $100,000 worth of new building passed upon favorably by the city building inspection department of which about $84,000 represented new homes to be erected. In all there were 74 permits issued, 28 being for new residences. There was one permit for a $10,000 duplex apartment building and the remaining 45 permits covered repair and remodeling projects amounting to an estimated cost of but about $6,000.

In view of the fact that there was no large commercial, mercantile or industrial building work represented in Evansville last week's showing the record hung up is considered excellent and since the bulk of the work covers new home construction City Building Commissioner Ed Kerth points to that feature as indicative of the city's gradual expansion.

Last week's building effort was quite a boost over that of the preceding week and helped to keep the June record considerably in advance of the May figures.

NEW FOUNDRY BUILDING IN PROSPECT

Local Industrial Plant to Add Several Thousand Square Feet of Floor Space

Provisions for increasing the operating area of the William F. Hartig Plow company plant are under contemplation as incorporated in plans for a new foundry building.

The new structure will be a brick and steel structure with steel sash throughout. It will have a frontage of 70 feet and depth of 160 feet. Plans will be ready for contractors to figure early in July.

CHIPS AND SHAVINGS

Remodeling of the L. K. Liggett company store, Fifth and Main streets, estimated to cost $60,000, was started Monday by Anderson and Veatch, builders, who were awarded the contract.

General Contractors Scarborough & Davies are busy on a pretty auto filling station at Morton ave. and Division st., for the Standard Oil Company.

The Garrett Coudret Co., Evansville, secured the roofing contract on the new high school at Eldorado, Ill.

C. Kanzler and Son, contractors, were low bidders on the remodeling and addition for the Barfield-Seiffer Clothing company store, 211-213 Main street.

FT. WAYNE

CLOSE TAB ON BUILDING BEING KEPT BY LOCAL CHAMBER OF COMMERCE

Steady Growth of City Indicated by official Analysis of Building Movement

Indications that Fort Wayne has experienced an increase in building instead of the decrease which was expected by many are shown in statistics collected by the chamber of commerce for the month of May, tabulation of which has just been completed. The statistics show that values stated in building permits during May exceeded those of April by $234,658.

The total values stated in permits issued during April was $1,609,612, while that of May was $1,844,270. The report showed decided increases in some lines of buildings with decreases in others.

The greatest increases shown in individual types of construction were those in the classification shown as public buildings, and those under the head of private garages. The former showed an increase of $656,000, while the increase stated in the permits issued for the construction of private garages amounted to $63,352.75. The total valuation stated in permits issued for the erection of public buildings in April was $45,000, while the total for May was $701,000. The total for April under the heading of private garages was $43,462.25, while that of May was $106,815.

The decrease in the values stated for commercial buildings probably was one of the greatest in proportion to the total amounts involved. It was $54,050. The total under this classification for April was $319,375 and that of May was $89,050. The greatest decrease was under the classification of factories.

There was a drop of $216,829.75 under the classification of homes. The total for April under this heading was $1,149,629.75, and that of May was $932,800. A portion of this decrease, according to the report, is to be assigned to the fact that the weather during May was extremely unfavorable to home building, and prevented much of the construction work for which permits ordinarily would be issued during the month.

NEW STRUCTURE TO ARISE ON OLD LAND MARK SITE

Work Started

Wrecking of the Masonic Temple and theatre building destroyed by fire last winter, has been begun by Hilgeman & Schaaf, who purchased the property recently as the site for a new two-story building.

Immediately after the site has been cleared, work will be begun on a two-story brick and terra cotta building. The second story of the new building

will be used by the Hotel Kindler as an annex and the first floor will contain store rooms. Plans provide for the completion of the building by January 1, 1925.

FINE TEMPLE OF FT. WAYNE MASONS WELL UNDER WAY

To Be One of Finest In the Middle West

Construction operations on the new temple for Ft. Wayne Masonry, located on East Washington boulevard adjacent to the Scottish Rite cathedral, is more than half completed. All stone work in the exterior walls has been finished and the structure has already taken on the beauty of outline expected from the expenditure of three-quarters of a million dollars.

In addition to the spacious lodge accommodations, banquet hall, private dining rooms, social and lounging rooms there will be a large auditorium with a 3,000 seating capacity.

The general contractor is W. A. Sheets. Other contracts were awarded as follows: Geake Brothers, stone contract; A. Hattersley, heating, ventilating and wiring; Schweigman-Witte, plumbing; Bass Foundry and Machine company, boilers; Cecil D. Coll, sewers.

INDIANAPOLIS

LET UP IN BUILDING OPERATIONS BRINGS SUBSTANTIAL BENEFIT

Slack in Employment Urges Men to Work Better

How times have changed. Several years back craftsmen at Indianapolis for building purposes were at a premium, in fact, there weren't any to be had and many of those employed, knowing the situation, were not any too particular about applying themselves to their work. As a result it was easy enough to get by as contractors could not be too strict or exacting for men would drop their tools at the least provocation, sure that there were other jobs waiting for some one to fill them.

Those were the good old days for the craftsmen, but, today the order has changed and though they are drawing as much as formerly even to the bonuses then advanced they are working harder than ever and are producing that they may hold their jobs. There are plenty of craftsmen to be secured when needed today, the labor supply being in excess of the demand.

The situation existing today is due to a letting up in building and the falling off has actually worked a benefit to the industry. The scarcity of work has given the men an incentive to exert themselves and though the current wage scales may seem high contractors claim the men are earning every cent they receive in that they are producing and are turning out good work. It has always been contended by the building trades employers that it was not the wage that caused adverse comment but the poor work, that was turned out at high wages, to which exception was taken.) As matters stand today the contractor is in a position to separate the grain from the chaff and reward competency by securing really skilled men to carry on the work which assures the owner a satisfactory structure and a dollar's worth for every dollar put out in wages.

ILLINOIS FIRM, MANUFACTURER OF CLAY PRODUCTS, OPENS INDIANA OFFICE

R. H. McKinley Named District Sales Manager

Indiana building construction operations having run to impressive volumes the past few years and still continuing in good proportion have not failed to attract with the result that outside material dealers are turning their attention in this direction.

One of the most recent entrants is H. D. Conkey & Co., Mendota, Ill., manufacturers of Conco Clay Products. This firm as opened an office at 1010 Hume-Mansur Building, Indianapolis, ready to serve the Indiana building construction field. R. H. McKinley, formerly connected with the Martinsville Brick Co., has been made district sales manager for Indiana by the Conkey Co., with headquarters at the new office.

TERRE HAUTE

SYMPATHY STRIKE BY BUILDING CRAFTS CALLED OFF

Carpenters and Tinners in Continued Stand for Increased Wages Lose Support of Other Workers

The differences of opinion between the building trades employers and the carpenters and tinners of Terre Haute as regards wages is still keen but the crafts involved don't seem to be getting much of anywhere.

The controversy between the contractors and the two crafts in question began along in April and came to a head May 1st when at the refusal of the contractors to pay an advance in wages over the 1923 scales, the union carpenters and sheet metal workers went on a strike.

A play for public sentiment by the crafts failed flat since citizens were of the opinion that the contractors were justified in their contention that prospective builders could not afford to assume a large wage burden. As matters stood all the other crafts, except the brick layers, had signed up at the previous year's wage scales. With the two crafts out the contractors proceeded to man their work with non-union carpenters and tinners and managed to get by to such an extent that the unions who were on a strike finally prevailed upon the local building trades council to call out all the affiliated crafts on a sympathetic strike. This effort held for three weeks with no apparent success and on June 20th, the crafts, who were out on a sympathy strike voted to abandon the effort and return to work. The crafts who were striking in sympathy were the hodcarriers, plasterers, painters, plumbers, electricians, lathers and structural iron workers. In all about 1,200 men were affected by the walkout.

The local contractors have begun active operations again now that the other crafts are back at work, and will continue to employ the "open shop" as far as the carpenters and sheet metal workers are concerned.

Copies of specifications for these items may be had of the persons mentioned above. Bids must be made on Form 96 prescribed by the Board of Accounts of Indiana and must be accompanied by a certified check for 5 per cent of the amount of the bid.

Separate bids must be made for each of the four items.

BOARD OF TRUSTEES OF THE INDIANA STATE NORMAL SCHOOL,
HELEN C. BENBRIDGE, Secretary.

June 28-July 5th-July 12 1924.

NOTICE OF BOND SALE

Notice is hereby given that on the 11th day of July, at two o'clock P. M., the School Trustees of the city of Mooresville, Morgan County, Indiana, will offer for sale at the office of the Board in said city, an issue of $11,750.00 bonds of said city, for the construction of a new power plant for the Mooresville schools.

Said bonds will be twenty in number; ten bonds of $500.00 each, and ten bonds of $675.00 each, dated July 1, 1924, with interest thereon at the rate of Five Per Cent Per Annum, payable annually as follows: One $500.00 bond and one $675.00 bond, to be paid on the first day of January, 1926, and in equal amounts and denominations each year thereafter until all have been paid, payable at the First National Bank of Mooresville, Indiana.

Said bonds have been issued in strict compliance with the laws of the State of Indiana, and pursuant to an order of the Trustees of the city schools of Mooresville, made and entered of record on the 16th day of June, 1924, authorizing said bonds to be issued for the purpose of providing funds for the erection of said power plant building, and for the heating equipment for the said Mooresville schools.

Said bonds will be sold according to law to the highest and best bidder for not less than their par value.

The right is reserved to reject any or all bids.

Date June 20th, 1924.

School City of Mooresville,
By C. B. COMER, Secy.

June 21st-28th-July 5th, 1924.

WOMEN'S DORMITORY

NOTICE TO BIDDERS

Bids for the construction of a Woman's Dormitory on the campus of Indiana University will be received in the office of the undersigned until Monday, July 21, noon. Plans may be examined in the offices of the architects, Lowe & Bollenbacher, 108 South LaSalle Street, Chicago, Illinois, and the Secretary of the Board of Trustees, Bloomington, Indiana. Plans may be secured from the architects.

A deposit check for fifty dollars ($50.00) is required to guarantee the safe return of the plans and specifications.

JOHN W. CRAVENS,
Secretary, Board of Trustees,
Bloomington, Indiana.

June 28th, 1924.

POWER PLANT

NOTICE TO CONTRACTORS

Notice is hereby given that the school city of Mooresville, Indiana, by its board of School Trustees, and Brown school township of Morgan County, Indiana, by its Trustee and Advisory Board, will receive bids until 2 P. M., 11th of July, at the office of the township Trustee, at Mooresville, Ind., for the erection and installation of a new power plant for the Mooresville schools, including changes necessary to connect up the new plant with the present buildings, and flooring and plastering the present boiler room in the High School building.

Bids on the work will be received as follows: A separate bid will be received for the brick stack, one for the boilers and the installation and connecting up to the present buildings as per plans and specifications, including a hot water system for showers and lavatories, and one bid for the building, wiring and the plumbing shown on the plans and in the old building.

The estimated cost of said improvement is $25,000.00. All bids must be on the regular form as required by law, and must be accompanied by certified check equal to 3 per cent of amount of bid, guaranteeing that the bidder will, if contract is awarded to him, give satisfactory surety bond for the full amount of the contract, and enter into a contract for the work bid upon.

Plans and specifications of said building and heating plant, are on file at the office of the school Board of Mooresville, and the office of the Trus-

NOTICE TO BIDDERS

GYMNASIUM EQUIPMENT, BLEACHERS, STEEL LOCKERS, BOWLING ALLEYS

Sealed bids will be received by the Board of Trustees of the Indiana State Normal School at 2:30 P. M., July 8, 1924, at the office of the Eastern Division of the Indiana State Normal School at Muncie, Indiana, for the following items of equipment for the gymnasium and the Science Hall:

Item 1. Gymnasium equipment as per specifications.
Item 2. Knock down bleachers for gymnasium as per specifications.
Item 3. Steel lockers for gymnasium as per specifications.
Item 4. Steel lockers for Science Hall as per specifications.
Item 5. Four bowling alleys complete as per specifications.

Copies of specifications for these items may be secured from the office of the Dean of the Eastern Division of the Indiana State Normal School, Muncie, Indiana, from the office of the Registrar of the Indiana State Normal School at Terre Haute, Ind.

Bids must be made on Form 95 prescribed by the Board of Accounts of Indiana and must be accompanied by a certified check for 5 per cent of the amount of the bid.

Separate bids must be made for each of the five items but alternate bids may be made on any group of items.

BOARD OF TRUSTEES OF THE INDIANA STATE NORMAL SCHOOL,
Helen C. Benbridge, Secretary.

June 21st-28th-July 5th, 1924.

NOTICE TO CONTRACTORS SCHOOL HOUSE

Notice is hereby given that the undersigned trustee of Shelby school township, Ripley County, Indiana, will receive sealed bids at the office of said township trustee at New Marion, Indiana, at 1 o'clock P. M. on

MONDAY. JULY 7. 1924

for the furnishing of all the material and performing all of the labor for the construction and completion of the Shelby Township Joint High School and Elementary School Building at New Marion, Indiana. Such construction and installations shall follow the plans and specifications approved by and now on file in the office of the State Board of Accounts, the office of township trustee, John G. Meisberger, New Marion, Indiana, and the office of the architect, Karl P. Henkel, 108 Heinemann Building, Connersville, Indiana.

Copies and plans and specifications will be furnished any contractor applying for same on deposit of the sum of $15.00 to be held in escrow for the return of said plans and specifications to the architect on or before seven days after the opening of the bids, after which date all checks on deposit will be cashed and no refund made.

All bids shall be made and submitted on forms 96 bidding blanks. Each bid shall be accompanied by certified check upon a solvent bank made payable to John G. Meisberger, trustee in the amount of not less than three per cent of the total amount of their bid, tendered as a guarantee that the bidder will, if awarded contract, enter into a bona fide agreement with the said school township of Shelby for the contract, and furnish sufficient bond equal to one hundred per cent (100%) of the contract price.

If, for any reason whatsoever, the bidder shall fail to enter into proper agreement or fail to execute a proper bond, the full amount of the certified check shall be retained by the school township as liquidated damages. The estimated cost of the building complete is $31,440.00.

The undersigned trustee and advisory board reserves the right to reject any and all bids, and waive any defects or informality, if deemed in the interest of said Shelby school township.

Dated June 2nd, 1924.

JOHN G. MEISBERGER,
Trustee of Shelby School Township, Ripley County, Indiana.

Indiana Society of Architects

Office of the Secretary
500 BOARD OF TRADE BUILDING
Indianapolis, Ind.

ARCHITECTS OF STATE HOLD INTERESTING MEETING

Elect Walter Scholer of Lafayette President of I. S. of A.

The annual meeting of the Indiana Society of Architects held Saturday, June 28th at the Lincoln Hotel, Indianapolis, brought together a goodly representation of the members of the architectural profession from many sections of the State and was marked by a fine program and a promising spirit of harmony that continues to grow, apparently from year to year, raising the Indiana architects to a plane upon which they are able to co-operate upon matters pertinent to the advancement of the profession and also to place it in a position where it is enabled to work mutually with other building interests for the betterment and improvement of conditions that influence the building industry in the state.

There are still those who hold aloof from the Society and discount its efforts, but this type of architect is the man who has failed to acquaint himself with the doers of his profession and has never come to realize what actual association with the other fellow means. Such men either have never sat in at an I. S. A. session or if they have they have stuck to the old prejudicial view that prompts suspicion of a fellow architect without trying to prove himself that such suspicion is ill founded. These latter go back home after one or two meetings and, not having caught the real spirit of the gatherings, try to convince themselves that there is nothing in the effort the organization is putting forth.

Sees Much Good In Regional Meetings and Urges That They Be Continued

Retiring President Harry M. Griffin in his farewell official address admitted that he did not see at first any advantage to be gained in regional meetings but that subsequent experience had proved to him that from such meetings great good has come. He pointed to the affairs that had been held under the auspices of the I. S. of A. at Ft. Wayne, Terre Haute, Vincennes, South Bend and Lafayette, as examples of what had been accomplished by regional meetings and stressed upon the fact that through that medium the profession had been brought closer together than was ever known before, and had even gone farther to reach out and create a situation where today Indiana architects, contractors, engineers and Labor are enabled to sit in conference for the solution of collective mutual problems that formerly kept the building construction business at sea because no unity of action was possible under the old order when the individual groupes sat aloof and, not knowing the desire of each for a general understanding, tried to handle individually matters in which all were concerned.

Mr. Griffin pleaded for a continuation of the regional meetings and the joint conferences, and pledged to the Society his hearty future support as an individual when he layed down the reins as chief executive and asked that all Indiana architects do the same for the good of the profession.

Financial Condition of Society in Good Shape

Treasurer Wilson B. Parker in his report showed the organiaztion to be in good financial condition with quite a bank balance on hand and fully capable of taking care of matters as they may arise to require attention and financial support.

Dead Timber Weeded Out

An interesting summary concerning the membership status was submitted by Geo. W. Allen, Laporte, chairman of the membership committee, which revealed the fact that twelve new members were admitted during the past year. This was two more than taken in last year. On the other hand, the Society lost three members through death during the past twelve months, and seventeen members were suspended for non-payment of dues. Every effort was made to be lenient with the delinquents, but when they proved themselves absolutely negligent the board of directors dropped their names from the roster, deciding that what was needed most was active interest and not dead timber that went for large numbers, quality rather than quantity is what is wanted. The 112 members of the Society now in good standing have at least proved their loyalty to the profession and can not but feel a pride in the things of benefit, not marked by dollars and cents, rather of a moral influence, that they have been a part to in bringing about.

Action Along State Building Code Line Beginning to Materialize

As for accomplishment, that was made very manifest by the remarks of Fermor S. Cannon, architect member of the Advisory Committee of the Administrative Building Council of Indiana. He referred to what the Council had done to date and announced that the Standard, Structural and Mechanical Committees of the Advisory Committee have worked out detailed building requirements that will be a boon to the building industry of the State. Buildings have been grouped and the requirements classified according to occupancy with a main view to promoting safety factors and at the same time effecting economy. These tentative details are soon to be printed and distributed for final criticism before adoption.

Indiana may not have a building code but she is to have a document of standardized regulations and requirements second to none, and when she has the Indiana Society of Architects will have played no small part in the achievement of that end.

War Memorial Architect Speaks

F. R. Walker of the firm of Walker and Weeks, Cleveland, O., which is preparing plans for the Indiana War Memorial, made an impassioned informal talk on the Memorial at the afternoon session, explaining the sincere effort his firm is putting into the problem at hand in an effort to develop a monument that will stand through the centuries to come to impress upon posterity the spirit, the life, the motive of the times through which we have so recently passed during the Great War Period and through which we are now passing. He illustrated his remarks with rough preliminary drawings, their subsequent development by a process of elimination and the model work that was employed to bring out the best interpretation of the purpose for which the Memorial is to stand. His was a most interesting disseration and carried a strong appeal to the architects present. Nor was he stinting in his praise of the support the Indiana Society of Architects had extended to the Memorial project, the Board of Trustees and his firm, a support of which he and all those concerned were deeply appreciative

Fine Evening Program Provided

The informal luncheon at noon which opened the day's program was a delightful affair but paled under the glow that was radiated that evening from the Lincoln Room where the annual banquet was held. The entertainment committee, of which Don Graham was chairman, simply outdid itself in the program that was furnished. Claris Adams, former prosecutor of Marion County, acted as toastmaster and surely to be able to preside in such fashion is a gift that only nature can give. His ease, his ingratiating charm, his quick and sure grasp of the situation, all expressed in a diction and eloquence beyond the usual, went far toward making the ban quet period a most enjoyable one. Then,

(Continued on Page 12)

too, Michael E. Foley, Indianapolis attorney, added greatly to the evening with a sterling address on Americanism that will long dwell with those who heard him. As for entertainment diversion there were vocal selections of the highest order, solos, duets and quartet numbers that were charming. Interspersed here and there were vaudeville acts, dancing and orchestral selections well chosen.

Election Result

The annual election of officers placed these men for the ensuing year: President, Walter Scholer, Lafayette; 1st Vice-President, Rodney W. Leonard, Frankfort; 2nd Vice-President, Wilson B. Parker, Indianapolis; Secretary, Merritt Harrison, Indianapolis; Treasurer, L. A. Turnock, Indianapolis. Committee Chairmen: Entertainment, Don Graham, Indianapolis; Legislative, Herbert Foltz, Indianapolis; Membership, G. W. Allen, Laporte; Publicity and Public Action, Herman Scherrer, Indianapolis.

Those present were: L. L. Johnson, Attica; H. M. Griffin, K. P. Henkel, W. E. Hanson, Connersville; K. D. Norris, East Chicago; Harry E. Boyle, Evansville; R. W. Leonard, Max Wolff, Frankfort; A. M. Straus, Ft. Wayne; L. Allen, A. C. Bohlen, F. S. Cannon, K. Coffin, R. F. Daggett, W. K. Eldridge, H. Foltz, W. H. Garns, Donald Graham, Merritt Harrison, Norman Hill, E. A. Hunter, C. T. Myers, Wilson B. Parker, Herman Scherrer, Frederick Wallick, D. G. Zimmerman, all of Indianapolis; Walter Scholer, Lafayette; Warren D. Miller, C. E. Scott, Terre Haute; J. W. Gaddis, Byron Sutton, Vincennes. Visitors, F. R. Walker, S. Clark, both of Cleveland, Ohio; J. H. Owens, L. C. Felton, B. B. Williams, T. L. Younggreen, Indianapolis.

Associated Building Contractors of Indiana

MAX IRMSCHER, President
Ft. Wayne

C. C. PIERSON, Secretary
Indianapolis

ORGANIZATION AND CURRENT NEWS

ANDERSON

CONTRACTORS OF CENTRAL INDIANA TO HOLD DISTRICT MEETING

Gathering to Be Held At Anderson

A district meeting of the members of the subsidiary city associations of the Associated Building Contractors of Indiana, from Anderson, Kokomo, Lafayette, Marion, Muncie and Peru will be held at the Stillwell Hotel, Anderson, July 8th. All contractor members from the above cities have been invited and urged to attend.

The meeting will be called to order at 2 P. M., at which conditions relating to the current building construction situation will be taken up for discussion. This getting together of the contractors of a prescribed district will in nowise interfere with the regular established quarterly conference plan of the State A. B. C., being planned with the idea of keeping the builders in closer contact with the situation in the particular district.

A six p. m. dinner is scheduled to follow the afternoon business session at which Architect Fermor S. Cannon, Indianapolis, chairman of the Advisory Committee of the Administrative Building Council of Indiana, will make an address that will cover the activities of the Council to date. Much has been accomplished toward the aim anticipated though no publiicty has been given the action, and since the State A. B. C. was one of the prime sponsors of the move that resulted in legislation that created the Council Mr. Cannon's message will prove that much more interesting to the contractors. It is an achievement in which Indiana contractors can feel a pardonable pride.

Calumet District

FACING A SURE ENOUGH PROBLEM

Purification Means for Water Supply Sought by Lake Shore Cities

Cities of the Calumet District and other municipalities along the shore of Lake Michigan have been forced to take action looking to the stopping of the pollution of the lake from which the water supply for the above sections is secured. To that end a meeting of the Lake Michigan Sanitary Congress, a body made up of representatives from the cities included in the above referred territory, has been called for July 27-28, at Hammond.

For many years Chicago was the chief offender as a polluter of Lake Michigan but after the sanitary drainage canal was built and put into operation the Chicago source of offense was eliminated. However, the growing cities of Northern Indiana and Michigan located along the big lake continue to use that body of water as an outlet for their sewage to such an extent that the southern end of the lake is assuming a most unhealthy aspect and something must be done to rectify the evil.

Quite a program has been planned for the meeting the latter part of July and included in the lay-out are many speakers of national prominence and men well versed in sanitation matters. There is no doubt that steps will be inaugurated that will culminate at no distant date in some sort of an extensive comprehensive scheme that will eventually eliminate the health menace that now threatens the territory involved. As matters now stand the continued pollution of the waters of Lake Michigan increases the danger to which citizens of Indiana's big industrial section are now exposed, the typhoid epidemic threat being continually just beyond the horizon with the chance that it may swoop down at most any time. The chlorine treatment of water taken from the lake is now resorted to but the problem is a growing one and some relief is sought.

The question is not a new one but is demanding drastic action now. In 1919 many prominent engieners studied the Calumet sanitation problem of sewage disposal and presented a report to City Engineer W. F. Bridges of Hammond advocating a treatment of settling and chemical process. These engineers also suggested the formation of a sanitary district for the handling of the issue estimating that the population of Gary, Hammond, East Chicago, Indiana Harbor and Whiting would run to over a half a million in a few years and such a population would require a protection such as it is hoped can be worked out tentatively at least at the approaching meeting.

POSSIBLY IT IS POLITICS

Some Inclined to Attribute Building Slump to That

What the cause is nobody knows, but it is a self-evident fact that the building business has shown a real tendency to grow rather dull. Some have attributed it to high material prices, others to high wages, and even the political aspect has been charged as contributory to the falling off of activity. If it is the latter maybe as soon as the radio reports of the conventions, to which everybody who can seems to be listening in, taper off into silence people will get back on the job once more. However, if it is the political bee we can't expect much escape, for it will not be long until the spellbinders with their political flow of oratory will be back on the scene, hopping from stump to stump up and down the country, in an endeavor to save the country from the danger of the other party. Ho hum!

STORM STRONG AT HAMMOND

Secretary Cole Can Vouch For It

While the big blow that swept the lake region Sunday was of more terrific violence farther east nevertheless it swept the Calumet District with great force and threatened serious damage for a time. New buildings under construction were especial objects of the gale, while big shade trees, telephone wires and signs also suffered considerably. The secretary of the B. T. E. A. was caught in the storm out on the Lincoln Highway near Medaryville while on the way home from Valparaiso and for a time was almost led to believe he was at the tiller of an aeroplane.

CALUMET BUILDING PROGRESS

The men of Contractor J. H. McClay are making short shift of the I. O. O. F. Building on State St., getting it out of the road to make room for a new structure.

General Contractors Rhoades and Graves are building two nice brick veneer bungalows on S. Hohman St., estimated to cost $8,500 apiece.

Dr. Lloyd has purchased a site on Hohman St., which sets a new record price for frontage on that thoroughfare, $1,500 per front fot.

The foundation for the new Paxton Building, S. Hohman St., is completed and Contractors G. P. Pearson & Son are ready to start the superstructure.

E. E. COLE.

EVANSVILLE

BUILDING PERMITS INDICATE INCREASED ACTIVITY

Valuation Not Up to That of June a Year Ago

A total of 523 building permits approximating $221,947 in building value, were issued in Evansville during June, Building Commissioner Ed Kerth announces. The number of permits issued this year shows an increase of 29 over the same month of last year although the 216 permits issued during June, 1923, approximated $275,635. Of the permits for this month, 36 were for new frame houses. There were 97 electrical permits issued during the month in conformity with the new building code.

FT. WAYNE

JUNE HOME BUILDING OPERATIONS SET HIGH MONTHLY TOTAL FOR THAT TYPE OF STRUCTURE

Activity On Other Work Slackens

Although Ft. Wayne building totals during June totalled only $720,101, the month saw the establishment of a new record for home building with 117 permits for residences.

Despite the slump, the long-hoped-for recocrd of a million-dollar monthly average was still well maintained with a total for the first half of the present year of $6,780,282 on a total of 1,567 permits. This average is somewhat higher than that of 1923 when 1,435 permits were taken out.

During the first half of the year 778 permits were issued for new residences.

For the coming month the city building inspector looks forward to a higher building total than in June as two big projects will be started, one being the erection of a five story warehouse building on Francis street, and the other the new Catholic community center building. Totals on these structures will reach well over $300,000, according to estimates.

INDIANAPOLIS

BUILDING AT INDIANAPOLIS STILL ON THE DECREASE

Past Month's Business Still Below Other Records.

June figures just made public by the building inspection department of Indianapolis again demonstrate the subsidence of building construction operations that have shown a continued tendency for the past few months to let down. This does not mean that the Indianapolis building field particularly is hit hard individually for the trend generally thruout the country has been toward an easing up in building.

Last month's record is rather colorless in that there was very little out of the ordinary to attract attention. There was but one big project for which a permit was granted, a storage garage, the Test Building to be erected on Monument Circle at an estimated cost of $350,000. This was the structure to which so much objection was raised, it being claimed its purpose was inimical t the locality. The matter was carried before the zoning commission, then to the courts and even a specil city ordinnce ws pssed in an endeavor to stop the project but the owners by altering the original plans somewhat finally triumphed.

Home building operations were fair, 197 permits for new houses being issued and the total estimated valuation of that class of work went a long way to swell the volume of business. Repair, remodeling and addition work was in large proportion but the individual projects were of small scope.

The June building business financially was 8.8% less than that for June, 1923 and 10.7% below that of May this year. There were 165 less permits issued in June than during the preceding month.

Official comparative figures for the past month and the corresponding period last year are:

Tom	Per.	Est. Val.
Jun, 1923 ----------	1396	$1,925,252
June 1924 ----------	1589	1,755,234

Sealed Proposals

SCHOOL BUILDING

NOTICE TO CONTRACTORS

The undersigned Board of Trustees of the School City of Salem, Indiana, hereby gives notice that on July 25, 1924, until 11 o'clock A. M. at the office of the Marks Abstract Company in the City of Salem, Indiana, they will receive sealed bids and proposals for the remodelling of the present grade school building and the installation in the same building of a heating and ventilating system and plumbing and sewerage in the boys' toilet; all in accordance with the plans and specifications heretofore adopted and approved therefor by the said Board and which are now on file in the office of the President of the Board of Trustees in Salem, Indiana.

The estimated cost of the above contract is $12,000.00.

All bids must be in writing on Form No. 96 as prescribed by the State Board of Accounts, delivered sealed and must conform in every respect to the laws of the State of Indiana.

Each bid shall be accompanied by a certified check for Three Hundred and Fifty Dollars ($350.00). These checks must be made payable to the Board of Trustees of the School City of Salem, Indiana, and will be held by them as a guarantee of good faith that the said bidder or bidders will enter into a contract and execute a bond for the full amount of his bid, approved by the Board of Trustees, for the due performance thereof, if his or their bid or bids are accepted. The checks of those bidders who fail to be awarded a contract will be returned to them when the contract has been awarded.

Should the successful bidder or bidders fail to enter into such a contract and execute such bond, then he or they shall forfeit the amount of said certified check as liquidated damages for such failure for the use and benefit of the proper fund of the School City of Salem, Indiana.

Copies of said plans and specifications are on file in the office of the State Board of Accounts, State House, Indianapolis, Indiana, and in the office of The Elmer E. Dunlap Co., Architects, 1050 North Delaware Street, Indianapolis, Indiana.

Copies of said plans and specifications may be obtained from the office of the Architects upon the deposit of $10.00 for each set. Said deposit will be returned to the bidders upon the safe return of said plans and specifications on or before the day and hour set for receiving bids.

The right is expressly reserved to reject any or all bids and to use sufficient time to investigate the bids and qualifications of the bidders.

W. O. MARKS, Pres.
W. C. SHANKS, Sec.
J. I. MITCHELL, Treas.
Board of School Trustees, Salem, Ind.

SCHOOL BUILDING

NOTICE TO CONTRACTORS

The undersigned Board of Trustees of the School City of Edinburg, Indiana, hereby gives notice that on Tuesday, July 22, 1924, until 10 o'clock A. M. at the office of the Superintendent of Schools in the High School Building in Edinburg, Indiana, they will receive sealed bids and proposals for the erection and completion of a new High School Building; and at the same time and place will also receive sealed bids and proposals for the installation of the Heating and Ventilating, Electric Wiring and the Plumbing and Sewering in the said building; all in accordance with the plans and specifications heretofore adopted and approved therefor by the said Board and which are now on file in the office of the Secretary of the Board in Edinburg, Indiana.

The estimated cost of the proposed building is $40,000.00.

All bids must be in writing, on forms provided therefor, delivered sealed and in every respect must conform to the laws of the State of Indiana.

Each bid for the General Construction shall be accompanied by a certified check for One Thousand Dollars ($1,000.00); each bid for the Heating and Ventilating shall be accompanied by a certified check for Five Hundred Dollars ($500.00); each bid for the Plumbing and Sewering shall be accompanied by a certified check for Three Hundred Dollars ($300.00) and each bid for the Electric Wiring shall be accompanied by a certified check for One Hundred Dollars ($100.00). These checks must be made payable to the Board of Trustees of the School City of Edinburg, Indiana, and will be held by them as a guarantee of good faith that the said bidder or bidders will enter into a contract and execute a bond for the full amount of his bid, approved by the Board of Trustees, for the due performance thereof if his or their bid or bids are accepted. The checks of those bidders who fail to be awarded a contract will be returned to them when the contracts have been awarded.

Should the successful bidder or bidders fail to enter into such a contract and execute such bond, then he or they shall forfeit the amount of said certified check as liquidated damages for such failure for the use and benefit of the proper fund of the School City of Edinburg, Indiana.

Copies of said plans and specifications are on file in the office of the State Board of Accounts, State House, Indianapolis, Indiana, and in the office of The Elmer E. Dunlap Co., Architects, 1050 North Delaware Street, Indianapolis, Indiana.

Copies of said plans and specifications may be obtained from the office of the Architects upon the deposit of $25.00 for each set. Said deposit will be returned to the bidders upon the safe return of said plans and specifications on or before the day and hour set for receiving bids.

The right is expressly reserved to reject any or all bids and to use sufficient time to investigate the bids and qualifications of the bidders.

POWER PLANT

NOTICE TO CONTRACTORS

Notice is hereby given that the school city of Mooresville, Indiana, by its board of School Trustees, and Brown school township of Morgan County, Indiana, by its Trustee and Advisory Board, will receive bids until 2 P. M., 11th of July, at the office of the township Trustee, at Mooresville, Ind., for the erection and installation of a new power plant for the Mooresville schools, including changes necessary to connect up the new plant with the present buildings, and flooring and plastering the present boiler room in the High School building.

Bids on the work will be received as follows: A separate bid will be received for the brick stack, one for the boilers and the installation and connecting up to the present buildings as per plans and specifications, including a hot water system for showers and lavatories, and one bid for the building, wiring and the plumbing shown on the plans and in the old building.

The estimated cost of said improvement is $25,000.00. All bids must be on the regular form as required by law, and must be accompanied by certified check equal to 3 per cent of amount of bid, guaranteeing that the bidder will, if contract is awarded to him, give satisfactory surety bond for the full amount of the contract, and enter into a contract for the work bid upon.

Plans and specifications of said building and heating plant, are on file at the office of the school Board of Mooresville, and the office of the Trustee at Mooresville, Indiana, and at the office of the Architect, W. H. Garns, 1217 Fletcher Trust Building, and the heating plans at the office of the Heating Engineer, W. A. Breining, 511 Traction Terminal Building, Indianapolis, Indiana.

The said School Board and the Trustee reserve the right to reject any or all bids.

Dated June 20, 1924.

NOTICE TO BIDDERS

GYMNASIUM EQUIPMENT, BLEACHERS, STEEL LOCKERS, BOWLING ALLEYS

Sealed bids will be received by the Board of Trustees of the Indiana State Normal School at 2:30 P. M., July 8, 1924, at the office of the Eastern Division of the Indiana State Normal School at Muncie, Indiana, for the following items of equipment for the gymnasium and the Science Hall:

Item 1. Gymnasium equipment as per specifications.
Item 2. Knock down bleachers for gymnasium as per specifications.
Item 3. Steel lockers for gymnasium as per specifications.
Item 4. Steel lockers for Science Hall as per specifications.
Item 5. Four bowling alleys complete as per specifications.

Copies of specifications for these items may be secured from the office of the Dean of the Eastern Division of the Indiana State Normal School, Muncie, Indiana, from the office of the Registrar of the Indiana State Normal School at Terre Haute, Ind.

Bids must be made on Form 95 prescribed by the Board of Accounts of Indiana and must be accompanied by a certified check for 5 per cent of the amount of the bid.

Separate bids must be made for each of the five items but alternate bids may be made on any group of items.

BOARD OF TRUSTEES OF THE INDIANA STATE NORMAL SCHOOL,
Helen C. Benbridge, Secretary.

June 21st-28th-July 5th, 1924.

POVERTY PLEA IN BEHALF OF LABOR IS LOSING FORCE

Establishment of "Labor Banks" Kills Old Stock Arguments

"Labor banking" has been pretty fully discussed in recent months. Here's one phase of it that has probably been overlooked.

It is likely to cause much grief to labor orators and speakers, or at least compel them to revise their sketches. They have bumped into a dilemma.

To boost the "good old cause" it has usually been the custom to tell the workingman how poor he is. But to boost the labor bank it is necessary to tell him how rich he is—to show him how he has been turning over his money to the banks controlled by the "rich."

This inherent contradiction has been worrying other saviors of the people. Senator Brookhart, for instance, uses a set of figures which impress the uncritical hearer with the idea that the malignant money devils are frisking the farmer and workingman out of two-thirds of the wealth they create, but when the senator urges more farmers on the federal reserve board he declares that these two classes own the great bulk of the bank deposits.

Note these two items from the same number of a labor magazine published by a union which has recently started a labor bank under happy auspices.

"Banking has been considered exclusively an institution maintained by the rich for the rich. The rich derive most of the benefits from banks. They monopolize the control of banking, and get the lion's share of the profits. But the rich do not keep their money in their banks. They invest it in enterprises, which yield them greater returns than bank interest rates. The majority of bank depositors are not wealthy men. The savings of wage earners and people of moderate means constitute the bulk of the money deposited in banks. These savings, which aggregate a stupendous sum, are used by the rich to exploit labor. Why indeed, should not labor organizations have their own banking institutions, where the deposits of their members, workers in general and people of moderate means could be safely kept and loaned for purposes that might accrue to the general benefit of the workers, rather than to strengthen the position of their oppressors?"

Why, indeed? Only one possible reason occurs to the writer. If the same sort of reasoning should prevail in labor banks that prevails in so much labor propaganda, the banks would be short lived. Here in one paragraph we have the old bunk about labor being "exploited" by the rich investing their money in productive enterprises, which enable labor to live; and a statement of the utterly inconsistent fact that poor "exploited" labor owns the money that runs the banks.

And a little later on occurs this jewel of consistency: "Coupled with the other (industrial) changes now taking place, and perhaps the most important of all, is the passing of industrial control out of the hands of the owner-manager over to the financial group. * * * Until this present generation, industry was dominated by the 'captains of industry,' by individuals or small groups of owners. The change in this control, the passing of the managing owner, and the appearance of money and credit as the chief element in dictating industrial policies, is the most significant fact before the world today."

And we have just been told that this "money and credit" or banking power, which is now assuming the control of industry is the property of the workingmen and others of moderate means. So then labor is being "exploited" by being vested with the ownership of the money and credit, which controls the industrial plants and processes, which we have been previously informed are bought by the rich with the use of labor's money.

Of course, few workingmen will note such inconsistencies as soon as they are presented, but facts wage a "war of attrition" on bunk, and labor is slowly waking up to the fallacies of the backward looking cant, upon which it has so long been fed in the name of "social progress."

When an organization comprising such untamed and unassimilated elements as the miners' union can come to a realization that labor's pay is limited by what the traffic will bear, there is no longer any doubt of the fact that organized labor in America is getting wiser.—Chicago Tribune.

NEW USES FOR SLAG

Its Use in Cement Manufacture as Done in Europe Predicted in America

Betterment of present methods of utilizing the slag produced as a waste product of blast furnaces, and research looking toward the development of new methods of using it were discussed at a conference of the National Slag Association held at the bureau of standards, department of commerce, recently. In addressing the conference Mr. P. H. Bates of the bureau of standards called attention to the fact that slag is now used in Europe for making "Eisen Portland cement" which consists of about 35 per cent of ground slag and 65 per cent of Portland cement. He expressed the opinion that such use would ultimately develop in this country. Eisen cement is nearly as strong as Portland cement, he stated, and is also thought to be more resistant to attack by sea water and by alkali.

Following Mr. Bates, Mr. J. C. Pearson, chief of the bureau's cement section, told the conference about tests made at the bureau of standards on the properties of concrete in which slag is used as aggregate. The bureau finds that if the usual proportions are adhered to the concrete made with slag is less workable than that made with gravel, and is not so easily handled, but this difficulty can be avoided by using a larger proportion of sand. Strength tests are now under way, and results are expected by the middle of the month. The slag concrete is found to fill about 6 or 7 per cent less space for the same volume of aggregates as compared with gravel concrete, Mr. Pearson stated.

There are 20,000,000 tons of slag produced annually in the United States, Mr. Pearson said, and it sells for a small fraction of a cent per pound. It is usually not handled by the steel industry, but is sold by them to independent concerns who make it into useful products.

WARNING SOUNDED

Architects Hear Admonition Against Radicalism That Would Upset Traditions of Our Country.

Indiana architects who attended the semi-annual meeting of the I. S. of A., at Indianapolis recently were stirred deeply by Attorney Michael E. Foley, Indianapolis, who warned against the growing tendency toward radicalism and pleaded for a safe, sane conservatism by means of which the country can be carried on to greater triumphs with added security for the welfare of its citizens if the time honored traditions of the government are respected and not cast aside in the pursuit of whimsical unproven theories.

Mr. Foley said in part:

"In politics today we have the conservative and the radical.

"The conservative accepts the ideals and institutions of our fathers and he is a ready defender of the written constitution of the republic. He has studied this immortal document and he fully understands its guarantees. He believes in law and order, and obeys the mandates of the courts of the republic. He recognizes the sanctity of life and liberty and opposes every attempt to conduct the government in the interest of any bloc, class or section. He is a disciple and follower of Washington, Jefferson, Wilson and Harding. He is familiar with the history of the republic and he believes in the preservation of liberty, justice and equality in the national life. He is an optimist and not a pessimist. As a student of American History, he realizes that the affairs of the government in America have been conducted honestly and economically for more than a century and a quarter. He understands that America is the land of hope and of opportunity. Lincoln's rise from obscurity to eternal fame commends America to him. He gives little heed to the demagogues who assert that the rich are all powerful in America and that the poor are denied the constitutional guarantees of the Federal Constitution. He is safe, sane and dependable in the hour of a nation's crisis. He places the welfare of the republic above and beyond the welfare of his party. His highest obligation is to America. The rank and file of the citizenship of America are conservatives and they are ready to oppose any national leadership that tends to Communism, radicalism, socialism and bolshevism. This great army of men and women who constitute the conservatives of America are the hope of the republic on the morrow. The political fads and fancies of European radicals do not appeal to this class of citizens.

The World War destroyed much that seemed permanent in the political life of Europe. For centuries the few had been asserting their power and authority in parts of Europe and they had been imposing unjust burdens upon the people. These exponents of autocracy were destroyed as a result of the World War, and the people of these unhappy lands lack constructive leadership. As a result of this lack of proper leadership, all sorts and types of radicalism have asserted themselves in much of Europe. Russia is in the hands of the mob and there is a total lack of stable dependable government. Germany, Italy, France and England are dominated in their legislative bodies by radicals. The legislative bodies of these nations are enacting many laws that are ill advised and intended to satisfy the whim and caprice of the radical mob. The leading nations of Europe are legislating without proper restraint and without due regard for the fundamental principles of justice, liberty and equality. There is no Supreme Court or other power to check this radical tendency in European legislation and no one can predict what the outcome of this wave of radicalism will be. America must hold fast to the time honored policies and principles of our fathers. By precept and example she must teach the world to legislate honestly and courageously for all the people. Many members of the Congress of the United States in recent years are much inclined toward European tendencies in legislative matters. They desire to legislate upon the theory that the congress is supreme and that the congress has the power and authority to enact legislation that is in direct variance with the Constitution of the United States.

"A former Solicitor General of the United States in discussing this question recently said:

> "On the other hand, as the Nation of the restraints imposed on it by the Constitution. It has been wont grew, Congress has become restive to assume that it was all powerful; for the supposed welfare of society that anything which it desired to do was proper, and that to it anyone could look for relief in any direction.
>
> "The result has been that year by year, the activities of Congress have widened. It attempts to deal with every possible phase of national, social and economic life. It thinks that its will is supreme. But there is where it is in error. The Supreme Court has again and again and with increasing frequency of late years been compelled to remind Congress that it must not pass the limits fixed by the Constitution. IF ANY CRITICISM SHOULD BE JUSTLY MADE, OF THE SUPREME COURT, IT IS THAT IT HAS BEEN TOO RELUCTANT TO CURB CONGRESS IN ITS ASSUMPTION OF POWER. The Supreme Court is not, as some have said, 'thwarting the will of the people.' It is only recognizing that it it the PEOPLE and not Congress which must extend the powers of the latter."

In America the fathers of the Constitution provided a check that was intended to prevent, and if necessary strike down all radical legislation, either in the state or nation that violates the tenets of the American Constitution. The radical in America today points with pride to the progress that has been made in Radical Russia, and he contends that the rule of the Russian mob is preferable to government administered along constitutional lines. Radicals in America are spreading propaganda against the Supreme Court of the United States. We must accept the challenge."

ORGANIZATION AND CURRENT NEWS

FIGURES FOR FIRST HALF OF 1924 SHOW BIG RECESSION FROM BUILDING VOLUME LEVEL REACHED AT END OF FIRST SIX MONTHS IN 1923

Elkhart Totaled Best Gain While South Bend Sustained the Greatest Loss

The slight monthly declines in Indiana's building business noted from time to time during the first six months of 1924, as indicated by the official returns of the building inspectors from the larger cities of Indiana where building permit records are kept, assume quite a sizeable proportion when lumped in the total summary for that period and compared with the building operations for the corresponding period a year ago. The estimated valuation of new building construction for which permits were granted from January 1st to June 30th, inclusive, 1923, amounted to $39,873,877 while that for the same period this year ran up to only $32,773,621. In the face of that loss there were 1,250 more permits issued over the same period in 1924 than in 1923. This latter gain is accounted for with a consequent loss in estimated valuation by the fact that there has been a tremendous amount of addition, remodeling and repair work of a small nature while the larger projects have been fewer than last year. Residential construction has held its own in comparison with that of last year but mercantile, commercial, industrial and public building construction operations have shown little activity.

Of the ten cities reporting on building activities only three of them showed a gain over last year's first six months record and as they were small cities as compared with the rest of the municipalities their volumes were not nearly enough to offset the losses sustained in the larger communities. The three cities, Elkhart, Gary and Kokomo, that showed gains, ran up an increase of $2,192,948 over last year's business for the first six months in 1924, while the other seven cities totaled a loss of $9,293,204, making a net loss of $7,100,256 for the entire territory.

Little Elkhart made the best record of the ten Indiana cities when comparisons were made, she showing a gain of 91.7%. Next comes Gary with a gain of 67.8% to be followed by Kokomo with a 9% increase over the 1923 building volume. As for losses sustained, Ft. Wayne was the most fortunate in this matter, turning in a $6,780,282 estimated valuation as compared with $7,389,114 for the corresponding period in 1923, a decline of but 8.2%. Terre Haute was second with 14%, with the other cities following in this order: Indianapolis, 19.1%; Hammond, 19.3%; Richmond, 26.1%; Evansville, 37.9%; South Bend, 56%. The latter city during the first six months of 1923 ran up a building volume of $7,339,380, but the best she could do over the corresponding period this year was $3,225,026.

The figures for the first half of this year and last are:

	1924		1923	
City	Per.	Est. Val.	Per.	Est. Val.
Elkhart	141	$ 1,110,250	157	$ 579,150
Evansville	1874	1,585,195	1152	2,554,968
Ft. Wayne	1567	6,780,282	1465	7,389,114
Gary	936	3,970,570	519	2,365,389
Hammond	612	1,902,790	589	2,359,333
Indianapolis	8398	11,792,844	7568	14,577,246
Kokomo	****	680,732	****	624,065
Richmond	299	403,897	308	547,251
South Bend	1852	3,225,026	2762	7,339,380
Terre Haute	1629	1,322,035	1538	1,537,981
Total	17,308	$32,773,621	16,058	$39,873,877

ANDERSON

DISTRICT CONFERENCE OF STATE A. B. C. ATTRACTS.

Many Builders Attend.

The district conference held at Anderson, Tuesday, July 8, comprising the following cities, Anderson, Muncie, Marion, Peru, Kokomo and Lafayette, attracted a good representation, many builders being present, with also two visitors, Mayor B. L. Horne and "Chick" Alford, Fire Chief, of Anderson. The meeting was called to order by Ross Eshelman acting as chairman. Reports from the above cities were to the effect that building operations were not as flourishing as a year ago; that there is little real large work to speak of under construction; there is a fair volume of small work; labor conditions are good with no shortage of mechanics in any particular craft. Short talks were made by Mayor B. L. Horne, Anderson; E. L. Danner, Kokomo; Chas. Morrow, Muncie; Jas. Hodgson and J. H. Owens, Indianapolis.

The real feature of the conference was a talk by Architect Fermor S. Cannon, Indianapolis, Chairman of the Advisory Committee of the State Building Council. Mr. Cannon outlined briefly the trials of the committee during the last session of the legislature in their effort to secure passage of the bill authorizing the State Building Council. He stressed upon the fact that it was the unselfish co-operation of the organizations sponsoring the bill that made possible its passage. Next he followed with an outline of the organization of the Building Council and the Advisory Committee, and illustrated how the work of these Committees was planned and is being worked out for standard rules and regulations of minimum requirements pertaining to the construction industry in Indiana.

At the conclusion of Mr. Cannon's talk a number of questions were asked of the speaker by the various members regarding certain features of the committee's work.

A vote of thanks was extended to Mr. Cannon for his co-operation in attending the Anderson conference and placing before the contractors, in such a constructive manner, that which the Building Council was attempting to do and what it has accomplished to date.

A vote of thanks was also extended to the members of the Anderson A. B. C. effort in making the district conference a success.

Those attending the conference were the guests of the Anderson A. B. C.

at a sumptuous dinner at 6:00 P. M. at the Stillwell Hotel.

The next district conference of the State A. B. C. is scheduled for the northern district which comprises constituent bodies in the following cities: Hammond, Gary, East Chicago and Indiana Harbor, Michigan City, South Bend, Elkhart and Fort Wayne. The meeting will be open to any other cities outside of the district whose members desire to attend. The meeting will ge held at the Spaulding Hotel, Michigan City, July 23rd.

The above city is geographically located for convenience to the various cities comprising the northern district with good good hard surface roads radiating in all directions which should make it possible for the cities concerned to send their delegates via automobiles.

This will afford a good opportunity to the builders of the north part of the state to get together for an afternoon and evening, and exchange ideas that should be productive of much good.

Michigan City expects you on July 23d. Why not go?

Calumet District

CATCHING UP WITH US

England Finds Building Trades Mechanics Demanding Increased Wages.

Merry old England continues to grow merrier all the time, giddy in a way and yet progressive in keeping abreast with the rest of the world. The latest a la mode stuff to be pulled over in the "tight little isle" is a strike by the building trades mechanics who, not to be outdone by their brethren in other countries, were ordered by their trade union officials to go on a strike because the demand for increased wages was not met. Seven hundred thousand men were affected by the order.

It would seem that the strike bug can get in its dirty work in other localities as well as in the United States. The worst of it all is that it is always the workman who suffers most and yet he is inclined to be a willing victim.

PLUMBERS INSISTENT

Hold To Demand For Decided Wage Increase.

Not much progress has been made in the wage fight between the craft and the employers. The master plumbers met with the representatives of the Union recently and after a short discussion refused to accede to the demand for $1.62½ per hour and a five-day week. Some of the owners of the smaller shops who carry union cards have signed up, but their giving in does not mean much as such action was expected on their part.

The general contractors and master plumbers are soon to get together to decide on some sort of definite action to meet this new wage threat that has arisen to further choke off building operations in this section.

With business suffering from a depression, men out of work, financial interests passing up the building investment field and operations slowing up it would seem that the Unions would seek to encourage building rather than to stifle it as they are with wage increase demands which are having a tendency to put their members out on the street unemployed.

PLEASURE—FIRST!

Building Activity Suffers Under Holiday Pressure.

Building news in the Calumet District this week is a scarce article and activity was at a low ebb. From appearances, everybody and his brother laid off for some vacation jaunt over the Fourth week-end holiday opportunity and some of the vacationists were not inclined to hurry back. The "Kluxers" drew well at Valparaiso with their picnic and the celebration and races at Crown Point also proved a strong lure for pleasure seekers. The B. T. E. A. headquarters were shut up tight while the secretary knocked off and took in both the Valparaiso and Crown Point events.

EVERY MOVE A PICTURE

Secretary Gets Into Action.

The auto needed a new home and being not in a position to meet union wages, the secretary got him some lumber, nails, ets., took up the saw and hammer and when he had finished the job had all the ear marks of the trade, splinters, blisters and several bruised fingers, ju t like old times. At that the new garage is a reality now.

STILL EBBING

Building Tide Shows No Inclination To Turn.

The drop continues. Last month building operations in Hammond backed up some more as has been customary of late.

The official figures of Building Inspector Henry Vis show seven less permits issued in June, 1924, than in June, 1923. The estimated valuation of the new work last month ran $66,165 behind that for the corresponding period a year ago.

Here are the records:

Time	Per.	Est. Val.
June, 1924	133	$324,525
June, 1923	140	390,690

CALUMET BUILDING PROGRESS

The building line on S. Hohman street is rapidly undergoing a decided change as the structures along that thoroughfare are being moved back twenty feet to allow for a widening of the street.

Since things were a little quiet those "worked to death" contractors Rhoads and Graves took advantage of the holiday respite last week to motor up into Wisconsin for some fishing. They are back now with a long string of ——— stories about the fish that were almost landed; every one that got away was a whopper.

Archt. Mac Turner, Hammond, has felt the rush of the motorists. He is now preparing plans for several steak and fish dinner resorts along the Indianapolis boulevard.

E. E. COLE.

EVANSVILLE

ONE OF EVANSVILLE'S MOST PROMINENT CONTRACTORS SUDDENLY STRICKEN DOWN.

M. J. Hoffman Victim of Apoplexy.

The death, the past week, of M. J. Hoffman, removed from Evansville one of the city's most prominent building contractors who for the past forty years had been actively engaged in the local building field and had erected many of the city's largest structures.

He was president of the M. J. Hoffman Construction Company which of re-ecent years had operated throughout Indiana, southern Illinois and in western Kentucky.

Mr. Hoffman was born in Dubois county in 1862 and at the age of twenty moved to Evansville where he started the company that bore his name and has played a big part in the upbuilding of Evansville. From local operations Mr. Hoffman and his associates extended their endeavor until the company became one of the largest contracting concerns in the city and also in Indiana.

Mr. Hoffman's death came suddenly without warning when he was conversing with friends and was due to a stroke of apoplexy. He is survived by his widow, his son Al J. Hoffman, well known in state contracting circles, and five brothers and three sisters.

Funeral services were held at St. Anthony's Church, Wednesday, July 9th, followed by interment in St. Joseph's Cemetery.

QUITE A FEW NEW PLANS APPEAR FOR ESTIMATE CONSIDERATION

New Activity Develops.

Things perked up in local building circles the past week and set contractors and material men to figuring in a lively manner when plans for ten new projects put in an appearance for estimates. It is true that they were not all to be located in Evansville, some were for southern Indiana, others for southern Illinois and still others for western Kentucky, but they all drew the attention of local building interests, both contracting and material.

In the lot put out for bids were residences, apartments, schools and a warehouse and a church. It was an encouraging pick-up, aroused much interest and inspired a hope that a revival of building activity is about to occur.

FT. WAYNE

FT. WAYNE'S BUILDING RECORD FOR FIRST HALF OF 1924 A MOST CREDITABLE ONE.

Far Outshines That of Her Rival, South Bend.

No city in Indiana has put —on a better building performance during 1924 than Ft. Wayne, everything taken into consideration. While other cities of consequence have been slipping steadily

far behind their building record of 1923, Ft. Wayne's construction operations held strong and only showed a slight decrease from the unusually high building figures established last year. Her percent of loss from the first six months total of 1923, but 8.2%, was the smallest building decline in the state, and when one stops to consider that from January to July 1, the estimated expenditure for new building construction work amounted to $6,780,282 it is realized that the city made a fine record and one that is only surpassed by the unparalelled record of 1923.

While Ft. Wayne was forging ahead at almost a record pace her northern Indiana rival, South Bend, slowed down and was far outdistanced. It is customary for these two cities to run just about even in building endeavor, but this season Ft. Wayne during the first six months has turned in 110% more new building than South Bend. A year ago Ft. Wayne had a lead of $49,734 on South Bend, and this year her margin on her rival is $3,555,256, or more than all the work South Bend has done this season to date.

OVER THE ONE HUNDRED THOUSAND POPULATION MARK.

Latest Estimate on Ft. Wayne Accounts To Some Extent For City's Extensive Building Operations.

One reason for Ft. Wayne's active building campaign that has been carried right ahead thru 1924, and especially the house building activities, is found in the latest information advanced by the city directory publishers. True it is this information is based more or less on estimate but the latter is figured on a basis generally accepted and employed thru out the country.

As a means of arriving at a fairly good then multiplied by two. Ft. Wayne's new names given in a directory are totaled, idea of a community's population the directory contains 52,376 and the population of the city figured on the above basis would amount to 104,752, a figure that is approximately a gain of 5,000 over last year's estimate.

INDIANAPOLIS

MID-SUMMER SALES CONFERENCE DEVIATES FROM THE OLD ORDER OF THINGS.

Hugh J. Baker and Company Combines Business And Pleasure For Employes.

Business is business, and pleasure is pleasure, and in the old days the two were like Kipling's, "East is East and West is West, and never the twain shall meet," but, a new order has intruded into the business world and men have come to realize that "all work and no play makes Jack a dull boy." As a result firms, now days, are prone to mix the two at the proper time and thus inspire their organizations to greater effort to the benefit of all concerned.

Just such an event was held this week at Indianapolis when Hugh J. Baker & Company held a mid-summer sales conference which was attended by those of the home office, representatives from the company's numerous branch offices in Indiana, Ohio and Illinois and also factory representatives of the various material lines handled by the Baker Company.

The conference covered a three days period beginning Wednesday and concluding Friday evening. The affair was held in the Italian Room at the Lincoln Hotel. Then to liven up the event a chicken dinner and entertainment was held Thursday evening at Page's Country Inn several miles east of Indianapolis on the National Road. Friday afternoon the entire organization participated in the company's annual golf tournament the winner of which came into possession for a year of a silver loving cup known as the Baker Trophy.

ANALYTICAL RECORD OF INDIANAPOLIS BUILDING EFFORT FOR PAST SIX MONTHS.

Many Residences Erected.

Figures compiled by the building commissioner of Indianapolis show that the new structural construction efforts put forth during the first half of 1924 failed to involve as much financially as did the work started during the corresponding period a year ago, but the number of projects for which permits were granted exceeded by 830 those started from January 1 to June 30, 1923.

Although the estimated valuation of this year's business up to July 1, was $2,804,654 in arears of that for the like period a year ago the $11,792,844 total was a good one in the face of the let up in building that has developed thruout the country and compared favorably with the $12,093,332 recorded during the first half of 1922.

Residential construction work while somewhat behind that of last year proved quite active, the 1265 new houses, for an estimated valuation of $5,135,853, accounting for 43.5% of all the new work started. Business, industrial and public buildings were off, such structures combined only numbering but 154 and totaling an estimated expenditure of $3,362,655. There was an unusually large volume of repair, addition and remodeling work 4,102 permits being issued for that class of work the bulk of which was small and the average cost of which did not amount to much.

An analysis of the permits issued shows the following:

Projects	Per.	Est. Val.
Repairs, additions, alterations	4102	$1,451,339
Miscellaneous (small work)	1556	850,162
Residences	1265	5,135,853
Tenements	15	607,000
Accessory Bldgs.	1306	384,835
Business Bldgs.	122	1,939,660
Industrial Bldgs.	19	749,676
Public Bldgs.	13	674,319
Total	8398	$11,792,844

Sealed Proposals

NOTICE TO BIDDERS

THE NEW STEAM HEATING AND VENTILATING SYSTEM IN THE TIPPECANOE SCHOOL

Please note the following instructions covering the filing of proposals and the awarding of contracts:

Sealed proposals to the Board of Trustees of the School City of Lafayette, Lafayette, Indiana, for the furnishing of labor and materials for a new steam heating and ventilating system in the Tippecanoe School, South Third Street, Lafayette, Indiana, in accordance with the plans and specifications prepared by R. W. Noland, Consulting Engineer, Lafayette, Indiana, will be received by the Board of Trustees, Lafayette, Indiana, up to and until 9 o'clock A. M., July 28, 1924, at which time the bids will be publicly opened in the Office of the School Superintendent, Sixth and Columbia Street, Lafayette, Indiana. All bids shall be made on blank form No. 96 as adopted by the State Board of Accounts.

The Board of Trustees reserve the right to reject any and all bids.

A Bidder's bond for the full amount of the bid is to accompany each and every bid.

The successful bidder will be required to execute a contract on a form provided by the Board of Trustees. The successful contractor will also be required to furnish satisfactory surety bond to the amount of the contract price to secure the fulfillment of the contract.

Plans and specifications relating to any of the above work may be consulted daily at the office of R. W. Noland, M. E. Consulting Engineer, 824 Lafayette Life Building, Lafayette, Indiana, and at the office of the School Superintendent, Sixth and Columbia Streets, Lafayette, Indiana.

Please note that the plans and specifications MUST BE RETURNED to the Engineer at the time the bid is sent in. All communications and references to the above proposals or contracts should be addressed to the undersigned.

SCHOOL CITY OF LAFAYETTE,
MRS. SARAH WESTFALL, Pres.
G. C. GOODHART, Secy.
H. M. BAHLS, Treas.

R. W. Noland, M. E Consulting Engineer, 824 Lafayette Life Bldg, Lafayette, Indiana.
July 12, 1924.

NOTICE TO ROAD AND STREET PAVING CONTRACTORS

Sealed bids for the improvement and paving of portions of Gonazles and Brooks streets in the Town of Francesville, Pulaski County, Indiana, will be received by the Board of Trustees of said Town at a meeting to be held in Francesville at One o'clock P. M. on the 21st day of July, 1924.

The work includes approximately:

3,000 Cubic Yards Grading,
4,000 lineal feet of Curb,
7,500 Square Yards Creosoted Wood Block, Reinforced Concrete or Bituminous Surfaced Macadam base pavement.

Plans and specifications are on file in the office of the Town Clerk and may be examined between the hours of 8:00 A. M. and 4:00 P. M. daily except Sunday.

Bidder's Blanks may be had from the Town Clerk.

Proposals must be made on Blanks furnished by the Town Clerk and must be accompanied by certified or cashiers check in a sum not less than Two Hundred Dollars ($200) and in accordance with the specifications. The Board reserves the right to reduce or increase the work to be done on either street by changing the width of the improvement. The Board of Trustees of the Town of Francesville reserves the right to reject any or all bids, waive any and all informalities and award contracts either in part or as a whole as may be deemed best for the interests of the Town of Francesville.

JOHN KOSTER,
Chairman Board of Trustees.
W. E. Tennell, Town Clerk.
July 12th, 1924.

PIPE COVERING CONTRACTORS
Let us relieve you of the worry of estimating and erecting the pipe covering you require. Write, wire or phone us at our expense.

$12,000.00.

All bids must be in writing on Form No. 96 as prescribed by the State Board of Accounts, delivered sealed and must conform in every respect to the laws of the State of Indiana.

Each bid shall be accompanied by a certified check for Three Hundred and Fifty Dollars ($350.00). These checks must be made payable to the Board of Trustees of the School City of Salem, Indiana, and will be held by them as a guarantee of good faith that the said bidder or bidders will enter into a contract and execute a bond for the full amount of his bid, approved by the Board of Trustees, for the due performance thereof, if his or their bid or bids are accepted. The checks of those bidders who fail to be awarded a contract will be returned to them when the contract has been awarded.

Should the successful bidder or bidders fail to enter into such a contract and execute such bond, then he or they shall forfeit the amount of said certified check as liquidated damages for such failure for the use and benefit of the proper fund of the School City of Salem, Indiana.

Copies of said plans and specifications are on file in the office of the State Board of Accounts, State House, Indianapolis, Indiana, and in the office of The Elmer E. Dunlap Co., Architects, 1050 North Delaware Street, Indianapolis, Indiana.

Copies of said plans and specifications may be obtained from the office of the Architects upon the deposit of $10.00 for each set. Said deposit will be returned to the bidders upon the safe return of said plans and specifications on or before the day and hour set for receiving bids.

The right is expressly reserved to reject any or all bids and to use sufficient time to investigate the bids and qualifications of the bidders.

W. O. MARKS, Pres.
W. C. SHANKS, Sec.
J. I. MITCHELL, Treas.

SCHOOL BUILDING

NOTICE TO CONTRACTORS

The undersigned Board of Trustees of the School City of Edinburg, Indiana, hereby gives notice that on Tuesday, July 22, 1924, until 10 o'clock A. M. at the office of the Superintendent of Schools in the High School Building in Edinburg, Indiana, they will receive sealed bids and proposals for the erection and completion of a new High School Building; and at the same time and place will also receive sealed bids and proposals for the installation of the Heating and Ventilating, Electric Wiring and the Plumbing and Sewering in the said building; all in accordance with the plans and specifications heretofore adopted and approved therefor by the said Board and which are now on file in the office of the Secretary of the Board in Edinburg, Indiana.

The estimated cost of the proposed building is $40,000.00.

All bids must be in writing, on forms provided therefor, delivered sealed and in every respect must conform to the laws of the State of Indiana.

Each bid for the General Construction shall be accompanied by a certified check for One Thousand Dollars ($1,000.00); each bid for the Heating and Ventilating shall be accompanied by a certified check for Five Hundred Dollars ($500.00); each bid for the Plumbing and Sewering shall be accompanied by a certified check for Three Hundred Dollars ($300.00) and each bid for the Electric Wiring shall be accompanied by a certified check for One Hundred Dollars ($100.00). These checks must be made payable to the Board of Trustees of the School City of Edinburg, Indiana, and will be held by them as a guarantee of good faith that the said bidder or bidders will enter into a contract and execute a bond for the full amount of his bid, approved by the Board of Trustees, for the due performance thereof if his or their bid or bids are accepted. The checks of those bidders who fail to be awarded a contract will be returned to them when the contracts have been awarded.

Should the successful bidder or bidders fail to enter into such a contract and execute such bond, then he or they shall forfeit the amount of said certified check as liquidated damages for such failure for the use and benefit of the proper fund of the School City of Edinburg, Indiana.

Copies of said plans and specifications are on file in the office of the State Board of Accounts, State House, Indianapolis, Indiana, and in the office of The Elmer E. Dunlap Co., Architects, 1050 North Delaware Street, Indianapolis, Indiana.

Copies of said plans and specifications may be obtained from the office of the Architects upon the deposit of $25.00 for each set. Said deposit will be returned to the bidders upon the safe return of said plans and specifications on or before the day and hour set for receiving bids.

The right is expressly reserved to reject any or all bids and to use sufficient time to investigate the bids and qualifications of the bidders.

Celotex—Speed—Quality

There's no time and no material wasted in sheathing the walls and in insulating the roof with Celotex. It saws readily and nails direct to studs, rafters and headers.

The qualities of Celotex are even more surprising than the ease of handling it.

With the insulating value of cork, Celotex makes a house cool in summer and cheap to heat in winter. It cuts fuel bills a fourth to a third.

Celotex makes a stronger wall than wood sheathing and when in place generally costs less than the materials it has replaced.

Recommend Celotex to your clients. Give them better homes with less trouble to you.

Use Celotex as sheathing, as roof insulation, as plaster base. Give quality with speed.

Celotex is a strong, rugged, weather-proof durable building lumber made from the long, tough fibres of cane. It is better than wood sheathing—equals cork for insulation.

Celotex is used for sheathing instead of wood; for plaster base, roof insulation, sound deadener and exterior finish.

Stock sizes: Thickness 7/16 in.; width 4 ft.; lengths 8 ft. to 12 ft. Weight about 60 lbs. per 100 sq. ft.

Write for complete information to Dept. V-7, The Celotex Company, 645 No. Michigan Ave., Chicago, Ills. Branch Mill Representatives, The Indianapolis Celotex Co., 205 East Ohio St. Phone, Main 7089. William J. Ryan, Mgr.

GAVEL AND BLOCK PRESENTED TO INDIANA SOCIETY OF ARCHITECTS.

Also Use of Library on Lumber Extended to Members by Maas-Niemeyer Lumber Co. of Indianapolis.

No more hereafter will the rattle of a knife upon a plate or the tinkle of a spoon against a glass reverberate at I. S. A. meetings to call the assembled members to order. That day is past and done, and in the future the president or presiding officer will wield a real for sure gavel.

The past week Secretary Harrison, received from the Maas-Niemeyer Lumber Company, Indianapolis, a package and a letter, the latter expressing the company's desire to present to the Indiana Society of Architects the walnut gavel and block contained in the package. The gift has been accepted by the secretary with an expression of deep appreciation since these instruments have long been needed by the Society and can be put to good use.

The letter from the donors makes the additional offer as follows:

We have accumulated a large and valuable collection of books covering the subject of woodwork design in all countries and periods. We are anxious that this library be referred to freely by Architects, as we feel that it might be useful to them.

We ask now that you announce this matter of our library officially to your Association, and express to them an invitation from us to make use of it at any time. There is no obligation whatever attached to the use of these books.

With best wishes, I am,
Very truly yours,
H. G. MAAS,
Vice President and Treasurer.

NOW HEADS NEW CROWD OF FORT WAYNE GOLFERS.

Well Known Indiana Architect Honored

Guy Mahurin, architect, Ft. Wayne, former president of the Indiana Society of Architects, has been elected president of the Orchard Grove Country Club near Ft. Wayne. A new nine hole course is now under construction and will be ready for play in a few months.

The new president is working nights now to get his boards cleared so he can take advantage of the new course when it is ready to lure fom the city rush and tear.

MEMORIAL ARCHITECT TALKS

Sets Forth His Problem And Asks For Co-Operation.

In view of the controversy that arose at Indianapolis regarding the proposed War Memorial scheme as worked out by the architects who have the commission, and in which no provision was made for the retention of the two churches now located on the site the remarks, as made recently by Architect F. R. Walker of the architectural firm of Walker and Weeks, Cleveland, the designers, before a gathering of the members of the Indiana Society of Architects, are interestingly illuminating.

Mr. Walker said that with all due respect to the two churches his firm from the first has considered that the monumental scope of the memorial project is paramount to all other considerations regardless of personal or sentimental matters. He admitted that there naturally must be certain endearing attachments for the members of the two congregations for their houses of worship, but such attachments are purely local and personal, and to insist on placing these features above the idea intended as an expression of the whole people of the state is really selfish.

The sense of Mr. Walker's remarks might be summed up as follows:

The Memorial Plan as it stands today represents the most sincere effort on the part of the architects who have the work in charge, and incorporates the best thought they were able to develop after eighteen months of sincere endeavor. It really is to be a monument for future generations to ponder over. There were two prime things to be considered; first, it must be something of which all the people of Indiana are a party to, and second, it must express the life of the time in which it was erected. That is what the architects have sought to bring out in their motif, the supreme effort of the State of Indiana and her people to erect a memorial in commemoration of the great sacrifice that was made in the World War. And to that end the architects are willing to court any criticism from any architect, a criticism that will at all times be given serious consideration. Since the architect in his profession must register the personal equation, and, since the personal equation must enter so fully into this project at hand, it is the duty of all architects of Indiana to help in this problem if they consider such help necessary to a true interpretation of the problem.

This Memorial project offers the opportunity by which we of Indiana today are to be judged in the future. Therefore, shall something be erected that will be laughed at, and in its presentation be belittled in the days to come? It is something by which we are to be measured by future generations. That being the case there is need of co-operation by all the people in securing the very best that can be erected.

And, in the execution and consummation of the intended scheme, the best interests of the State of Indiana and her people must be served, not those of any one individual or set of individuals. The churches on the present site may be beautiful, but they, in their present location, do not fit into the expression that is sought through the Memorial. They may be of interest today but in the days to come they would appear out of place because they would not fit in and, because they didn't, the effect of the Memorial would be lost.

The architect in planning must be careful. Some men can do things that can be put aside if poor, but, the architect is not one of that ilk; if he puts up a monstrosity of a building it is up for a long time to be looked at. A bad speech may make a bad impression for a time, but, it can be forgotten, not so with a building, it is there to remind continually of the fault incorporated.

It is hoped in the Memorial to register that which is the greatest expression of the life and time of the people of today, not only the soul, thought and spirit, but the character also, to erect, too, a real shrine to Old Glory.

ORGANIZATION AND CURRENT NEWS

DUTIES OF BUILDING CONTRACTOR STRESSED UPON.

Association Pointed To As Agency Thru Which Such Duties Can Best Be Effected.

The duties of the building contractor are much more difficult than one would on first thought imagine. It is a subject that every one is familiar with and yet, if you were asked, "What is the Duty of the Builder?" it would be simply necessary to imply the Moral Law.

The definition of the word "Duty" in the sense that we builders understand it, and as an Association understands it, as it may be applied to the subject, is as follows:

Obedience To The Dictates of Conscience

At their earliest inception, associations and societies were formed when two or more men banded themselves together for mutual protection against common enemies, oppression for revenge, or for defense. Later, such associations or guilds resolved themselves into commercial organizations for solely selfish purposes.

Today we are endeavoring to have associations, such as contractors have, serve an unselfish purpose and for the general welfare of the public. When our pagan forefathers formed associations for protective or aggressive measures, each of the persons joining, would deposit some of his blood into the earth, clasp each others hands and take an oath of allegiance. They were very formal in their ritual and discriminating regards whom they permitted to become one of their number.

With this explanation, the subject of "What is the Builder's Duty towards the Public," will be treated both as individuals and collectively as members of an association.

Broadly speaking, the builder's duty to the public should be to encourage and foster ideals of service to the building and general public as a basis of all worthy enterprises. If we are to organize solely for self, our association cannot endure, neither can it remain respectable or confine itself within decent ethical standards. To give full measure of service, the Builder might lean a bit backwards to fulfill every obligation.

Craft guilds were formed in the early part of the middle ages and were essential bands of men organized for mutual protection. However, they soon resolved themselves into organizations for profit, and as they waxed stronger, enjoyed monopolies that made them wealthy. Finally, they became a menace and a nuisance to the public and their existence was forbidden by the Kings, Feudal Lords and Partricians of that period, which was about the Ninth Century.

However, not daunted because of former public and official discredit, the guilds again organized and became powerful in the 14th to 16th Centuries in all sections of Europe, and enjoyed monopolies or special privileges granted them by their Kings and Feudal Lords for money. But these guilds were required to register complete returns of their purposes; their foundation; their properties, etc. This was required of them that they could be held accountable for their acts, obligations and taxes. The masters journeymen and apprentices enjoyed the benefits of these guilds whose chief purpose was to regulate and control their trade monopoly under special license from their King. The guilds' real concern was to supervise the manufacture, impose payment, royalties and restrictions on others who desired to exercise a similar privilege for a livelihood.

Unless a craftsman was a member of a guild, he could not work at his trade or even join the masters of the guilds or craft. The monopolies of these guilds, however, became so burdensome to the public that, it created a revolt in many countries and the guilds were gradually done away with. In England their danger was recognized and the guilds practically abolished by Act of Parliament. Their monopolies and regulations of output and prices were curbed. They became dangerous, when as trade organizations, because of purely selfish motives. They forgot the service they ought to have rendered to the public. Such organizations as theirs do not deserve recognition, neither should they be encouraged. Moral—If we turn selfish, we cannot live. No State Contractors' Association can live if purely a selfish organization.

The Builder's Duty Toward The Public should be an active one in all matters whether civic, economic or political, and the moral welfare of the community should always be of paramount importance.

It is the builder's civic duty to keep a watchful eye on all attempted legislation, whether national, state or municipal. His peculiar knowledge and experience especially fit him to exercise a tremendous influence in encouraging helpful legislation to keep building costs within economic limits, and, discourage the enactment of laws that are vicious and contrary to good public policy. Especially should he discourage the enactment of laws that represent purely class legislation and are fostered by organizations with recognized reputations for selfishness to justify them.

Efficiency of Labor Only Possible When In Unrestricted Competition.

The builder should initiate legislation and aggressively get behind its enactment that will forbid labor monopolies who restrict their membership to numbers, or who levy exhorbitant initiation fees. The builder should actively sponsor legislation that will eliminate all restrictions on the employment of apprentices and helpers. The idea being to give the American boy every opportunity to choose whichever craft may appeal to him as the craft to become apprenticed in. No union ought to be permitted to exercise a monopolistic control and be permitted to decide whether our American boy may or may not become indentured in that trade which has an appeal for him. Experience has found and knows only one economic way to efficiency and that is, to have labor in unrestricted competition for employment.

Another essential condition that the builder should concern himself in, is the enactment of comprehensive laws and their enforcement that will effectively break every attempt to restrict the purchasing power of the builder and public. Combinations of material interests that either control prices or sectional allotment for distribution, should be fought from every angle. Restriction on the purchasing of material, or union label, should not be tolerated. It menaces construction activities and always advances its cost.

Under present prevailing conditions, Labor Unions cannot be held accountable for their acts so they may be brought to court for breach of contract, or because of their interference with the rights of others who may choose to stand upon their American constitutional rights to individually bargain for employment. There are, of course, other objectionable conditions as for instance, the restriction of output, that Labor Unions impose upon the public. All these features should be strenuously opposed by the builder in line with his duty to the public.

Everyone engaged in the building industry should participate in those movements for public welfare in which his training and experience qualify him to give competent and disinterested advice. Contractors individually, as well as an Association, should support public officials in the proper enforcement of building codes and safety regulations and should take an active interest in the formulation and improvement of such codes.

Duty Towards Economic Questions

In matters economic, one great question that should interest the builder is,

proper reduction of freight rates and no favorite rates for other commodities. Freight and fuel rates on building materials are so far advanced as to represent a serious question in relation to the cost of construction work. The item of rates has become a real draw-back to the industry since 1914 and presents one of the biggest inflations and watered conditions our industry has to contend with. Every builder is in duty bound to support every attempt to wring this unjustified water out of the cost of building.

Another condition that indirectly operates to the disadvantage of the building industry and the welfare of the general public, and should occupy the minds of the builders with the purpose of serving the public, is the influence tax exempt securities have in denying the building industry all the money it can, with reasonable security absorb. Tax exempt securities attract investors among the wealthy, because they do not require the payment of income tax and usuallv net more than real estate securities on which taxes are assessed.

The builder's duty is to interest himself in the matter by urging either, that the interest of tax exempt securities be so reduced that such investments only offer equal inducements compared with real estate securities, or, that the tax exempt feature be eliminated or surtaxes reduced which will tend to bring money for building purposes. There are reams written on taxes and the builder who is the first to be hit by high taxes should interest himself in this reduction.

It is futile for the U. S. to feel that she can live within herself. She must export, and inasmuch as we export, we get into competition with foreign labor markets, then we soon learn that we cannot compete, even though we may have better machinery, more intelligence, better nourished employees. It is then evident that in order to meet competition, it is necessary for labor to cut its cost, in their part of our product, or it is necessary for the other countries to raise its costs and put their employees on the scale and standard of the American workman. It is difficult indeed to sit on Arbitration Boards and bargain with other men for others lifetime, and tell them what comforts, pleasures and existence they may have for the 8 hours that are delivered to you. Who is the employer that he shall have the right to dictate what another human being is entitled to; yet the contractor in performing his duty, which is for himself and the public, must have in mind that he cannot afford to raise the cost of his product to his neighbor, state and town, so that his neighbor cannot buy our product, or that the lessor, who is another wage earner, the clerk in the store or the other fellow employees, cannot live in the house that the builder and his labor have produced. It is indeed a difficult task to put any contractor on an Arbitration Board, for he is bargaining on one side for the lifetime of one man and on the other side for the shelter of another human being. It is strange that the labor unions have so little compassion for other men and will not concern themselves about other workmen's conditions, **forgetting that their dollars are somebody else's cost of living.**

Interchange of Ideas Among Builders.

The builder should co-operate with his colleagues in his profession by exchanging freely ideas and business methods found helpful by experience. All builders should meet one another not only in the course of business, but socially also, with the thought of creating the best of relationship and good will among them. Instructive campaigns teaching and discussing the most approved method on accounting, cost finding, cost keeping, overhead construction methods and even the use of machinery to speed up and reduce the cost of construction, should be constituted. Through this each builder will render a distinct and valuable service to himself and his colleagues, and the general public will be the gainer by cost reduction.

The Builder's Creed

The Builders business standards should have in them a note of sympathy for our common humanity.

The Builders business dealings, ambitions and relations should always cause him to take consideration as his highest duties as a member of society.

In every position in business life in every responsibility that comes before him, his chief thought should be to fill that responsibility and discharge that duty so that when he has ended each of them, he shall have lifted his level of the ideals and achievements of his industry a little higher than he found them.—(Address delivered by Gerhardt F. Meyne, Chicago, at Annual Convention of Associated Building Contractors of Illinois.)

Calumet District

DIDN'T GET VERY FAR

Hurry Up Demand For Increased Wages Started By Plumbers Meets With Determined Resistance.

It would appear at this writing as if the plumbers' trouble over wages which grew to a serious threat when an increase demand was made recently, will subside without any drastic action being necessary.

The master plumbers who operate all the larger shops in the Calumet District absolutely and steadfastly refused to consider any demands of the journeymen plumbers for an advance of the current scale. This rebuff seems to have caused the Plumbers' Union to have a second thought which indicates an inclination now to let well enough alone and not seek to force an advance in pay.

Last year an increase was railroaded across so easily that some thought it could be done again. However, this year was another story and, when so much concerted opposition arose against further "strong-arming," the advocates of an increased demand backed up and appear to have taken a wiser course by letting the matter drop.

PREPARING FOR CONFERENCE

Calumet District To Be Well Represented At Michigan City.

Hammond is getting set for the State A. B. C., District Conference scheduled for July 23, at Michigan City. There are eight local contractors who have already signified their intention of pulling themselves away from business on that day long enough to get over the "city near the dunes" to attend the conference. East Chicago and Indiana Harbor will send over about seven contractors.

Such meetings should appeal to the builders as these gatherings are in the right direction in that they get the contracting fraternity in closer touch and create influences that are bound to develop good in the long run.

What Thickness is Necessary to Insulate Properly?

To protect a building properly against heat and cold **requires** ½ inch insulation in the walls and 1 inch in the roof.

The makers of Flax-li-num sell their product on that basis. And when you compare Flax-li-num prices with other materials make sure that you compare **equal thicknesses.**

It is cheaper to buy thin flimsy insulation. But since the cost of installing it is equal to that of installing Flax-li-num, the saving on an entire house is seldom more than a few dollars. And after the first winter the purchaser will know the full truth about the insulation he bought and the insulation he should have.

Flax-li-num is real insulation. The thickness in which it is made and the way in which it is applied insure maximum efficiency in stopping heat and cold. Easy to apply, no warping, no cracking. Flexible enough so that it can be forced in between the studding. Rigid enough so that it can be easily handled and will stay in place. It's the only pure flax insulation made in flexible board form. A material that's right in every way—worth every cent of its cost.

Write today for sample and prices.

Sealed Proposals

NOTICE TO BIDDERS ON THE NEW STEAM HEATING AND VENTILATING SYSTEM FOR THE LOCUST GROVE SCHOOL, PRAIRIE TOWNSHIP, WARREN COUNTY, INDIANA

Please note the following instructions covering the filing of proposals and awarding of contracts:

Sealed proposals to the Trustee and Advisory Board of Prairie Township, Warren County, Indiana, for the furnishing of labor and materials for the new steam heating and ventilating system for the Locust Grove School Building, Prairie Township, Warren County, Indiana, in accordance with the plans and specifications prepared by R. W. Noland, Consulting Engineer, Lafayette, Indiana, will be received by Henry C. Frazier, Trustee. Prairie Township, Tabb, Indiana, up to and until 3 o'clock P. M., August 7, 1924, at which time the bids will be publicly opened at the Locust Grove School Building, Prairie Township, Warren County, Indiana. All bids shall be made on blank form No. 96 as adopted by the State Board of Accounts.

A certified check for five (5) per cent of the amount of the bid is to accompany each and every bid. The successful bidder will be required to execute a contract on a form provided by the Trustee and Advisory Board. He will also be required to furnish satisfactory surety company's bond to the amount of the contract price to secure the fulfillment of the contract. Each bidder is requested to state in his proposal the date upon which he guarantees to complete the job, as it is necessary to get the installation in as soon as possible.

The Trustee and Advisory Board reserve the right to reject any and all bids.

Plans and specifications relating to any of the above work can be consulted daily at the office of R. W. Noland, Consulting Engineer, Lafayette Life Building, Lafayette, Indiana, and at the office of Henry C. Frazier, Trustee of Prairie Township, Warren County, Indiana.

Please note that the plans and specifications must be returned to the Engineer at the time the bid is sent in. All communications and references to the above proposals or contracts shall be addressed to the undersigned:

R. W. NOLAND, M. E.,
Consulting Engineer, 824 Lafayette Life Bldg.,
Lafayette, Ind.
July 19th, 1924.

PIPE COVERING CONTRACTORS
Let us relieve you of the worry of estimating and erecting the pipe covering you require. Write, wire or phone us at our expense.

$12,000.00.

All bids must be in writing on Form No. 96 as prescribed by the State Board of Accounts, delivered sealed and must conform in every respect to the laws of the State of Indiana.

Each bid shall be accompanied by a certified check for Three Hundred and Fifty Dollars ($350.00). These checks must be made payable to the Board of Trustees of the School City of Salem, Indiana, and will be held by them as a guarantee of good faith that the said bidder or bidders will enter into a contract and execute a bond for the full amount of his bid, approved by the Board of Trustees, for the due performance thereof, if his or their bid or bids are accepted. The checks of those bidders who fail to be awarded a contract will be returned to them when the contract has been awarded.

Should the successful bidder or bidders fail to enter into such a contract and execute such bond, then he or they shall forfeit the amount of said certified check as liquidated damages for such failure for the use and benefit of the proper fund of the School City of Salem, Indiana.

Copies of said plans and specifications are on file in the office of the State Board of Accounts, State House, Indianapolis, Indiana, and in the office of The Elmer E. Dunlap Co., Architects, 1050 North Delaware Street, Indianapolis, Indiana.

Copies of said plans and specifications may be obtained from the office of the Architects upon the deposit of $10.00 for each set. Said deposit will be returned to the bidders upon the safe return of said plans and specifications on or before the day and hour set for receiving bids.

The right is expressly reserved to reject any or all bids and to use sufficient time to investigate the bids and qualifications of the bidders.

SCHOOL BUILDING

NOTICE TO CONTRACTORS

The undersigned Board of Trustees of the School City of Edinburg, Indiana, hereby gives notice that on Tuesday, July 22, 1924, until 10 o'clock A. M. at the office of the Superintendent of Schools in the High School Building in Edinburg, Indiana, they will receive sealed bids and proposals for the erection and completion of a new High School Building; and at the same time and place will also receive sealed bids and proposals for the installation of the Heating and Ventilating, Electric Wiring and the Plumbing and Sewering in the said building; all in accordance with the plans and specifications heretofore adopted and approved therefor by the said Board and which are now on file in the office of the Secretary of the Board in Edinburg, Indiana.

The estimated cost of the proposed building is $40,000.00.

All bids must be in writing, on forms provided therefor, delivered sealed and in every respect must conform to the laws of the State of Indiana.

Each bid for the General Construction shall be accompanied by a certified check for One Thousand Dollars ($1,000.00); each bid for the Heating and Ventilating shall be accompanied by a certified check for Five Hundred Dollars ($500.00); each bid for the Plumbing and Sewering shall be accompanied by a certified check for Three Hundred Dollars ($300.00) and each bid for the Electric Wiring shall be accompanied by a certified check for One Hundred Dollars ($100.00). These checks must be made payable to the Board of Trustees of the School City of Edinburg, Indiana, and will be held by them as a guarantee of good faith that the said bidder or bidders will enter into a contract and execute a bond for the full amount of his bid, approved by the Board of Trustees, for the due performance thereof if his or their bid or bids are accepted. The checks of those bidders who fail to be awarded a contract will be returned to them when the contracts have been awarded.

Should the successful bidder or bidders fail to enter into such a contract and execute such bond, then he or they shall forfeit the amount of said certified check as liquidated damages for such failure for the use and benefit of the proper fund of the School City of Edinburg, Indiana.

Copies of said plans and specifications are on file in the office of the State Board of Accounts, State House, Indianapolis, Indiana, and in the office of The Elmer E. Dunlap Co., Architects, 1050 North Delaware Street, Indianapolis, Indiana.

Copies of said plans and specifications may be obtained from the office of the Architects upon the deposit of $25.00 for each set. Said deposit will be returned to the bidders upon the safe return of said plans and specifications on or before the day and hour set for receiving bids.

The right is expressly reserved to reject any or all bids and to use sufficient time to investigate the bids and qualifications of the bidders.

NOT DESERVING OF CRITICISM

Building Inspection Departments' Insistence Means Better Construction

Frequently around the building inspection department offices in the various cities one comes across men and women who, wishing to build, become quite piqued because "brown paper" plans, almost meaningless sketches can't be railroaded through for a permit. Some folks grow peeved also when plans are turned back for more specific details that, upon inspection, will assure to the building officials safety, sanitation and other important factors in the proposed structure.

What is the building inspection department for if not to enforce the building regulations and requirements and insist on such detail as will give assurance that the owner will be protected in his investment and also adjacent property owners will be safe-guarded against a menace to their holdings.

There have been many instances where irresponsible builders have sought to put across cheaply constructed buildings with little attention being paid to existing building codes, but determined efforts have been made by the city building departments to institute set rules up to which those who would build must live. Such rulings are not discriminatory as some are inclined to believe and take as a personal affront, rather, they are simply a means employed to best guard against shoddy construction and the shyster contractor. Thus it is that this attempt of the building inspection department is deserving of the wholehearted support of the community in which it operates.

The high construction costs of the last few years have been a boon to the builders of houses and apartments to sell rather than to live in. In every residential section of the city and in every suburb their products can be found today. Scores of home owners and investors could also be found to testify to the unwisdom and the unsoundness of part of the construction work which has been done since the war.

Excessive fuel bills, rapid deterioration and heavy costs of maintenance are the immediate results of poor building. Its ultimate effects are even more costly. They are reflected in the depreciation of real estate values, affecting good and bad improvements alike, in bad housing, in ill health—factors which offset many times the immediate savings effected by cheap construction.

The individual who buys a house for his home, or an apartment or a terrace for investment is usually unable to determine exactly what is beneath the paint on the outside and the finish inside. He can protect himself only with the greatest difficulty and at considerable cost. His protection ought to be undertaken in a greater degree than it is at present by those who are directly and financially interested in sound real estate development and in making improved real estate a more attractive field of investment. This burden falls upon builders, architects and realtors' associations, all of whom, by co-operating with the city building inspection departments, can do a great good. Their obligation in this connection is exactly the same as that of the investment banking organizations to rid their field of fly-by-night promoters.

The "shyster builder" is in the same class and deserves no more consideration. The interests directly concerned with good construction work and wholesome development in the real estate field should eliminate him.

SIMPLIFICATION AND STANDARDIZATION IN LUMBER AND OTHER INDUSTRIES EFFECTED

Waste Expected to Be Materially Reduced

The first of July was an important date for a number of industries connected with building construction. It was the time when simplification became effective in a number of industries which, with the co-operation of the Division of Simplified Practice, U. S. Department of Commerce, have discovered an excess of varieties of their products, and in which the producing, distributing and consuming groups have agreed that fewer sizes, styles or other variations would serve the purpose previously served by many items.

Our very important industry was affected by previous decisions in conferences held under the auspices of the Division. It was the lumber industry, which, after spending many months in considering simplification and standardization, reached an agreement some time ago which will result in a reduction of nearly 60 per cent of the number of finished yard lumber items and will make effective certain standards for the protection of both producer and consumer. It is predicted by lumber experts that this action will be of appreciable value in the effort to check the present annual waste in the lumber industry which is estimated at $250,000,000 a year.

Other industries whose simplification programs became effective July 1 were the forged tool group, range boiler group, and blackboard and roofing slate, in each of which sweeping reductions have been made.

THE BUILDERS

We fellows who fool with a pencil or pen
May serve in a measure the leisure of men,
May dream little dreams which we draw or we write,
To give them a moment or hour of delight;
But somehow, it's little and useless we feel,
Compared to the builders in stone and in steel.

We muddle around with our paints or our ink
And talk about Art and the things that we think,
And we fancy ourselves and the work that we do,
Which gladdens the eye for a moment or two,
And if a few people should mention our name
We think we are figures of glory and fame!

Our visions are nothing but visions—that's all,
But the dreams of the builders are built in a wall;
They are hammered in steel, they are mortared in stone,
In tower and bridge and in buttress they've shown,
Say what are we signers and painter-folk worth
Compared to the builders who conquer the earth!

—Berton Braley.

WAGE CONTRACTS

Pertinent Comment From the Architects' Viewpoint

Once again strikes are among the architects' troubles, this time for higher wages. Where existing agreements with the Unions contain clauses that might be thought to control this question, there is a tendency to brush them aside with the answer, "The officers of the Union organizations can not control the members against their wishes."

It is difficult for the architects to understand why such a condition should have been allowed to start in the first place and still more difficult to understand why it is allowed to continue.

A similar situation would have existed in the case of dealings between the architects and the builders had the two parties tolerated such a situation.

It is a business necessity that the architect, if he is to function successfully as the Agent of the Owner, in the creation of buildings, must control the contractor definitely and positively when it comes to carrying out his commitment for the erection of buildings in accordance with the drawings and specifications; and this necessity is recognized by the builder who provides evidence of his ability and reliability, he signs a contract, of which drawings and specifications are a part; he furnishes a good and sufficient bond guaranteeing faithful performance; he receives payment on account of his contract in an amount less than a fair and reasonable value for the work performed and the material furnished, with the remainder of the money held in reserve until the work is entirely completed and accepted; and on this basis of relations, the architect and the contractor carry on their business of converting capital into buildings, and all in the final analysis predicated upon the useful, efficient and profitable application of the building so created.

If the type of building as arranged by the architect, or the cost of building as built by the contractor, persistently and repeatedly fails to find a sale or an occupancy on a profitable basis, then, either the architect or the contractor changes his method or changes his price until he does produce a profit or else he does no more business.

No reasonable mind would expect any other conditions to apply to the continuing of the architects' or the contractors' business; yet the minute we touch the matter of labor, wages and working conditions, these apparently reasonable conditions of service are abandoned for a method of procedure that seems to be based principally upon strategy, or convenience or policy.

In this controversy over the raise in wages, we do not hear emphasis laid on the adequacy or inadequacy of the wage as compensation for an end result in the amount of work done, nor of the finished cost of the building so erected with reference to its profitable occupancy, nor of the amount of work which a given unit of wage produces in the form of brick laid or surface covered, but rather a reiteration echoed over and over again of, on the one hand, higher wages; and on the other hand, the willingness or unwillingness of the builder to pay them, as though the contractor has the money hidden away somewhere and to pay it out or withhold it is simply a matter for his decision.

The architect has difficulty in stamping his approval on this handling of the matter. In view of the attitude which he is compelled to take in carrying out his part of the work, there are two outstanding items that appear to him as an absolute necessity in any scheme that it is expected will prove a permanent solution of the wage contract:

1st.—The absolute responsibility of the parties and such a character of contract as will permit its mandatory enforcement against the resistance of either party towards carrying it out.

2nd.—A scale of remuneration that is consistent with a finished cost of building that can be marketed or occupied on a profitable basis established by the going price of buildings or the going rental for space.

And if these two elements are not present as of prime importance in the contract for wages, or of any other item required in the creation of a building for that matter, then, from the architects' point of view, it is not a sound solution of the problem.

(From Bulletin of Illinois Society of Architects, written by Architect Charles E. Fox of Chicago.)

SECRETARY HARRISON BACK ON THE JOB

Underwent Tonsil Operation Last Week

It will be news to the majority of the members of the Indiana Society of Architects to learn that Secretary Merritt Harrison has been confined to his home the past week recovering from an operation on his tonsils. The industrious secretary who keeps the Architects' Page in the Recorder fed up with news was advised recently to undergo an operation for the removal of his tonsils and last week took out time enough to visit the hospital, after which he was removed to his home in Irvington. We are pleased to report his rapid recuperation, now being able to be back at his desk.

ORGANIZATION AND CURRENT NEWS

ANOTHER URGE FOR ALL-YEAR AROUND BUILDING SOUNDED

Everyone In The Building Industry Should Encourage The Idea.

Building industries, with more than two million workers, are so operated that many crafts are out of work three months each year. This was revealed by a nation wide survey of the building situation instigated by Secretary Hoover of the Department of Commerce to determine why building construction could not be carried on the year round.

The survey was an outgrowth of the Committee on Seasonal Operations in the Construction Industries of the President's Conference on Unemployment, whose purpose is to stimulate employment, to eliminate waste and to reduce costs.

"Few workers have an opportunity to work more than nine months," the report says. "Earnings in nine months must be sufficient for twelve months' living. The calendar months of work and of idleness are different for different crafts, and are less related to climate than to customs created by employers. A change in this situation is worthy of painstaking study by everyone connected with the construction industries because of the large savings such a change would bring not only to the industries concerned but to the nation as a whole.

"The ideal condition would be steady employment for all competent workers throughout the year. Bad weather is by no means the only handicap that makes it difficult to approximate such a condition. Some time is lost while one trade waits for another to complete work before its own activities can begin. Careful planning by the contractor will help to cut down this lost time."

The survey included requests for information on the employment of workers in the different building trades in each of the 68 largest cities of the country and in a number of smaller communities.

Individuals concerned with building are urged to do their share in contributing to all year round building operations by scheduling new work and repair work at a time when the pressure of general building is not at its height. Data on the subject of seasonal construction in general may be obtained on application to the Division of Building and Housing, Department of Commerce, Washington, D. C.

A TWICE-TOLD TALE THEN MANY TIMES AGAIN

Never Varies in Repetition

Chambers of Commerce are all alike. They are long on talk and short on real action. They, rather the members that go to make up the Chambers, snort about the high wages paid in the building field and when called upon to take a stand that would combat said high wage levels they pass the buck.

The Hammond contractors sensing an aggravating situation relative to a readjustment of wages this spring sought the support of the Chamber of Commerce to combat increased wage demands by the trades. Wages may be high and offer a good topic for a lot of discussion by Chambers of Commerce but as for the Chambers backing up the men who would protect the prospective builder from increased construction costs that is another matter. Such was the experience of the Hammond contractors, the C. of C. was inclined to wash its hands of the whole affair and stand by quietly while the public that would build is left to the mercy of the Unions if the contractors are unable to block the increased demands.

As long as the Chamber of Commerce members are unwilling to come out in the open and back up the contractors it would be more appropriate that they lay off the high pay howl that they set up about the building construction industry. There have been many instances where Chamber of Commerce members during an individual building operation have actually made it hard for local contractors who were trying to live up to an agreed scale in that said member in order to get his operation hurried along was willing to pay the workmen a bonus, a procedure that only makes it harder for the other fellow who wants to build.

MOTHER GOOSE UP TO DATE

The early bird now seeks in vain
A worm on which to dine;
The worms have joined the Union now
And don't come out till nine.

Calumet District

DRIVEN TO IT

Poor Transportation Service Causes Hammond Citizens to Seek Motor Bus Relief

Enough is enough, and too much is unbearable, hence, a move is on foot to curb the down grade trend of the transportation problem in Hammond and assure to the people a better service. If the proposition is put across the "jitneys" of the city will become a thing of the past and the street car company will have to do some tall hustling for public patronage.

The present situation is the outgrowth of the poor service on the part of the street car company and the deplorable condition of the cars and tracks and the citizens in desperation are seeking a way out.

An ordinance has been introduced in the City Council that if passed will grant a franchise to a corporation to operate motor busses, the double deckers such as are in use at Chicago and other cities.

The utter indifference of the street car company to the deplorable conditions that have been allowed to develop in the transportation situation of the city simply has forced drastic action that a means may be secured to relieve matters and afford better and more comfortable transportation facilities for the citizens at large. Since the car company wouldn't make improvements something had to be done. If the new motor busses are put into commission under a franchise they will operate upon a regular time schedule and their coming will mean the passing of the "jitneys."

THE BUILDING SITUATION

Slight Gain Shown in Country's Operations With Upward Wage Trend and Decline in Material Prices

According to the reports on building conditions sent out by S. W. Strause & Co., building operations throughout the entire country continue to increase in volume as the season advances, notwithstanding an unmistakable slowing down in many sections. During the first six months of this year 328 cities and towns filed reports. Plans filed and permits granted amounted to an estimated valuation of $1,996,082,235, a gain of eight per cent over the same period in 1923.

Official records in the same cities and towns reveal June building plans and permits amounting to $299,682,315, a gain of 10 per cent over June of last year.

The 25 cities which led in the plans filed and permits issued during the half year ending June 30th, show a gain of 11 per cent over last year. It is interesting to note that these twenty-five cities reported prospective building operations amounting to 67 per cent of the total amount reported by the 328 cities for the first six months of the year.

The general tendency of the price of building labor is upward, although the month of June brought forth some scattered instances of reduced wages to skilled craftsmen in the smaller cities. June saw a farther reduction in material prices. As in May the decline was confined almost wholly to lumber and structural steel. The eastern and southern cities report a gain over the first half of last year, and the central, west and Pacific coast report slight losses.

CALUMET BUILDING PROGRESS

Architects Berry and Co., Hammond, put out the plans of the Evangelical Lutheran Church, July 25, for estimates. The structure is to be erected on Sibley street, Hammond.

The new bids for the construction of the Sobeiski School in Calumet City are to be opened July 30.

Hammond's building volume for the year was given a big boost the past week when a permit was granted for the construction of the new bank building which is estimated to cost $750,000.

Local contractors did not care to tackle the job, evidently, as only one of them submitted an estimate. The masonry and carpenter work went to C. E. Clark Co., and the structural steel to Duffin Steel Co., both of Chicago. Excavating was begun July 21.

General Contractors Danner and Co., have finished the first story walls on the Bicknell Apartment Building in East Chicago.

The structural steel is in place on the Paxton building in Hammond and the contractors, Pearson & Son, are now on the brick walls.

E. E. COLE.

EVANSVILLE

BUILDING LABOR

Evansville Courier Holds Prosperity of Building Industry Hinges on Attitude of Labor.

A building employer in the East reports that bricklayers are laying more brick than they have been for several years. Before the war they ordinarily laid about 1,200 a day. After the war, it was often charged that they were laying only about one-fourth that many. A few months ago the usual number a day, this employer says was about 600. Now it is back to 1,200.

It would be worth knowing whether this account is accurate, and whether it applies generally. The employer quoted seems to think it does. He draws from it a conclusion which he applies to the whole building industry.

More or less "slacking" was natural, he remarks, in a period of great demand for buildings and an inadequate supply of building labor. With the building famine almost wholly relieved, and with a prospect of slacker times, the building trades, he says, are speeding up "to keep their jobs."

There may be truth in this, even though the workmen themselves are not clearly conscious of it. And if they are speeding up, it may be from more or less instinctive appreciation of an economic law that working groups sometimes deny. Too often such groups talk and act as if there were only so much labor to be done in the world, and if they got it done prematurely, by extra effort, they would be left jobless. The fact is that in a great industrial country like the United States, where many industries are interwoven and prosperity is a matter of interdependence, efficient work is likely to produce more work.

In the present case, for example, if the building boom comes to an end soon, it will be not so much because the country is "all built up" as because, with the most urgent needs satisfied, people cannot afford to pay present costs of construction any more. If costs of production are lowered, by more productive labor or lower material prices, or both, building activity will be stimulated and prolonged.

CHIPS AND SHAVINGS

New plans for projects are continually being started by local architects, quite a few are appearing for contractors to figure, and contracts are being awarded weekly. The majority of the new work is small with residences still getting the heaviest call. Good progress is being made on work already started, all of which is making for considerable activity.

Contractor J. R. Wilkinson has five new brick residences for Wm. Browning on Lincoln avenue, well along toward completion.

Scarborough-Davies Co., general contractors started some alteration work at the telephone exchange last week.

Percy Goodwin has awarded the general contract for a new $15,000 residence to J. Bippus & Son, who have started work.

One of the largest projects to come up in the local field this season is the new $250,000 Y. W. C. A. building, bids for the erection of which are to be received July 21, at 9 a. m.

John Nellis secured the contract for alterations and an addition to the F. R. Peters home on Chandler avenue.

FT. WAYNE

KEEPING ABREAST OF THE REST OF THE COUNTRY

Building Active at Fort Wayne

In keeping with the average trend of building in most localities the volume of business in Ft. Wayne continues good to active with a fair prospect ahead. There is a good movement in house building with some larger construction projects bobbing up here and there. The operations to date have nicely taken care of the employment problem and all building trades craftsmen are being kept busy. There is a heavy demand for common laborers which so far has been met and no delays have been occasioned on that score.

While last year was an unusually heavy building year for Ft. Wayne this year's operations are comparing favorably with the record hung up in 1923.

PARK BOARD TO MAKE ATTRACTIVE IMPROVEMENT

Beautification of City With Utilitarian Feature In View

Plans for the establishment of a park on both sides of the St. Joseph river from State boulevard south on Spy Run avenue to Elizabeth street and on the east bank of the river from State boulevard to a point near St. Joe boulevard, have been practically decided upon by the board of park commissioners.

INDIANAPOLIS

JAMES HODGSON, SR., HEADS INDIANAPOLIS MASON CONTRACTORS' ASSOCIATION

Annual Election Held

Every one in Indianapolis building circles these days is putting in his best licks, making hay while the sun shines as it were and the brick mason contractors are no exception to the rule. Their licks consist of laying brick and their men are pushing right ahead to hold their jobs with the result that nice progress is being made on all work under construction.

However, the brick contractors who are members of the Mason Contractors' Association took out enough time recently to get together for the organization's annual election and when the vote was counted this result was revealed:

President, James Hodgson, Sr.; Vice-President; T. J. O'Hara; Secretary, Leon Joyce; Recording Secretary and Treasurer, James Rybolt.

SOUTH BEND

THE LOCAL BUILDING SITUATION

Plenty of Work Though Scope Is Not As Large As That of Last Year

While South Bend does not show as great a volume in her building operations as in 1923, still there are many new things to take into consideration which cause the decrease. Many permits for new work of a large nature were taken out in 1923 during the month of December, and to a great extent this caused 1924 to take a big slump in her showing. This work is now going on rapidly.

Another thing that caused the great drop is the fact that last year everybody was busy and there was plenty of money in circulation resulting in the larger jobs being to the forefront, while this year, though there are a world of jobs being let, they are of the small variety, such as homes and garages and small business buildings.

H. G. Christman Company, general contractors, are working on five big building projects: St. Mary's School, Junior High School, Lincoln School, Epworth Hospital and the Masonic Temple. These are all very large jobs and rapid progress is being made on them. Thos. L. Hickey, another general contractor, has the contract for the large Science Hall at Notre Dame University. Contractors Kuehn-Jordan Company have the work for the large Knights of Columbus building on West Jefferson Boulevard, and have the building well under way. That firm, too, is finishing the LaSalle Paper Company's big building and have just commenced the remodeling of the M. E. Church at St. Joseph, Mich.

Hay-Weaver Company, general contractors, are working hard to complete the Oliver Park Pumping Station for the City Government. They are also going right ahead with the addition to the vocational school adjoining the Central High School and the Franks Stores Building. Hay-Weaver are also completing the large warehouse of the W. H. Woolworth Company and the four-story concrete building of Hoffman-Weiss Company.

Then, too, there are numerous projects over the city that the smaller contractors are quite busy erecting. Other contracts are to be awarded in the near future.

WOULD INSTITUTE QUANTITY SURVEY BUREAU

South Bend Contractors Exerting Effort In That Direction

The Exchange is now busy with a committee for establishing a "Quantity Survey Bureau." Quite a lot of information from over the entire country has been secured and is being compiled into a report for action by the members. Milwaukee has had an established Quantity Survey Bureau for the past twelve years, which in its operation has been of great benefit to Exchange members. The Bureau has saved the contractors up there many thousands of dollars by eliminating mistakes in take-offs and also through the doing away of duplication of effort. The Quantity Survey Bureau, based on the same principle as is used in Milwaukee and other cities of this country, is economic and along the right lines to be of the greatest advantage; that is, there are competent quantity surveyors who take off the quantities for each structure and they are submitted to each bidder member of the Association, therefore, each member bidder is bidding on one and the same thing; the quantity surveyor being employed and controlled entirely by the Contractors Association. In this way, it is said, quantities are gotten that are more accurate, and any misinterpretation or misrepresentation is usually discovered and the quantity surveyor, as an independent party, will be of assistance in case of disputes in settling the proper interpretation to be put on the plans and specifications. Local contractors think this is a step in the right direction to protect exchange members in making their bids.

CONTRACTORS TO BE ENTERTAINED

Exchange Members to Be Guests At Big Affair Planned by Lumber Company

There is a great day approaching for the South Bend building contracting fraternity and that day is not far distant.

Along about the middle of August the new South Side lumber yard of the Indiana Lumber and Manufacturing Company is to be opened with jollification ceremonies and the entire membership of the local Builder's Exchange has been invited to participate in the affair which is to be a gala event.

The lumber company is preparing quite a diversified program that will include a 6 p. m. dinner, music and other entertainment for the contractors and other guests. The program arrangements are in charge of President Walter Fassuacht of the Exchange who is also a member of the lumber firm, and all who know Walter are anticipating an event second to none in South Bend building construction social history.

E. H. HYMAN, Secy.-Mgr.,
South Bend Builders' Exchange.

TO TEACH HOW TO WALK CORRECTLY

No wonder the Northwestern University authorities have found it advisable to offer a three hour a week course for instructions in the proper way to walk. Four million automobiles were manufactured in the United States last year, according to reports. These, together with millions of "used cars," scooting about are inclined to make proper walking an art. If walking has become an art, how about thrift? According to statisticians it costs somewhere in the neighborhood of five billions of dollars to operate the fourteen millions of autos said to be in service in this country. Many consider it is to live to drive. No wonder that the cost of living has jumped considerably.

Sealed Proposals

WATER MAINS, STEAM HEATING, BOWLING ALLEYS, ELECTRICAL WORK

NOTICE TO CONTRACTORS

Bids will be received by the Board of Trustees of the Indiana State Normal School at 2:00 P. M., August 11, 1924, at the Ball Teachers' College of the Indiana State Normal School at Muncie, Indiana, for the following items:

1. Water mains, gas mains and fittings laid ready to connect complete, according to the plans and specifications prepared by Kibele and Garrard, architects, Muncie, Indiana. Etimated cost $1,000.00
2. Steam heating equipment and connections complete for the Ball Brothers Gymnasium according to plans and specifications prepared by Kibele and Garrard, Muncie, Indiana. Estimated cost $20,000.00
3. Four bowling alleys, according to the plans and specifications on file in the office of the Dean of the Indiana State Normal School, Muncie, Indiana. Estimated cost.....$4,000.00
4. Electric wiring and equipment complete for connecting the buildings of the Indiana State

Normal School, including transformers and automatic Oil Circuit Breakers, according to the plans and specifications prepared by E. J. Kirkpatrick, Commercial Manager, Indiana General Service Company, Muncie, Indiana. Estimated cost $7,80000

Bids for items 1, 2 and 4 must be made on Form No. 96 and item 3 on form 95, prescribed by the State Board of Accounts and each bid must be accompanied by a certified check equal to 5 per cent of the amount of the bid. Separate bids must be made for each of the four items.

BOARD OF TRUSTEES OF INDIANA STATE NORMAL SCHOOL,

By HELEN C. BENBRIDGE, Secretary.

July 26th-Aug. 2-Aug. 9th, 1924.

NOTICE OF THE LETTING OF CONTRACT FOR REPAIR, AND CONSTRUCTION OF ADDITION TO SCHOOL BUILDING AT BLACKHAWK, PIERSON TOWNSHIP, VIGO COUNTY, INDIANA

Notice is hereby given that the Trustee, of Pierson School Township, Vigo County, Indiana, will receive sealed bids for the change and repair of the present School Building, located at the Town of Blackhawk, in said Township. And for the building of a two-story addition thereto, which addition shall be approximately fifty by seventy feet, with gymnasium and etc., on lower floor, with two class rooms and an Assembly room, and office on second floor. Said bids to include all materials, labor, heating, plumbing and etc. necessary to complete the same.

Which said building shall conform in material and workmanship, and in all other respects, to the plans and specifications therefor, which are now and will continue to remain on file, at the office of Johnson, Miller, Miller & Yeager, Architects, 30 North 5th St., in the City of Terre Haute, Vigo County, Indiana, and also at the residence of the said trustee, in Pierson Township, Vigo County, Indiana.

The total estimated costs of said changes, repair, and addition is Thirty-three Thousand Five Hundred ($33,500.00) Dollars. Separate bids will be received for general construction of the building and for installation of heating, and plumbing of present school building, and addition thereto, at the present school building in the Town of Blackhawk, in said Township, County and State, on the 18th day of August, 1924, at Ten O'clock A. M.

Each bidder will be required to file with said Trustee, in connection with his bid, a non-collusion affidavit, which bids shall be submitted on forms as prescribed by State Board of Accounts. And he shall also deposit with the Trustee, cash, or certified check payable to said trustee in an amount equal to four per cent of his bid, as a guarantee that he will accept said contract and carry out the construction of said work, if the contract shall be awarded him. Should said bidder fail to enter into said contract, he shall forfeit said sum to said trustee.

Within seven days after notification thereof, such successful bidder, when contract is awarded him, shall enter into a written contract, and shall furnish a bond; which said bond shall be given with security to be approved by the Trustee for a sum equal to the contract price, insuring the completion of said work, according to said contract, plans, and specifications. And such successful bidder shall be prepared to immediately begin said construction and carry the same through to completion as speedily as possible, so as to complete the same within the limit of the time fixed for the completion of same.

The right is hereby reserved to reject any and all bids.

Dated this 22d day of July, 1924.

R. M. GRAHAM,

Trustee of Pierson Township, Vigo County, Ind.

OPINIONS JUST ISSUED REGARDING ARCHITECTS AND THEIR RELATION TO TOWNSHIP BUSINESS

As State Board of Accounts Sees It

The architect is bound by contract to prepare plans and specifications permitting the township to erect a building within the constitutional debt limit. The township should not pay for such plans and specifications which cannot be used on account the expense to be incurred in construction of building exceeding the constitutional debt limit.

A heating plant is an essential part of the equipment of a school building and should be included in the appropriation for the construction and completion of such building.

A contract with an architect will not be valid unless an appropriation is made for employment of architect before contract is drawn. (See Opinions of Attorney General Lesh 1921-1922, page 346 and 180 Ind. 63.)

Architects may be paid for their services from the special school fund.

An architect cannot legally bid or contract for the erection of a building for which he has been employed to draw the plans and specifications. (Sec. 2423 Burns' R. S. 1914.)

Payment to an architect for plans for school buildings can properly be charged to the appropriation for new buildings and grounds.

DESPOLIATION

A New Slant At the Toll Progress Demands

There are certain persons to whom buildings, as such, are like people, standing for something to them, as one's friend stands for an ideal, or your enemy for the thing you despise. Like people, they may have a good deal of character or they may have little; they may be distinct and superb, or they may be, like the simple countryman you know, plain and rambling and human.

Many times you will pass them unobservingly. Their faces are devoid of appeal. No line of subtle beauty stirs your heart or brings to life some gentle memory, no graven front to bid you pause with breath suspended! Other buildings you come to you look upon with interest and often, as you watch them through a long acquaintanceship, you find some tendril from your heart going forth to twine itself about them.

Then, one day, comes the realization of all that the companionship means to you. You put forth your hand; you find it taken in a sudden, friendly grasp; your heart misses a beat, and you stand before the building you have grown to love, unable to speak because you have no common language.

From that moment you go out of your way to refresh yourself with the vision of a building—the one YOU love—standing tall and oblique against the sky, feelnig that in it surely live courage, and hope, and success. You watch the clouds as they bank themselves behind it. You search in the window markings for some long since forgotten story, and then your fancy toys with the doors of the building, searching for new designs, a new play of symmetry. You watch for the building's moods; you note each change of countenance, the ever-shifting drama of light, and shade, and color.

As the days go by, you find yourself depending upon the building for your strength, your moral strength, and as a musician turns to his harp, you find your eyes lifting to the lines of the building when you are weary. It is the one permanent thing on which you may count.

But the destinies of buildings, like the destinies of people, are controlled by an invisible hierarchy, and one day a change is begun in the building you like. An addition is being made, and atop the bricks and stone so nobly reared against the sky, a sign is being placed to flash its nightly message across the sky in a thousand twinkling lights. Day by day you watch the workmen creep about the iron framework, high on top the building. Counting them, you find they are ten in number. In your imagination you stand them one above the other until you find they would reach to the top of the sign—this superstructure upon a structure, fifty feet and more in height. You dwell upon the time it will take to complete the work. Your heart grows heavy. An addition is being made to the building, but something is also being torn down. The calm, steady message of the building you have grown to love is being taken away and in the sign across the building's roof a quicker way to advertise is being found. The building which stood for so much to you, through a long association, winning you to it gradually, and winning, in turn, your loyalty to the firm which stood behind it, can be what it was no longer. It is but a ruined shrine, a pedestal of the bizarre, the blatant.

The change has come about gradually, but at last the men have finished their work. Your steps take you past the same building day by day, and in the evening, when the first twilight comes on, you see the glittering lights of the advertisement flickering faintly: the attention of a million is being drawn to that which before had won the heart of but one! A million, but do they see what you saw, do they, too, feel loyalty, and comradeship, a deep abiding faith? Their attention is caught and held but a moment. The sign has flashed its message. Your steps drag heavily. In the glare of the light above, the solidity beneath is lost, gone is the feeling of permanance, gone the sense of devotion to the men, the architects and the owners, who had made the building possible, a loyalty that was to have endured so long as stone remained on stone, standing forth in rugged simplicity.

You turn away your face. You can endure the sight no longer. The lights on the building have gone. The stars have paled from the sky. In the east the dawn is breaking. Before you stands a gigantic form and across its broad expanse of roof stretches a hideous, gaping sign. Can you look upon the sight? Ah, no! A truer friendship than this was yours, and now your steps must know another house.

A friend has been despoiled.

(Viola Irene Cooper, in The Architect and Engineer, June, 1924.)

Indianapolis

ORGANIZATION AND CURRENT NEWS

SIZING UP THE COUNTRY'S BUILDING ACTIVITIES AND OUTLOOK

Present Slack Only Seasonable to the Mid-Summer Period

The building boom goes right on. Though construction has slackened in some cities and sections, the country as a whole continues to build in more than normal volume. Building permits issued in 328 cities and towns during the first six months of this year amounted to nearly $2,000,000,000, representing a gain of 8 per cent. over the corresponding period last year. The permits for last month were 10 per cent higher than for June of 1923.

Generally speaking, the smaller communities have caught up with their building first. The greatest activity now is in the larger cities. There is talk in many such cities of an impending slackness, but few actual signs of it. Building materials have dropped a little, but labor costs as much as ever, and in some places more.

Thousands of builders and home-owners would give a good deal to know how long this situation is going to last. Surely the building deficit for the country as a whole must be made up before long, at the present rate. Yet it may be that the old standards of housing, office quarters, factory facilities, etc., have changed so much that it is going to take a great deal more building of all kinds to satisfy the normal demand henceforth.

If this is the case, there can be no early prospect of lower building costs, lower rent and lower prices for completed structures. There may be temporary slumps—as there are this summer in some places—but many keen building men and real estate men say they can not foresee much change in the situation for years yet.

—Evansville Courier.

DON'T DO IT

To Guess Is to Court Trouble

That estimating and figuring of quantities is an important part of the contractor business is evidenced by the fact that the larger contracting companies maintain large departments to do this work only.

No matter how good a construction crew a contractor may have, nor how clever he is in devising economical ways of doing the work—all this may be offset by mistakes in the original estimate, and the result may be loss instead of profit.

Many smaller builders do not exercise sufficient care in estimating on jobs. They are prone to guess—"That'll take about so many bags of cement, or so many thousand of brick"—with the result that if they have over-estimated they may lose the job, and if they have under-estimated, they may lose some money. A builder should make and keep estimate and quantity sheets on every job, no matter how small, and should keep on hand for reference, tables which will enable him to figure quantities accurately.

Don't guess—it pays to be sure.

—Contractors' Atlas, July Issue.

VOLUME AND PROFITS

Great Effort For Volume Frequently Plays Havoc With Profits Both For Contractor As Well As Other Business Men

The president of the General Motors Corporation recently made the statement that the automobile industry would soon recover from the mild slump in which it is plunged at present. He also declared that the business the industry is doing today is really satisfactory, but that it is not up to expectations, because both dealers and manufacturers have developed a habit of expecting business each year to be far in excess of that of the preceeding year.

In the mad scramble to make each year bigger than the preceeding one, profits are often sacrificed and the industry is thrown into a chaotic condition. When a selling organization finds that it is falling under its previous high water mark, the salesmen undergo a psychological change and conclude that a serious depression has fallen upon the industry and immediately begin to slow up. As a result a real depression does come, simply because of the state of mind that has been developed on the part of those representatives of the industry who are in daily contact with the public.

The same thing may be said about the construction industry. On nearly every hand contractors are reporting that business is falling off and that a serious depression is upon us, in spite of the fact that statistics prove the volume of construction so far this year is greater than that of last year.

Contractors also are finding themselves in the same position as the automobile men as regards profits. In the rush to get new business so that each succeeding year will show an increase over the preceeding one, profits are often sacrificed and it has been the experience of many firms during the past few years that a large volume of business netted but small profit.

Contractors must be made to realize that it is not necessary to break records every year to do a profitable business. Each job should be so figured that when it is completed it will show a fair profit. Just as soon as this principle is adhered to by contractors generally, the construction industry will be placed on a solid, substantial basis. (From Bulletin of National Association of Building Trades Employers.)

AIDS TO EXTENSION OF THE BUILDING SEASON

Introduction of New Methods and Mechanical Equipment Overcomes the Weather Handicap

The introduction of modern machinery and newer methods in building construction has made building possible with very little regard to weather conditions, according to the report of a nation-wide survey conducted by the Department of Commerce under Secretary Hoover to determine why building could not be carried on the year round.

The survey by the Committee on Seasonal Operation in the Construction Industries was an outgrowth of the President's Conference on Unemployment, whose purpose is to stimulate employment, to eliminate waste and to reduce costs. "Construction with steel has gained an independence of the weather because of the hoisting engine and air-driven tools," the report says.

"The hoisting engine was adapted for building purposes about 1895. It not only lifts heavy parts to place without the risk attendant upon raising by hand, particularly in cold and wet weather, but also makes it possible to raise heavier pieces than could be raised by hand. It eliminates much of the labor and most of the accidents which occurred when laborers crawled up uncertain ladders with loaded hods, or up slippery planks with heavy wheelbarrows in inclement weather.

"The application of compressed air also has increased the possibilities of all year round building. Compressed air in building was first utilized about 1900 to meet the demand for more economical riveting of the joints in steel structures. The pneumatic hammer greatly decreased the labor and time needed for riveting—no small matter when the steel worker's complete exposure to the elements is considered.

"Rivets formerly were heated in coal-burning forges and were thrown and caught by the riveting crews. Many were the fires and accidents due to sparks, overturned forges and misdirected rivets. The latest equipment heats rivets by gas or oil flames or by electric currents passed through them. Rivets are heated nearer the place where used and most of the former dangers eliminated."

Individuals concerned with building are urged to do their share in contributing to all year round building operations by scheduling new work and repair work at a time when the pressure of general building is not at its height.

Calumet District

MICHIGAN CITY CONFERENCE OF STATE A. B. C. DREW QUITE A CROWD

Hammond to Get the Next District Conference

Wonder of wonders! There actually proved to be quite a few contractors in Northern Indiana who could pull themselves away from work long enough to take an active part in organization deliberations. Reference is made to the District Conference of Affiliated City Associations of the Associated Building Contractors of Indiana which was held at Michigan City, Wednesday, July 23.

The Building Trades Employers Association, Hammond, sent over five delegates: Messrs Dickover, Danner, Morris, Granger and Cole, who were delighted to find some forty other contractors at the meeting.

The cities represented were East Chicago, Elkhart, Ft. Wayne, Gary, Hammond, Indiana Harbor, Michigan City and South Bend.

Though the weather was intensely hot the contractors peeled off their coats and plunged into the business at hand refusing to allow a little thing like heated atmosphere to interfere with the affair.

Not unlike a good old fashioned Methodist camp meeting was the recent gathering of contractors. Everybody packed up his troubles in the old kit-bag and brought them along to get them out later, air them and make confessions. Honest confessions, so the saying goes, are good for the oul and it must be so for all those present at Michigan City unburdened themeslves and, when all was said and done, those in attendance said they felt better and had enjoyed the meeting.

The conferences are good for one thing if nothing else, they reveal to the representatives from the various cities that they are not alone in trouble and annoying aggravations, instead, said vexations are more or less mutual, and when the builders get together there is considerable consolation to be found in the opportunity to swap experiences.

Relative to the condition of building activities in the northern section of the State the gist of the information developed was to the effect that while operations have slowed down to some extent the let-up has had to do with the larger sized projects as there is enough of the latter to keep the builder busy.

An interesting first hand talk by Field Representative J. H. Owens on what the State A. B. C. is doing at all times to advance the best interests of the contractors was most enlightening and was received with enthusiasm.

Just before adjournment was taken those present expressed the opinion that another conference should be held in northern Indiana and it was voted to hold it in Hammond some time in September.

A WORD FROM HAMMOND

Sounds Fishy But Nobody Doubts the Truth of This Advance Notice

Come on, boys! Don't overlook the next District Conference scheduled for Hammond some eight weeks hence. It will be our first real opportunity to entertain State A. B. C. members and we will guarantee you a good time. If you like a fish fry no effort will be too great to see that you get all the lake fish you can eat.

MEANS MUCH TO THE CALUMET

Court Decision Should Be a Boon to Indiana

The Calumet District has had a real thrill. Everybody in the section has been buoyed up by the prospect for a great industrial expansion since that decision that knocks out the "Pittsburgh Plus" scheme employed by the eastern steel mills. It was a real detriment to Indiana's steel industry but now that the barrier has been swept away—watch our smoke.

SKIMMED THE HIGH SPOTS

Local Contractors Wasted No Time Along the Way

Not only can he contract, but he can drive. He qualified at the former some years since and then on the Michigan City jaunt last week he pressed a heavy foot on the accelerator and the distance from Hammond to the conference city was clocked at 1 hour, 20 minutes, a speed that is fast enough for anyone. L. J. Granger surely stepped on it.

STILL AT IT

Secretary Can't Forgo That Rod and Reel These Hot Days

"Out of the City."

Such a placard graces the roll-top of the secretary's desk at the B. T. E. A. this week, silently greeting visitors as they arrive.

In the meantime the aforesaid secretary is anchored out in Lake Webster in Kosciusko County, Ind., and from his boat would lure the wary species of the finny tribe onto a hook into his fish bag, then into the live-box. He loaded up the motor car last Saturday and went southeast for a week's stay, leaving behind those who are looking forward, with watering mouths, to his return with a big catch.

CALUMET PROGRESS

Somehow folks can't resist a certain facination that the rattling, scraping, chugging steam shovel, with now and then the shrill blast from a hissing whistle, holds. As evidence of that fact great crowds each day congregate at the pit where the Public Construction Co. is excavating for the new sky-scraper bank building and idle around watching the busy gouging steam shovel that should give them lessons on industrious endeavor.

Plans for a $50,000 school building for Schiller, Ill., are being prepared by Architects Berry, Wainwright & Co., Hammond. The same firm is also working on plans for the remodeling of the Bohling Garage, South Hohman street, Hammond.

E. E. COLE.

EVANSVILLE

JULY BUILDING AT EVANSVILLE LEANS TO REMODELING

Absence of Large Work Very Conspicuous

Of approximately 100 permits issued at the office of the city commissioner of building since July 1, the great bulk of work involved remodeling and repairs according to Buliding Commissioner Ed C. Kerth. The total issue involves an expenditure of about $30,000 for such work as above referred to.

There are more homes available in the city at the present time than has been the case for the past eight years, according to Mr. Kerth.

SEEK TO REDUCE CONSTRUCTION COST

New Y. W. C. A. Bids Considerably In Excess of Anticipation

A called meeting of the Y. W. C. A. board was held the past week to hear a report of the building committee relative to proposed changes in the plans for the new building. The committee has gone over the plans very carefully cutting down excess space and making numerous changes in order to reduce the building costs from $268,000 to around $190,000.

No definite action, however, can be taken until the plans have been revised by the architects, Thompson and Geary of New York.

CHIPS AND SHAVINGS

Construction work was started last week on the first of a series of building units for the W. F. Hartig Plow company at Baker and Morgan avenues. General contract for the new building which will cost about $15,500 has been awarded to W. A. Smith. J. E. Woolley and Son were awarded the plumbing contract.

The new office and administration building of Igleheart Brothers to be built at First and Morgan avenues, will be one of the most modernly equipped structures of its class in this section. It will be of fireproof construction of reinforced concrete with structural steel skeleton.

Work has been started by J. Biplus and Son, contractors, remodeling the residence of Ed Hening, Gum street and McCormick avenue, to be converted into a duplex apartment dwelling. An addition will be built. ach suite will comprise six rooms.

The Tri-State Construction Co. is finishing up the new Lodge Ave. school building which is 1 story and basement with six class rooms.

INDIANAPOLIS BUILDING PERMITS

(Issued From July 24th to July 31st)

***War Memorial Building:** (1st unit): $345,570. Archt., Walker and Weeks, 1900 Euclid Ave., Cleveland, O. Owner, Indiana World War Memorial Assn., Michigan and Pennsylvania. Contractor, Craig-Curtis Construction Co., Cleveland, Ohio. Foundations in.

***Church** (rem. and add.): $28,000.00, 828 Elm St. L. H. Sturges, Board of Trade Bldg. Owner, Seventh Presbyterian Church, 828 Elm St. General contractor, R. L. Durflinger, 332 N. Walcott Street.

***Bank:** $30,000.00, Belmont and Washington. Archt., Fermor S. Cannon, 21 Virginia Ave. Owner, Belmont State Bank, care Fletcher American National Bank. General contractor, Service Construction Co., Castle Hall Bldg. Exca.

***Chapel:** $12,000.00, 4630 Kenwood. Archt., Wilson B. Parker, Board of Trade Bldg. Owner, Fairview Presbyterian Church, Rev. Edward Haines Kistler, pastor, 5121 Kenwood. General contractor, Frank Meid, 528 W. 29th. Excavating.

Residence: $8,850.00, 5234 Washington Blvd. Owner, W. W. Seibert, 3324 Carrollton. General contract let to Floyd Graham, 1011 W. 32nd St. Frame.

Residence: (double): $7,050.00, 2621-23 N. Gale St. Owner, D. Milne, care general contractor. General contract let to Daniel Newhart, 1202 N. Kealing.

Residence: $7,500.00, 4932 Kenwood. Owner R. H. Shelhorn, 4836 College. Owner will build and award separate contracts. Brick and hollow tile.

Residence (double): $6,356.00, 802-04 N. Dearborn. Owner, J. J. Mitchum, 3023 E. Michigan. Contract let to T. J. Eales, 3906 Hillside Ave. Frame.

Residence: $6,700.00, 5047 N. Capitol. Owner, Ray Clem, State Life Bldg. Contract let to J. M. Brown, care owner. Frame and stucco.

Residence (double): $6,800.00, 1346-18 Hyatt. Owner, C. F. Boling, at site. Contract let to J. W. Coryell, 1131 Centennial St. Frame.

Residence: $4,150.00, 766 N. Emerson. Owner, Marion Cordell, at site. Excavating.

Residence: $4,500.00, 1132 W. 37th. Owner, Estella Longest, 1004 City Trust Bldg. Contract let to Longest Realty Co., City Trust Bldg.

Residence: $4,500.00, 1425-27 W. 33rd. Owner, M. E. Kynett, 1504 N. Pennsylvania. Owner builds.

Residence: $4,650.00, 5235 E. Walnut. Owner, Marion Cordell, at site. Owner builds.

Residences: $4,800.00 each, 3115 Clifton, 1058 Congress. Owner, Frederick Lawrence, 4244 Sunset avenue. Frame. Owner builds.

Residence: (double): $4,000.00, 1133-35 N. Rural. Owner, D. W. Snyder, 962 Stillwell. Frame.

Residence: $4,700.00, 1210 E. 46th. Owner, Chas. Radtke, 3716 N. Capitol. Contract let to Louis Schupp, 2357 N. LaSalle St. Frame.

Residence: $4,400.00, 2130 Napoleon. Owner, Clara Armbruster, 1209 E. New York St. Contract let to H. C. Parkhurst, 1541 E. Walker. Frame.

Residence: $5,800.00, 5425 N. Delaware. Owner, R. W. Lewis. 923 Lemcke Bldg. Frame.

Residence (double): $5,400.00, 850-52 N. Gladstone. Owner, O. H. Guype, 610 Linwood. Owner builds. Frame.

Residence: $3,600.00, 410 W. 25th. Owner, F. M. Knight, 6205 Broadway. Owner builds.

Residences (2 doubles): $6,000, total, 1453-55 and 1437-39 Churchman. Owner, Fred T. Reed, 3370 Broadway.

Residence: $3,645.00, 1303 N. Gale St. Owner, Mildred Harmening, 401 Prospect St. Contract let to Chas. D. Evans, 1321 Congress.

Residence: $3,600.00, 710 N. Chester. Owner, Samuel Woods, 2130 Jefferson. Contract let to J. D. Felts, 1855 W. Morris.

Residence: $3,660.00, 2729 Allen. Owner, B. E. Farmer, 1702 Troy.

Residence: $3,370.00, 1236 N. Belle View. Owner A. W. Cox, 1260 N. Belle View Place.

Residence (double): $9,400.00, 14-16 Irvington Court. Owner, Creighton Realty Co., 1105 Peoples Bank Bldg. Owner builds. Stucco and frame.

Residence: $5,330.00 (double), 946-48 N. Gray St. Owner, Homer W. Rants, 623 N. Dearborn St. General contract let to Jos. Akers and Son, 409 N. LaSalle St. Frame.

Stores: $5,000.00, 1639-41 Villa Ave. Owner, W. B. Wood, at site. Owner builds. Brick and hollow tile.

Residence (double): $3,500.00, 2372-74 N. Olney. Owner, Herman Roesch, 2330 Station St. Frame.

Residence: $4,680.00, 6325 Central. Owner, Templeton Realty Co., 42nd and College. Owner builds. Frame and stucco.

BEDFORD

***Fire Station:** $18,000.00, 2 sty., 30x58, 16th and K Sts. Archt., O. L. Hill, P. O. Box No. 274, Bedford. Owner, City of Bedford, care City Clerk, Bedford. Plans in progress. Brick, stone front.

***Store Building:** $12,000.00, 1 sty., 37x75. Private plans. Owner, Harry Thomas, (bus line) Bedford. General contractor, E. M. Carey, Bedford. Plans in progress. Brick, comp. roof, metal ceiling, copper store fronts, restaurant equipment.

***Commercial Garage and Salesroom:** $25,000.00, 1 sty. and bas., 50x110, 5th and Lincoln. Archt., O. L. Hill, P. O. Box No. 274, Bedford. Owner, Ellis Fish, Bedford, Ind. Plans in progress. Brick, hollow tile, comp. roof, steel sash, tile or terrazzo floor in salesroom, steam heat.

EAST CHICAGO

***Apartment Building:** (18 apts.): $80,000.00, 3 sty., 110x119, Beacon and Whiteoak St. Archt., Jos. G. Kraft Co., East Chicago Bank Bldg. Owner, Albert Given, 602 Chicago Ave., East Chicago. Archt. receiving bids. Brick, stone trim, comp. roof, steam heat, incinerator, ranges, refrigerators.

Apartment: (6 apts.): $40,000.00, 4300 Magoun St., East Chicago. Archt., Halperin and Halperin, 19 S. LaSalle St., Chicago, Ill. Owner, Mrs. Esther B. Given, East Chicago. Archt. awarding separate contracts. Brick, stone trim, steam heat, comp. roof.

***East Chicago:** Bath house and swimming pool. "Todd Park." Archt., Roy Stubbs, City Hall. Owner, Board of Park Commissioners, City Hall,

NOTICE TO CONTRACTORS

Bids will be received by the Board of Trustees of the Indiana State Normal School at 2:00 P. M., August 11, 1924, at the Ball Teachers' College of the Indiana State Normal School at Muncie, Indiana, for the following items:

1. Water mains, gas mains and fittings laid ready to connect complete, according to the plans and specifications prepared by Kibele and Garrard, architects, Muncie, Indiana. Etimated cost $1,000.00
2. Steam heating equipment and connections complete for the Ball Brothers Gymnasium according to plans and specifications prepared by Kibele and Garrard, Muncie, Indiana. Estimated cost $20,000.00
3. Four bowling alleys, according to the plans and specifications on file in the office of the Dean of the Indiana State Normal School, Muncie, Indiana. Estimated cost.....$4,000.00
4. Electric wiring and equipment complete for connecting the buildings of the Indiana State Normal School, including transformers and automatic Oil Circuit Breakers, according to the plans and specifications prepared by E. J. Kirkpatrick, Commercial Manager, Indiana General Service Company, Muncie, Indiana. Estimated cost $7,80000

Bids for items 1, 2 and 4 must be made on Form No. 96 and item 3 on form 95, prescribed by the State Board of Accounts and each bid must be accompanied by a certified check equal to 5 per cent of the amount of the bid. Separate bids must be made for each of the four items.

BOARD OF TRUSTEES OF INDIANA STATE NORMAL SCHOOL,

By HELEN C. BENBRIDGE, Secretary.

July 26th-Aug. 2-Aug. 9th, 1924.

PAVING

NOTICE TO ROAD AND STREET PAVING CONTRACTORS

Sealed bids for the improvement and paving of portions of Gonazels and Brooks Streets in the Town of Francesville, Pulaski County, Indiana, will be received by the Board of Trustees of said Town at a meeting to be held in Town Hall at Francesville at one o'clock P. M. on the 11th day of August, 1924.

The work includes approximately 3,000 cubic yards grading, 4,000 lineal feet of curb, 7,500 square yards bituminous surfaced macadam base pavement.

Plans and specifications are on file in the office of the Town Clerk and may be examined between the hours of 8 A. M. and 5:00 P. M. daily except Sunday.

Bidder's blanks may be had from the Town Clerk.

Proposals must be made on Blanks furnished by the Town Clerk and must be accompanied by certified or cashiers check in a sum not less than Two Hundred Dollars ($200) and in accordance with the specifications. The Board reserves the right to reduce or increase the work to be done on either street by changing the width of the improvement.

The Board of Trustees of the Town of Francesville reserves the right to reject any or all bids, waive any and all informalities, and award contracts either in part or as a whole as may be deemed best for the interests of the town of Francesville.

JOHN KOSTER,
Chairman Board of Trustees.
W. E. Tennell, Town Clerk.
August 2nd, 1924.

STEEL REINFORCING BARS TO BE SIMPLIFIED.

Move To Be Started In September

Because of a large number of varying specifications for steel reinforcing bars used in construction of roads, bridges, and buildings and other structures, proposals for simplification of the varieties of this commodity will be considered at a meeting on September 9 in the Department of Commerce, it has been announced by the Division of Simplified Practice, under whose auspices the conference will be held.

Based upon an anaiysis of experience and sales demand, it has been suggested by representative dealers that the following sizes of steel reinforcing bars be used as a basis for a simplified practice recommendation:

Square: ½ inch, 1 inch, 1⅛ inch and 1¼ inch.

Round: ⅜, ½, ⅝, ¾, ⅞ and 1 inch.

Surveys reported to the Division show that many rolling mills, manufacturers, dealers and consuming interests have already adopted these sizes, which can be supplied economically by all producers. It is declared that the range in the recommended sizes would be sufficient to supplant the 15 sizes now used in each style.

Endorsement of the recommended sizes will be asked from Government departments and technical bodies, as well as architects, contractors, engineers, bridge and road builders as well as other consuming interests.

As to the flat-shaped bars, no suggestions have been made, but it is expected that existing conditions will be discussed and a survey may result.

Suggestions have been received by the Division that an "intermediate" grade, embodying the desirable features of "structural" and "high carbon" grades, would enable dealers to cut their stocks from 30 piles to half that number, or even to one-third if one grade were adopted. The question of a future course of action concerning an adequate and sufficient grade of steel will be referred to technical bodies concerned.

CONTRACTORS AND BRICK LAYERS GET TOGETHER TO ENCOURAGE APPRENTICES

Every Effort to Be Made to Replenish Ranks of Craftsmen

Under an agreement recently signed by the Mason Builders' Association of Greater New York and five bricklayer unions, all apprentices working at the trade must attend evening public vocational schools two hours a night for two nights a week during the regular evening school session. The agreement provides for the creation of a joint apprenticeship committee, outlines the duties of the committee, provides for continuous employment of apprentices, states the minimum wage to be paid, and sets up the method of supervision, regulations and adjustments. A special course of study is now being outlined by experts in the trade, that will enable an apprentice to get the theoretical and related subjects which he can not get on the job during the day.

CONTRACTORS SUE UNIONS

Court Action Instituted to Recover Damages

Two interesting suits were recently started in both of which labor organizations are being sued by contractors.

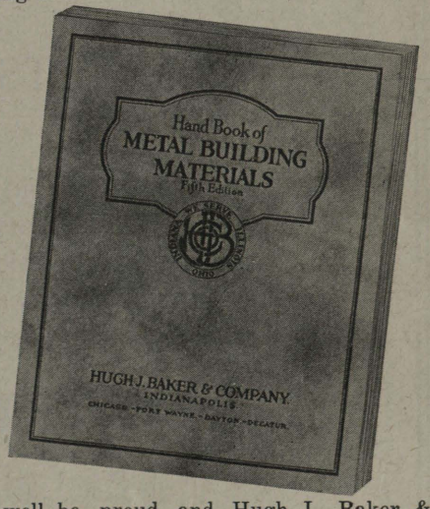
The first is the case of the Iron League of New York, which seeks damages in the amount of $5,000,000 from the International Association of Bridge, Structural and Ornamental Iron Workers. The other case is that of the Clifford F. McEvoy Company of Newark, New Jersey. This concern has started suit against a number of local unions, the Carpenters and Joiners District Council and the Building Trades Council of Newark. The suit calls for damages in the amount of $500,000. The action, the bill of complaint in the case shows, is the result of a strike on a union job being erected by the plaintiff, to force the company to employ union men on another project being erected by them.

VALUABLE HANDBOOK ON FIRE-RESISTIVE BUILDING MATERIALS ISSUED BY WELL KNOWN INDIANAPOLIS FIRM

A handsome, comprehensive, conveniently arranged handbook of metal building materials dealing with the problem of fire-resistive construction, published by Hugh J. Baker & Company, is just off the press and should prove a valuable adjunct to any reference library on building construction.
tion.

The volume, containing one hundred and twenty pages, is bound in heavy cover stock, giving the impression of cordova leather and is a fine example of the printer's art. It is intended as a condensed data book giving details and essential tables of sizes and loads; serving as an index to the company's file of complete catalogues and handbooks on individual materials. There is a complete index alphabetically arranged containing two hundred and seventy-six listings on fire resistive building materials. In addition to the exhaustive tables reproduced there are profuse illustrations and a wealth of explanatory reading material.

This new handbook clearly evidences painstaking care in preparation and editing and is one of which any firm might



well be proud, and Hugh J. Baker & Company is to be commended for the effort thus put forth.

Contractors and Road Builders

Before closing your contracts for the handling of Building Material, you will find it to your interest to consult the Traffic Department of the

IN MOST ANY INDIANA CITY

All You Have to Do Is to Look Around to Verify This

Residential construction work in Indiana the past six or seven months has been the one big feature of the building effort and has gone a long way to protect the architects from a lean year. There have been some large projects here and there throughout the state but only a handful of them, with few of any notable proportions, and the individual jobs distributed about the various architects' offices would not have been near enough to have reached clear down the list. Commercial buildings, a few industrial structures, some churches and a fair proportion of school houses helped to keep Indiana architects busy, but, it was residence work that carried the burden and kept the designers and planners busy.

The reason for this new residence construction movement has been traced to high rents, a shortage of housing accommodations, and the desire of people to get away from the congested districts, to get out on a place they could call their own. With rents as high as they were and still are, people were willing to strain a point in an effort to build and get a better return on their money than just a rent receipt.

The ambition of folks to own a home lent a decided impetus to home building and, though residential construction has been going on on a heavy scale for the past few years, the desire for a place of one's own in which to live seems to be as strong if not stronger than ever with the result that prospective builders continue to develop all the time under a steady pressure to the benefit of the architectural profession and the contracting fraternity.

Commenting upon the home building activity apparent in the construction permit reports made by the city building inspection departments around the country, the Chicago Evening Post has this to say:

"Glancing over the reports of building conditions for the past few months, in a year when construction is showing a tendency to recede from the peak established by the postwar construction boom, the analyst cannot help but be impressed with the frequency of the phrase, "the demand for single family dwellings at a moderate price continues unabated."

From the civic standpoint, this desire to exchange the narrow limits of a four-room and sun parlor niche in a fifty-eight apartment block for the delights —and some disadvantages—of the suburban home is a splendid thing. A new realization of community responsibility is impressed upon the small house purchaser, whether he wants it or not, and he soon finds himself discussing the different grades of paving proposed in a special assessment project with a vehemence that would do credit to the community's oldest inhabitant.

On a broader plane, this continuation of the home owning movement will be the salvation of the building industry during the next year or so.

The building industry is basic and gives employment to workers in many lines, from the limestone quarries of Indiana to the lumber camps of the south and northwest, and from hardware to glass and paint factories, to say nothing of the men employed directly in the work of construction.

To bring this activity to a sudden halt, as might easily be the case under present industrial conditions and a lack of demand for homes, would be little short of a calamity through the amount of unemployment created.

Such, fortunately, is not the case. Just so long as the thousands of John Jones with moderate incomes and character sufficiently good to negotiate a bank loan continue to migrate to the suburbs, there will be moderately steady employment in the building industry.

And the Jones army, apparently, has been very little reduced in numbers by the boom of the last two years."

A COSTLY EXPERIMENT

Proving Real Business Management Is Essential to Success in Building Business

Architects in general have been watching with some interest the experiment of the English Guilds in contracting to complete large building programs. In 1920 English labor leaders saw the opportunity to put into action the system of Guild Socialism in the building industry. Two guilds were formed to do construction work; one in Manchester and the other in London. These two guilds were later combined into a single guild. Their first large operation was the contracting to complete two thousand houses, on a cost plus basis with a compensation of 6 per cent., plus forty pounds, per house, for the continuous employment; a requirement of the guilds, which was to accrue to the benefit of the members. It is reported that a profit was made on the cost plus work during the year 1920, but in 1921, the Government quit its cost plus work policy for Government housing.

The guilds, though opposed to the lump sum contract, were forced to take work on that basis or go without work; a condition which, on account of the continuous employment feature in their organization, very soon used up all their resources.

The management of the guilds were men selected or elected by the guilds, and were perhaps chosen in the same way as the business agents of the trade unions with which we are more familiar. It soon became evident that under such management the guilds could not compete with the skilled, trained business management of private capital; the result being that the guilds lost money on all operations and are now in a condition of hopeless bankruptcy.

It is reported that when building operations slackened that there was an over manning of jobs, and that the workmen themselves made every effort to make the work stretch out as long as possible.

It now appears that the members of the guild as individuals did not evidence much desire to make the new scheme go over, and when the Central Control Office woke up, the economics which were then tried, were too late to prevent the inevitable crash.

Thus is recorded another bit of evidence that the guild or public enterprise can not compete with private organization free from political influence.

ORGANIZATION AND CURRENT NEWS

AN IMPORTANT CONTRIBUTING CAUSE TO HIGH BUILDING CONSTRUCTION COSTS.

Short Season of Activity Must Shoulder Dull Period Expenses.

Building trades workers in the average American city are employed less than three-fourths of the time at their trade. This is the finding of a committee appointed by Herbert Hoover, Secretary of Commerce, to survey the building situation in the United States with a view to determining why building construction could not continue through all seasons of the year. The survey was an outgrowth of the Committee on Seasonal Operations in the Construction Industries, of the President's Conference on Unemployment, whose purpose is to relieve unemployment, to eliminate waste and reduce costs.

"In the average year," a report filed by the committee says, "men in the building trades must be paid enough to support themselves and their families for twelve months on wages received for seven to ten months' work. With most contractors, twelve months' overhead costs of maintaining their offices must be charged against the jobs carried on actively during seven or eight months.

"Building supply dealers must maintain establishments big enough to handle a large amount of work during four or five months. These establishments are practically idle during at least three months, and are operating at only a fraction of their capacity during the rest of the year. Building material manufacturers also have to maintain unnecessarily large plant and equipment or else stock up materials during dull seasons in order to meet peek demands.

"Architects find their office work crowded largely into the first six months of the year, although their field work is often active for some months later. Intermittent employment conditions keep young men from taking up the building trades, and account in large part for the high hourly wage rates, and give a false impression of actual earnings."

All those of the building industry should do their best to share in contributing to all year round building operations by scheduling new work and repair work at a time when the pressure of general building is not at its height, and also urge prospective builders to push work ahead during the so-called off season.

ASSOCIATIONS, LIKE BUSINESS VENTURES CAN MAKE NO PROGRESS WHEN UNDER-FINANCED.

Catch Penny Dues Basis Always Leads To Difficulty.

The question of finances is one that is bound sooner or later to confront the average contractors association, and it therefore is a subject of vast import to all associations.

No business venture that is under financed can hope to succeed, and it is inevitable that an association that is not properly financed is doomed to fail. The strength of the organized labor movement has been due very largely to the fact that stress was laid on the importance of an adequate treasury.

Many associations make the mistake at the start of determining on a low rate of dues in the hope of securing more members than if a higher rate were charged. The result very often is that the officers find themselves confronted with the problem of carrying out an extensive program without sufficient funds. Numbers are of course desirable, but an organization strong numerically but weak financially is at a decided disadvantage, especially when a long drawn out labor fight develops.

Many of the strong local associations of the country long since adopted the percentage method of collecting dues, with the result that during the past few years of extensive building operations, a number of them have accumulated a substantial reserve fund which always strengthens the position of an organization.

The strongest argument in favor of the percentage plan as opposed to the flat per capita charge is that the contractor who does the greatest amount of work, and therefore derives the most benefit from the association contributes the most to the organization in the way of dues.

To all local associations that are experiencing trouble along financial lines, and to all contractors who are considering the question of organizing associations, we urge that due consideration be given to the advantages contained in the so-called percentage method.

NATIONAL BOARD OF JURISDICTIONAL AWARDS IN SESSION.

Important Cases Up.

The regular meeting of the National Board of Jurisdictional Awards opened in Washington, D. C., August 4th.

Two important cases will be considered by the Board at the August meeting. One is the question of the re-hearing of the decision rendered August 2, 1920, under which the handling of all rods and material used in re-enforced concrete construction was awarded to the common laborers. The other is the application of the Associated General Contractors of America for the re-opening of the decision of the Board, awarding the placing of re-enforcing rods to the iron workers.

Both of these questions are of paramount importance to contractors doing this class of work.

TO SEEK TO SETTLE LOCAL JURISDICTIONAL DISPUTES.

Building Interests At St. Louis Would Organize Board To Endeavor To Eliminate Strikes.

A meeting attended by representatives of the Associated Building Interests of St. Louis and delegates from practically all of the local unions was held recently for the purpose of discussing the advisability of forming a local board for adjusting jurisdictional disputes.

It was the concensus of opinion that such a board could settle many questions that might otherwise result in strikes, and it is likely a permanent organization will soon be formed.

Calumet District

NEW FORM OF PUBLICITY FOR ASSOCIATION ENDEAVOR THAT SHOULD PROVE FAR REACHING.

Luncheon Club Asks For Message From Contractors on Their Organization Work.

There are many and varied ways of securing publicity, but the surest way is through real action, action that means something, that has a mission, and has a real news value to it.

The Building Trades Employers Association of Hammond has gone along striving always to accomplish things not only for its members, but, above its members, for the good of the prospective builder, the men employed in building activities, and the building industry as a whole. The big aim of the association has been to ameliorate conditions in the local building field to the extent that the business could be carried on with dispatch to the benefit of everyone concerned and the city itself in its expansion process.

There was no bias to the workings of the association though at times it has been accused of being selfish because it took sides in some aggravating problems. The organization has fought wage increases when such increases were considered detrimental to the continuation and encouragement of future building operations. In so seeking to hold things in check, that favorable conditions might follow, the craftsman was considered indirectly, for, a continuation of a reasonable wage meant, in the long run, that the building trades mechanics would find steady employment, where if wages were boosted to a high notch there would be a cessation of building.

The association has stood out in the open at all times and played fair in all its dealings. It has commanded respect little by little and by its action shaken off all taint of suspicion.

And now has come the reward. The past week an invitation was extended to the association to send a representative to the weekly luncheon of the local Lions Club to speak before that representative body of business men on the workings of the association and the building situation. What better publicity could an association ask? Here was an opportunity for the contractors to reach out into the many avenues of business, reach men at the head, lay its cards squarely on the table, create a new interest in building affairs, and inspire confidence that will help in days to come.

Such opportunities should not be allowed to escape and other city associations could well afford to follow up this advantage that has developed at Hammond and send men of caliber before business men's luncheon clubs to sound first hand, the message dealing with the aims, the purposes and aspirations of the contractors in association work they are carrying on.

SKY LINE TO RISE

Prospects Indicate New Elevated Contour For Hammond.

In a year's time, if plans do not miscarry, Hammond should have three eight-story buildings. They will be the new home of the First National Bank and First Trust & Savings Co.; the proposed 8-story office building to be erected by Dr. A. W. Lloyd, and the new theatre building to be erected next to the new bank building on Hohman Street by the S. J. Gregory interests. Several other large buildings are in "the wind," but have not yet been officially announced.

TOO MANY TO ACCOMMODATE

Carpenters Arriving In Bunches

There is no dearth of carpenters in the Calumet. They are flocking in daily from as far west as California intent on copping off some of the good wages they have heard about. Unfortunately the building wave here is not quite big enough to float the surplus and the result is that there are many idle members of the carpenter craft hanging around.

SO FAR SO GOOD

Hammond Piling Up Creditable Building Total This Year.

At the close of the third week in July, 1923, the building permits since January 1, 1923, were valued at $2,338,110. This year for the same period of time, the permits were valued at $3,611,380. For the same period of time in 1922, the total permits were valued at $1,271,975. In other words, this year's building record for the first seven months is greater by $1,200,000 over last year, which was then considered a record for Hammond.

PAST UNDERSTANDING

Why Men Will So Thoroughly Seek To Rule or Ruin.

It is hard to figure out why the building trades mechanics' unions in certain localities continually seek to stir up trouble and make it hard for the building industry to prosper when other men are idle and are anxious to secure employment. There are many men out of employment because of poor business, and yet some unions in the building field seem set on blighting building by advanced wage demands which, if continued, will undoubtedly throw craftsmen out of work who are now employed.

The word from Chicago is to the effect that the building industry there is traversing anything but a rosy path. The contractors of the "Windy City" are kept on the anxious seat by the hectic conditions that are ruling. Here is the lay-out: Quite a few of the building trades unions are clamoring for more pay; some of the trades threatening to strike; some of the craftsmen now striking; rumors that a few contractors are signing up agreements based on the increased demands; others denying that advances are being met. A fine line of encouragement for the prospective builder, eh what?

URGE ADVANCED TO SAVE DUNES AS CONVERTED STATE PARK

Chicago Hoosiers Back Move

It really seems as if Hoosiers were awakening to the necessity of preserving the State's natural scenery. At a meeting of the Indiana Society of Chicago at the Union Club recently a strong argument was presented for the preservation of the picturesque Dunelands in northern Indiana. It was advocated that every effort be made to make of that section a State Park.

The plan suggested incorporated a move for the raising of $100,000 by popular subscription to be augmented by a similar amount to be appropriated by the State Legislature. This fund, when collected, would be used for the purpose of beautifying the Dune Section along the south end of Lake Michigan, also for construction good roads and trails thru the area of wonderful sand hills and knobs.

It was announced at the meeting that one donation of $250,000 was in prospect as soon as the park project began to show results.

CALUMET BUILDING PROGRESS

Architects Berry, Wainwright & Co., Hammond, are preparing tentative plans for a new City Administration Building for Calumet City. The structure will have stone facing and is estimated to cost $50,000.

The contract for the new bank building at Calumet City, plans for which were prepared by Archts. Berry-Wainwright & Co., Hammond, has been awarded to Hansen Bros., 127 N. Clark St., Chicago, Ill.

Morris Bros., contractors on the new building for the Hammond Plumbing Co., are making nice progress and have the structure walls pretty well up.

The Public Construction Co., who is excavating for the new sky-scraper bank and office building at Hammond, has struck water and been forced to drive down cribbing as there are twenty-seven more feet to go down for the main footings.

E. E. COLE.

EVANSVILLE

BUSY BUT NOT RUSHED

Evansville Building Operations Holding Fairly Active.

Activity in Evansville building construction circles is holding up well with all contractors busy, good progress being made on work under way, and a fair volume of new projects in prospect.

There were no big contracts awarded the past week but several sets of plans for some good sized projects are expected to be ready for the attention of the contractors soon.

Residence work continues in good volume with an abundance of repair and remodeling work on all sides.

Among the most promising projects indicating an early maturity are a new recreational building for the Trinity M. E. Church and an extensive addition to the Guardians' Home. The latter structure is estimated to cost $65,000.

The best contract awarded last week went to the Tri-State Construction Co., and was for the erection of a new M. E. Church at Howell, the contract price for which was $36,500.

LABOR UNIONS SQUARE DIFFERENCES.

Carpenters Reaffiliate With Central Labor Council.

The local Carpenters' Union which has been going it alone for the past two years has reaffiliated with the Central Labor Council. The carpenters separated from the council on a disagreement of policy. The differences have been patched up and the carpenters went back into the fold August 1.

ASSISTANT BUILDING INSPECTOR NAMED TO AID IN INCREASED WORK OF CITY BUILDING DEPARTMENT

The petition of Building Commissioner Ed Kerth of Evansville, for a field inspector has been granted by the city council which has made an appropriation of $1,800 per year for salary.

Henry Koenemann, brother of Councilman Koenemann, was recommended for the position by Mayor Elmendorf and the appointment was confirmed at the safety board meeting. Several names were suggested for the position and Koenemann was selected on account of his knowledge of building construction. The duties of the new assistant began immediately following confirmation.

The building department was placed under the jurisdiction of the safety board May 1 when the new building code became effective. Previous to that time it was a department of the board of public works.

INDIANAPOLIS

NEW VIM CROPS OUT IN LOCAL BUILDING CIRCLES.

July Activity Makes For Nice Gain In Operations Over June Volume.

It is particularly gratifying to learn that building operations in Indianapolis showed quite a decided improvement in July over the volume of the preceding month. As matters had been going, local building for the past few months had been on a downward trend and since midsummer is usually a very listless period as far as building operations are concerned the recent pick-up in activity is that much more encouraging.

The estimated valuation put upon new construction work for which permits were issued during July amounted to $2,965,051 which was a gain of 63% over the June building business. Though there were 1589 permits issued in June as against 1499 in July the bulk of the work was of a larger scope last month. For instance, during July there were 24 permits issued for commercial buildings at a valuation of $836,890, while in the preceding month but 14 permits, estimating $396,415, were issued, a gain of 10 permits for an increased volume of $439,475. There were the 209 permits for residences issued during last month as against 197 the month previous. The estimated valuation of the new residences passed upon favorably by the building inspection department amounted to close to a million dollars, $908,239 in round figures.

There are those who see in the unexpected July revival of building activity a strong indication for greater activity from now on and a chance for a good fall building period ahead.

An analysis of the July permits, according to classification of building work started, shows the following:

Projects	Per.	Est. Val.
Accessory Bldgs.	277	$ 106,563
Business Bldgs.	24	836,890
Misc. Work	230	300,820
Public Bldgs.	9	598,985
Repairs & Alts.	748	192,553
Residences	209	908,239
Tenements	2	21,000
Total	1499	$2,965,051

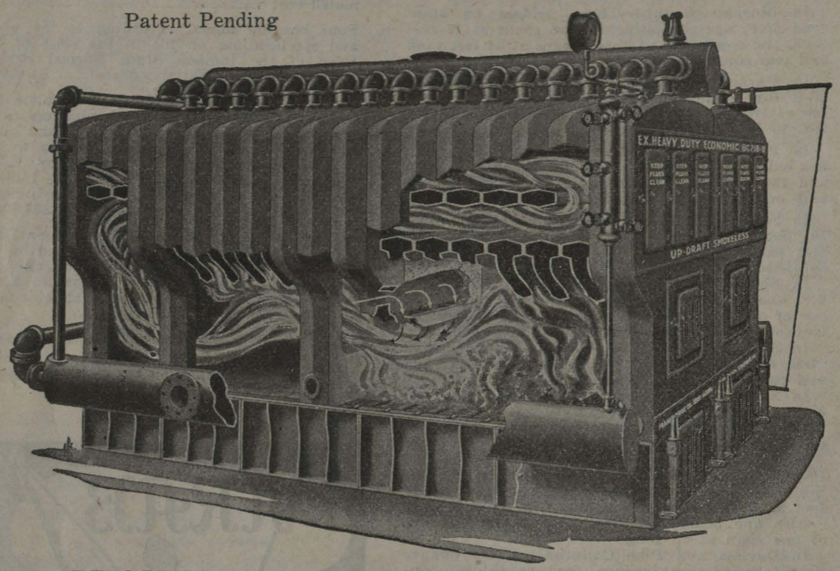
"BC" Series Up-Draft Smokeless Boiler

Patent Pending



The success or failure of a heating installation depends upon getting the right boiler. Next to efficiency, the matter of economy is an important point. PROX BOILERS are built for economical service and lasting satisfaction. They are so constructed that the maximum number of heat units are generated from every shovelful of coal consumed.

PROX UP-DRAFT SMOKELESS BOILERS

Burns all grades of fuel, such as bituminous coal, lignite, coke, oil, gas, wood.

Capacities - 1750 sq. ft. to 22,800 sq. ft. steam

You can't beat Celotex

FOR satisfaction to the men on a job you can't beat Celotex. It works easily, rapidly and without waste. It is easier to handle than wood sheathing and paper. It makes a stronger wall.

As plaster base it is ideal—forms a strong bond and makes no stains, rust spots, nor lath marks.

For roof insulation, Celotex is unequaled for convenience to the builder, for effectiveness to the owner.

When a prospective home owner talks with you remember the selling points of Celotex. Insulation that will cut usual fuel bills a fourth to a third. Smooth stainless plaster. Stronger walls. Inexpensive because Celotex generally costs less when in place than the materials it replaces.

Celotex is a strong, rugged, weather-proof durable building lumber made from the long, tough fibres of cane. It is better than wood sheathing—equals cork for insulation.

Celotex is used for sheathing instead of wood; for plaster base, roof insulation, sound deadener and exterior finish.

Stock sizes: Thickness 1/16 in.; width 4 ft.; lengths 8 ft. to 12 ft. Weight about 60 lbs. per 100 sq. ft.

Write for complete information to Dept. V-8, The Celotex Company, 645 No. Michigan Ave., Chicago, Ills. Branch Mill Representatives, The Indianapolis Celotex Co., 205 East Ohio St. Phone, Main 7089. William J. Ryan, Mgr.

HOOSIER GIANT BRIX

GIVE BETTER BUILDINGS AT LOWER COST

The chief object in any building project today is to secure better buildings at lower cost. The public demands economy without the sacrifice of quality. Architects and contractors are meeting this demand with HOOSIER GIANT BRIX, the ideal material for high grade, economical construction.

Homes of HOOSIER GIANT BRIX

In residence construction, whether for outside veneer or solid walls, HOOSIER GIANT BRIX offer all the advantages of brick construction and yet save 25% over the cost of brick. HOOSIER GIANT BRIX can be laid up in a small fraction of the time required for other construction, thus making big savings in labor cost. In beauty they match fine quality tapestry brick. They equal brick in strength and load-bearing capacity. HOOSIER GIANT BRIX are five-walled, vitrified, mat-face fire-clay units, and are adaptable for any construction where brick can be used.

For INDUSTRIAL BUILDING

HOOSIER GIANT BRIX and HOOSIER Building Tile are adaptable for every type of industrial buildings, such as schools, gymnasiums, churches, factories, garages, stores and other fireproof structures. This material insures big savings on construction cost and makes a building unsurpassed for beauty and serviceability.

Architects and contractors are invited to send for samples and illustrated literature describing HOOSIER GIANT BRIX and Building Tile. Let us submit estimates on your specifications.

PRESIDENT FOR ACTION

Takes Hold to Make I. S. A. A. Militant Aggressive Organization

"Everybody up and doing" is the slogan the new president, Walter Scholer, Lafayette, has adopted. He is convinced that the Indiana Society of Architects has a constructive mission to fill and he believes that accomplishment is possible if the membership will keep awake to the issues that arise. To that end he has written all committee chairmen to use discretion in the selection of the men whom they would appoint so that each committee this year will be in a position to actively function. Further, the president has urged the chairmen to give this matter their immediate attention so that the machinery of the Society under the new administration can be put into active operation.

NEW BUILDING CONSTRUCTION AT STATE FAIR GROUNDS HOLDS APPEAL FOR ARCHITECTS

One Million Dollars Worth of New Buildings Ready This Year

The Indiana State Fair, at Indianapolis, September 1 to 5, inclusive, in addition to attracting citizens of all walks of life to see the products that agricultural efforts produce and those things that make such production possible should, this year, carry a special appeal to the architects and builders of the state.

The State Board of Agriculture has just brought about the construction and completion of a number of new exhibition buildings and pavillions that are of attractive design and the last word in that type of construction. A million dollars has been spent for new buildings and the result of that outlay for new structures has produced one of the finest show places of its kind in the country. The buildings of brick, steel and concrete with tile roofs are the outcome of architectural effort and reflect much credit on the profession, in design, construction and modern equipment employed.

Among the day and night attractions announced, in addition to the agricultural exhibit, are: Mabel Cody, America's greatest aerial acrobat, will change from a rapidly moving automobile to an airplane and from airplane to airplane in mid-air. There will be a thrilling auto polo game each day. Gossett's Bucking Ford; many of America's greatest aerial acts; the very best racing program anywhere this season; a feature horse show in the large coliseum and a Fashion Plate Revue with gorgeous fireworks in front of the grand stand every night; a Better Babies Contest; Boys' Club Camp and a Girl's School of Home Economics; a fine Automobile Show, and many other features too numerous to mention.

I. S. A. REGIONAL MEETING CONTEMPLATED FOR THE CALUMET DISTRICT

Affair to be Held in September

Plans are now under consideration by the Indiana Society of Architects to hold the next regional meeting of the organization at Hammond, Ind., sometime in September. An invitation has been extended to the Society by the architects of the Calumet District to hold its fall regional meeting in that section of the State. preferably at Hammond.

Since meetings have been held at Fort Wayne, South Bend, Evansville, Terre Haute, Lafayette, Vincennes and Indianapolis a trip to Hammond will just about complete an official visit by the Society to all sections of the state and will be the first time any such meeting has been held in the Calumet district.

Hammond with her great steel mills should prove an attractive point for the architects, and the location would afford the members of the profession of northwestern and northern Indiana an excellent opportunity to participate in an I. S. A. gathering.

DRAFTSMEN'S MEMORIES JOGGED UP A BIT

Interesting Demonstration Put On by Indianapolis Architectural Club

Now and then someone arises in the course of construction operations to utter an indictment against architects, engineers and draftsmen, alleging that they have the habit (some call it a gift) of forgetting many important details. Be that as it may, quite a few architects do seem to forget continually that there are architectural profession organizations that do hold regular meetings. Particularly is this latter evidence amplified by some members of the Indianapolis Architectural Club who fail to remember the regular Tuesday noon luncheons, and even go farther in that they fail to recollect that absence without a valid excuse carries a 50 cent penalty.

Last week there was a horrible example of forgetfulness when a meeting was held and most everybody forgot to come. Something had to be done so the program committee got busy, and secured a memory improvement specialist from New York City, who was in Indianapolis, for a talk to the draftsmen at the meeting, August 12.

The speaker gave a very interesting dissertation on memory which depends on three basic fundamentals, impression, retention and recollection. Then to prove that memory development is possible to an almost unbelievable degree an assistant, to the principal speaker, to whom those present had been introduced proceeded to name off hand the various men about the room.

After the talk and demonstration it goes without saying that there will be no more forgetting in the Indianapolis architects' offices.

PENCIL SKETCHES

The spirit of goodfellowship is the keynote of all business today. Wake up, it's time to take a little of the spirit.

It's money that makes the mare go at the race, but it's new members that makes I. S. A. go 100 per cent.

Ambition and love for your work should be the driving force of success if we carry our dynamo with us.

ORGANIZATION AND CURRENT NEWS

Calumet District

OPEN SHOP DRIFT APPEARS TO BE GROWING

Many Cities Report Building Circles Casting Off Offensive Shackles.

Checking up on the building labor situation about the country a survey made by E. M. Craig, Secretary of the Building Construction Employers Association, Chicago, indicates that the open shop has made a big gain in building constructon circles in many cities.

The favor with which the open shop is being received and put into practice must be backed up by substantial reasons, chief of which is that conditions arising from closed shop methods must not be proving satisfactory either to the employe or the employer. Many writers after going over the situation advance the suggestion that Organized Labor has reached the zenith of its power, and no matter what the conditions in the financial world may be a gradual decline in the strength of Labor is about due.

The shift of conditions and sentiment from the closed to the open shop has not been brought about entirely by the steady advance in wage scales, but is traced to a large extent to the overbearing, arbitrary, tyranical attitude assumed by the Labor leaders, and to the corruption and graft that has grown out of the power exercised by the Labor organizations. The power that came to Labor, and which has been so flagrantly abused, was first started by the sympathy that Labor was able to command and was a real asset until the men who controlled the Labor element became intoxicated with the power that was theirs and created a fear of violence and damage to the person or persons, and their business, who dared to oppose the mandates promulgated by the Labor leaders.

There is no question but that organization among laboring men has its place and a proper function to perform, for only through organization is the laboring man and mechanic able to obtain his rights of recognition and an adequate established wage that will give him the opportunity to live and enjoy life, rear his family as all good American citizens should be reared, and meet as a whole the employers as a whole and work out problems satisfactorily to both sides. Both must approach the matters at hand in a spirit of friendship, with due consideration for the rights of each. It has been proved time and again that where Labor is inclined to be reasonably conservative and fair better conditions have been worked out both for the working man and the employer with a resultant stabilty that is far better than where the open shop rules. However, admitting the desirability for and the usefulness of organization, unless the heads of Organized Labor take heed of the trend of the times and adopt a more conservative course, temper their ambitions with reason, the Open Shop sentiment will continue to grow. Just as governments abuse their power, become tyranical, over-reach their goals, impelled by selfishness, and go into a decline, so will Organized Labor unless it employs for good the power it possesses.

GREAT GAIN

Hammond Hangs Up Some Building Permit Record

During the month of July a new activity seized upon the building construction operations of Hammond and when the final tabulation for that period was made by City Building Inspector Henry Vis it was found that the city had climbed into the charmed million dollars a month building circle, not only that, the volume of business ran fairly close to two million dollars, $1,807,875, making for the best building month Hammond has experienced in years.

There were 147 permits issued in July, 1924, as against 113 during the corresponding period a year ago, a gain of 34. The total estimated valuation of the new work passed upon favorably was 509% in excess of the July, 1923, valuation.

The official figures recorded are:

Time	Per.	Est. Val.
July, 1924	147	$1,807,875
July, 1923	113	296,840
Gain, July, 1924	34	$1,511,035

CALUMET BUILDING PROGRESS

The heavy rains that have been prevailing in the Calumet District the last few weeks have put quite a crimp in outside building operations. Excavating work was entirely tide up to allow the ground to dry out.

The contract for the new $10,000 substation for the Northern Indiana Gas and Electric Co., Calumet Ave., was awarded to M. A. Dickover.

Danner & Co., has picked off a couple of good projects. The contracts for the construction of the new swimming pool and bath house, $40,000, Todd Park, East Chicago, and the boiler house addition for the Franklin School, Robertsdale, were awarded to the above firm.

E. E. COLE.

EVANSVILLE

BUILDING MOVING ALONG QUIETLY

July Volume Below That Posted During Same Period in 1923.

As the months roll by no unusual features develop in local building circles to attract unusual attention, in fact, the season promises to be a very ordinary one devoid of color. Operations have been moving along steadily month after month furnishing work for contractors and building trades mechanics, but the scope of the projects is small, having to do mostly with residences, additions and alterations. There has been quite a volume of this work of lesser degree as is evidenced by the increased issuance of permits n 1924 over the number granted last year.

According to the latest figures of the building inspection department July ran true to the form set by the previous months developing no work of great moment, nor indicating any great rush of new work for the immediate future.

A comparison of the July figures for this year and last reveals that more permits, to the number of 77, were issued in 1924 than during the corresponding month in 1923. However, on the other hand, the estimated valuations a year ago were 28.6% greater than those of last month.

These are the figures for the two corresponding months:

Tme	Per.	Est. Val.
July, 1924	258	$180,834
July, 1923	181	253,600

NEW BUILDING CODE DRAGGED INTO COURT.

Restraining Order Asked To Prevent Enforcement.

Now the city has a building code wrangle on its hands. The new code recently put into effect contains quite a few provisions regulating building construction and specifies certain requirements in certain localties which are a new departure from the old order when a citizen could do much as he pleased with few exceptions as regards building.

It so happens that Taylor Conway, a property owner, desiring to build finds his scheme conflicts with the code and he has decided to contest the right of the code to regulate his action. He has brought suit in the Superior Court asking that the new building legislation be declared invalid and that the city be en-

joined and restrained from enforcing it

Should the court fail to grant a restraining order the plaintiff will be prevented by the city from putting up a modern five-room bungalow on his property, which he claims in his suit will damage him irreparably.

The city board of health recently compelled Conway to remove a cesspool from his property and when he proposed to erect a frame room to his dwelling to house a sanitary water system, the building code would not permit its erection; neither is Conway able, under the code, to erect a frame bungalow.

Law Invalid, He Says.

He affirms the enforcement of the city building code is in violation to the Indiana state constitution in that he is deprived of the use of his property. He further alleges that the code is void because the citizens of the state have never conferred the right upon the Legislature to delegate to the City Council of Evansvide the right to arbitrarily regulate the location of a frame building or the right to improve a home with a sanitary water system.

The code, according to Conway, prevents repairs being made to frame buildings in the city, and because of this one resident, the roof of whose home was recently partially destroyed by fire, is unable to repair the roof because his house is a frame structure.

ZONING SCHEME FOR EVANSVILLE BIDS FAIR TO BECOME A REALITY SOON

Effort of Months About To Crystalize With Sanction of The City Council.

The proposed new city zoning ordinance for Evansville, which has been in the hands of a committee of the city planning commission for the last seven months, was formally adopted at a meeting of the commission a few days ago. The proposed ordinance containing five major features, was ordered put into shape and arrangements for holding public hearings in each ward of the city, were started. The ordinance will be submitted to the city council as soon as the hearings have been finished.

Various Classes

The zoning ordinance is patterned after zoning ordinances in several of the larger cities. Class A is a zone restricted entirely to one and two family homes. No business establishments of any kind will be permitted in the Class A zone and such business places as are now located within the confines of the zone cannot be repaired or altered.

Class B is a zone including both one and two family homes and also apartment houses and tenements, but prohibitive to business. Class C will be known as the commercial zone, permitting ordinary business establishments not engaged in manufacturing. Class D will be restricted to light manufacturing and such industry as has no objectionable features to a residential dstrict. The fifth and last zone, known as Class E, is the unrestricted or heavy manufacturing zone.

Enforcement of Ordinance

The enforcement of the zoning ordinance will become a part of the duty of city building inspector Edward Kerth, if adopted by the council, and will be under the jurisdiction of the board of public safety. Maps and blue prints of the proposed zones have been prepared and were approved by the commission.

In preparing the proposed ordinance an attempt to eliminate conflict with the residential and business districts now established, was made and it is believed by commission members that very few protests will be registered against the adoption as a city ordinance. Council members in the various wards will be asked to act as chairmen of the ward meetings, in order that sentiment may be sounded out before the measure is put to a vote on the council floor.

The effort to effect city planning in Evansville was started soon after the passage of the law by the State Legislature and has never been allowed to lag. The move has had the support of the various civic organizations and all the citizens who had the future welfare of the city at heart. There is much satisfaction expressed now that the matter is rapidly nearing maturity.

FT. WAYNE

SLIGHT INCREASE SHOWN BY JULY BUILDING OVER THAT FOR JUNE

Figures Trail Those of Same Period a Year Ago

The building situation in Fort Wayne, while not up to the pace set a year ago, is fair with a volume of business of sufficient proportions to keep operations active. The big slump shown in June as compared with the business of previous months still held through July when the returns from the building inspector's office showed but a slight increase over the preceding month's figures.

The July volume for 1924 ran $371,993 behind that for July, 1923, with 14 less permits issued last month than during the corresponding period a year ago.

The figures of building inspector H. J. Korte show the following:

Period	Per.	Est. Val.
July, 1924	285	$ 769,272
July, 1923	297	1,141,265

ORPHANS' HOME PROJECT AROUSING FAVORABLE SUPPORT

Officials Aiding in Local Building Movement

It would seem as if the public officials of Fort Wayne are in favor of helping the building cause along. First the school board members encouraged building construction action by pushing forward several new school projects and now the county commissioners are inclined to follow suit. There is an indication that the latter officials have practically decided to go ahead with the erection of a new $125,000 orphans' home if the county council will make the appropriation at its meeting in September.

Public sentiment seems to favor the new institution and for that reason the commissioners are inclined to respect that sentiment above the need for a new jail and county infirmary though two such buildings are needed. The orphanage, however, is needed most and it is probable that the construction of the other structures will be laid over for consideration at a later date.

Various civic clubs are getting behind the move for a new orphanage and are expected to bring pressure to bear upon the county council members that will be influential in speeding the maturity of the proposed project.

INDIANAPOLIS

SCHOOL FACILITIES GREATLY INCREASED BY THIS YEAR'S CONSTRUCTION ACTIVITY

Over a Million Dollars Worth of School House Work Nearing Completion

Five new grade school buildings and five additions to present buildings will be ready for Indianapolis school children by September 8, term opening date, as a result of construction effort this season, says Jacob Hilkene, inspector of construction for the school board.

Buildings and additions will provide a total of ninety-five new rooms. They will accommodate approximately 3,990 children. The construction work cost approximately $1,302,812, raised by a bond issue last October.

The largest new building erected contains seventen class rooms and cost about $196,376.

Other new buildings are School 12, twelve rooms; School 70, Forty-Sixth and Central Avenue, twelve rooms; School 62, Tenth and Wallace Streets, ten rooms, and School 30, 40 N. Milay Avenue, ten rooms.

Additions have been made to school 23, Thirteenth and Missouri, six-room addition; school 38, Winter avenue and Bloyd street, twelve-room addition; school 67, 3615 W. Walnut street, ten rooms; school 27, Park avenue and Seventeenth street, four rooms, and school 39, State street and Lexington avenue, two rooms.

TERRE HAUTE

PROSPECTS PROMISE BETTER BUILDING BUSINESS

The word sent out by Noah D. Brill, local building inspector is that the building outlook for Terre Haute is growing brighter. There has not been much large work to date but some prospects are looming up to lend promise for the future.

Earlier in the season a strike of several of the building crafts put a damper on activities until the contractors had to take matters in hand, secured the support of civic organizations and business men and instituted the American Plan in the carrying on of their work. Since that time operations have picked up and progressed without delays or labor trouble.

New work in July was estimated to cost $147,865, it representing the valuation placed on the 258 permits issued during the month. The business recorded showed a falling away from that of July, 1923, when 302 permits were issued for an estimated valuation of $250,725.

Where Does Heat Insulation Get Its Real Test?

In the proving of a building material laboratory tests have their place. Any heat insulation should stand laboratory comparison to prove that it stops heat and cold equal to many times its thickness in common building materials.

Fourteen years ago Flax-li-num had passed every laboratory test. It has passed every one since that time. It is equal in stopping heat and cold to sixteen times its thickness in brick or to twenty-seven times its thickness in concrete.

But this is not the **proof** of heat insulation. That comes on the job itself.

Will it tear? Will it puncture easily? Will it warp, break or crumble? Is it easy to apply **right**? Will it last as long as the building?

These are the practical things that make one material superior to another. And Flax-li-num meets these practical tests. It was expressly designed to meet them after its makers had considered every other known form of heat insulation.

Flax-li-num is not rigid, nor is it limp and flimsy. It is half-way between the two extremes—a flexible board insulation. So tough that hammer blows won't damage it. Easy to handle, no danger of tearing it. And time is saved in installing it. Stays in place, does not sag. Can be forced in between the studding. The only pure flax fibre insulation made in flexible board form.

Flax-li-num is made in one-inch thickness for roofs, one-half inch thickness for walls. The right thickness, the right material, the right form. These three qualities combine to make Flax-li-num the most practical insulation on the market.

VIOLENCE BREAKS OUT IN INDIANAPOLIS BUILDING FIELD

New Building Badly Damaged While Two Other Projects Are Threatened by Jurisdictional Disputes of Labor

Early this week there occurred at Indianapolis an example of vandalism of such proportions at the new $1,000,00 Elks Building, nearing completion, that a storm of indignation has been aroused and a demand that no efforts be spared to apprehend those guilty of the outrage.

Sometime between Sunday afternoon and Monday morning an unknown person or persons entered the building and maliciously defaced all the interior metal doors and jambs that had been installed. Every door was hacked by some sharp instrument, such as a chisel or a hatchet, and the casings were pried from their positions and warped and bent beyond reclaim. The damage done is estimated at $10,000.

The affair is a mystery as there seems to have been no one who saw any person or persons entering or leaving the new building either Sunday afternoon, that night, or Monday morning. The damage was discovered early Monday when the foreman for the Dahlstrom Metal Door Company, arrived on the scene.

There has been labor trouble on the Elks Building now and then of a jurisdictional nature as to which craft should handle certain kinds of work. There was a dispute as to who should install the metal doors but the carpenters went ahead and finished the installation.

Some of the labor leaders object to the imputation that the vandalism is the outgrowth of jurisdictional disputes. Be that as it may, an investigation is on and a determined effort is to be made to round up the guilty parties.

Regarding the affair, John T. Cosgrove, first general vice-president of the International United Carpenters and Joiners Union says: The officers of that union are more than willing to co-operate in any effort to uncover information that would lead to the arrest and conviction of the party or parties guilty of damaging the Elks' building. "It is time this vandalism was stopped," he said, "and we, as union men, who are trying to keep organized labor free from the stigma that the imputation that this job was the work of any one trade organization would give, are going to help see that it is stopped." The damage done at the Elks' building, which he described as the worst kind of vandalism, is deplored, he said, by all high standing representatives of organized labor.

This latest outrageous matter at the Elks' structure recalls a somewhat similar circumstance, some time since, when vandals entered the new home of Dr. W. F. King, secretary of the State Board of Health, just before he was to move in, and hacked up all the fine interior mill work, causing considerable damage and forcing the contractor to replace the wrecked wood work.

Regardless of who caused the above serious damage there is no getting away from the fact that jurisdictional disputes between union crafts are a thorn in the side of the building industry and will continue to add to its burden as long as so much acrimony is aroused by them. Even now at Indianapolis there are such disputes at issue at the Manual Training High School and the new Indiana War Memorial upon which construction operations have just been started. So much feeling has been aroused that police protection has been asked to safe guard the property.

PICK-UP IN BUILDING OPERATIONS IN INDIANA SHOWN BY JULY FIGURES OF BUILDING INSPECTORS.

Hammond Tops All Other Indiana Cities With 509% Gain.

Mid-summer, according to the July reports from the offices of the building inspectors of eleven Indiana cities where such figures are kept as a matter of offical record, proved a fine building period in which there was a fine revival of operations with a resulting volume that showed a big increase over the business posted both in June, 1924 and in July, 1923. The July figures with an estimated valuation at $7,855,299 showed a gain of 75.3 per cent over June building this year and a gain of 30.8 per cent on the operations recorded during July, 1923. Though there were 60 less permits issued in July, 1924, than during the corresponding period last year the estimated valuation this year ran $1,852,019 over the July, 1923, valuation.

Except for Indianapolis which showed a 44 per cent gain over the figures of a year ago the big burden for the recent July increase fell upon the smaller cities of Elkhart, Gary, Hammond, Muncie and Richmond, all of which came through nicely, while Evansville, Fort Wayne, Kokomo, South Bend and Terre Haute lagged for substantial losses.

Hammond was the "big noise" for July, hanging up a 509 per cent gain. Then came Gary with an increase of 219 per cent to be followed in this order: Richmond, 130 per cent; Muncie, 59.3 per cent; Indianapolis, 44 per cent; Elkhart, 3 per cent. On the loss side are to be found these cities: South Bend, 76.8 per cent; Kokomo, 76 per cent; Terre Haute, 41 Per cent; Fort Wayne, 32.6 per cent, and Evansville, 28.6 per cent.

The July, 1924-1923 figures as reported by the building inspectors are as follows:

	1924		1923	
Cities	Permits	Est. Val.	Permits	Est. Val.
Elkhart	29	$ 92,900	18	$ 90,100
Evansville	258	180,834	181	253,600
Fort Wayne	285	769,272	297	1,141,265
Gary	---	1,314,315	---	411,325
Hammond	147	1,807,875	113	296,840
Indianapolis	1,499	2,965,051	1,413	2,057,748
Kokomo	---	34,620	---	144,581
Muncie	---	173,124	---	108,635
Richmond	67	89,982	52	39,055
South Bend	368	279,461	594	1,209,406
Terre Haute	258	147,865	303	250,725
Total	2,911	$7,855,299	2,971	$6,003,280

INDIANAPOLIS

***Department Store:** $300,000.00, 7 sty., basement and sub-basement, 36x 120, at 20 West Washington. Archt., Vonnegut, Bohn & Mueller, 610 Indiana Trust Bldg. Owner, Selig Dry Goods Co., Samuel L. Hahn, pres., 20 W. Washington St. Low bidder, R. W. Bauman & Co., 1319 Bates St. Will award contract shortly. Brick, terra cotta front.

Residence and Garage: (10 rooms, 3 baths, servants' quarters, 3 cars): 2 sty., Washington Blvd. and 40th St. Archt., Frederick Wallick, 308 Hume-Mansur Bldg. Owner Charles Mayer, Jr., care archt. Archt. receiving bids to Sept. 1st, on complete contracts including roadways and landscape work. Face brick, veneer, Indiana stone trim, tile rfg., ornamental iron, steel casement windows, steam htg., plmg., and elec. fix.

Residence, Servants' Quarters, 2-Car Garage: (8 rooms, 3 baths): 2 sty., 41st and Washington Blvd. Archt., Frederick Wallick, 308 Hume-Mansur Bldg. Owner's name withheld. Archt. receiving bids on complete contracts to Sept. 1. Face brick, veneer, Indiana stone trim, slate roofing, ornamental iron, steel casement windows.

Residence: (12 rooms, 3-car garage, servants' quarters): 2 sty., River Road. Archt., Frederick Wallick, 308 Hume-Mansur Bldg. Owner's name withheld. Archt., receiving bids to Sept. 15th, on complete contracts. Face brick, veneer, Indiana stone trim, slate roofing, steel casement windows, marble & tile work, pump house.

Residence: (8 rooms, 2-car garage, 3 baths): 2 sty., lot 21, Golden Hill. Archt., Frederick Wallick, 308 Hume-Mansur Bldg. Receiving bids on complete contracts August 25th. Owner, Wendell Sherk, care archt. Face brick, veneer, slate roofing.

Apartment House: 7 sty., 80 apts., $500,000, Lake Shore Drive, St. Petersburg, Fla. Archt., Frederick Wallick, 308 Hume-Mansur Bldg., Indpls. Owner, Robert T. Hughes, care Union State Bank, Winter Park, Fla. Preliminary sketches. Project being financed. Re. conc., exterior stucco, Spanish tile rfg., marble and tile work, elevators.

Apartment House: $60,000, Lake Shore Drive, St. Petersburg, Fla. Archt., Frederick Wallick, 308 Hume-Mansur Bldg., Indpls. Owner, Robert T. Hughes, % Union State Bank, Winter Park, Fla. Preliminary plans. Re. conc., exterior stucco, Spanish tile rfg., marble and tile work.

Rectory: $40,000, Winter Park, Fla. Archt., Frederick Wallick, 308 Hume-Mansur Bldg., Indpls., Ind. Owner, Episcopal Diocese. All correspondence, care archt. Preliminary plans, hollow tile, exterior stucco, Spanish tile rfg.

School Building: Alt., group of 7 bldgs., Orlando, Fla. Archt., Frederick Wallick, 308 Hume-Mansur Bldg., Indpls., Ind. Owner, address all correspondence, care archt. Project to mature this winter. Stucco over hollow tile.

Hotel: (add., roof garden): Hotel Angebilt, Orlando, Fla. Archt., Frederick Wallick, 308 Hume-Mansur Bldg., Indianapolis, Ind. Owner, Robt. H. Hackney, Winter Park, Fla., Tile paving, pergola enclosures, redecoration.

Residence (alt.): Winter Park, Fla. Archt., Frederick Wallick, 308 Hume-Mansur Bldg., Indpls., Ind. Owner, Hal G. Cady, Winter Park. Work in progress. Structural changes, redecoration, new rfg., orn. iron, landscaping.

Residence (alt.): 2847 N. Meridian St. Archt., Frederick Wallick, 308 Hume-Mansur Building. Owner, R. H. Sherwood, care archt. Structural changes. new heating and plumbing, redecoration. Work started.

***Church:** $40,000.00, Hamilton, Ohio. Archt., A. A. Honeywell, 413 Penway Bldg., Indpls. Owner High Street Church of Christ, Rev. Brogdon, pastor, Hamilton, O. Bids rejected. May revise plans and ask for new bids this fall.

***Gymnasium:** $20,000.00, Liberty township, Hendricks County, Ind., at Clayton. Archt., Self and Allen, 2215 E. 10th St., Indpls. Owner, D. S. Hazelwood, Trustee, Clayton, Indiana. Bids rejected. Project held up by State Tax Board. Definite data later. Brick.

City Hospital (improvements): $75,000.00 includes (2) driven wells, a water softening plant and new boilers. Engineer, Chas. Hurd, 1405 Merchants Bank Bldg. Owner, City of Indianapolis, Board of Health and Charities, City Hall. Plans in progress. Owner will advertise for bids soon.

Postal Sub Stations: (2) 32nd and Illinois and 42nd and College. Archt., Bass, Knowlton & Co., 312 N. Meridian. Owner, Raymond D. Brown, 341 Postal Station Building, Lessee, Postoffice Department, Indpls. Post Office, Robert H. Bryson, postmaster. Plans in progress. Brick, 1 sty. & bas.

Bus Terminal: 2 sty. Ky. and Senate Aves. Archt., not selected. Owner, Indianapolis Motor Bus Terminal Assn., A. G. Harmon, Franklin, Ind.; Norman Harvey, Greenfield, Ind. Contemplated. Probably mature early spring.

Radiator Guards for Asylum for the Insane at Julietta, Ind. Owner, Board of County Commrs., Harry Dunn, Auditor, Court House, Indianapolis. Owner receiving bids to close August 27th at 10:00 a. M.

Lumber Yard, Mill and Office: $75,000. Private plans. Owner, Dynes-Pohlman Lumber Co., 28th and Monon. Plans in progress. Frame and brick.

***Grade Schools** (15): general alterations and remodeling, $232,041.00. Owner, Board of School Commissioners, 150 N. Meridian St. Owner receiving sealed bids until 11 o'clock A. M., Friday, August 29th, 1924, for the following buildings:

THE ARCHITECT OF TODAY

By PAUL THOMPSON

Goethe once said, "Architecture is frozen music." It is, at least, putting into material and lasting form beauty, sentiment and character. Since earliest times, architects have recorded in the designs of temples, churches, palaces and other great buildings, national ideals and characteristics. From the architecture of Egypt, Assyria and Babylonia, and later from Greece and Rome, we may learn much of the people who lived in those countries. However, the architects of those early times, even through the period of the Renaissance, strove largely for splendor and magnificence; they were seldom handicapped by being obliged to combine the grandeur of their structures with great utility, which is chiefly the problem of the architect of today.

The modern architect must know more than beauty of outline and artistic design. He must combine art with the unemotional science of engineering, whch deals with endurance, utility, stress and strain in the construction of a building. In the cities of today utility does not stand at attention while grandeur struts by. In fact, in the construction of most of our large city structures, utility receives first consideration. Not only must the greatest possible use be made of both space and material, but provision must be made for elaborate sanitary, heating and lighting equipment, as well as for elevators and stairways. In addition, the building must be a thing of beauty.

Modern architects are accomplishing this, and more, for their efforts are not confined to the large imposing structures, as they were centuries ago, when architecture was something for the government, the church, the nobility, and the extremely wealthy, to consider. Then the average man never dreamed of having an architect design his home. But today many of our architects, including some of our greatest, devote much of their time to the designing of homes even for those of very modest incomes. They are giving us charm and individuality in homes that are arranged for comfort, convenience, and the greatest possible utilization of space and material. The accomplishments of the architects in this direction during the past decade are particularly noteworthy. Homes may cost a little more today than they did ten years ago, but in most cases they are far better homes.

Though many American architects have received foreign training, there are schools in the United States that are doing much for American architecture. The quality of the instruction in these schools is of a very high character, as shown by the recent presentation of a medal for the best record of accomplishment in the teaching of architecture, to President Angell of Yale University. This honor was bestowed by the Societe des Architects Diplomes par le Government Francais, through its president, Chester H. Aldrich. This society is an organization of architects who have received diplomas from the School of Fine Arts in Paris.

After getting the best that America can offer them in the way of instruction, many architects of this country visit Europe to round out their education and receive the inspiration that can come only from a personal acquaintance with the masterpieces of the great architects of the past. American architectural organizations encourage and aid in this study by offering scholarships for the best efforts in certain fields. The largest of them is the Le Brun Traveling Scholarship, offered by the American Institute of Architects. (From The Pure Iron Era.)

REGIONAL MEETING ASSUMING ATTRACTIVE PROPORTIONS

Date Set for September 18th

A big time is brewing right now for the members of the Indiana Society of Architects who attend the regional meeting to be held at Hammond, Ind., September 18th, and the recipe is guaranteed to be a real finished product when the members of the profession arrive upon the scene.

Carte blanche has been given Karl D. Norris, East Chicago, to deal with the Calumet District architects to handle the local arrangements and he has written back that plans are under way for the most attractive regional meeting the I. S. A. has ever held. The architects up there, aware of the fact that their section of the State is possessed of many distinctive features, are anxious for the other Indiana architects to pay them a visit so that they may be convinced of the Calumet District's attractiveness.

It has been suggested that a side trip be made to and through the Inland Steel Co.'s plant at Indiana Harbor, as that steel mill is closer to Hammond than any of the others in northern Indiana and offers the same conception of the steel making industry as any of the mills.

As the Associated Building Contractors of Indiana will be holding a district conference session in Hammond on the same day it has been proposed that the sight-seeing trip to the steel mill be made a joint one with a wind-up at a big fish fry out at one of the lake shore resorts that evening.

THIS SECOND HONEYMOON NOT LIKE THE KIND BRIGGS PORTRAYS

Honey Bees Take a Hand In the Affair

Just to sort of look over the city where they spent their honeymoon, nine years ago, Architect A. E. Neucks and his wife of Evansville, motored up to Indianapolis this week. They dropped into the Recorder office for a few moments and rather took the editor by storm when they introduced three little Neuckses, Jack, Robert and Marylin.

Al reported a fine drive except that they passed through a traveling swarm of honey-bees, some of which got into the car and vented their rage on several of the occupants.

ORGANIZATION AND CURRENT NEWS

THE GENERAL LABOR SITUATION IN THE BUILDING FIELD

Wage Advances Granted in Places—Material Prices Grow Firmer

Wage scales for skilled craftsmen in the building trades held firm generally through July.

In many cities advances have been accorded the workers since spring. There are isolated cases where reductions have been made, but these have been confined largely to small centers where operations have been light.

The payment of bonuses has been quite largely eliminated, although this does not signify a reduction in labor costs, as the bonsuses simply have been absorbed in the advancing wage scales.

During the last three months wage increases ranging from 2½ to 12½ cents per hour have been granted to the principal building trades in Kansas City, Cincinnati, Pittsburgh, St. Louis, Baltimore, Buffalo, Louisville, and Des Moines. Other cities in which some wage increases have been granted, mostly to plasterers, bricklayers, painters, electricians and carpenters, were Chicago, Dayton, Columbus, Milwaukee, Atlanta, Shreveport, St. Petersburg, Fla., Youngstown, New Haven, Johnstown, Pa.; Erie, Cleveland, Houston, Birmingham and Sharon, Pa. In Chicago steamfitters announced a raise to $1.27½ an hour, effective July 1.

St. Louis continued to lead the country with the highest wage scale. Common laborers were reported as receiving from 45c to $1.10 and bricklayers $1.75 and up.

The common labor rate for the nation as applied to pick and shovel men was 56c for July as against 54c for July, 1923.

Bricklayers in the leading cities were reported as receiving from $1 to $1.75; carpenters, 70c to $1.60; plasterers, 90c to $1.75; hod-carriers, 30c to $1.25; structural iron workers, 65c to $1.50; lathers, 75c to $1.50; masons, 85c to $1.50; painters, 65c to $1.37½; plumbers, 70c to $1.50; electricians, 70c to $1.50; hoisting engineers, 62½c to $1.67½; common laborers, 25c to $1.10.

While the curtailment of general business has released a large amount of common labor for the building industry, it is to be noted that the new 2 per cent immigration law greatly lessens the likelihood of more mechanics being available from Europe. Approximately 27,000 building craftsmen entered during the current year, but, with the reduction of the quota, this number may be reduced by one-half during the next year. This means that the apprenticeship training movement will have to be depended on more than ever before to supply the 35,000 workers required each year to fill the gaps caused by death and the withdrawal of members to other lines of industry.

In an effort to supply skilled workmen, the building trades unions and contractors throughout the country are pushing efforts to establish building trades apprenticeship schools.

A national movement to further apprenticeship in the bricklaying trade has been launched by the Mason Contractors' Association of the United States and Canada which has prepared a program calling for the expenditure of $42,000. The association states that under its plan it can guarantee 10,000 more apprentices within the next four years without interfering with the rules of the Bricklayers' International Union.

The Materials Market

The building materials market showed a firmer tone during July than at any time during the past three months. Most grades of lumber were stabilized at June prices although many classes of southern pine registered material advances. While the decline in structural steel continued it was not as pronounced as in June. Common brick was slightly lower in some Middle Atlantic cities. Other starting materials were unchanged generally, except in Atlanta where some advances were recorded.

Calumet District

REVEALED BY INVESTIGATION

General Building Situation and Conditions Interestingly Set Forth

A special report on the building situation and conditions just issued by the National Industrial Conference Board contains much of interest for those of the building construction industry in that it sets forth influences that have swayed and are still effecting the industry, advances a great deal of useful information, suggests remedies that might well be employed to improve various phases of the industry, and also sounds an optimistic note for the future.

This report is the result of a thorough investigation conducted by Cuthbert Hicks and his assistants of the Conference Board's research staff. Some of the salient conclusions reached and those of particular import are:

Building construction in the past two years, 1922-1923, reached unprecedented levels, both in volume and cost. The huge volumes rolled up were due to the accumulated shortage of construction in relation to the growing needs of the population and of the industry, a result of war conditions, the effect of which reached into several years after the conclusion of the great struggle itself. The increased costs are attributable to the advanced levels of prices and wages and the relative shortage of labor in the face of the heavy demand put upon the available supply.

The expansion of the building construction effort has been a major factor in general business activity since the war, and will continue to exercise its influence for some time to come. Although building costs seem destined to remain at high levels, and although there has been some recession of building operations as shortages of certain types of structures have been filled in some sections of the country, there is every indication that a large volume of general construction work is likely to continue for several years.

Summing up the outstanding needs of the building industry the report advances these: The development of new sources of labor supply, better methods of financing, the standardization of structural materials and methods of construction, the reduction of the wide seasonable fluctuations in construction activity, and a wise restraint of tendencies toward over-expansion, especially when free capital is plentiful, through more com-

prehensive and standardized information regarding the volume of and demand for building construction and other factors affecting the cost and return on the proposed investment. Perhaps in no other industry is there greater need for guidance in production, costs, supply and demand than in the building industry.

It would appear from the report that one of the outstanding features of the present situation is the shortage of available homes of from $3,000 to $5,000 for persons of moderate incomes. Fact of the matter, there does not seem to be sufficient profit in constructing homes of that type to warrant activity of investors in that field, thus causing a shortage of shelter for people of small incomes. In other words, such classes of buildings as business and industrial, the higher type of dwellings, and apartment houses offer a better return upon the money invested, thus proving more attractive and crowding the smaller residence work to the rear. The residential builder is not and can not afford to be a philanthropist, and to substantiate that contention the report sets out various tables of cost and other comparisons.

STREET IMPROVEMENT ENCOURAGES BUILDING PROSPECTS

Big Projects to Arise Along Hammond's Widened Thoroughfare

South Hohman Street, Hammond, which has been widened after considerable effort, through city government and contractors' activities, gives every promise, within a year, of justifying the effort that has been put forth to improve that business district of the city.

The east side of the thoroughfare was set back twenty feet, thus adding that much to the width and immediately a building Boom seized upon quite a few of the property owners.

Prospects that promise a progressive and metropolitan appearance to Hammond's revamped business artery have developed as follows:

Ten story bank and office building, excavating under way.

Paxton business building, in course of construction.

New Lloyd building assured.

New theatre, adjacent to above bank building, foundation to be put in this fall, superstructure to start in spring.

Show rooms and offices for Northern Indiana Gas and Electric Co., 5 stories high, site deal closed.

EMERGENCY SITUATION AROUSES IRE OF BUSINESS AGENT

Contractor Puts Hand to Throttle of Hoisting Engine and Gets Rise Out of Union

Just to sort of let everybody know that the Unions have not dispensed with the business (?) agent, who seems to make other people's business his, one of that gentry popped in at the new hospital building and sought to stir up trouble.

It all came about because the contractor, in a pinch, ran one of the hoists for a couple of hours, just to fill in, which action brought the business agent for the hoisting engineers to the scene on the hop, step and jump, all out of breath, who proceeded to issue an ultimatum and explicit instructions to the contractor. Since it was only a case of emergency the contractor managed to keep things moving and the B. A. has moved on in an endeavor to find other circumstances that will be conducive of producing the weekly pay check.

LOOKS LIKE INTAKE WOULD BE ABLE TO FILL THE BILL BY NEXT SUMMER AT LEAST

Once Over Lends Encouragement

Activity out at the new water-works intake on the lake front is moving along and an inspection there the other day led to the belief that Hammond ought to be able to secure an additional water supply sometime the coming winter. Thanks to the skies above there was a bountiful amount of moisture this summer that descended therefrom to keep Hammond's lawns green and thriving while the new intake was being put into shape for heavy duty later on.

HE PROBABLY HAS HEARD NOTHING ABOUT EXTENDING THE BUILDING SEASON

If He Has, He Should Be Reported to Secretary Hoover

Now to add to human woes and disappointments the weatherman struts forward upon the stage in that drama called "Life," and nonchallantly announces that one scene is to be deleted from this year's pageant. He says there will be but three settings, Spring, Fall and Winter. He cheated us on Spring, now admits he cut out the Summer and leaves us to wonder if he'll fudge on Fall. It will be just like him to elaborate on Winter and tire us all out with that act.

You might just as well pack up that Palm Beach suit, get out the medium heavies and slip off for that Fall fishing trip while the slipping is good. Oh, yes, the slipping may be better next winter, but fishing is not good then.

CALUMET BUILDING PROGRESS

The contract for the Leonard Plaza, S. Hohman St., Hammond, was awarded to Geo. Pearson & Son, at $21,000.

J. Wesley Reed, Hammond, on a bid of $35,000, was awarded the contract for the construction of a boy's orphanage on Sheffield Ave., to be erected by the Carmelite Sisters. The structure is to be of brick, two stories high, 45 by 70 ft.

L. and R. Elster are having plans prepared by Architect Mac Turner, Hammond, for a store and flat building on E. Sibley St. The structure will contain three store rooms and five apartments, and is estimated to cost $40,000.

Though the contract probably will not be let till early next spring, the school authorities of Calumet City have retained Architects Berry, Wainwright & Co., Hammond, to prepare plans for a new high school.

E. E. COLE.

FT. WAYNE

BUILDERS AND BUILDING INTERESTS HAVE NEVER CEASED TO ENCOURAGE ACTIVITY AT FT. WAYNE

Best Building Records in City's History Have Followed

No other city in Indiana, all things considered, has shown to better advantage in the past few years in the matter of building construction launched and put across than Ft. Wayne. In 1922 the city's volume of building work ran to record figures, surpassing all previous yearly efforts, and then came right back in 1923 and shattered that record. But that is not all, this year to date local building construction activity has continued to run ahead of that of 1922 and is holding close to the pace set in 1923.

There are numerous reasons for this great and sustained building movement in Ft. Wayne not the least of which is the encouragement publicly sounded constantly by the building construction interests which have worked hard to assure propitious conditions, inspired con-

fidence, and urged a continuation of building operations, backing up their arguments with reason and facts.

Over two years ago the building interests began a systematic encouragement campaign and advised the public to build, pointing out that prices were stable and the outlook for prosperity was good, although business was dull and prospects were rather gloomy to the average business man.

Ft. Wayne builders based the above advice on practically two points. First, the need of more buildings. Second, on the belief in the vision of big business men. When these men saw there wasn't much chance of the European mess being settled, instead of sitting back and waiting for conditions to adjust themselves, they opened up new markets in South America, Africa and other parts of the world, this had the effect of stimulating the domestic market, started the factories and payrolls going, then in turn started the buildng activity which has given the country the prosperity it has been enjoying for over two years.

And the local encouragement brigade is still at it despite the fact that in the past two months business has slowed up to a considerable extent, principally on account of the unwarranted pessimism broadcasted all over the country, unwarranted because there hasn't been and there isn't now an honest reason why there should be a slump in business this year even though this is a presidential year. They urge that because there was a slump in the past on these presidential years doesn't mean that there must be one this year. In the past invariably there were some serious questions to decide, which would have had a general effect on business.

At present most of the major problems are settled, and not only that, the big bankers have practically decided to loan about a quarter of billion dollars to Europe, and that means the European question is about settled, and most of this money instead of being sent out of the country will be spent right in the U. S. A. and if that doesn't mean prosperity, what does?

In conclusion, Ft. Wayne builders say if they were justified in advising building a little over two years ago when business looked so gloomy, what about now when the markets of Europe are about to be opened to us?

"Don't wait; build now," is the word that has kept Ft. Wayne building going and going good.

INDIANAPOLIS

CRIMINAL LAWLESSNESS OF A MOST DESPICABLE NATURE

No Possible Way of Condoning Such Action As Crops Out In Indianapolis Building Field

Referring to the recent vandalism perpetrated at the new $1,000,000 Elks Lodge when metal doors and casings throughout the building were irreparably damaged, with chisels and crow bars, to the extent of $10,000, the Indianapolis News editorially said:

"There have in the last few months been several cases of destruction and attempted destruction of property, and in all of them there were labor differences. Several months ago the steel pillars of a building in process of construction were so loosened that they fell in. Here the question was one of union and non-union labor. Other cases appear to have involved jurisdictional disputes, the members of one union insisting on their right to do work that was being done by the members of another. This was the trouble in regard to the new building of the Elks. The point at issue was whether the metal doors should be placed by the carpenters or the structural iron workers. These doors, after having been placed, were hacked by scoundrels to such an extent as to make it necessary to put in new ones, the loss being estimated up to $10,000. In all the cases, one of them involving men who traveled some distance from Indianapolis to work their ruin, there were labor disputes. Now it is said that the war memorial building and the Manual Training School building are threatened —and here again there are labor differences—and work on them is being carried on under police protection.

"The trade unions of Indianapolis and their leaders realize that no one is more deeply interested than they in bringing to justice the criminals, and in making it clear that such crimes as these will not be tolerated. Labor union leaders clearly see that they can not afford to be suspetced of condoning such criminal acts, or even of being indifferent to them. They are accordingly proposing to cooperate in all measures taken to hunt the rascals down. The police and detectives should be able to count on the most cordial and effective co-operation of the labor unions. A crime is a crime, no matter what the end sought by those guilty of it. Society will find a way to protect itself, as it always has done. As for organized labor, it can protect itself only by drawing the line clearly between itself and the wreckers who have been at work in this town under the wicked impression that they were serving the cause of labor.

"It is shameful that it is necessary—at least in three cases—to carry on building operations under police protection. The men who by their crimes have compelled such precaution to be taken do not represent labor, but the demonstration of the fact can be made only by labor itself. The people of Indianapolis will not submit to such terrorism, nor will they rest quietly till the criminals are detected and punished. The heads and members of our trade unions will, if they are wise, and awake to their own interests, do everything in their power to stop such outrages, and to insure the punishment of those guilty of them. Nothing could do as much to strengthen them in the confidence of their fellow-citizens, and to win for them the approval of the community. Indianapolis is not to be Chicagoized and the sooner all interests get together to prevent this the better."

NO PLACE FOR AN ARCHITECT

Steeple Chase Riders Though Would Be Right At Home

"No wonder there are no architects in that territory directly south of Indianapolis in the section along the Ohio River and some miles back from that stream," says L. A. Turnock, architect, Indianapolis. "If an architect was down there and had many projects he'd have to visit he'd soon get so he couldn't draw a straight line from the jolting that would be his in riding around.

"After that trip from New Washington to Jeffersonville my auto is a regular hurdler and I feel qualified for any steeplechase proposed; anyone who can stick in a seat over that route could surely stick in a saddle even on a bucking bronco."

L. A. advances the information that down there they don't know what a detour sign is, at least he suspects as much for he got onto a road without any warning and found a series of concrete culverts being installed, and after bucking over each he thought it was the last only to find more ahead. To turn back was just as bad as to proceed, so, he kept on going and bouncing, much as a jack rabbit hopping along. He says the scenery was magnificent and southern Indiana should herald it more, but, should also flatten out the roads more, for it is really not so pleasant to be forced to crack your head continually against the top of the car.

School No. 2, located at 700-710 N. Delaware St., auditorium ceiling, plumbing and heating. Estimated cost, $16,750. Archt., Donald Graham, 1126 Hume-Mansur Bldg.

School No. 4, located at 630 W. Michigan St., plumbing, stairs and repairs. Estimated cost, $15,000. Archt., McGuire and Shook, 320 Indiana Pythian Bldg.

LABOR OFFICIALS OPENLY AND UNEQUIVOCALLY CONDEMN SUCH VANDALISM AS WAS PERPETRATED AT INDIANAPOLIS

No Mincing of Words in Public Statement

The outbreak of violence in the Indiana building construction field recently, resulting in malicious destruction of property at the new $1,000,000 Elks Building, Indianapolis, where all the metal doors in the structure were irreparably ruined by hacking with a sharp instrument, the destruction of some four hundred metal lockers at the new high school at Connersville, threats of further violence at the Manual Training High School, Indianapolis, where construction work is under way, and also at the recently started Indiana War Memorial is a serious menace to the building construction industry that, if permitted to continue, will prove a real hardship to everybody therein engaged as it is a trend toward terrorism that would intimidate and cannot but have an effect that will put a check on construction activity.

It would seem to the public on the face of the evidence at hand that there is a conspiracy, probably with headquarters in Indianapolis, to damage construction work in Indianapolis, in other Indiana cities and in neighboring states, as a result of jurisdictional disputes between trade union organizations. Such tactics are along the old plan that brought union labor into disrepute in various parts of the country and i tis the very thing against which the responsible labor leader directs a relentless fight.

Labor Officials Appreciate Danger of the Situation

Leaders of labor organizations realize that the whole theory of the labor movement is based on fair play and the law and that vandalism is the shortest road to failure. That such is their view is indicated by the summary action taken the past week by the business agents of the building trades unions at Indianapolis who at a special meeting, following the vandalism at the Elk's Building, discussed the matter, and of the thirteen agents present eleven of them endorsed the following statement denouncing acts of violence and vandalism:

Deplore Such Tactics

"To the Citizens of Indianapolis:

"Believing that the good citizenship of Indianapolis is not only entitled to a statement from the organized labor bodies of the city, but further that it is anticipating such a statement, we, the undersigned, duly accredited representatives of our respective organizations, take this method of making our position clear in reference to the events of the last few weeks which have culminated in the dastardly acts of vandalism on the new Elks' Club building, now being completed. Though we regret the necessity for making this statement, we do so in earnest sincerity and trust that it will be so received.

"The organized labor unions of the city, their individual members and their respective representatives are as a whole honest, law-abiding and industrious, desirous of protecting the city from any acts of lawlessness which would in any way detract from its fair name. They are subject to the same emotions, ambitions and desires as any other organization or citizen, regardless of occupation. They believe in law and order, and for its enforcement without prejudice by the constituted authorities. They believe in and demand that the law breaker be sought out and punished, regardless of his station in life, his affiliations or his influence. They likewise demand that the innocent be protected from any acts of lawlessness and from any suspicion of committing the same.

Settle Disputes Legally

"Labor has lawful and legal ways of settling its disputes. Any act of violence, sabotage, slugging or the like, which may be done under the guise of trade unionism, is a blow at labor itself and commited by those who are not and could not be true unionists. None realize this more than we do ourselves. There have been and there may be yet, misguided groups or individuals who by their silence give consent and silent applause to such methods of reprisal. We do not wish ourselves nor our respective organizations to be classed with these individuals.

"The malicious destruction of property on the Elks Club was as despicable as it was cowardly. The Dahlstrom firm has suffered a monetary loss and the owners of the building must suffer the delay in replacing the damaged work. But the honest, law-abiding citizens and trade unionist has suffered an even greater loss, unless the guilty parties may be speedily found and punished. They have suffered a loss of prestige and confidence among their fellow-citizens, unless, again, the guilt can be placed on the real culprits. Speaking for ourselves as individuals and for the organizations we represent, we here publicly condemn the vandalism, slugging, intimidation and like acts which have been committed in the last few weeks. We absolutely deny all responsibility for the same, either by word, act, consent or guilty knowledge.

"In reaffirming our belief in law and order, we pledge our wholeheatrted support and that of our respective organizations, in time, money and effort, to assist the authorities in every way possible in securing the arrest and conviction

HOOSIER GIANT BRIX

GIVE BETTER BUILDINGS AT LOWER COST

The chief object in any building project today is to secure better buildings at lower cost. The public demands economy without the sacrifice of quality. Architects and contractors are meeting this demand with HOOSIER GIANT BRIX, the ideal material for high grade, economical construction.

Homes of HOOSIER GIANT BRIX

In residence construction, whether for outside veneer or solid walls, HOOSIER GIANT BRIX offer all the advantages of brick construction and yet save 25% over the cost of brick. HOOSIER GIANT BRIX can be laid up in a small fraction of the time required for other construction, thus making big savings in labor cost. In beauty they match fine quality tapestry brick. They equal brick in strength and load-bearing capacity. HOOSIER GIANT BRIX are five-walled, vitrified, mat-face fire-clay units, and are adaptable for any construction where brick can be used.

For INDUSTRIAL BUILDING

HOOSIER GIANT BRIX and HOOSIER Building Tile are adaptable for every type of industrial buildings, such as schools, gymnasiums, churches, factories, garages, stores and other fireproof structures. This material insures big savings on construction cost and makes a building unsurpassed for beauty and serviceability.

Architects and contractors are invited to send for samples and illustrated literature describing HOOSIER GIANT BRIX and Building Tile. Let us submit estimates on your specifications.

HEARTY WELCOME ASSURED

Latch-String Out at Hammond for Indiana Architects

The Calumet District architects are looking forwar dto the time they can welcome and entertain as a body the other members of the state architectural profession when the Indiana Society of Architects holds another regional meeting at Hammond, Thursday, September 18th and to that end are planning quite a program.

Karl D. Norris, East Chicago, who is chairman for local arrangements writes in that he and his fellow architects of the Calumet are anxious to have a big delegation of the profession wend its way to Hammond that an opportunity may be given them to show the great industrial features of the northwest section of the state that borders the shores of Lake Michigan.

And then, too, while the architects are meeting at Hammond the Associated Building Contractors of Indiana will be holding a District Conference at the same city. This circumstance is to be taken advantage of to bring the architects and contractors together in joint session that evening, the event to be preceded by a big fish fry down at one of the famous fish dinner establishments along the lake shore.

The tentative program for the day as now contemplated is along this line: Regional meeting in the afternoon, sight seeing trip and inspection of one of the big steel mills, shore dinner, concluding with large joint meeting of architects and contractors that night.

While scheduled as a regional meeting the affair is open to all Indiana architects and it is hoped as many of the profession as can will avail themselves of this opportunity and help to swell the crowd at Hammond so the architects may present a good representation at the joint meeting with the contractors.

INDIANA LIMESTONE MEN ACQUIRE INTERESTING RELICS FOR STONE COLLECTION

Unique Exhibit of Stone Types Being Assembled At Bedford

Egyptian stone relics from the ancient city of Tel-El-Amarna, sent by the Egyptian Exploration society, have arrived at headquarters of the Indiana Limestone Quarrymen's association. They will form a part of what eventually is planned to be the most complete collection of stone types in the world.

King Tut-Ankh-Amen's father-in-law, Amenhotep IV, 33 centuries ago founded the city whose ruins are now known as Tel-El-Amarna, on the Nile in upper Egypt and from which the collection was excavated, according to Thomas Whittemore, who obtained many of the relics for the society.

Quaint pieces of limestone furniture, low-slung chairs, stools, stands, an offering table and curious utensils for grinding meal are included in the collection, dug from many homes of these ancient ruins. There are also bits of sculpture being hieroglyphics sharply carved and easily translated.

LONDON CONFERENCE EFFECT MAKES SELF FELT IN INDIANAPOLIS BUILDING FIELD

Local Firm Senses Good Business As Result and Decides to Build At Once

That the probable adjustment of the European reparations problem through the Dawes plan is having its reaction on the business conditions in this country is shown by the reports of increased construction activity.

An example of this change of the state of mind of American business men is evidenced by the decision of the Indianapolis Candy Company to take bids on their proposed manufacturing plant now, instead of waiting until after January 1st, 1925, as was reported some few weeks ago.

Their architects and engineers, The Russell N. Edwards Company, in discussing this change of attitude, say, "The latest decision of our client was due to no other cause than the result of the London Conference on the acceptance of the Dawes plan, coupled with an easy money market and reasonable construction costs

"There was no question but that to take care of their business the company needed a new plant. The problem was, would that demand for manufacturing space persist after the plant was completed. For a time this was a debatable question and the taking of bids was held in abeyance. But with the action of the London Conference, doubts were dispelled and the officers of the firm, being far-sighted business men, concluded that the time was now opportune to prepare for the increased business that was bound to come in the next few months."

The officers of this company are to be congratulated on their good judgment. If other manufacturers, with the same demand for production space were wise, they would emulate the example of these men, take advantage of the present opportunities to build at lower costs than have prevailed for several years past, and thus be prepared to get their share of business as it reawakens.

ORGANIZATION AND CURRENT NEWS

LABOR LEADERS

(Continued from Page 5)

of the guilty parties, not only that the name and reputation of the legitimate and honest union organization and individual may be protected, but to the end that we as citizens, may protect the honor and prestige of our city."

The union leaders who signed the above were: C. E. Hammond, Painters' Union, No. 47; Charles Dunlop, Elevator Constructors' Union, No. 34; C. O. Cromlish, Plumbers' Union, No. 73; A. W. Keane, Electrical Workers' Union; J. B. Snowden, Hod Carriers' Union, No. 120; Earl M. Kingham, Plasterers' Union, No. 46; Thomas M. Dexter, Cement Finishers' Union, No. 532; Charles W. Kern, Steam Fitters and Helpers' Union, No. 440; Bert Robinson, Hoisting Engineers' Union, No. 103; John Watson, Bricklayers, Masons and Tilesetters' Union of Indiana, No. 3, and Cyrus Burleson, Wood, Wire and Metal Lathers' Union, No. 39.

Two Fail to Sign

The two business agents present who did not sign the statement were J. J. McNamara, business agent for the Bridge and Structural Iron Workers local, and C. D. Sperlin, business agent for the Sheet Metal Workers local.

The former is said to have bitterly opposed the issuance of the document while the latter contended he had no authority from his organization to sign. However, as regards the sheet metal workers' organization it went into the matter officially and though not signing the original statement did come forth with an individual declaration condemning violence and vandalism. While McNamara has refused to comment on his action, at the same time, an official communication from the president of the International Bridge and Structural Iron Workers' Union, whose headquarters are at St. Louis, and by which McNamara is employed, comes out openly in condemnation of the act of vandalism at the Elks' Building and offers to co-operate with the authorities in running down those responsible for the wanton destruction.

That Labor is aroused by such as the recent lawlessness is indicated by the action of Bricklayers' Union No. 3, which has subscribed a $100 reward for the apprehending of the man or men responsible for the vandalism.

Authorities Active

In the meantime police have been assigned to the above mentioned construction operations as a means of protection to the work and the craftsmen there employed, detectives are working on the case and the prosecutor of Marion County is conducting an investigation in an effort to bring the culprits to justice.

Calumet District

CALUMET BUILDERS AND ARCHITECTS ARRANGING TO EXTEND BIG WELCOME TO VISITORS SEPTEMBER 18

Plans for Joint Architects' and Contractors' Meeting Shaping Up

Hammond builders are preparing to show state contractors just how it is that "The Map Shows Why Hammond Grows." All plans as regards the scheduling of a definite date, September 18, have been completed for the holding of the District Conference of the Associated Building Contractors of Indiana in Hammond at that time and further details are now being gone into to provide an attractive program for the day when the Indiana builders journey to the Calumet District.

Since the Indiana Society of Architects was contemplating a regional meeting for members at Hammond this fall the idea of a joint meeting with the contractors suggested itself and a move to that end was started resulting in arrangements that will make such a gathering possible on the above mentioned date.

Local contracting and architectural interests are pleased with the way things are working out as it is the concensus of opinion that the idea is a good one since the better relationship that is engendered between the contracting fraternity and the architectural profession the better it will be for the building industry. These occasional get-together affairs afford broader understandings, more just appraisals of the individual and a harmonious tone for approach and dealing thru which suspicion, mistrust and selfishness is cast aside. Though the function of the contractor and the architect is separate and distinct, at the same time the successful completion of a project is of mutual interest, and when the two elements are in a position through a full understanding of each one's rights and province and can respect each other and work for the best interests of the client and clients it means encouragement to and advancement for the building industry.

It is the hope of the Calumet contractor, and the architect, also that the members of the Indiana contracting fraternity and those of the state architectural profession will lay aside their business cares for the day, September 18, and visit Hammond.

The Calumet building folks are determined to do their best to make the visit of the outsiders both interesting and profitable. Further, the information is advanced that if fresh lake fish appeals, it is guaranteed that all the good Lake Michigan fish that can be disposed of will be furnished to satisfy the appetites that are brought to the dinner tables that evening.

Right now is a good time to red-ink the date on the calendar, reserve it for the big meeting.

LOCAL FINANCIERS SEEK TO START PLANT LONG IDLE

Take Over Food Products Factory Buildings

Action, industry, is what Hammond craves; if there is one thing the city can't abide it is an idle plant that should be in operation. To prove the above here is the evidence. The Reed-Murdock Canning Factory that was sold to the Campbell Soup Co., and was allowed to stand idle, never having been put into operation by the owner, has been purchased by a syndicate of leading local financial men whose intention is to get the place into action producing. There are several large buildings and a power plant in the groupe and if need be the new owners are willing to divide the structures so they will accommodate small manufacturing concerns.

CHEERING NEWS

Trend Indicated Toward Larger Structure Construction Effort

At least there is an indication for encouragement in building circles. Just when home building operations that have carried the big construction burden all season have begun to slow down, and it looked as if a dullness was about to settle over building construction activity,

along comes the word that there is evidence pointing to an increase in larger structural work.

This information is welcome to say the least.

THE WAY SOME WOULD DESCRIBE IT WOULD HARDLY MEET WITH APPROVAL

This Safely Passed the Censor

Here's a new way of describing the weather. A man came into the office and in discussing the atmospheric conditions said, "the weather was as hot and sticky as the underside of a baked apple." Even the rain failed to cool things off.

PUTTING ON AIRS

Hammond Developing Quite an Aristocratic Section

The fine residences being erected on the Ridge Road south of the Little Calumet River are giving to that section of the city a fine appearance and if such operations are continued in proportion as in the past, Hammond will be accused of having a Gold Coast, too.

TO BUILD BIG MACHINE SHOP

Site Acquired for Project

Industrial building work is contributing its share to the Calumet District construction activity. Hoess Bros., Hammond have purchased a site on E. Summer street, for a new machine shop. It is the intention of this firm to erect several buildings on the new location. The general contract for the first building has just been awarded to J. K. Doeppler, who will soon start work. The other buildings in contemplation are to be erected next spring.

SCHOOL CONTRACT AWARDED

Calumet City to Have New Educational Building

The contract for the new school at Calumet City was awarded to Milda & Hansen, that place, for $81,000. The heating and plumbing contracts went to Lewis & Capron, Chicago, who bid in the work at $16,000. Hutton & Son, Hammand, were the architects.

HOHMAN STREET WIDENING STILL UNDERWAY

Another Contract Placed

They are still whittling away at South Hohman Street in order to make that thoroughfare wider so as to accommodate Hammond's increased downtown traffic. The owners of Bohling's Garage have awarded a contract to George P. Pearson & Son, who will cut twenty feet off the front of the building and then erect a modern front. The work is estimated to cost $15,000.

CALUMET BUILDING PROGRESS

Rhoades and Graves, well known house builders of Hammond, are putting the finishing touches on a couple of bungalows out on Hohman Street and are starting two more residences on Vine street.

Rufus Danner & Co., general contractors, Hammond, have added a second story to their office and yard building which will be used for shop, mill and storage purposes.

Still they come! Things must be slackening up somewhere for there is almost an army of building mechanics blowing around this section looking for jobs.

E. E. COLE.

EAST CHICAGO

TWIN CITIES DEVELOP QUITE A BUILDING MOVEMENT

Another Spurt for the Calumet District

The month of August has climbed into first place for the peak of new construction work in the Twin City district, East Chicago and Indiana Harbor. It has surpassed all other individual monthly effort this season so far with a total in building of $452,946. This amount is expected to be augmented to nearly $600,000 before the close of the month.

Industrial extensions have given a large share to this figure while residential and new business block construction is holding up its record stride as started out early in the spring.

EVANSVILLE

ENCOURAGING INCREASE IN LOCAL BUILDING SHOWN BY AUGUST FIGURES SO FAR

Quite a Gain on July

The first three weeks of August, the fourth month under the new city building code, have shown a remarkable increase in building activities over previous months, according to a statement issued at the office of the city building commissioner.

This month's total so far is one and one-half times as large as that for the entire month of July. More than 250 building permits have been taken out, the majority being for electrical installations and general repairs.

Permits for thirty-five new houses, one-fifth for those of fire-proof construction, have been granted. Two industrial permits and one church permit were issued.

FT. WAYNE

SUBURBAN PUBLIC IMPROVEMENTS COMPLETED AT COST OF NEARLY QUARTER OF MILLION DOLLARS

Residential Districts Reaching Out to Convert Erstwhile Fields

City improvements costing $240,000 have just been completed in Lafayette place by the Grace Construction Company. The work includes street paving, new sidewalks, ornamental lights, sewers and water lines. Lafayette place is a new addition in the southern part of the city.

FORT WAYNE AFTER A NEW BUILDING CODE, TOO

Action in Line With That of Other Indiana Localities

The building code fever seems to have seized upon Indiana and her cities with a firm grip from the activities along that line that are ruling.

Sometime back Evansville felt the need for more modern building regulations and a new code was drawn up, adopted and put into effect. Also, the need for codifying the existing Indiana building laws impressed itself upon some of the building interests, a law was passed by the legislature creating the Administrative Building Council of Indiana, which body is now working out a general set of building construction rules, regulations and requirements to conform to the various existing laws, which when completed will partake of the nature of a state building code by which building construction throughout Indiana will be governed.

Then, again, Indianapolis has under consideration a revision of her present code to bring it up to modern-day usages and practice.

Now another city, Fort Wayne, has joined the ranks of the code makers and shortly a new building code ordinance is to be presented to the city council for passage. The proposed code is being worked out by a council comittee, a special committee consisting of three architects, three contractors, the city building inspector and others interested in building construction matters.

BIG SHOW AND AMUSEMENT PLANT TO BE ERECTED

$300,000 To Be Spent on Project

Establishment of an exposition ground, including an athletic field and a one-mile race track for both automobile and horse races, is planned by a group of Fort Wayne and out-of-town men, according to an announcement just made public. It will be located within two and a half miles of the court house. When completed, including grandstand, barns and buildings, it will represent an investment of about $300,000.

The site includes 139 acres, and it is so situated that it will be suitable for use for expositions and small fairs. It is level and high, providing excellent drainage.

The race track will be unusually large, and will be the only mile track within 100 miles of the city. It will be 80 feet wide on the straight-away and 100 feet wide on the curves. It will be what is known to racing men as a spectacular track because of the fact that all of the course will be visible to spectators in the grandstand.

A row of barns will be erected along the north side of the track to house horses and cattle at expositions, and it is proposed to erect a large grandstand with a seating capacity of about 30,000 persons. Other buildings will be erected as needed, including devices for entertainment, sheds to house equipment and garages for use of automobile racers.

INDIANAPOLIS

SOMEWHAT OFF

Week's Building Total for City Considerably Below That of Previous Week

Building construction in Indianapolis recorded a slump last week when the valuation for 375 permits issued during the period amounted to but $479,849. This is a decrease of $687,154 over last week's total of $1,167,003 for 351 permits issued. The total for the week, however, is representative of a normal volume as gauged by other weeks. In the last three or four weeks the permit totals included permits for projects that had been announced previously to that time.

A permit to the board of school commissioners for the erection of a school building at 551 South Meridian street at a cost of $200,000 was one of the largest issued for the week.

Real estate sales were subjected to the slowing down process, only 181 transfers were recorded.

POINT OF INFLATION LIMITED, THEN COMES THE BURSTING

The actions of some men in the building field remind one of that first line in the chorus of the former popular song, "I'm Forever Blowing Bubbles." We wonder just how much larger they think they can blow the wage bubble?

Sealed Proposals

SCHOOL BUILDING
NOTICE TO CONTRACTORS

Notice is hereby given, that the undersigned Trustee of Forest School Township, Clinton County, Indiana, will receive sealed bids at the high school building in the town of Forest, up to the hour of ten o'clock a. m., on Saturday, September 20th, 1924, for the furnishing of all the materials and performing all the labor for the construction and completion of an addition to and the remodeling of the joint high school and elementary school building at said town of Forest.

Such construction and installation and remodeling following the plans and specifications approved by and now on file in the office of the State Board of Accounts, the office of the Township Trustee T. C. Merrick, Forest, Indiana, and the office of the architects, Henkel and Hansen, 108 Heinemann Bldg., Connersville, Ind. Copies of plans and specifications will be furnished any contractor applying for the same on deposit of the sum of ($15.00) fifteen dollars to be held in escrow for the return of said plans and specifications to the architect on or before seven days after the opening of the bids, after which date all checks on deposit will be cashed and no refund made.

All bids shall be made and submitted on form 96 bidding blanks. Each bid shall be accompanied by a certified check upon a solvent bank made payable to T. C. Merrick, Trustee, in an amount not less than (3%) three per cent. of the total amount of the bid tendered as a guaranty that the bidder will, if awarded the contract, enter into a bona fide agreement and contract with the said School Township of Forest for the contract, and furnishing sufficient bond in the amount of the contract price.

If, for any reason whatsoever, the bidder shall fail to enter into proper agreement, or fail to execute a proper bond, the full amount of the certified check shall be retained by the School Township as liquidated damages. The estimated cost of the building complete is ($50,000.00) fifty thousand dollars.

The undersigned Trustee and Advisory Board reserves the right to reject any and all bids and waive any defects or informalities if deemed in the interest of said Forest School Township.

Dated August 29th, 1924.

T. C. MERRICK,
Trustee Forest School Township,
Clinton County, Indiana.

WALTER B. SMITH,
GURNEY M. HOBSON,
JOHN W. GAYLOR,
Advisory Board.

Aug. 30, Sept. 6, Sept. 13.

DORMITORY
NOTICE TO CONTRACTORS

Bids will be received by the Board of Trustees of the Indiana State Normal School at 2:00 P. M. September 2, 1924, at the office of the President of the Faculty of the Indiana State Normal School, Terre Haute, Ind., for the erection and completion of the girls' dormitory to be located on Mulberry Street, between Sixth and Seventh Streets, Terre Haute, Ind.

Separate bids will be received for the general construction, for the heating and ventilating and for the plumbing system. The total estimated cost of such construction is $100,000.00.

Bids must be made on Form No. 96 prescribed by the State Board of Accounts and must be accompanied by certified check equal to 5 per cent of the amount of the bid.

Detailed plans and specifications will be on file in the office of the Registrar of the Indiana State Normal School, Terre Haute, Ind., and additional plans and specifications for individual use of the bidder may be secured from Johnson, Miller, Miller and Yeager, architects, 30 North Fifth Street, Terre Haute, Indiana.

BOARD OF TRUSTEES OF THE INDIANA STATE NORMAL SCHOOL,
By Helen C. Benbridge, Secretary.

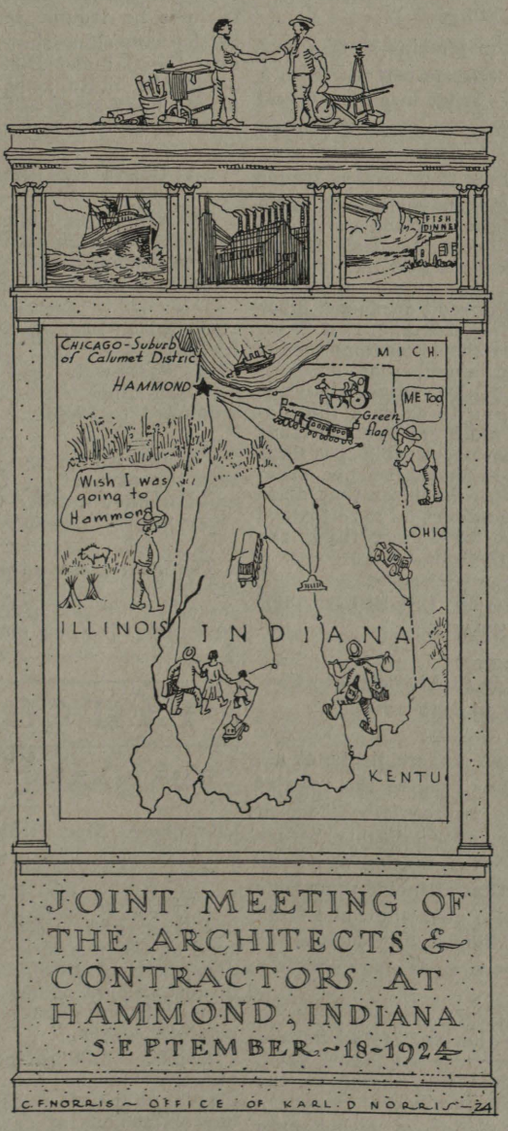
GEORGE W. ALLEN
HERBERT FOLTZ
DONALD GRAHAM
HERMAN SCHERRER



ANXIOUS TO INCREASE I. S. A. MEMBERSHIP ROLL.

Architect George Allen Solicits Aid of all Members.

Every effort is to be exerted this year by Architect George W. Allen, Laporte, Chairman of the Membership Committee of the Indiana Society of Architects to outdo his previous excellent records of several years. Under Mr. Allen's guidance the membership roll of the Society has been substantially increased during the past two years and he is anxious to keep up the good work.

He holds that the organization has accomplished much for the architects of Indiana and through its co-operation with the contractors' and engineers' associations has bettered conditions in the building industry.

Mr. Allen believes all architects in Indiana should be aligned with the Society and urges all members throughout the State to volunteer in the move to interest the outsiders. Local men can aid greatly in keeping the membership committee chairman posted on new architectural firms starting up, by sending in names of non-member I. S. A., members and also by soliciting the latter for membership.

PENCIL SKETCHES

A face that cannot smile has no real message for the world. "Smile," it's worth while.

A perfect raisin pie may fill a long felt want, but an application for membership sent to LaPorte would be a test of your loyalty to our Society.

Every good word for your competitor is the stepping stone to a broader vision of life.

Better wear out in true service than rust out waiting for opportunity.

Gardners raise high grade asparagus; George aspires to greater membership in I. S. A.

Don't put chewing gum in the soup—chew the rag with architects who do not belong to I. S. A. Get their application.

ORGANIZATION AND CURRENT NEWS

Calumet District

TO BE A REAL EVENT

Calumet Building Men Anxious to See Good Crowd of Visitors at Sept. 18, Meeting

Lest some should forget! Don't lose sight of the fact that the architects and contractors of Indiana are to meet in joint session at Hammond, Thursday, September 18.

Both the Associated Building Contractors of Indiana and the Indiana Society of Architects are to hold a district conference and a regional meeting, individually, at Hammond on the above date, the district and region being northern Indiana, but, that does not mean just for contractors and architects for that section, instead, every Indiana architect and contractor is invited to attend the affairs which are to be merged into a joint meeting that evening.

Calumet contractors and architects are not stressing a whole lot on press agent stuff but they are preparing to take care of the crowd in good shape and believe that when all is over every visiting architect and contractor will feel well repaid for having made the trip.

The big feature of the day will be the fish fry that evening at the Hammond Beach Inn along the shore of Lake Michigan.

Again the Calumet District says, "Lay aside your business cares for the day and wend your way our way September 18."

GETTING READY FOR ANOTHER BIG STEEL MILL

Access for Ore Boats to Site Nearing Completion

The big dredge, operated by the Great Lakes Dredge & Dock Company, has about completed the deepening of the canal from the forks at Indiana Harbor to the site of the Jones-McLaughlin Steel Mills. It will require about two more weeks to finish the new slip and turning basin, which will complete the contract of the East Chicago Land Co., made at the time of the sale. There is a persistent rumor that preparatory work for the building of the plant will be started soon.

FINDS SELF IN INENIVABLE POSITION

Jurisdictional Dispute Throws Bad Light in Labor's Direction

That was to be expected! To be sure the Labor Unions are only too eager to emphatically deny any and all complicity in connection with the outrage pulled off at Indianapolis when that metal door vandalism was perpetrated at the new Elks Building.

But, the question remains as to whom else would have cause to perform such a piece of villiany. What incentive would any one else have to center an attack on those metal doors? There is no getting away from the fact that certain trades have been waring upon each other as to which has the right to place the metal trim in buildings, and when such things occur, as did at Indianapolis, it certainly reflects back on Union Labor. It is just such moves that discredit organized labor more than anything else, and, if it is innocent the leaders should leave no means unemployed that would root out the guilty ones or at least prove labor adherents had nothing to do with the violence that did so much damage. If labor don't want such an undesirable spot light flashed its way it should remove from within its circle the impulses that arise to make the public direct its gaze toward that spot light's rays and think the things as naturally follow.

STATE REALTORS USURPED THE STAGE

Flock in in Crowds to Attend State Convention at Hammond

Builders, contractors, architects, et al., were crowded clear back to the rear at Hammond by the realtors who stormed the city and carried everything before their onslaught. The occasion was their state convention that attracted some four hundred real estate men who came from all sections of Indiana and in addition to convention business made merry with a vengeance.

The local Realty Board did everything possible to make the stay of the visitors pleasant and evidently succeeded from the comments that were heard in the wake of the city's guests.

Festivities consisting of a big auto parade, sight seeing tours through the Calumet Steel Districts and other points of interest, concluded with a lake trip by special steamer at night.

SOME LOOK FOR STARS, OTHERS FOR MOONSHINE

Latter Appears in the Calumet But Comes Not From the Sky

While the country's learned astronomers are watching Mars' 7,000,000 miles dip toward the earth in an endeavor to pick up some additional specific information regarding that planet, there are others not versed in astronomy who seem to have no trouble learning the source of the moonshine that has been bursting over the Calumet District. Of evenings along the State Line Road the pseudo astronomers seem to find it a good territory for their investigations.

CALUMET BUILDING PROGRESS

The architects report not much doing the past week but advance the information that shortly there will be some good building news to give out.

George P. Pearson & Son, general contractors, were the low bidders on the H. J. Postlewait project. Their figures, not including heating and plumbing amounted to $9,865.

Contractors for the crib piling to protect the excavating for the new bank building have finished their work and the steam shovel has been started again.

The labor trouble that had cropped out at the new hospital building has been smoothed out and things over there are now running along smoothly once more.

E. E. COLE.

EAST CHICAGO

HALF A MILLION IN BUILDING

City Shows Nice Pickup in Construction Work

A total of eighty-five building permits aggregating $500,000 have been issued by Commissioner Henry Bainbridge during the month of August. This is the largest amount of new construction to be started in any one month of the good weather season.

August building includes residential, business blocks and industrial, the greater share of the betterments being in new extensions at several of the plants throughout the district.

The building boom is expected to continue into September and late October, contingent on belated cold weather.

EVANSVILLE

FEWER PERMITS FURNISH INCREASED BUILDING VOLUME

Last Month's Business Showed to Advantage

A total of 225 building permits, representing property valued at $320,171, were issued during August, according to figures completed by Building Commisioner Ed Kerth of Evansville. The valuation represented in the 225 permits is divided as follows: $24,988 for repair work and $295,183 for new construction.

Though there were 258 permits issued by the city in July, a loss of 33 for August, the estimated valuation of last month's new building operations was 77 per cent in advance of the previous month's record.

FT. WAYNE

WARNING SOUNDED

Local Contractors of Reputation Seek to Protect All Prospective Builders

The building men of caliber of Ft. Wayne, those who have the real interests of the industry at heart, are continually building up confidence for building in the city and boosting those features that will attract the attention of the prospective owner builder to salient points involved in building construction operations about which the ordinary layman knows nothing and if he is not careful and is not advised properly, his ignorance may cost him dearly should he fall into the hands of an unscrupulous contractor, or undertake to do the work himself without knowing the laws that apply to building.

Here is the argument the conscientious contractors of Ft. Wayne advance to the building public:

"It is of the utmost importance to the prospective home-owner to know that he is assuming an unnecessary risk when he lets his contrart for his new home, unless he insists that the contractor, who is to do the work, carries Workman's Compensation and Public Liability Insurance, otherwise he, the owner, is liable. For instance, the Workman's Compensation Law of Indiana says:

> Section 14. The state, any political division thereof, any municipal corporation, any corporation, partnership or person, contracting for the performance of any work without exacting from the contractor a certificate from the industrial board showing that such contractor has complied with section 68 of this act, shall be liable to the same extent as the contractor for compensation, physician's fees, hospital fees, nurses' charges, and burial expenses on account of the injury or death of any employe of such contractor, due to an accident arising out of and in the course of the performance of the work covered by such contract. (Section 68 makes it compulsory for the contractor to protect you with this insurance.)

In plain words it means that if the prospective builder fails to insist upon the contractor showing that he has complied with the laws of the state, said owner becomes liable in case of any accident or any property damage which may occur during the construction of his structure.

Should a carpeter, painter or any of the workmen fall and break a leg, or become hurt in any way, or killed, or should they damage the property of others, the owner becomes liable for the full amount of damage.

So when the prospective builder insists upon the contractor carrying such insurance, he is not only upholding the laws of the state, but he is protecting himself against this possible expense, and at the same time he is protecting the legitimate contractors and assuring himself of honest workmanship and saving trouble and expense that might occur had he contracted with some irresponsible person."

The Ft. Wayne builders who are preaching the above are responsible men who have built up reputations for honesty, good work, and integrity in their business dealings and are eager not only to guard those reputations but also to protect the building industry from comebacks that are sure to arise when careless, shyster builders seek to worm in and "get by" regardless of the responsibility that should be theirs, but which they are unwilling to assume at cost to the owner when things break badly.

INDIANAPOLIS

BUILDING VOLUME GAINS SHOW STRONG AT INDIANAPOLIS

Past Month Best of the Year

August, on the face of the face of the figures recorded at the office of the city building inspection department, proved to be Indianapolis' banner building month of the spring and summer seasons. The volume of business ran up to $3,218,000 the best monthly total recorded this year. However, the number of permits issued, 1,550, was not as great as those of some of the previous months. The slowing up in the number of permits granted while the total estimated valuation increased simply means that a better class of work developed during the month to offset the small work such as repairs, alterations and miscellaneous projects that in the aggregate amounted to a large estimated valuation, but taken separately were not of much scope.

Comparative figures show that August building in 1924 was 21.3 per cent ahead of that for the corresponding period a year ago, and also registered the following gains on the four preceding months this season: 29 per cent over April, 63 per cent over May, 83.3 per cent over June and 9.5 per cent over July.

Housing projects, residences, flats and tenements, accounted for $1,749,975 worth of the entire volume for the month, of which $868,975 was for 213 new residences.

An analysis of the permits for the month is set forth below:

Classification	Per.	Est. Val.
Accessory Bldgs.	254	$ 64,902
Business Bldgs.	15	112,175
Industrial Bldgs.	2	75,500
Miscellaneous work	237	185,921
Public Bldgs.	16	615,500
Repairs & Alterations	807	414,027
Residences	213	868,975
Tenements and Flats	6	881,000
Total	1,550	$3,218,000
August, 1923	1,617	$2,652,800

OFF TO ANOTHER SEASON'S PLAY

Indianapolis Building Men Take to Bowling Again

The Builders' Bowling League at Indianapolis reorganized for another winter campaign, to cover a twenty-eight weeks' schedule, got away to a flying start Friday night.

There was a good attendance with all players eager for the start. Eight teams made up of those interested in the building construction business, architects, contractors, engineers and supply men faced the barrier and broke through with a rush when the whistle blew sending them away on an eighty-four games grind.

While there were few changes in the players who took part in last season's games, the majority of them being back to toe the foul line, there was a change in several team names. The teams who came back from last year were: The champion Wege-Stanfords, Triangles, Hugh J. Bakers, Central Supplies, Indianapolis Electrics and Thumb-Tacks. The two newcomers were the Walter Wises and Geigers.

This is the sixth season for the Builders' League which has stepped into the fast company circle and should hang up some high score before the present season's schedule is completed. J. Earle Woodard, 925 Peoples Bank Building, is president, and W. H. Dwyer, Central Supply Company, is secretary.

Meridian St. Archt., Vonnegut, Bohn and Mueller, 610 Indiana Trust Bldg. Owner, Leo Kahn, Pres. American Sanitary Lock Corp., 825 So. Meridian. Low bidder on general contract, R. W. Bauman & Co., 1319 Bates St. Expect to award contracts in 10 days. Brick, stone trim. Will contain 4 store rooms, a theatre and combination dance hall and auditorium.

*Lodge Building (3 or 4 sty., rear addition), 29½x50, 534x36, Indiana Ave. Archt., Harrison and Turnock, 500 Board of Trade Bldg. Sealed Proposals

GYMNASIUM

NOTICE TO CONTRACTORS

The undersigned Board of Education of the School City of Anderson, Indiana, and the Anderson Public School Athletic Association, Anderson, Indiana, hereby gives notice that on Thursday, September 25th, 1924, until 7:30 o'clock P. M. at the office of the Superintendent of the City Schools in the High School Building in the City of Anderson, Indiana, they will receive sealed bids and proposals for the Addition of Vocational Departments in the present Gymnasium, and at the same time and place will also receive sealed bids and proposals for the installation of the Heating and Ventilating, Plumbing and Sewerage, and Electric Wiring in said building, all in accordance with the plans and specifications heretofore adopted and approved by said Board and which are now on file in the office of the Superintendent of City Schools in the City of Anderson, Indiana.

The estimated cost of the proposed work is Thirty Thousand Dollars ($30,-000.00).

All bids must be in writing, on forms provided therefor, delivered, signed and sealed, and in every respect must conform to the laws of the State of Indiana.

Each bid for the General Construction, Heating and Ventilating, Plumbing and Sewerage and Electric Wiring shall be accompanied by a certified check for 5 per cent of the full amount of said bids. These checks must be made payable to the Board of Education of the School City of Anderson, Indiana, and The Anderson Public School Athletic Association, Anderson, Indiana, and will be held by them as a guaranty of good faith that said bidder or bidders will enter into a contract and execute a bond for the full amount of his bid, approved by said Board of Education and, The Anderson Public School Athletic Association for the due performance thereof, if his or their bid or bids are accepted. The checks of those bidders who fail to be awarded a contract will be returned to them when the contracts have been awarded. Should the successful bidder or bidders fail to enter into such contract and execute such bond, then he or they shall forfeit the amount of said certified check as liquidated damages for such failure, for the use and benefit of the proper fund of the School City of Anderson, Indiana.

Copies of said plans and specifications are on file in the office of Ernest R. Watkins, Architect, Farmers Trust Building, Anderson, Indiana.

Copies of said plans and specifications may be obtained from the office of the Architect, upon the deposit of Ten Dollars ($10.00) for each set. Said deposit will be returned to the bidders upon the safe return of said plans and specifications on or before the day and hour set for receiving bids.

The right is expressly reserved to reject any or all bids and to use sufficient time to investigate the bids and qualifications of the bidders.

MRS. AUGUSTA MILSPAUGH,
President, Board of Erucation.
HERBERT McMAHAN,
President, Anderson Public School Athletic Association.
Sept. 6-13-20.

SCHOOL BUILDING
NOTICE TO CONTRACTORS

Notice is hereby given, that the undersigned Trustee of Forest School Township, Clinton County, Indiana, will receive sealed bids at the high school building in the town of Forest, up to the hour of ten o'clock a. m., on Saturday, September 20th, 1924, for the furnishing of all the materials and performing all the labor for the construction and completion of an addition to and the remodeling of the joint high school and elementary school building at said town of Forest.

Such construction and installation and remodeling following the plans and specifications approved by and now on file in the office of the State Board of Accounts, the office of the Township Trustee T. C. Merrick, Forest, Indiana, and the office of the architects, Henkel and Hansen, 108 Heinemann Bldg., Connersville, Ind. Copies of plans and specifications will be furnished any contractor applying for the same on deposit of the sum of ($15.00) fifteen dollars to be held in escrow for the return of said plans and specifications to the architect on or before seven days after the opening of the bids, after which date all checks on deposit will be cashed and no refund made.

All bids shall be made and submitted on form 96 bidding blanks. Each bid shall be accompanied by a certified check upon a solvent bank made payable to T. C. Merrick, Trustee, in an amount not less than (3%) three per cent. of the total amount of the bid tendered as a guaranty that the bidder will, if awarded the contract, enter into a bona fide agreement and contract with the said School Township of Forest for the contract, and furnishing sufficient bond in the amount of the contract price.

If, for any reason whatsoever, the bidder shall fail to enter into proper agreement, or fail to execute a proper bond, the full amount of the certified check shall be retained by the School Township as liquidated damages. The estimated cost of the building complete is ($50,000.00) fifty thousand dollars.

The undersigned Trustee and Advisory Board reserves the right to reject any and all bids and waive any defects or informalities if deemed in the interest of said Forest School Township.

Dated August 29th, 1924.

T. C. MERRICK,
Trustee Forest School Township,
Clinton County, Indiana.
WALTER B. SMITH,
GURNEY M. HOBSON,
JOHN W. GAYLOR,
Advisory Board.

From Every Angle Flax-li-num Is TRUE Heat Insulation

In thousands of homes and industrial buildings, Flax-li-num has demonstrated its superior ability to insulate against heat and cold.

Fourteen years ago, Flax-li-num had passed every laboratory test. It has passed every one since that time. It is equal in stopping heat and cold to sixteen times its thickness in brick, or to twenty-seven times its thickness in concrete.

But this is not the **proof** of heat insulation. That comes on the job itself.

Will it tear? Will it puncture easily? Will it warp, break or crumble? Is it easy to apply right? Will it **last** as long as the building?

These are the practical things that make one material superior to another. And Flax-li-num meets these practical tests.

Flax-li-num is not rigid, nor is it limp and flimsy. It is half way between the two extremes—a flexible board insulation. So tough that hammer blows won't damage it. Easy to handle, no danger of tearing. And time is saved in installing it. Stays in places, does not sag. Outlasts the building. The only pure flax fibre heat insulation made in flexible board form.

Flax-li-num is made one inch thick for roofs, and half inch thick for walls. The right thickness, the right material, the right form. These three qualities combine to make Flax-li-num the outstanding buy in heat insulation.

Flax-li-num is the most practical heat insulation on the market today. It is 100 per cent efficient on the job—where the only real proof of heat insulation comes.

BUILDING CONSTRUCTION COURSES PLANNED FOR REAL TRAINING

Big Technical Institute to Push Building Trades Teaching

In view of all the talk that has gone the rounds with regard to training young men for the building trades, a recent bulletin issued by Carnegie Institute of Technology, Pittsburgh, Pa., proves interesting in that it announces regular courses for the teaching of young men in certain branches of building construction.

There are day and night courses varying in length from four years to two years and even one year intensive trade training.

In all the courses students have the advantage in securing their practical instruction in a shop that was designed and equipped especially for teaching bricklaying, masonry, and reinforced concrete. The shop is supplied with brick, cement, sand, gravel and lime and equipped with a complete assortment of tools and scaffolding.

Day Courses

The four-year course in Building Construction, leading to the degree of Bachelor of Science, is offered to high school graduates or young men with equivalent training who desire a type of technical training that will fit them for positions of responsibility in the building industry and in its various branches. In this course Bricklaying, Masonry, and Reinforced Concrete are basic shop subjects.

The two-year courses are designed for intensive training in brick-laying, masonry, and reinforced concrete, and lead to a certificate of graduation. They are open to beginners and men already engaged in these trades. The aim of the courses is to meet the needs of the student who desires a broad foundation for the mastery of his craft. In addition to the specific shop training which covers one-half of the course, instruction is given in Trade Mathematics, Business English, Plan Reading, Architectural Drawing, and Estimating.

Applicants must be nineteen years of age or over and must show evidence of being able to pursue the course selected.

One-Year Special Course in Bricklaying, Masonry and Reinforced Concrete

These courses are designed for men who feel the need of instruction in a single subject or group of subjects closely related to their trade. Emphasis is placed upon the fact that all instruction is of a practical nature. Applicants must be nineteen years of age or over and must have had previous experience in bricklaying, masonry, and reinforced concrete. Men who complete these courses will receive a statement of credit.

Night Courses

The regular four-year trade course in Bricklaying, Masonry, and Reinforced Concrete offered at night leads to a certificate of graduation. It is intended for men already engaged in the trade as apprentices, or those who have the opportunity to enter it, and who need a more thorough training than can be secured in their daily work, combining practice with theory, thus increasing their efficiency and earning power. The minimum age for admission to this course is seventeen years. The course usually requires four years for completion, but this time may vary somewhat depending upon the previous training and ability of the individual student; those with experience and other preparation may finish more quickly. The subjects of instruction include Trade Mathematics, Freehand Drawing, Architectural Drawing, Plan Reading, Quantity Estimates of Concrete, Stone Work, Brick Work, Tile for Small Buildings, Dwelling Houses, Garages and Mercantile Buildings, as well as shop work.

Students are required to attend three evenings a week, two hours per evening; two evenings are devoted to shop work and drawing, and one evening to the other subjects. The course is flexible; instruction is individual, allowing opportunity for advancement.

One Year Intensive Trade Courses

These courses are intended particularly for journeymen and vocational teachers who need to supplement their experience in the trades with a more accurate technical training. Opportunity is also given to particularly qualified persons to specialize in any branch of the trade of brick-laying, masonry and reinforced concrete. Each course is seven months in length with two-hour class sessions three nights a week, beginning October 1st and continuing through to May.

TREND OF ALL BUSINESS LENDS ENCOURAGEMENT

Building Holding Up Well

That business is on the upgrade is the opinion being expressed by many writers on the subject. This is especially true in the automobile and steel industries. The steel industry which was perhaps effeced the most by the depression is likewise showing an increase of unfilled orders. Many mills are now up to 60 percent. The construction industry on the whole has been the least effected by the depression, and if the volume of business during the next four months maintains the same proportion as that of the first seven months of this year, the high peak of 1923 will be passed in 1924. Conditions are steadily improving in the basic industry of the country—agriculture. Wheat is now reported selling at a good price and other farm products are demanding higher prices than for some time back. The increased purchasing power of the farmer cannot help but have a stimulating influence on business generally.

Give us the opportunity of demonstrating our various lines of building materials before placing your orders.

GIVE BETTER BUILDINGS AT LOWER COST

The chief object in any building project today is to secure better buildings at lower cost. The public demands economy without the sacrifice of quality. Architects and contractors are meeting this demand with HOOSIER GIANT BRIX, the ideal material for high grade, economical construction.

Homes of HOOSIER GIANT BRIX

In residence construction, whether for outside veneer or solid walls, HOOSIER GIANT BRIX offer all the advantages of brick construction and yet save 25% over the cost of brick. HOOSIER GIANT BRIX can be laid up in a small fraction of the time required for other construction, thus making big savings in labor cost. In beauty they match fine quality tapestry brick. They equal brick in strength and load-bearing capacity. HOOSIER GIANT BRIX are five-walled, vitrified, mat-face fire-clay units, and are adaptable for any construction where brick can be used.

For INDUSTRIAL BUILDING

HOOSIER GIANT BRIX and HOOSIER Building Tile are adaptable for every type of industrial buildings, such as schools, gymnasiums, churches, factories, garages, stores and other fireproof structures. This material insures big savings on construction cost and makes a building unsurpassed for beauty and serviceability.

Architects and contractors are invited to send for samples and illustrated literature describing HOOSIER GIANT BRIX and Building Tile. Let us submit estimates on your specifications.

INDIANAPOLIS

***Printing Plant, Offices and Stores:** $25,000, 3 sty. and bas., 30x118, Spencer, Ind. Archt., Elliott B. Hadley 600 State Life Bldg., Indianapolis. Owner, Imp-O-Luck Co., E. M. Visquesney, Pres., Spencer, Ind. Archt. and owner receiving bids to close in a few days. The following contractors are figuring: Emmett Pierson, 2934 Kenwood, Indianapolis; William Sides, 121 Garfield Ave., Indianapolis; Southern Bldg. & Realty Co, Guaranty Bldg., Indpls. Hollow tile (purchased) joist constr., stone trim, steel columns, comp. roof, hand freight elevator, steam heat, boiler, sidewalk lights, tin-clad doors.

Residence (Italian Design) and 2-Car Garage: $12,000 ,2 sty. and bas., Golden Hill. Archt., Elliott B. Hadley, 600 State Life Bldg. Owner, Remster A. Bingham, 1027 No. Pennsylvania St. Plans in progress. Stucco, tile roof, steam or fan blast system, tile and hardwood floors, will contain laundry, servant's wing, 2 baths.

Bungalow (5 rooms) and 2-Car Garage: $7,500, 5100 Kenwood, 1 sty. and bas., "English style." Archt., Elliott B. Hadley, 600 State Life Bldg. Owner, Henry Ketcham, c/o Kingan & Co. Plans in progress. Stucco, asphalt shingle roof, tile and hardwood floors, furnace.

Residence: (Colonial type), $15,000, Washington, La. Archt., Elliott B. Hadley, 600 State Life Bldg., Indianapolis. Owner, John R. Thistlewait (lumber), Washington, La. Plans in progress. Frame, 2 baths, sleeping porch, sun room, garage.

***Municipal Garage:** $140,000. Archt., Frank B. Hunter, 912 State Life Bldg. Owner, Board of Public Works, City Hall. Bids rejected. Archt. revising plans to lower cost. Owner will advertise for new bids soon. Brick.

Hydro Electric Generating Plant: Near Bristol, Ind., on the St. Joseph River. Owner, The Interstate Public Service Co., Harry Reid, Pres.; Ira E. Guthrie, Secy., 1100 J. F. Wild Bank Bldg., Indianapolis. Plans in Progress. Ready for bids soon. Plans are also being considered for plants at Upper Benton, New Benton and Baintertown, on the Elkhart River.

Laundry Bldg.: (fire rebuild), 2441 Central Ave. Owner, The Sanitary Laundry Co., 2441 Central Ave. Will either rebuild present location or build in another part of town. Definite data soon as insurance is adjusted. Brick, complete laundry equipment.

Stores (5): 1 sty., 80x100, New York St., between Penn. and Delaware. Archt., D. A. Bohlen and Son, Majestic Bldg. Owner, John B. Kitchen, Room 415 at 241 North Pennsylvania St. Archt. receiving bids. Brick, steel, terra cotta front, copper-set store fronts, comp. roof, composition floors hollow metal windows.

Contracts Awarded

Apartment Building (25 Apts.) and Garage (22 cars): $140,000, 2 sty. and bas., 120x161, 3734-34 North Pennsylvania. Private plans. Owner, Arthur Baynham, 508 State Savings and Trust Bldg. Owner will build and award separate contracts. Brick veneer. Start work at once.

***Commercial Garage, Offices and Stores:** 2 sty., 100x120, 310-14 No. New Jersey St. Owner, H. K. Fatout (contractor and builder), 3107 Ruckle St. Excavating. Owner builds and awards separate contracts. Brick, concrete and steel.

Business Building (5 store rooms), 1 sty., Michigan and Chester Sts. Private plans. Owner, C. E. Foreman, 4027 Boulevard Place. General contract let to Emmett H. Pierson, 2934

Residence: $10,000, Blue Ridge Addition. Private plans. Owner, J. B. Maggart, 4241 Park Ave. Contract let to Ford Woods Realty Co., 425 Lemcke Bldg. Plans in progress. Start work soon.

Church (basement only), $18,000, 2136 West Michigan. Owner, West Michigan M. E. Church, 2136 West Michigan St. 1 sty., 73x90, will roof basement walls this fall, build superstructure in spring. Brick. Starting work.

***Residence and Garage:** $20,000, 3701 Spring Hollow Road. Archt., Frederick Wallick, 308 Hume-Mansur Bldg. Owner, Wendell Sherk, c/o Fletcher-American Co. General contract let to Albert Fuller, 438 No. Emerson St. Brick veneer 2 sty. and bas., 30x40.

Double Residence: $11,000, 54-56 No. Irvington Ave. Owner, W. C. Morro, 58 No. Irvington Ave. General contract let to Clarence Clarke, c/o Owner. Stucco and frame.

Double Residence: $11,000, 5834-36 University Court. Owner, Caroline Hall, 5850 University Ave. General contract let to J. M. Miller, 5808 Lowell Ave. Frame.

INDIANAPOLIS BUILDING PERMITS

***Postal Sub-Station and Stores:** $18,500, 4205 College. Archt., Bass, Knowlton & Co., 312 No. Meridian. Owner, R. D. Brown, Postal Station Building. Contract let to Ostrom Realty Co., Peoples Bank Bldg.

Residence: $18,300, 3660 Wash. Blvd. Owner and builder, H. L. Simons, 5151 No. Meridian. Excavating.

Residence: $10,350, 5678 No. Meridian. Owner, Indianapolis Building and Investment Co. Excavating. Brick veneer.

Double Residence: $9,330, 5180-82 E. Wash. Owner, John T. Carr, 36 Parkview. Contract let to T. F. Monaghan, 19 No. Euclid Ave. Excavating.

Double Residence: $6,000, 2709-11 S. East St. Clair. Owner, John G. Klein, 823 Eastern Ave., excavating.

Paint Shop: $6,000, 1 sty., 1018 No. Meridian. Owner, General Realty Co., 1018 No. Meridian. Brick.

Residence (double), $6,900, 1822-24 Park. Owner, Anna E. Emry, 1818 Park Ave. Frame.

Residence (double) $6,800, 539-41 No. Gray. Owner, Walter C. Kelly Co., 706 State Life Bldg. Frame. Day work.

Residence: $4,750, 5410 Broadway. Owner, Bridges and Graves, at site. Brick veneer.

Residence: $5,700, 2717 Allen St. Owner, Alex Adomatis, 2313 Daisy St. Excavating.

Residence (double): $4,800, 645-47 Tecumseh. Owner, J. A. Carr, at site.

Residence: $4,250, 5219 Park. Owner, C. C. Finnefrock, 33 Maple Court.

Residence: $3,800, 1152 No. Holmes. Owner, R. W. Lowery, 5920 Broadway. Contract let to J. E. Christian, 5920 Broadway.

Residence: $3,800, 1245 King Ave. Owner, T. H. McTarsney, 1320 No. Warman.

Residence (double), $7,856, 818-20 No. Bradley. Owner, Harold Tandy Miller, at site.

Residence (double): $8,275, 3710-12 E. Market. Owner, M. G. Ayers, 3714 E. Market. Contract let to Ayers Bros., 3714 E. Market St.

Residence: $7,270, 105 Ridgeview. Owner, D. D. Fitzgerald, 25 Johnson Ave. Contract let to O. E. Pike, 19 No. Ritter Ave.

Apartment (add.): $6,000, 2709 E. St. Clair. Owner, John G. and Julia Klein. Contract let to C. H. Moon, 3620 No. Illinois St.

Residence: (double), $4,800, 317-19 West 31st. Owner, I. N. Darter, 3015 Boulevard Place.

Residence: $4,960, 5408 Guilford. Owner, Rollin E. French. At site.

ANDERSON

Residence and Garage: $14,000, Alexandria, Ind. Archt., E. F. Miller, 545 Farmers Trust Bldg., Anderson, Ind. Owner, Carl Robinson, (lumber dealer), Alexandria, Ind. Plans in progress. Brick and frame.

Residence and Garage: $50,000, 2 sty. and bas., Newcastle, Ind. Archt., E. F. Miller, 545 Farmers Trust Bldg., Anderson. Owner, Mr. Ayers, (oil), Fortville, Ind. Plans in progress. Brick.

Residence and Garage: $40,000, 2 sty. and bas., Newcastle, Ind. Archt., F. F. Miller, 545 Farmers Trust Bldg., Anderson. Owner, name withheld for present. Sketches. Will start plans soon as sketches have been approved by owner. Brick.

Contracts Awarded

***Sisters' House:** $38,000. Archt., Ernest R. Watkins, Farmers Trust Bldg. Owner, St. Marys R. C. Church. General contractor, Eshelmann and Sons. Archt. taking bids on heating, plumbing and wiring. Excavated.

BLOOMINGTON

***Bank and Office Building:** 3 sty. and bas., 52x132, Bloomington, Ind. Archt., McGuire and Shook, 320 Indiana Pythian Bldg., Indianapolis. Owner, Citizens Loan and Trust Co., Bloomington, Ind. Plans in progress. Archt. ready for bids about September 20th. Brick, Bedford stone.

Contracts Awarded

***Fraternity House:** $45,000, Bloomington, Ind. Archt., Nicol, Scholer and Hoffman, LaFayette, Ind. Owner, Building Committee of the Indiana Chapter of Delta Upsilon Alumni Association, Walter O. Lewis, Pres., 702 Lemcke Bldg., Indianapolis, Ind. General contract let to Chas. Pike, 327 So. College Ave., Bloomington; heating and plumbing let to Orth Plumbing and Htg. Co., Lafayette. Face brick, hollow tile backup and partitions, reinf. steel, Bedford Oolitic limestone trim. Red Spanish tile roof, tile baths and toilet rooms, vestibule marble floors, casement windows.

BLUFFTON

Cemetery (improvements), $18,000, Comfort station and tool house and platting 15 acres. Owner, The Fairview Cemetery Assn., Bluffton, Ind. Plans in progress. Landscape Archt., J. C. Doswell, 301 West Main St., Ft. Wayne, Ind. Ready for bids soon. Buildings to be built of white brick veneer.

***School** (elementary and high school, addition of 6 class rooms, recitation rooms, auditorium and gymnasium). $73,000. Nottingham Twp., Wells County at Petroleum, Ind. Archt., Everett I. Brown, Studebaker Bank Bldg., Bluffton. Own-

PROGRAM AS PLANNED FOR HAMMOND. SEPTEMBER 18

Steel Mill Inspection Trip the Big Feature of the Day

After several weeks of conferences amongst the architects and contractors of the Calumet District definite plans have been worked out for the meetings to be held at Hammond next week by the members of the Indiana Society of Architects and the Associated Building Contractors of Indiana.

The layout for the day is as follows:

1:00 P. M.—Architects' Luncheon, Indiana Hotel

1:30 P. M.—Architects' Business Meeting, Indiana Hotel

1:30 P. M.—Contractors' Meeting, Building Trades Employers' Assn., Headquarters, 108 Citizens National Bank

3:30 P. M.—Architects and contractors to join forces and start on tour of inspection of one of the big steel mills.

7:30 P. M.—Joint Dinner, fish fry, and meeting at Hammond Beach Inn.

Note—The above time schedule is based on the daylight savings plan which is in use at Hammond and the Calumet District.

MORE ON ADVERTISING

Institute Stresses Upon Desirable Size and Character of Same

The American Institute of Architects has issued an interesting circular on the size and character of advertising matter intended for preservation by architects which says:

"The value to the architect of technically informative advertising, and its reciprocal value to the advertiser depends upon the extent to which it aids the architect in applying intelligent understanding to the selection and utilization of products and methods employed in construction.

When advertising does contain technical information of value to the architect, its preservation for future reference becomes a matter of importance to both the architect and the advertiser, for if it is not preserved and, moreover, so preserved as to be readily available when wanted, the cost of publication and distribution is waste and the architect is shut off temporarily at least from a source of information.

The use value to the architect of technically informative advertising depends upon:

Substance: The advertising should present the facts which an architect is likely to require. Helpful diagrams and tabulations should be given. When tests have been made by disinterested authorities, reports of such tests should be reprinted. Claims should be supported by proof. Drawings of parts or the whole and drawings showing methods of installation should be reproduced accurately and at an indicated scale.

Size and Form: The advertiser can encourage and facilitate the preservation of advertising by the architect if he will comply with the recommendations as to size, classification of subject matter and indexing made by the American Institute of Architects. One of the conditions which contributes to the difficulty of filing advertising, whether it is properly indexed or not, lies in the lack of uniformity in size. Obviously, it is highly desirable that a standard size be recognized which will readily lend itself to filing in the standard vertical filing equipments now generally in use, and at the same tme provde for the greatest possible economy in the use of paper. The Institute, therefore, recommends that advertisers adopt 8½ inch by 11 inch as the size for all catalogs, circulars and other publications intended for preservation by architects. Because of its adoption as standard by other national bodies and because of the recommendations of the U. S. Department of Commerce, the Institute also approves as a minimum the size 7½ inches by 10⅝ inches, or either of these sizes folded once and saddled stitched to open flat in the file.

Handbooks to be carried in the pocket and bound volumes to be placed upon shelves are not intended for filing, and consequently no recommendation as to size is called for in this circular. The Institute, however, recommends that manufacturers who make a practice of publishing a single catalog comprising a number of products for dissimilar uses, consider the possibility of increasing the usefulness of advertising to architects by publishing in place of the catalog a number of booklets of standard size each dealing with a single subject as listed under the Standard Classification.

To simplify the filing of informational advertising in the architect's office and to make the file yield most readily the information wanted, the A. I. A. has adopted a uniform filing system for architects' offices and a Standard Classification. The advertiser is urged to classify and index his advertising under the Classification so that when it is received in the architect's office it may be filed with the minimum of time and effort and so remain constantly available for convenient future reference.

The correct index number for each piece of advertising should be secured from the Committee on Structural Service. Application to the Committee for the assigning of a correct index number is important as a precaution against error and misplacing of the material in the file. The index number thus secured should be printed on the lower right hand corner and the upper left hand corner of the front cover of a bound publication or on the face of a single sheet, to read from the left hand and right hand side respectively. The inscription should be as follows:

"A. I. A. File Number _____"

printed the "A. I. A. File Number" in 9-point and the number assigned in 14-point bold faced type.

The institute urgently requests that all pieces of advertising literature be dated in a prominent place. Architects can then know whether the information contained is sufficiently recent to warrant its acceptance without question or whether they should apply to the manufacturer for a later publication."

ORGANIZATION AND CURRENT NEWS

Calumet District

JOINT MEETING PLANS ALL ARRANGED

Calumet Contractors and Architects Ready for Coming of State Builders

The Contractors' Central Council of the Calumet District composed of delegates from Gary, East Chicago, Hammond and Indiana Harbor, at a recent meeting at B. T. E. A., headquarters, Hammond, held for the purpose of arranging final details for the State A. B. C., District Conference at the latter city, September 18th, came to the following conclusion, the program also taking care of the regional meeting to be held at the same time by the Indiana Society of Architects.

Both meetings are to open at 1:30 P. M., the architects to meet at the Indiana Hotel, and the contractors at the rooms of the Building Trades Employers' Association, 108 Citizens National Bank Bldg. Each organization will hold a get-together and business session and then adjourn to meet jointly at the B. T. E. A., quarters from which place the crowd will start on a tour of inspection of one of the steel mills at 3:30 P. M. When the trip through the mill has been completed the contractors and architects will be conveyed to the Hammond Beach Inn along the lake shore where a joint meeting and fish dinner will be held at 7:30 P. M.

Since the Calumet District records time on the day-light saving schedule and the above hours for meetings are planned on that schedule all visiting architects and contractors are admonished to keep that fact in mind. The main thing to do is to start for Hammond early so you will arrive in time for the opening ceremonies, after you get there the Calumet fellows will see to it that you are well taken care of.

This is the first chance the northwestern Indiana contractors and architects have had to play host to the builders from around the state and they are anxious to see a good crowd present. Lay your tools and drawing utensils aside on the 18th, and treke for Hammond;it will be well worth your while to take that day off.

LOOKS LIKE A GREAT BUILDING YEAR FOR HAMMOND

August Came Through With Another Good Total

Hammond building permits for the month of August were thirty-nine in excess of the number issued during the corresponding period in 1923 and the total estimated valuation of the new work amounted to $367,415 or 38.4 per cent greater than the valuation recorded in August, 1923.

The recent month's totals, however, showed a great decline from the July figures when valuations amounted to $1,807,875. On the face of things the August performance looks bad, indeed, but in July there were several large permits for projects of unusual scope which carried Hammond along at a building pace far beyond her normal speed.

Henry Vis, city building inspector, is quite optimistic regarding the future and predicts a 1,200 building permit issuance for a valuation of $6,000,000 for Hammond when the present year of 1924 has run its course. Such a result would be approximately a 50 per cent gain over the 1923 building business.

The comparative August figures are:

Year	Per.	Est. Val.
1924	151	$367,415
1923	112	265,385
Gain, 1924	39	$102,030

SPECIAL

All Set for Him

We know the editor of the Recorder has been fishing week ends all through the summer with some luck now and then, but we hope he will be able to spare the time to drop into Hammond for the big meeting so we can show him a real fish fry and fill him up.

MOTOR BUSSES FOR HAMMOND

Franchise Granted

Goodbye heletr-skelter jitneys.

That don't mean that Hammond is not to have motor transportation of a public nature, instead, she is to have well regulated motor bus conveyances run on a regular schedule with a certain definite responsibility to the city.

The city council at a special meeting voted to pass the Motor Bus Franchise that has been given considerable attention of late. Under the franchise the operating company is to pay into the city treasury 3 per cent of its income and the busses are to be put into operation not later than thirty days after the granting of permission to operate regular buss lines.

The effect of this new order to provide adequate additional transportation facilities for the city is awaited for eagerly.

CALUMET BUILDING PROGRESS

No wonder Hammond is building all the time; she has to to keep up with the demands that are put on her to take care of her citizens.

Forty-two years ago the population of Hammond amounted to 2,000. That figure at the end of 1923 had been run up to 42,609 and it is estimated that at the finish of 1924 it will have been boosted to 50,000 and over.

One large concern and several smaller firms are negotiating for factory facilities in the Campbell Soup Factory building which was recently taken over by local financiers who intend to put the place into operation for light manufacturing purposes. The move looks like a good one and promises to add some more industries to Hammond's already large colony.

The Hammond Clearing House report for the period, August 21st to 28th, amounted to $4,212,000. The clearings for the year, January 1st to August 28th, inclusive, totaled $124,597,000. Not bad, eh!

Architects Buckley & Skidmore, Hammond, are preparing plans for a three-story office building for the Northern Indiana Gas & Electric Co.. and will be ready for bids about September 23rd.

Dr. O. O. Melton, has plans out for bids for the construction of an apartment building to accommodate 34 families. The structure, 3 sty., 100x114, is to be erected on Webb street, facing Harrison Park.

E. E. COLE.

FT. WAYNE

REVIVAL INDICATED BY AUGUST BUILDING FIGURES

Volume of Business at Ft. Wayne Shows Nice Gains

Substantial and encouraging increases over the volumes of July, 1924 and August, 1923, were to be found in Ft. Wayne's building volume for August this year. After month after month of fine building records the city during July showed a big slump, the volume dropping down considerably under the million dollars level. That set back caused some uneasiness and, because the city had held up favorably with the building pace of 1923 while other places showed

perceptible declines, there were some folks who thought that at last the slump had finally reached Fort Wayne.

As a result of the doubt raised by the backward trend developed in July much interest centered on what building would do in August. The month started off well and as the weeks passed the volume of business increased gradually and when completed had rolled up a total for a big come back going up to and over $1,000,000.

There was a time when the million dollars total created quite a sensation but now days if the building total fails to reach that level it seems that something is wrong with local operations. Well, July fell short but August has staged a come back and the city is riding along nicely once more.

Local permits in August lacked six of equaling the issuance of July, 1923, but the total estimated valuation amounted to $1,096,469 as against $698,203 for the corresponding period a year ago, a gain of 57 per cent. Not only that but last month's valuations registered an increase of 42.5 per cent over the figure of July this year.

The figures are:

Month	Per.	Est. Val.
August, 1924	250	$1,096,469
July, 1924	285	769,272
August, 1923	256	698.203

LARGE CONSTRUCTION PROGRAM INDICATED FOR FALL AND WINTER

Much Residential Building Still in Prospect

Construction of more than 100 new residences in Fort Wayne, involving the expenditure for labor and materials of approximately $650,000, within the next six months is indicated in data collected by the Fort Wayne Real Estate Board.

This, according to the report, will include only a minor portion of the construction done throughout the city, and is based only on the activity in newly settled localities where residences will be erected in large groups, such as new subdivisions and in additions where there remain numerous lots.

Construction work on residences throughout the city generally has not been considered in the above statistics.

Of the total number of questionnaires sent out to real estate firms and construction companies, only a few have replied. Officials of the board believe that, had the questions been answered by the majority of the firms to which they were sent, the total number of homes would have been greatly increased.

Replies, however, were received only from the larger real estate firms, which operate construction departments, and firms which devote their attention entirely to construction work.

In one locality alone, a manager of a building department said that about forty homes would be erected. Only a few of these, he explained, were to be of "stock" type or built for sale, the majority being built on order, the plans and specifications being drawn to suit the tastes of the purchasers.

In another addition, 30 homes probably will be erected during the fall and early winter. Few of these will be of the stock type, all being built on order. In still another addition, construction companies will erect 27 homes during the fall. All of these will be designed especially to suit the owners of lots on which they are being constructed. One or two private operators also are building homes in this addition for speculative purposes.

Other reports range from five and six homes in a locality to 12 and 15.

INDIANAPOLIS

LAST SEASON'S CHAMPIONS GET AWAY WITH A JUMP

Marble Men Show Heels to Others at Opening of Builders' Bowling League

LEAGUE STANDING

Teams	W.	L.	Per.
Wege-Stanford	3	0	1.000
Thumbtacks	2	1	.667
Triangles	2	1	.667
W. W. Wise	2	1	.667
Central Supply	1	2	.333
Ind. Elec. Supply	1	2	.333
Conder & Culbertson	1	2	.333
Hugh J. Baker	0	3	.000

Gathering up the burden where they left off last spring the A. C. E. S., (Builders) Bowling League teams of Indianapolis plunged back into the thick of the fray again last week for the seasons opening.

There was a big crowd out and enthusiasm was at a high pitch, all team line ups being full with the boys fighting hard all the way down the stretch over the three games series.

Last season's champions, the Wege-Stanfords, while not setting things on fire did manage to make a clean sweep of their contests and since none of the other aggregations pulled a similar stunt the "champs" rode out of the evening at the head of the parade at the expense of the luckless Hugh J. Bakers. As for the other six teams the Thumbtacks, Triangles and Walter W. Wise crowds took the odd game from the Central Supplies, Electric Supplies and the Conder and Culbertsons.

High single game, 900, for the evening was credited to the Thumbtacks, which team also captured high three-game total with 2,567 pins, while Ed Clemens of that crowd posted high single individual score. 213. Other double century shooters were: Grimm, Born, Wise. Berry and Wege.

FRUIT PICKING VENTURE PROVES DISASTROUS

Indianapolis Contractor Suffers Bad Fall

After ten weeks of incapacitation M. M. Bonewitz, well-known Indianapolis brick mason contractor, secretary of the Brick Mason Contractors' Association of Indiana, asserts he is about through as a fruit picker and will stick to brick work.

He says the latter is not so hazardous.

You see. "Bony" some weeks ago went cherry picking and had a nice supply of them bucketed when the step ladder upon which he was standing gave away percipitating him to the ground like a plummet. When he and the earth met there was some impact and the brick contractor was not only badly shaken up but the ligaments of his left limb and hip were torn and bruised. Fortunately no bones were broken but his injuries were exceedingly painful and he is just now able to hobble around with the aid of a cane.

BRICKLAYERS LEAD IN WAGE INCREASES

Carpenters Come Second

Bricklayers lead the field of labor in wage increases gained in the last half century. The fact is shown in a report of a survey of wages and costs in the construction industry, covering a period of fifty years, just made public by the Engineering News Record. The average rate for this trade today being $1.50 an hour for an eight-hour day, as against a rate of 43 cents an hour in 1874.

In consistent and steady gains, the carpenters come second to the bricklayers. Common labor is shown to have achieved the least proportion of wage gains and is affected more than the skilled trades in the fluctuation of the industry.

BUILDING COST DOUBLES IN TEN YEARS.

Both Wages And Materials Pyramid To Cause Advance.

"Building costs in the United States have doubled in the past ten years," is a statement made in a special reort on the building situation issued by the National Industrial Conference Board. A chart illustrating the report shows that material costs since 1914 have risen much faster than building wages and total building costs. For a short period in 1922 material and labor costs ran together.

From the middle of 1922 material costs again ran ahead of wages, but at the beginning of 1924 material prices declined and wages rose till both had reached a common level about 100 per cent higher than in 1914. The report states that the labor shortage stands out as the most important factor in the construction industry today.

er, James W. Carter, Trustee, Petroleum, Ind. General contractor, L. E. Wickersham, 2100 No. St., Logansport, Ind. Excavating.

sealed bids and proposals for the installation of the Heating and Ventilating, Plumbing and Sewerage, and Electric Wiring in said building, all in accordance with the plans and specifications heretofore adopted and approved by said Board and which are now on file in the office of the Superintendent of City Schools in the City of Anderson, Indiana.

The estimated cost of the proposed work is Thirty Thousand Dollars ($30,000.00).

All bids must be in writing, on forms provided therefor, delivered, signed and sealed, and in every respect must conform to the laws of the State of Indiana.

Each bid for the General Construction, Heating and Ventilating, Plumbing and Sewerage and Electric Wiring shall be accompanied by a certified check for 5 per cent of the full amount of said bids. These checks must be made payable to the Board of Education of the School City of Anderson, Indiana, and The Anderson Public School Athletic Association, Anderson, Indiana, and will be held by them as a guaranty of good faith that said bidder or bidders will enter into a contract and execute a bond for the full amount of his bid, approved by said Board of Education and, The Anderson Public School Athletic Association for the due performance thereof, if his or their bid or bids are accepted. The checks of those bidders who fail to be awarded a contract will be returned to them when the contracts have been awarded. Should the successful bidder or bidders fail to enter into such contract and execute such bond, then he or they shall forfeit the amount of said certified check as liquidated damages for such failure, for the use and benefit of the proper fund of the School City of Anderson, Indiana.

Copies of said plans and specifications are on file in the office of Ernest R. Watkins, Architect, Farmers Trust Building, Anderson, Indiana.

Copies of said plans and specifications may be obtained from the office of the Architect, upon the deposit of Ten Dollars ($10.00) for each set. Said deposit will be returned to the bidders upon the safe return of said plans and specifications on or before the day and hour set for receiving bids.

The right is expressly reserved to reject any or all bids and to use sufficient time to investigate the bids and qualifications of the bidders.

MRS. AUGUSTA MILSPAUGH,
President, Board of Erucation.
HERBERT McMAHAN,
President, Anderson Public School Athletic Association.
Sept. 6-13-20.

SCHOOL BUILDING
NOTICE TO CONTRACTORS

Notice is hereby given, that the undersigned Trustee of Forest School Township, Clinton County, Indiana, will receive sealed bids at the high school building in the town of Forest, up to the hour of ten o'clock a. m., on Saturday, September 20th, 1924, for the furnishing of all the materials and performing all the labor for the construction and completion of an addition to and the remodeling of the joint high school and elementary school building at said town of Forest.

Such construction and installation and remodeling following the plans and specifications approved by and now on file in the office of the State Board of Accounts, the office of the Township Trustee T. C. Merrick, Forest, Indiana, and the office of the architects, Henkel and Hansen, 108 Heinemann Bldg., Connersville, Ind. Copies of plans and specifications will be furnished any contractor applying for the same on deposit of the sum of ($15.00) fifteen dollars to be held in escrow for the return of said plans and specifications to the architect on or before seven days after the opening of the bids, after which date all checks on deposit will be cashed and no refund made.

All bids shall be made and submitted on form 96 bidding blanks. Each bid shall be accompanied by a certified check upon a solvent bank made payable to T. C. Merrick, Trustee, in an amount not less than (3%) three per cent. of the total amount of the bid tendered as a guaranty that the bidder will, if awarded the contract, enter into a bona fide agreement and contract with the said School Township of Forest for the contract, and furnishing sufficient bond in the amount of the contract price.

If, for any reason whatsoever, the bidder shall fail to enter into proper agreement, or fail to execute a proper bond, the full amount of the certified check shall be retained by the School Township as liquidated damages. The estimated cost of the building complete is ($50,000.00) fifty thousand dollars.

The undersigned Trustee and Advisory Board reserves the right to reject any and all bids and waive any defects or informalities if deemed in the interest of said Forest School Township.

Dated August 29th, 1924.

T. C. MERRICK,
Trustee Forest School Township,
Clinton County, Indiana.
WALTER B. SMITH,
GURNEY M. HOBSON,
JOHN W. GAYLOR,
Advisory Board.

Celotex—Speed—Quality

There's no time and no material wasted in sheathing the walls and in insulating the roof with Celotex. It saws readily and nails direct to studs, rafters and headers.

The qualities of Celotex are even more surprising than the ease of handling it.

With the insulating value of cork, Celotex makes a house cool in summer and cheap to heat in winter. It cuts fuel bills a fourth to a third.

Celotex makes a stronger wall than wood sheathing and when in place generally costs less than the materials it has replaced.

Recommend Celotex to your clients. Give them better homes with less trouble to you.

Use Celotex as sheathing, as roof insulation, as plaster base. Give quality with speed.

Write for complete information to Dept. V-9, The Celotex Company, 645 No. Michigan Ave., Chicago, Ills. Branch Mill Representatives, The Indianapolis Celotex Co., 205 East Ohio St. Phone, Main 7089. Venner E. Brace, Mgr.

Celotex is a strong, rugged, weather-proof durable building lumber made from the long, tough fibres of cane. It is better than wood sheathing—equals cork for insulation.

Celotex is used for sheathing instead of wood; for plaster base, roof insulation, sound deadener and exterior finish.

Stock sizes: Thickness 7/16 in.; width 4 ft.; lengths 8 ft. to 12 ft. Weight about 60 lbs. per 100 sq. ft.

VOL. VI INDIANAPOLIS, INDIANA, SEPTEMBER 20, 1924 No. 25

MAIL ORDER LOGIC

Not Infrequently Employed in Building Circles

The conduct of procedure after bids are taken on a prospective structure before the final award is made in some instances calls to mind the following story which appeared in a recent issue of Forbes Magazine.

One day a farmer walked into a country store accompanied by his wife and their ten children, and announced to the clerk, "I want to get the whole lot of them fitted up with shoes."

After several hours of hard work, the clerk succeeded in geting each one properly fitted and was beginning to make out the bill.

"Oh, don't bother about that," said the farmer. "I didn't want to buy the shoes. I just wanted to get the sizes so I could order them from Sears and Roebuck."

Not infrequently the architect and owner of a private building in effect say to the low bidder on their work, who believes that his low bid legitimately entitles him to the award of the contract, "Never mind coming back (until we want some more figures). We didn't mean that we would award the contract to the low bidder. We just wanted to know what it would cost."

Bids are taken every day on work which the architect and owner have no intention of awarding to the legitimate low bidder. They are simply engaged in the extremely cheap and pleasant practice of having a group of contractors who are very generous with their time and money establish a mark for the favorite to shoot at. In some instances the high bidder at the original taking of bids has been jockeyed into the position of the successful bidder and awarded the contract.

The prevalence of this practice was revealed by one contractor who recently stated that fully eighty per cent of the contracts for privately owned buildings in the city where he operated upon which bids were solicited by architects and owners were not awarded to the low bidder.

This practice is both unfair and unethical and represents a very real economic waste. Estimates can not be prepared for nothing. The preparing of an accurate estimate involves the expenditure of both time and money. Is it fair to ask and expect a group of contractors to spend the necessary time and money in making up an accurate estimate when there is no intention of awarding the work to the low bidder. In effect the architect and owner are shopping around at the expense of perhaps a dozen contractors.

Would it not be fairer and far more economical to invite bids for a given project from a moderate number of contractors of substantially equal ability and standing; to invite bids only from contractors to whom they would be willing to award the work in case their bid is low; and having invited bids as provided above, to award the work to the low bidder unless other considerations than price are to enter into the award, in which case this fact should be made perfectly clear to the bidders before the bids taken?

If the owner requested an approximate estimate of the cost of his structure from the architect or several architects he would expect to pay and would pay for each estimate. Is there any less obligation when this estimate is made up individually by a group of contractors? If an approximate estimate of this kind is desired, the contractor is certainly entitled to be informed of the circumstances and is equally entitled to be paid for the services rendered. It is to be hoped that the time will come when contractors will refuse to figure a job unless they have some guarantee that their bid will be given real consideration.—The Iowa Builder.

CONTINUED GAINS OVER 1923 SHOWN BY BUILDING AS THE MONTHS ROLL BY

August Checked in With a Six Million Dollar Total for a 5.2 Per Cent Increase

According to the figures that are being registered month after month in the various Indiana cities showing the current building construction activitity the old "Presidential Year" bugaboo seems to have lost its terror. Evidently business has shown a stronger tone this year than last if the building movement is to be taken as a criterion, for, construction effort has always proved a good barometer on business conditions. People only build when they have money, and since 1924 has moved right along with a good building volume recording monthly increases over the corresponding periods a year ago it is a self-evident fact that business is prospering.

August was no exception to the prevailing order and ten of Indiana's cities registered a 5.2 per cent gain over the building business of August, 1923, this in face of the fact that there were 196 less permits issued than during the like period a year ago. All of which means that the projects this year are of greater scope than those launched in August, 1923, an encouraging indication indeed.

Though the past month valuations fell off 23.2 per cent from those posted in July such a state of affairs should cause no great alarm as August invariably shows a recession in building effort.

Of the cities officially reporting figures on their building endeavor for August six showed good gains while four sustained losses when as compared with the August, 1923, business. Terre Haute topped all the rest with an 82.9 per cent increase. South Bend recorded the greatest loss, 65.1 per cent.

The order of the cities in the matter of gains and losses is: Terre Haute, 82.9 per cent gain; Fort Wayne, 57 per cent gain; Richmond, 49 per cent gain; Hammond, 38 per cent gain; Indianapolis, 21.3 per cent gain; Evansville, 17.7 per cent gain. Losses—Muncie, 6 per cent; Elkhart, 40 per cent; Kokomo, 62.9 per cent; South Bend, 65.1 per cent.

Following are the figures as reported by the city building inspection departments:

Cities	Aug., 1924		Aug., 1923	
Elkhart	13	$ 31,350	17	$ 53,050
Evansville	225	320,171	211	271,865
Fort Wayne	250	1,096,469	256	698,203
Hammond	151	367,415	112	265,385
Indianapolis	1,550	3,218,000	1,617	2,652,800
Kokomo	56	49,780	99	134,355
Muncie	94	77,745	89	82,800
Richmond	58	61,275	48	31,175
South Bend	379	472,285	506	1,355,149
Terre Haute	235	337,966	252	184,785
Total	3,011	$6,032,456	3,207	$5,729,567

Furniture Building: (rem. from wholesale grocery building), 110-116 South Meridian St. Archt., Rubush and Hunter, American Central Life Bldg. Owner, The Taylor Carpet Co., Carl Taylor, Pres., 26 West Washington St. Plans in progress. Work will consist of a new front, a mezzanine floor, painting, tearing out partitions, re-wiring, alterations to plumbing system and general alterations.

School Furniture: Owner, Vestal C. Davis, Trustee of Wayne Township, Marion County, Ind., is taking bids to close October 6th at 10:00 a. m., on the following: 30 tablet armchairs, more or less, 100 school desks of assorted sizes, more or less, 6 teachers' desks and chairs, and other general supplies. Vestal C. Davis, Indianapolis, Ind., R. R. "C".

***Apartment Building:** (4 apartments), rem. from residence at 2711 No. Meridian. Archt., Bacon and Tislow, 31 W. Ohio St. Owner, Fred Meiere, c/o Fred Meiere Printing Co., Century Bldg. Plans in progress, work will consist of 4 new bath rooms, tile floors, electric wiring, new plumbing, painting, plastering, tearing out partitions and general alterations.

Residence: (country estate), $125,000, near Indianapolis. Archt., Bass, Knowlton and Co., 312 N. Meridian St. Owner, J. I. Holcomb, V. P. Holcomb and Hoke Co., 1545 Van Buren St. Plans about completed. Expect to ask for bids in three (3) weeks, Brick.

***Storage Warehouse:** $125,000, 5 sty. and bas., 200x61, 1430 N. Illinois. Archt., Fermor S. Cannon, 21 Virginia Ave. Owner, Samuel Lewis Shank (mayor of Indianapolis), City Hall. Ready for bids in a few days. Brick, reinforced concrete, fireproof construction, steel sash, freight elevator, comp. roof, steam heat.

***Residence:** $12,000, 2 sty. and bas., Wellington Estates Addn. Archt., Edw. D. Pierre, 1134 Hume Mansur Bldg. Owner, James T. Barrett. Head Master of Boys' Preparatory School, West Riverside Drive, south of 36th St. Plans in progress. Bids soon. Frame, slate roof, furnace, tile and hardwood floors.

***Residence and (3) Car Garage:** $30,000 ,52nd St., South of Highland Golf Course. Archt., Harrison and Turnock, 500 Board of Trade Bldg. Owner, Dr. William Campbell Hall, 903 Fletcher Trust Bldg. Archt. taking bids to close in a few days. Stucco over hollow tile, slate roof, vapor heating system, tile and hardwood floors, 2 baths.

***Residence:** $10,000, 5100 block on North Delaware St. Archt., Edw. D. Pierre, 1134 Hume-Mansur Bldg. Owner, E. A Gard, care Hibben-Hollweg & Co., 131 S. Meridian St. Archt. taking bids. Brick, slate roof, English type of architecture, furnace heat, tile and hardwood floors.

Garage: $8 000, 1 sty. Archt., Rubush and Hunter, American Central Life Bldg. Owner, Allen A. Wilkinson Lumber Co. Bids in under advisement. Brick, mill construction.

Contracts Awarded

Residence and Garage: $35,000 (10 rooms, 3 baths, servants' quarters, 3-car garage), Washington Blvd. and 40th St. Archt., Frederick Wallick, 308 Hume-Mansur Bldg. Owner, Chas. Mayer, Jr., c/o Chas. Mayer & Co., 29 West Washington. General contract awarded to Albert Fuller, 438 North Emerson Ave. Start work at once. Face brick veneer, Indiana stone trim, tile roofing, ornamental iron, steel casement windows, steam heating.

Residence: $12,000, 2 sty. and bas., 111 East Maple Road. Private plans. Owner, Albert R. Gray, c/o Gray, Gribben and Gray (Jewelers), 151 No. Illinois St. General contract awarded to William F. Applegate, 20 South Temple Ave. Brk. veneer, frame and stucco.

Residence: $11,000, 121 E. Maple Road Blvd. Private plans. Owner, Asher W. Gray, c/o Gray, Gribben and Gray (Jewelers), 151 No. Illinois St. General contract awarded to John Fisher, 2665 Burton Ave. Brick veneer and frame.

Stores (3): $10,000, 34th and Illinois. Owner, Western Oil and Refining Co., 310 No. Meridian. General contract let to J. G. West, Castle Hall Bldg. Brick.

Apartments (3): rem. from residence, $15,000. 11th and West St. Archt., S. C. Dark, 308 Baldwin Bldg. (Delaware and Market Sts.) Owner, W. H. Lane, 539 W. 11th St. General contract let to Geo. Weaver, 2223 Brookside Parkway. Brick.

***Lodge Building:** $40,000, 2 sty., 56x100, Lebanon, Ind. Archt., J. P. Parrish, 418 Castle Hall, Indianapolis. Owner, B. P. O. E. Lodge, Bryant Edwards, Exalted Ruler, 803 No. Lebanon St., Lebanon, Ind.; S. E. Jones, Secy., Farmers Bank Bldg., Lebanon. General contractor, Ernest Stoops, 225 LaFayette Ave., Lebanon, Ind. Excavating, heating and plumbing to Carr & Bosber, Lebanon; masonry let to C. E. Platt, Lebanon.

***Postal Sub-Station and Stores:** $25,000, 32nd and Illinois. Archt., Bass, Knowlton & Co., 312 No. Meridian. Owner, Postal Station Bldg. Co., R. D. Brown, Pres., Postal Bldg., Illinois and South Sts. General contract let to Ostrom Bldg. Co., Peoples Bank Bldg. Brick.

***Apartment Building** (24 Apts.): $75,000, 134 West 21st. Owner, Willard Realty Co., C. E. Nichols, Pres., Lemcke Bldg. General contractor, State Construction Co., 1201 East 30th. Stone let to Chas. Arthur, 134 Leota St. Painting to Jesse Marshall, 656 E. 16th. Contractor taking bids on In-A-Door Beds, wiring, roofing and sheet metal work and plastering.

INDIANAPOLIS BUILDING PERMITS

(Week of September 11th to September 18th)

Blacksmith and Repair Shop: $14,000, 1 sty., 28x156, Sheds, $12,000, 1 sty., 19x122, barns, $26,000, 2 sty., 42x104, Crown Hill Cemetery. Archt., D. A. Bohlen and Son, Majestic Bldg. Owner, Crown Hill Cemetery Assn., 34th and Boulevard Place. General contract let to Latham and Walters, 927 State Life Bldg. Excavating. Brick.

Residence: (double), $6,000, 2534-36 Shriver. Owner, Jos. Stello, at site. Excavating.

Residence: $6,750, 945 West 35th. Owner, R. E. and Jessie M. Elrod, 954 West 35th. General contract let to John Tomlin, 1019 West 35th. Excavating.

Stores: $6,000, 1 sty., 40x60, 4913-15-17 College Ave. Owner, Elizabeth Randall, c/o contractor. General contract let to W. C. LeFeber, 440 No. Rural.

Residence: (double), $6,000, 842-44 No. De Quincy. Owner, William P. Shea and M O'Brien at site.

Residence: $7,725, 5036 Central. Owner, Fred Strens, c/o contractor. General contract let to F. M. Bartholomew & Son, American Central Life Bldg. Brick veneer.

Residence: $7,250, 4320 No. New Jersey St. Owner, Carl L. Plummer, 509 East 10th. Owner, Plummer Bros., 509 East 10th. Brick veneer and frame. Excavating.

Residence: (double), $5,100, 1157-59 Congress. Owner, Evalyn B. Schmidt, 635 West 31st. Contract let to D. P. Lewis, 659 West 31st.

Residence: $4,250, 842 No. Riley. Owner, William Griffin. Contractor, F. Osterwald, at site.

Residence: $4.160, 550 No. Drexel. Owner, E. J. Sexton, Indiana Trust Bldg.

Residence: $4,650, 1601 East Raymond. Owner, Royse-Borchert Co., 603 City Trust Bldg.

Residence: $3,665, 2728 Manker St. Owner, Elizabeth Eiser, 1848 Singleton St.

Residence: $4,150, 2029 Koehne. Owner, Bridges and Graves, at site.

Residence: (double), $4,500, 1421-23 West 32nd. Owner, Mary E. Kynett, 1504 No. Pennsylvania.

Residence: $4,700, 2619 Brookside Parkway. Owner, W. A. Colglazier, 1529 Brookside.

Residence: $4,950, 1222 No. Oakland. Owner, Frank Shaner, c/o contractor. General contract let to C. S. Clifton and Sons, 1415 No. Tuxedo.

HAMMOND MEETING DRAWS A GOOD CROWD

Both State Architects and Contractors Well Represented

Though the big joint meeting of Indiana architects and contractors at Hammond, Thursday, occurred too late for us to carry a detailed account this week there was every evidence at press time that the affair was to be quite an event and carried an appeal that had reached to all corners of the state.

Particularly attractive was the proposed tour of inspection of one of the large steel mills, a number of architects in the various localities expressing their desire to make the journey to Hammond for that interesting junket. At a late hour Architect Karl D. Norris, East Chicago, had received acceptances from quite a few architects forcasting a good representation of the profession at the meeting.

The members of the Indiana Society of Architects met at the new Indiana Hotel where a noon luncheon was served to be followed by their I. S. A., Board and Regional meeting.

In the meantime the representatives of the Associated Building Contractors of Indiana gathered at the Hammond Building Trades Employers' Association headquarters in the Citizens National Bank building for their District Conference.

At three-thirty P. M. the two organizations joined forces for the trip through the steel mills at the conclusion of which the entire crowd moved on to the Hammond Beach Inn on the lake shore for a fish fry and chicken dinner. The joint meeting of the architects and contractors was held that evening at which building matters were discussed and short talks were made by both contractors and architects.

SIMPLIFICATION OF BUILDING MATERIAL

Effort Started Sometime Ago Beginning to Show Results

The Division of Simplified Practice of the United States Department of Commerce has rendered a valuable service to the construction industry through the simplification and standardization of building materials. Among the items standardized are the following:

Item	Reduction in Varieties
Metal Lath	125 to 24
Hollow Building Tile	36 to 19
Face Brick	39 to 1
Blackboard Slate	90 to 3
Hot Water Tanks	120 to 14

CURRENT USE OF CEMENT IN CONSTRUCTION WORK SEND PRODUCTION SOARING

Cement Industry Establishes Great Record in July

Statistics recently issued by the Department of the Interior and prepared under the direction of the Geological Survey Bureau show that production and shipments of Portland cement during the month of July are the highest on record. Production totalled 14,029,000 barrels compared with 13,538,000 in June and 12,620,000 in July 1923. Shipments amounted to 16,614,000 barrels compared with 13,712,000 in July 1923. There are 133 active plants manufacturing Portland cement in the United States; 13 additional plants are under construction; 16 more are in the process of financing or are projected. The 133 active plants have an aproximate capacity of 162,000,000 barrels annually and it is estimated that when the plants now under actual construction are completed that it will be possible to produce 175,000,000 barrels of cement in this country each year.

OUTLOOK GOOD FOR THE BALANCE OF THE YEAR

Elements Influencing Building Construction Indicate Favorable Trend

The passing of Labor Day marks the beginning of a new construction period, and it is therefore advisable to look into the future of the industry for the remaining four months of the year. The summer months usually show a slight let down in the industry, but the first of September invariably brings a resumption of activities. Conditions are more stable now than they have been any time this year. No marked wage fluctuations either upward or downward are in sight. The material market is operating on an even keel and there is every reason to believe that there will not be much deviation from present prices during the balance of the year. Many investors have been waiting for assurance that building costs have been stabilized and undoubtedly the next few weeks will bring out a large number of projects which were held up during the early part of the season. Conditions in other lines are rapidly improving. The American farmer is in a better position today than for some time past. It is estimated that the value of crops this year exceeds that of last year by $700,000,000. Four lines of manufacturing, namely, iron and steel, motors, textile and leather are rapidly returning to normal conditions. Money is plentiful and interest rates are low. Taking all these various phases into consideration it becomes evident that for the balance of 1924, at least, conditions in the construction industry will be good.—Bulletin National Building Trades Employers' Association.

PENCIL SKETCHES

The true craftsman does his work for the love of doing it. He will not ask "When do we eat?" because his heart is on his work and not on the clock.

Why keep those applications in the ice box? Thaw out and send them along. You signed a pledge card last year to get one new member.

He who understands his work presses forward and is not likely to turn back.

You don't have to wear goggles to protect your eyes looking at a real piece of craftsmanship in any line.

Your pledge card was for "Fall Delivery" (last fall). Why not fall for it this year?

It's a tremendous task to excavate a large cellar with a teaspoon—a small matter with a steam shovel. Then why use some of our old habits?

He who starts the day early is likely to feel proud of his work at the close of the day.

ORGANIZATION AND CURRENT NEWS

ADOPT STANDARDS FOR STEEL REINFORCING BARS

Step Taken That Promises Construction Economies

Steel manufacturers, big distributing interests and representatives of the Associated General Contractors of America and other consumer representatives, meeting in the Division of Simplified Practice, Department of Commerce, have adopted as standards for steel reinforcing bars eleven sizes, based on the area of the bars. This action, effective on January 1 for producers and on March 1 for distributors who have stocks or current orders to be cleared before the completion of the action, will replace some forty or more sizes at present in use. The meeting, which brought together all interested groups, was presided over by Edwin W. Ely of the Division.

Opening the discussion, A. E. Lindau, representing both the American Concrete Institute of Detroit and the American System of Reinforcing of Chicago, outlined the pre-war experience as to varieties demanded. He showed how in a single plan, 18 to 20 sizes of reinforcing bars were frequently called for, some with as little as 1/16th of an inch variation. The demand was curbed during the war, but had since backslid to nearly as great a variety as before. He declared that certain state highway departments had standard plans which included other than the suggested standard sizes, and that a certain amount of hesitancy might be found before changes to the standards would be made.

W. A. E. Doying of the Panama Canal spoke in favor of the proposed standards, as did O. L. Grover of the Bureau of Public Roads, Department of Agriculture, and A. W. Slater of the Bureau of Standards.

E. F. Kelley, representing the American Association of State Highway Officials, and W. O. Irwin of Youngstown, O., representing Truscon Steel Company, discussed highway construction. Mr. Irwin disclosed that from the distributors' standpoint, the present variety is tying up huge sums in stocks and that the consumer has to pay the interest on the investment. Pacific Coast points, he said, call for a great variety than the central and eastern parts of the country.

George E. Routh, Jr., of the Kalman Steel Company, Chicago, recommended that the area of bars be considered for standardization rather than the shapes, a position which was indorsed by Richard L. Humphrey of Philadelphia, who represented both the Committee on Standard Specifications for Concrete and the American Society for Testing Materials. Other speakers included Commander Ralph Whitman of the Navy Department; C. A. Bissell of the Reclamation Service, Department of the Interior; J. H. Gray, of the American Telegraph & Telephone Company; E. P. Goucher of the American Electric Railway Association; M. W. Lewis of the office of the Chief of Engineers, War Department; D. H. Sawyer, of the Associated General Contractors of America; Dr. John M. Gries, Chief of the Division of Building and Housing, Department of Commerce.

"The complexities of building construction are becoming greater daily," Mr. Sawyer told the meeting. "Ten years ago, without the improved means of handling materials, we couldn't have accomplished the program which is being carried on. The Associated General Contractors, are for anything which will lessen the cost of materials and will decrease labor and equipment, as any such step will not only be of advantage to them but to the owner who pays the bill.

"Applying this specifically to the problem of reinforcing bars, the handling of material, the segregation of material of various sizes and shapes, the operation of machinery to bend and deform bars, all present a serious burden to city constructors, both from the standpoint of space and men to handle such material. Assuredly, any step for simplification will find our organization members supporting it."

Consideration of the question of grades —a proposition having come from several sources that one grade take the place of the existing three grades—the statement was made that a committee of the American Society for Testing Materials, and it was decided to hold this question in abeyance until the next annual conference on revisions of the simplification adopted. Further information will be sought in regard to this subject from the Association of American Steel Manufacturers.

The areas in inches of the standards adopted were as follows: .049, .110, .196, .250, .307, .442, .602, .785, 1,000, 1.266, 1.563.

Calumet District

DO YOU CRAVE ACTION?

If So Buckle Down and Get Right Down to the Heart of Your Association

The first essential for a successful organization of any kind is to pledge the efforts of the members to a high ideal, even if it be unattainable, for anything more tangible provides an inferior goal. With this to hold the common interest, any proper beneficial activities may be undertaken. The more clearly these activities serve the common good without injury to the public, the stronger will be the support given to the work.

This requires able leadership to point out the course of action to be taken and the best means to attain the desired end. The definite objective should be known from the beginning to sail a true course, and to follow out the simile, no ship ever reached a harbor with only one in ten (or less) of the crew giving a hand to the work to be done. As essential as good leaders is a full complement of willing workers.

Most associations must depend upon voluntary service of members for much of their best work. In fact, this is the great strength and resourcefulness of group action; the wide diversity of talent and experience of many may be drawn upon for the benefit of all.

Unless the member is willing to contribute something more than his dues to the work he is an unprofitable unit in the scheme. Associations are quite properly judged by their activities, whether good or bad, weak or forceful, and the group action is made up of the working units, both standing and special committees.

If the members of each committee meet, plan and act promptly, knowing just what they are supposed to accomplish, the entire organization will show signs of life in every line of endeavor. Assigned duties will be met promptly and well, and if possible the presiding officer will have a snappy report in his hands at the next meeting.

Is your local contractors association doing all you think it can and should? Do you feel that it is not hitting on all six as it should? Do you crave action?

Then be fair and go to your president and offer to do something. Don't kick, but PULL!

MAYBE NOT TO OTHERS, BUT, IT DOES TO CONTRACTORS

However, Latter Could Greatly Aid Each Other by Working Out Their Happenings Together

Nothing ever happens!

Such was the statement an English playwright of world-wide repute tacked on to the end of one of his most dramatic efforts. How he arrived at such a conclusion is a matter of several thousand words.

Now, general contractors can reach the opposite conclusion and take issue with the above assertion without resorting to

lengthy spiels, for, things a plenty happen to them all the time.

The idea is, however, that unless they tell each other and other interested parties generally about the things that arise, occur, or happen, all their experiences and lessons gained by contact with perplexities—and problems will go for little more than naught.

There probably is not a single general contractor in the entire country who has not met up with a cantankerous building situation, recently. Most likely, being possessed of the initiative necessary to his business success, he has mastered his problem, or, if not, he is floundering around wrestling still with a solution far over his head.

Be the situation as it may, he could well have considered letting his colleagues in on his perplexity. By such action he would either pass along a thought to be of value, to his fellow contractors, or, he would set forth a puzzling situation that would draw to itself a concerted attention that would afford an opportunity of aid on a broad scope which in the end would offer a most likely chance for solution.

BUYS SITE FOR FACTORY

Plan to Manufacture Voting Machines in Large Quantities

Crown Point is in line for a fine new industrial plant estimated to cost $350,000.

The Cummings Vote Register Corporation, Knox, Ind., has bought a factory site at Crown Point and preliminary arrangements have been started for the erection of the contemplated factory.

PLANS FOR NEW HOTEL APPROVED

Expected Work Will Start Soon

It also appears as if a new hotel is in prospect for Crown Point.

This project has been up for consideration for some time, and now the word is out that the State Inspection Bureau has finally approved the proposed plans. That being the case it is expected that early action of a building nature will be decided upon soon.

CALUMET BUILDING PROGRESS

Architects Berry-Wainwright & Co., Hammond, are revising plans for the remodeling of the Emmanuel Evangelical Church. Bids will be called for shortly.

E. E. COLE.

FT. WAYNE

RUNNING CLOSE TO 1923 BUILDING RECORD

Fort Wayne Effort Shows Little Let up from Great Effort Put Forth Last Year

While other cities about the country, as well as in Indiana, showed decided tendencies to let down in their 1924 building construction operations as compared with the 1923 performance Fort Wayne has tenaciously hung on and continued right along almost at the record pace set last year, with the result that the record for the first eight months of 1924 is only slightly in arrears of her high level building effort exerted over the corresponding period a year ago. In fact, her eight months total for 1924 up to September 1st, is only $531,933 behind that of the same period last year, this is but a 5.76 per cent decrease in business for 1924 as compared with the record volume of 1923. Though the total estimated valuations have fallen away a little, she has granted 83 more permits this year than over the same period last year. Her monthly building business for 1924 has shown an average of $1,087,608. The figures for February, March and August showed gains over the figures for the corresponding months in 1923, but the other five months showed losses.

All of which means that the city is doing her full share to hold up the Indiana building volume for 1924.

The figures from the building inspector's office show the following record.

	1924		1923	
Months	Per.	Est. Val.	Per.	Est. Val.
January	66	$ 239,450	99	$ 390,885
February	98	733,450	62	425,550
March	267	1,683,495	281	1,450,000
April	451	1,609,612	383	1,939,275
May	406	1,850,020	327	2,166,085
June	279	720,101	314	1,022,539
July	285	769,272	297	1,141,265
August	250	1,096,469	256	698,203
Totals	2,102	$8,701,869	2,019	$9,233,802

INDIANAPOLIS

LOCAL BUILDING FOR FIRST EIGHT MONTHS OF 1924 ALMOST EQUALS 1923 FIGURES

Only a Slight Recession Noticeable

Looking back over the building figures recorded in Indianapolis for the first eight months of 1924 several interesting facts are revealed, first the current year has developed a volume of construction work that has run well into the millions of dollars, and while not quite as large as that of the corresponding period of 1923 at the same time it is but 4.9% less than that of the record figures that were hung up a year ago; second, the monthly average of the estimated valuations of the new work launched so far has approximated $2,292,236 as against $2,410,724 for the corresponding period last year; third, three of the monthly valuations turned have exceeded those of the same months in 1923 while 5 have shown losses; fourth, August, 1924, posted the highest building figures recorded for any of the sixteen months; fifth, there were 813 more permits issued by the building inspection department this season than during the like period last year.

Therefore, summing up the Indianapolis building effort so far put forth this year as compared with that exerted over the corresponding period in 1923 one finds that the business this season has been exceedingly good, being almost on a par with the great volume of last year which was considered remarkable, in fact broke all past records.

Comparative figures for the two years, month by month, from January 1st, to September 1st are:

	1924		1923	
Months	Per.	Est. Val.	Per.	Est. Val.
January	634	$ 1,012,221	619	$ 2,021,138
February	748	2,714,162	545	1,601,282
March	1,527	2,215,313	1,438	3,028,839
April	2,110	2,492,173	1,761	3,215,976
May	1.754	1,965,741	1,809	2,805,011
June	1,589	1,755,234	1,396	1,905,000
July	1,499	2,965,051	1,413	2,055,748
August	1,550	3,218,000	1,617	2,652,800
Eight Months' Total	11,411	$18,337,895	10,598	$19,285,794

Brick, terra cotta.

Valparaiso: Factory: (add.) $40,000.00. Owner, Fibroe Insulation Co. Contract let to Foster Lumber Co. Brick.

Sealed Proposals

SCHOOL HOUSE
NOTICE TO CONTRACTORS

Notice is hereby given that sealed proposals will be received by the Trustee of Jackson School Township, Clinton County, Ind., until ten (10) o'clock A. M. on the 11th day of October, 1924, at the home of John K. Wright, Trustee of said Township, for the erection and completion of a Joint Grade and High School Building located one-half mile south of Antioch on the Jackson Highway in said Township, County and State, according to the plans and specifications prepared by Rodney W. Leonard, Architect, 309 Peoples Life Bldg., Frankfort, Ind.

Plans and specifications for the same are now legally on file in the office of the trustee of said Township and also on file in the office of said Rodney W. Leonard, Architect.

Any prospective bidder desiring to take copies of said plans and specifications from either of said offices must make a deposit of Twenty-five (25) Dollars for their safe return.

The approximate total cost of said building and equipment is estimated at $70,000.00.

Bidders shall submit their bids in the following manner:

1. On all work complete as contemplated in the General Specifications, exclusive of Plumbing, Heating and Electrical work.
2. On all work complete as contemplated in the Heating and Ventilating Specifications.
3. On all work complete as contemplated in the Plumbing and Sewering Specifications.
4. On all work complete as contemplated in the Electrical Wiring, Signal System, and Electrical Fixture Specifications.
5. On a Combined Bid including all work complete as contemplated in Heating, Ventilating, Plumbing and Sewering Specifications.

All bids must be in writing, sealed and with the envelope endorsed, giving the name of the bidder and all bids will be opened at the time and place fixed in this notice.

All bids must be made out on form No. 96 as prescribed by State Board of Accounts.

Each bidder will be required to accompany his bid with a certified check for a sum equal to five per cent of his bid, payable to said Trustee. The check of the successful bidder will be returned when he has executed proper contract and bond, and in the event that such successful bidder fails to execute proper contract satisfactory to said Trustee, and give the required bond within ten days then such check of the bidder, so in default, shall be forfeited to said Trustee as liquidated damages for such failure.

The contract will be let, in compliance with the law to the lowest and best bidder, and said contract shall cover all legal requirements of the school law in force.

The Trustee and Advisory Board reserve the right to reject any and all bids.

Dated this 17th day of September, 1924.

RICHARD McINTYRE,
CHRIS HORTON,
FRANK B. HODGEN,
Advisory Board.

JOHN K. WRIGHT,
Trustee Jackson School Township,
Clinton County, Indiana.

Sept. 20-27-Oct. 4, 1924.

GYMNASIUM

NOTICE TO CONTRACTORS

The undersigned Board of Education of the School City of Anderson, Indiana, and the Anderson Public School Athletic Association, Anderson, Indiana, hereby gives notice that on Thursday, September 25th, 1924, until 7:30 o'clock P. M. at the office of the Superintendent of the City Schools in the High School Building in the City of Anderson, Indiana, they will receive sealed bids and proposals for the Addition of Vocational Departments in the present Gymnasium, and at the same time and place will also receive sealed bids and proposals for the installation of the Heating and Ventilating, Plumbing and Sewerage, and Electric Wiring in said building, all in accordance with the plans and specifications heretofore adopted and approved by said Board and which are now on file in the office

of the Superintendent of City Schools in the City of Anderson, Indiana.

The estimated cost of the proposed work is Thirty Thousand Dollars ($30,000.00).

All bids must be in writing, on forms provided therefor, delivered, signed and sealed, and in every respect must conform to the laws of the State of Indiana.

Each bid for the General Construction, Heating and Ventilating, Plumbing and Sewerage and Electric Wiring shall be accompanied by a certified check for 5 per cent of the full amount of said bids. These checks must be made payable to the Board of Education of the School City of Anderson, Indiana, and The Anderson Public School Athletic Association, Anderson, Indiana, and will be held by them as a guaranty of good faith that said bidder or bidders will enter into a contract and execute a bond for the full amount of his bid, approved by said Board of Education and, The Anderson Public School Athletic Association for the due performance thereof, if his or their bid or bids are accepted. The checks of those bidders who fail to be awarded a contract will be returned to them when the contracts have been awarded. Should the successful bidder or bidders fail to enter into such contract and execute such bond, then he or they shall forfeit the amount of said certified check as liquidated damages for such failure, for the use and benefit of the proper fund of the School City of Anderson, Indiana.

Copies of said plans and specifications are on file in the office of Ernest R. Watkins, Architect, Farmers Trust Building, Anderson, Indiana.

Copies of said plans and specifications may be obtained from the office of the Architect, upon the deposit of Ten Dollars ($10.00) for each set. Said deposit will be returned to the bidders upon the safe return of said plans and specifications on or before the day and hour set for receiving bids.

The right is expressly reserved to reject any or all bids and to use sufficient time to investigate the bids and qualifications of the bidders.

MRS. AUGUSTA MILSPAUGH,
President, Board of Erucation.
HERBERT McMAHAN,
President, Anderson Public School Athletic Association.

'TWOULD HAVE BEEN IMPOSSIBLE A FEW YEARS BACK

However, Greater Vision Has Come to Make Such As Hammond Meeting Possible

One of the finest demonstrations of what organization co-operative effort can accomplish toward a better relationship between men of a profession and those of business whose interests are individually of a separate nature and yet mutually entwined in ultimate accomplishment occurred last week when members of the Associated Building Contractors of Indiana and the State Society of Architects gathered on the evening of September 18 at the Hammond Beach Inn, Hammond, for a joint meeting, the same being preceded by a novelty for many in the way of a fine fish fry. There was a fine spirit of fraternalism that was much in contrast to the old days when it would have been impossible to get so many architects to meet amiably, to say nothing of mixing the two architectural and contractural elements into a big assemblage for a period of constructive thought and good fellowship.

The spirit of the meeting was correctly interpreted by Mr. C. G. Fanning, Chicago, acting as toastmaster, who caught the serious element that prompted the men present in their chosen callings and also the human side that made them fellow men, when he said:

"When I look about me, tonight I can hardly conceive that you are the men who are responsible for the mighty monuments that are springing up about us in the shape of Court Houses, Capitols, Libraries, Cathedrals and Skyscrapers. I really think that the builders, both architects and contractors. are the most unassuming and yet brainiest fellows to be found, and yet just a lot of overgrown boys.

We sometimes wonder why we like to come to dinners of this kind. It isn't for what we get to eat and surely it is not for what we get to drink, no it is because man is a domestic animal and does not like to be alone. He likes to lay aside the cares of business and get together with his fellowman to frolic, to sing, to lay aside his dignity and be the overgrown boy he really is.

The real history of the building business, I should say, begins with the development of architecture. Just as soon as the architect began to conceive something out of the ordinary, something different from what had been done before, then drawings became necessary, a master mind to interpret, and a master hand to execute had to be found. Just as architecture is the embodiment of the intellectual life of the designer, so also is its execution an index to the character of the builder. The architect expresses his feelings, his ideas, in his drawings—but the contractor must bring out in reality and put into shape all that the drawings convey. He must grasp immediately the architect's meaning and cause the cold unfeeling materials to spring into life and proclaim, as it were, the intention of the designer.

Years ago the architects all seemed to belong to one school. There was a sameness, a repetition in their work, no deviation from the beaten path worn by their predecessors. Now, however, each one, by his originality, is endeavoring to form a school of his own, and the contractor must be versatile enough to interpret and give back in the building the ideas intended.

The world is progressing, great strides are being made in all the arts and sciences and the building trade has steadily held its own. You are the men who have kept it in the front rank. Is it any wonder then that a man will marvel when he sees before him these very men who in their relaxation are only big boys?"

Other speakers were: Mayor Johnson, Gary; Mayor Schrage, Whiting; L. C. Granger, electrical contractor, Hammond; Herbert Foltz, Indianapolis, President Indiana Chapter, A. I. A.; Joseph Doeppler, Indiana Harbor, 2nd Vice-President A. B. C. of Indiana; E. Hill Turnock, Elkhart, Past President Indiana Society of Architects; Merritt Harrison, Indianapolis, Secretary I. S. A., and Otto Holtz, Chicago, Manager Builders and Manufacturers Mutual Casualty Co.; J. H. Owens, Indianapolis, Field Representative of the A. B. C. of Indiana.

The two mayors welcomed the visitors heartily and expressed the hope all of them would return soon, each paying a high tribute to the profession, architecture, and the business of contracting. Mr. Granger advocated continued co-operation between architect and contractor that greater things may be accomplished for the state building industry. Architect Foltz noted progress in the changing conditions that had come about making it possible for the architects and contractors to meet for a discussion of the problems that are mutually theirs.

Mr. Doeppler spoke on the contractor and the responisbilities that are his in carrying out the scheme of the architect. E. Hill Turnock reviewed the early ambitions of the Architects' Society and expressed pleasure that those ambitions are being realized.

Secretary Harrison referred to the architect and his conception of his duty to the public and the building industry. Mr. Holtz said Indiana was the only state he knew of where such strict collective co-operation between the various building interests was being observed and that the architect and contractor by such action can bring to a successful conclusion the vexatious problems that arise. Mr. Owens briefly referred to that which the building interests, architects, contractors, engineers and labor, through co-operation have done toward securing better building rules and regulations for the State of Indiana.

HOOSIER GIANT BRIX

GIVE BETTER BUILDINGS AT LOWER COST

The chief object in any building project today is to secure better buildings at lower cost. The public demands economy without the sacrifice of quality. Architects and contractors are meeting this demand with HOOSIER GIANT BRIX, the ideal material for high grade, economical construction.

Homes of HOOSIER GIANT BRIX

In residence construction, whether for outside veneer or solid walls, HOOSIER GIANT BRIX offer all the advantages of brick construction and yet save 25% over the cost of brick. HOOSIER GIANT BRIX can be laid up in a small fraction of the time required for other construction, thus making big savings in labor cost. In beauty they match fine quality tapestry brick. They equal brick in strength and load-bearing capacity. HOOSIER GIANT BRIX are five-walled, vitrified, mat-face fire-clay units, and are adaptable for any construction where brick can be used.

For INDUSTRIAL BUILDING

HOOSIER GIANT BRIX and HOOSIER Building Tile are adaptable for every type of industrial buildings, such as schools, gymnasiums, churches, factories, garages, stores and other fireproof structures. This material insures big savings on construction cost and makes a building unsurpassed for beauty and serviceability.

Architects and contractors are invited to send for samples and illustrated literature describing HOOSIER GIANT BRIX and Building Tile. Let us submit estimates on your specifications.

Indiana Society of Architects

INDIANA ARCHITECTS ROYALLY ENTERTAINED AT HAMMOND

President Fox of Illinois Society Architects, Guest of Honor

No mistake was made when the Board of Directors of the Indiana Society of Architects decided several months ago to carry the message of the organization to the Calumet Region in person, in other words, hold the next regional meeting at Hammond and invite in the members of that territory to get acquainted with the actual workings of the Society. The proposed meeting was held Thursday, September 18th, and was a success from beginning to end and in that success the hospitality and cordiality of the Calumet architects and their contractor friends played no little part.

Architect Karl D. Norris, East Chicago, chairman on program, together with his architectural colleagues in the Calumet District, arranged a fine lay-out for the day, had everything in ship-shape when the time came and followed through the various features with clock-like precision affording the visitors a round of entertainment and enjoyment never exceeded at any other I. S. A. affair. Mr. Norris and his committee of architects and contractors are deserving of great credit for the way they handled the regional and later the joint meeting of the Society and the Associated Building Contractors of Indiana.

The architects gathered at the new Indiana Hotel where a delightful noon luncheon was served, made the more attractive by the genuine felicitations exchanged and the harmonious atmosphere that enveloped the dining room. Around the table were members of the state architectural profession from nine cities and one prominent member of the profession from Illinois, Charles E. Fox, Chicago, the guest of honor. He is president of the Illinois Society of Architects and was delegated by that organization to attend the meeting in response to the invitation extended by the Indiana Society.

Since the program for the day was quite an extensive one, and time was limited, President Walter Scholer, Lafayette, allowed none to go to waste, and as soon as the meal was completed called the board meeting to order making it an open one and combining it with the regional affair which gave all present an intimate insight into the business matters of the Society and the aims of the directors.

President Scholer expressed his gratification at the turnout for the day and the number of cities represented, saying that these features indicated the interest the Society was arousing, considering it quite a tribute to the organization that those present would take out time from their business to travel to the meeting. He said the officers and directors appreciated the support they were receiving from the profession, that the Society had achieved much in the past few years and would continue to work for greater recognition of the profession and also for the advancement of the building industry in co-operation with other building construction interests.

Secretary Merritt Harrison read the minutes of the last meeting and also several communications that had been sent to the Society. One of the latter was of particular interest in that it came from Wm. H. Mac Lucas, architect, of Indianapolis, who resigned from the I. S. of A. with regret. He explained that owing to poor health he was forced to abandon his practice and was returning to his former home in Scotland. He asked to be remembered to the members of the organization and extend to them his best wishes. Mr. Harrison and others spoke of "Mac's" loyalty and interest in the Society and of how he had actively worked on architectural exhibits. The resignation was accepted with regret.

Another communication from the Associated Building Contractors of Indiana suggested that since that organization was to hold its annual state convention in Indianapolis January 27 and 28, 1925, the Indiana Society also consider holding its semi-annual meeting in the same city on January 27, and that evening join the contractors at their banquet. It was moved that no action be taken on this matter, rather, that it be taken under advisement for future disposition. This latter was carried.

The concluding business had to do with the selection of a site for the next regional meeting in November, and as these affairs have been held in practically all the various sections of the state it was voted to hold the November meeting in Ft. Wayne, which city has not been visited by the Society for nearly two years. The date will be selected later.

President Fox of the Illinois Society was then called upon for a few remarks. He said in part: "Mr. President and Gentlemen of the Indiana Society of Architects. I am pleased to be with you today, consider it an honor to act as delegate from the Illinois Society, and to you I bring greetings from the members of the architectural profession of my home state.

It is a fine thing for the architects of a city or from the various localities of a state to get together as you men have done today and I am pleased to see you all here. The interchange of ideas and opinions movement fostered by such meetings is a good thing for any business or profession and it pleases me that the architects are adopting it. The fact that you men have gathered for a regional meeting such as this one today bespeaks the strength of your Society and the interest it has aroused. We in Illinois have a membership of over four hundred architects and yet it is hard to get more than seventy-five or so out to a meeting. To me it seems that one of our greatest problems is to interest architects in our professional organizations and to keep the members interested in the activities of such bodies. There are too many just willing to belong and let the other fellow carry on the work.

There should be definite constructive policies; we should move to convince of the earnestness of our purpose. Architects should interest the draftsmen and meet with them, teach, lecture and dissemate the experience that we have gathered through the years, thus helping the younger men and impressing upon them our organization's interest in them.

Then, too, our Societies should seek to profit the profession by acquainting the average man with the value of an architect which is little understood. The layman seems to fail to realize the difference between good plans and design and bad plans and design. Many take a plan to provide solely for walls and a roof, failing to consider the deeper service of design for utility, convenience and comfort. How to get around this I am not sure. Much has been said about publicity, but, how to gain the desired publicity is a question not yet settled.

These are matters we, as architects, through our Societies, must go into; we are too prone to be self-contained, to take too much for granted to our own detriment. However, I believe we can remedy this if we will work together, shake off our aloofness and by means of our organizations tackle these things in a constructive vein."

Adjournment was then taken to enable the architects to meet the visiting members of the State A. B. C. for a trip through one of the Calumet steel mills, a very delightful trip that concluded at the Hammond Beach Inn where a fish dinner was served.

The architects present were: Nat Smith and guest, F. E. Muzzall, Crown Point; K. D. Norris, C. F. Norris, East Chicago; E. Hill Turnock, Elkhart; Rodney W. Leonard, Frankfort; I. M. Cohen, Gary; A. C. Berry, G. H. Buckley, W. S. Hutton, Max Wainwright, Hammond; Phil Bartlett, Elmer E. Dunlap, Herbert Foltz, Merritt Harrison, L. A. Turnock, Indianapolis; R. W. Nolan, Frank Riedel, Walter Scholer, Lafayette; George W. Allen, Laporte; Charles E. Fox, Chicago.

ORGANIZATION AND CURRENT NEWS

LATE ARRIVALS CUT IN ON PROPOSED CONTRACTORS' DISTRICT CONFERENCE

Short Session Held, Then Came a Great Time That Ran Well Into the Night

The scheduled district conference of contractors, members of the Associated Building Contractors of Indiana, didn't get very far owing to the late arrival of many of the builders, and also due to the fact that the program committee had quite a sight-seeing tour arranged that it was found out would take more time than was originally scheduled.

The contractors' conference was set for 1:30 p. m. at the headquarters of the Building Trades Employers Association, Citizens National Bank Bldg., but by the time the visitors secured their noon luncheon and got squared away for action it was past 2 o'clock, daylight savings time. There were some forty builders present when the gathering was called to order and more kept arriving as the session progressed. Short discussions of conditions and the outlook for building followed the roll call. A general summary of the opinion expressed showed that conditions had held fairly satisfactory with a promise of no apparent change in the near future; as for the prospect it was generally conceded that operations had showed a tendency to let up to some extent, but that there was enough prospective work in sight and contemplated to lead to the belief that fall business will continue steady though not in the volume of some of the previous months.

The feature talk of the afternoon was made by E. H. Hyman, Sec'y-Mgr. of the South Bend Builders Exchange, who explained the move being made by his organization to institute a Quantity Survey Bureau for the building industry of that city. The speaker, while limited for time, briefly and concisely put forth some interesting facts regarding the quantity survey matter, referred to the success with which it had met in other cities, and spoke of the co-operation that had been extended to him by men in those cities who had such bureaus in operation. His remarks were received with favor and started many of the contractors thinking along the line he had been discussing.

Just after 3 p. m. the meeting was forced to adjourn in order that the visitors might be able to reach the huge mill of the Youngstown Steel and Tube Company at Indiana Harbor, where plans had been made for a tour of inspection. This was a most educational and interesting jaunt and the only regret was that more time was not at the disposal of those present for a more studied inspection of the various processes pursued in the melting of the ore, the rolling of the bars, and the drawing and manufacture of the tubes and pipes. While the mill was not the largest in the Calumet District it is one of the most modern and a journey thru it was a feature alone worth going miles to experience.

At the conclusion of the steel mill inspection tour all the architects and contractors were again hustled into automobiles and taken on a ride thruout the cities of the Calumet section, being thus given a fine opportunity to size up and appreciate the wonderful industrial development and activity of the far northwestern part of Indiana, made possible only thru the great railroad and lake shipping facilities.

As dusk came down to brighten the flares from the great mills the builders' caravan wended its way to Hammond Beach Inn where, in a spacious dining room, one entire side glass windowed, looking out over Lake Michigan from which came the sound of swishing, tumbling waters as it pounded on the beach, a fish fry was served to the hungry architects and contractors who joined forces and made merry thruout the evening, thus bringing to a happy ending a day that will be long remembered.

The Calumet architects and contractors did their part nobly in arranging for the details of the day, proved fine hosts, put on a brand of hospitality not to be excelled anywhere and are deserving of great credit from the State Building Industry for the wonderful way in which they handled the big meeting and the cordiality they extended to those who journeyed to Hammond, Sept. 18.

Calumet District

CALUMET CONTRACTORS PLEASED WITH COMMENT AROUSED BY HAMMOND GATHERING

Feel Well Repaid for Effort expended To Make Affair a Success

As an aftermath to the builders' gathering last week, there murmured thru the Calumet District echoes which seemed to indicate that everyone who attended the joint meeting of Indiana Architects and Contractors enjoyed the affair and that it was a complete success. If such is the case Calumet builders are glad, particularly those of Hammond who had the honor of having the State guests in their midst and whom they sought diligently to entertain. We of the Calumet section were pleased that so many of the architects and contractors saw fit to lay aside their business routine and cares for the day and journey from various localities to pay us a visit, and thus show a deep interest in organization endeavor. Such action demonstrates the progress organization effort is making, for without association inspiration it would be impossible to attract such a representative crowd of building men from out over the State.

Hammond sincerely hopes that all her visitors and guests thoroughly enjoyed the hours spent in her midst and that those who did come felt well repaid for the effort put forth. Further, Hammond, East Chicago, Indiana Harbor, Whiting and Gary all hope the Indiana architects and contractors who spent Sept. 18 in the Calumet will come back again soon.

ON THE OUTSIDE BUT DIDN'T APPRECIATE FACT

Seemed To Think He Was Expounding Something New Only To Prove He Was Playing a Lone Hand

There was but one discordant note sounded during the day of the big meeting, and it did not break out till late. As it was the incident was trivial and went but to accentuate the advantage of knowing where one is, and how such a one could profit if he, a stranger in a community, would but get right with the local contractors' association in place of turning a deaf ear to the advice and offers of help that are extended.

It so happened that a Chicago contractor who had landed a job in the Calumet District was at the meeting as a guest. Somehow, strange to relate, he had secured some of the forbidden beverages and evidently had imbibed rather freely. He was nursing a peeve over certain conditions that had arisen concerning his building operation, and that peeve grew as the beverages got in their influence. Suddenly he felt called upon to enlighten the throng and, unbidden, unintroduced, he arose and began a long harangue on the evils of contractors paying bonuses. He talked and talked and got nowhere except to prove that he was not co-operating with local contractors' associations, and that he was but reaping the whirlwind caused by his own action in seeking to go it alone, run his own business regardless, and refusing to align himself with association effort in an endeavor to better working conditions. At first it seemed he had a message to get across, then his actions took a humorous twist and many thought it was just a stunt for amusement, but in the end the whole proved to be a pitiful effort of one who failed to appreciate just how "in Dutch" he really was. After repeated attempts someone succeeded in getting him to "answer a telephone call."

All of which went to prove if said contractor had only been in harmony with local association strivings he would not have been so bowed down with supposed "grief," and would have never made such a spectacle of himself.

BACK TO THE GARAGE WENT THE CAR

And to the Desk Treked the Secretary

The B. T. E. A., secretary, with the big meeting out of the way, and feeling in need of a rest, had in mind a week's or ten days' motor trip down through Indiana and was just about ready to hop off when up came some unforeseen circumstances that make it imperative that he be at his desk, so, there he will be instead of motoring. He is convinced Bobbie Burns was right when he wrote, "The plans of mice and men, etc."

WORRIED FOR A TIME

Feared Editor Would Miss The Fish or They Would Miss Him

While some of his old friends did not land at the same table with him and were therefore not in a position to look after the wants of the editor of the Recorder we did not have much cause for worry, for, he seemed quite busy wrestling with fish, and from that continual smile on his face we judged he was either being well taken care of or was taking good care of himself. We hope he got enough fish to satisfy that appetite of his, for it's a long winter ahead and fishing is not pleasure but an occupation when the days grow cold and icy. We just wanted to save him from having to work too hard, it might not agree with him.

CALUMET BUILDING PROGRESS

Last week a report from Hammond was to the effect that a contract was awarded to Morris Bros., for a structure for Pearson and Son, it should have read a building for the Linen Supply House.

Milda & Hansen were the successful bidders on a new residence for John Jarnowski, Calumet City, Ill. The contract at $24,000 also included heating, plumbing and wiring.

Otto McCracken, Lansing, Ill., awarded a contract to Morris Bros., Hammond, Ind., for the erection of a $7,500 bungalow.

Bids for the new telephone building, Hammond, exceeded the estimate and have been taken under advisement.

E. E. COLE.

INDIANAPOLIS

LOCAL MASON CONTRACTORS TO PLAY TODAY

To Toss Tools Aside—Enjoy Annual Picnic

The members of the Brick Mason Contractors' Association are to frolic this afternoon, Saturday, Sept. 27. This is the occasion of their annual picnic, dinner and dance, an event long since established as a regular part of the association activities, and one that in the light of past performances is always looked forward to with much anticipation by the members of the organization and their families.

The affair is scheduled for Paige's Country Estate, several miles east of the city out along the National Road where chicken dinners are a specialty. Leave it to the masons to spot a good place to eat, they located the place several years ago and have been going back annually in a body for more chicken and good times.

"Ernie" Pierson, chairman program arrangements, aided and abetted by some of the other "youngsters" in the association have been framing up a program for several weeks and have just been waiting for a definite date to spring it for a "knock-out." Some of the boys have brushed up the horseshoes for the annual battle of "ringing the peg" which always gets a rise out of the crowd. They are some barnyard golfers. Then, too, there will be a ball game, races and other sports, with various stunts intermixed to keep things moving along at a high tension.

Along about 6 p. m. there will be an invasion of the dining precincts where the festive board will offer to the hungry contractors and their guests that American Favorite, fried chicken and all the embellishments that go with it to make such a meal complete. Following the dinner there will be dancing.

It's a hard life this being a member of the Indianapolis Brick Mason Contractors Association.

OF INTEREST TO THE WHOLE OF INDIANA

Industrial Exposition at Indianapolis To Be a Fine Aff:air

When the doors of the great new exposition building at the State Fair grounds are thrown open on the evening of Saturday, October 4, the second Indianapolis Industrial Exposition will get under way amid a splendor of decoration which will be in keeping with the importance and magnitude of the undertaking.

The first Indianapolis industrial exposition held in 1921, which attracted record crowds from every part of the state, will be surpassed in every way by the coming exposition, according to those in charge of the approaching affair.

Everything that would contribute to the complete comfort and safety of the exposition visitors has had the attention of the executive committee. Spacious aisles and numerous entrances and exits in all parts of the building will completely eliminate crowding and make it possible for every exposition visitor to see each exhibit.

Bands stationed at both ends of the exposition building will provide music during the hours the exposition is open to the public and will contribute to the gala nature of the great exposition.

Beauty and brilliance will mark the decorations of the great four acre exposition building. The industrial exposition being the first exposition to be held in the structure, which was completed during the summer for the Indiana State Board of Agriculture, the scheme of decoration will be entirely new. Gold and black, the official colors of the exposition, will predominate in the decorative scheme. A myriad of electric lights hung in great chandeliers, and unusual flood lighting effects which are to be used throughout the building will contribute to the splendor of the exposition.

More than four hundred Indianapolis manufacturers have co-operated to insure the exposition being the most important civic event in Indianapolis, also Indiana, this year. Under the vast expanse of a roof that covers four acres of ground will be assembled an unrivaled array of industrial products, all of Indianapolis manufacture.

Much of the romance of business will be bound up in the exposition. Many of the displays will be by industries which came to Indianapolis in the early stages of its industrial expansion. During the years that followed, energy and foresight combined with the hard work which is necessary to build up satisfactory markets enabled these plants to grow until today many of them are known throughout the world.

Sealed Proposals

STATE HIGHWAY DEPARTMENT ROADS AND BRIDGES

Bids for the construction of twenty-six bridges throughout the state were opened by the Indiana state highway commission. The total amount of the low bids was $273,305.14. Three bids were also received by the commission for the construction of 2.75 miles of highway on the Indianapolis Avenue road, from the Illinois state line to 116th street, and on the Calumet Avenue road, from Indianapolis Avenue to Sheffield Avenue, in Lake county. The low bidder on this project was Ahlborn & Lavene, of Hammond, whose estimate was $127,193.72.

Low bidders on the bridge projects were: Four structures in Franklin and Fayette counties, D. Y. Stout, of Crawfordsville, $17,874.39; ten structures in Spencer, Perry, Crawford, Whitley and Allen counties, Fritch Construction Company, of Jasper, four contracts, totaling $87,046.73; two structures in Whitley and Allen counties, George Jaap & Sons, of Fort Wayne, $11,201.73; six structures in Spencer, Perry and Crawford counties, Vincennes Bridge Company, of Vincennes, $41,909.43; one structure over Eel river, in Whitley county, Elkhart Bridge and Iron Company, of Elkhart, $4,831.01; one structure over Indian creek, in Switzerland county, substructure, Robert H. King of Danville, $66,517.81, superstructure, St. Louis Structural Steel Company, of St. Louis, Mo., $20,432.50, and grading, Ellis & Scamahorn, of Rockport, $23,491.54. The bids were above the engineer's estimate for two bridges in Franklin county.

NOTICE TO CONTRACTORS

SIDEWALKS AND DRIVEWAY

Notice is hereby given by Edward J. Hecker, Trustee of Warren Township, Marion County, Indiana, that until one o'clock P. M., Thursday, October 16, 1924, at his office at No. 5241 East Washington Street, Indianapolis Indiana, said trustee and his Advisory Board will receive sealed proposals for cement sidewalk and cinder driveway, and alternate bid for gravel driveway in place of the cinder driveway, at the Warren Township Central High School Premises, located on the east side of the Post Road, between East Michigan and East Tenth Streets, in Warren Township, Marion County, Indiana, in accordance with specifications prepared by Harrison and Turnock, Architects and Engineers, 500 Board of Trade building, Indianapolis, Indiana, and on file with said trustee, the State Board of Accounts, and in the office of the Architects and Engineers.

All bids must be made out on the Standard Form, No. 96, of the State Board of Accounts, and shall be accompanied by a certified check for Fifty Dollars ($50.00) guaranteeing that if the bidder is awarded the contract he will accept the same and give bond for the faithful performance of said contract.

The contractor's proposal shall be the price per square foot surface area for furnishing labor and materials for: (a) Cement walks, estimated cost $790.00; (b) Cinder driveway, estimated cost, $2,100.00; (c) Gravel driveway, estimated cost, $2,400.00; any, or all, as above specified.

Owner reserves the right to reject any or all bids.

Dated this 25th day of September, 1924.

ERWARD J. HECKER, Trustee.

SCHOOL HOUSE NOTICE TO CONTRACTORS

Notice is hereby given that sealed proposals will be received by the Trustee of Jackson School Township, Clinton County, Ind., until ten (10) o'clock A. M. on the 11th day of October, 1924, at the home of John K. Wright, Trustee of said Township, for the erection and completion of a Joint Grade and High School Building located one-half mile south of Antioch on the Jackson Highway in said Township, County and State, according to the plans and specifications prepared by Rodney W. Leonard, Architect, 309 Peoples Life Bldg., Frankfort, Ind.

INDIANAPOLIS :: INDIANA

Plans and specifications for the same are now legally on file in the office of the trustee of said Township and also on file in the office of said Rodney W. Leonard, Architect.

Any prospective bidder desiring to take copies of said plans and specifications from either of said offices must make a deposit of Twenty-five (25) Dollars for their safe return.

The approximate total cost of said building and equipment is estimated at $70,000.00.

Bidders shall submit their bids in the following manner:

1. On all work complete as contemplated in the General Specifications, exclusive of Plumbing, Heating and Electrical work.

2. On all work complete as contemplated in the Heating and Ventilating Specifications.

3. On all work complete as contemplated in the Plumbing and Sewering Specifications.

4. On all work complete as contemplated in the Electrical Wiring, Signal System, and Electrical Fixture Specifications.

5. On a Combined Bid including all work complete as contemplated in Heating, Ventilating, Plumbing and Sewering Specifications.

All bids must be in writing, sealed and with the envelope endorsed, giving the name of the bidder and all bids will be opened at the time and place fixed in this notice.

All bids must be made out on form No. 96 as prescribed by State Board of Accounts.

Each bidder will be required to accompany his bid with a certified check for a sum equal to five per cent of his bid, payable to said Trustee. The check of the successful bidder will be returned when he has executed proper contract and bond, and in the event that such successful bidder fails to execute proper contract satisfactory to said Trustee, and give the required bond within ten days then such check of the bidder, so in default, shall be forfeited to said Trustee as liquidated damages for such failure.

The contract will be let, in compliance with the law to the lowest and best bidder, and said contract shall cover all legal requirements of the school law in force.

The Trustee and Advisory Board reserve the right to reject any and all bids.

Dated this 17th day of September. 1924.

RICHARD McINTYRE,
CHRIS HORTON,
FRANK B. HODGEN,
Advisory Board.

JOHN K. WRIGHT,
Trustee Jackson School Township,
Clinton County, Indiana.

Indiana Society of Architects

I. S. A. COMMITTEES NAMED

Men From Over the State Who Have Been Active In the Society Affairs Appointed

Business matters, naturally requiring the close attention of the architect during the active building months of the summer, then vacations, and other things all coming thick and fast the past few months left little time for the officers of the Indiana Society of Architects to devote much time or thought to the affairs of the organization. However, with the approach of fall, an effort was launched to organize and build up the various standing committees. After considerable thought the following architects have been named for service this year:

Entertainment Committee:

Donald Graham, Chmn., Indpls.
August Bohlen, Indianapolis.
Charles Brossman, Indianapolis.
Harry R. Fitton, Indianapolis.
Frederick Wallick, Indianapolis.

Membership Committee:

Geo. W. Allen, Chmn., Leporte.
Everett Crabb, Indianapolis.
L. L. Johnson, Attica.
Lester W. Routt, Vincennes.
A. M. Strauss, Ft. Wayne.

Legislative Committee:

Herbert Foltz, Chmn., Indianapolis.
Charles Bacon, Indianapolis.
Fermor S. Cannon, Indianapolis.
J. W. Gaddis, Vincennes.
W. E. Russ, Indianapolis.

Publicity and Public Action Committee:

Herman Scherrer, Chmn., Indpls.
Harry Boyle, Evansville.
Warren D. Miller, Terre Haute.
Frank P. Riedel, Lafayette.
Byron Sutton, Vincennes.

Pageant and Exhibit Committee:

Kurt Vonnegut, Chmn., Indianapolis.
Wayne Bell, Ft. Wayne.
Robert Frost Daggett, Indianapolis.
Clarence T. Meyers, Indianapolis.
Edward Pierre, Indianapolis.

HAMMOND HOLIDAY ECHOES

After the crowd had emerged from the extensive tour through the big Youngstown Sheet and Tube Co. mill at Indiana Harbor, all more or less somewhat tired from walking in and out and round about, someone mentioned that the Inland Steel Co.'s plant was much larger and a jaunt through there would have been interesting. L. A. Turnock, who had sunk into the back seat upholstering of a big sedan with a sigh of relief, stuck his head out of the window excitedly and chirpped, come on, I'm satisfied, that other mill was plenty big enough for my curiosity. Others seconded the motion and back to town went the architects.

Rolling comfortably around the Calumet District in Karl D. Norris' new Paige sedan, semi-baloon tire equipped, convinced quite a few of the architects that K. D. made no mistake when he located at East Chicago some years back.

The boys had quite a time trying to pronounce some of the foreign names on the store windows. "There Rodney is one you can't figure out," said an architect to Leonard. The latter studied the jumble of z's, x's, k's, y's, i's, e's, u's, then gave up, "but," said he, "if I had a fiddle I could play that name."

Merritt Harrison did some quick ducking when the jets of water, turned on the big rollers to keep them cool, struck the white heated tubes as they came from the furnace. Merritt had seen nothing but foreigners and when a racket like a bunch of cannon crackers fired in rapid succession followed the meeting of hot steel and water, he thought a bomb-throwing contest was on.

Herbert Foltz broke a record by going to Hammond. Next day the Engineer's Registration Board met, and since he had returned to Indianapolis by Pullman, he was over at the State House bright and early to greet the other members of the board as they arrived. At first they thought something was wrong and there was a general reference to watches. No one ever recalled Foltz beating the gavel before.

They must be making money in Lafayette when a fellow can leave his stylishly cut, perfectly good, top coat lying overlooked, forgotten, in a depot waiting room, and that, too, on a chilly night. When Frank Riedel came to, though just as the Monon for Lafayette was leaving, he nearly knocked the conductor down in an effort to retrieve the missing garment. Yes, the smile came back to Frank's face when one of the other architects breathlessly tossed the coat to the owner and he went on his way rejoicing.

When informed that Indiana Harbor was 85% foreign-born in the way of population, E. Hill Turnock innocently inquired why the citizens did not go right ahead and make it unanimous.

As the stranger at the dinner continued to argue about the $1.60 bricklayer's wage and the folly of paying bonuses, advanced only to retrace his argument and repeat the whole over again, Walter Scholer grew quite nervous and asked one of the contractors if he happened to have a brick handy.

Nat Smith, Crown Point, was one of the architects who had never before sat in at an I. S. A. meeting. He expressed pleasure at the opportunity to get in closer touch with the organization. By the way, Nat, while going through the big steel mill, opined that there was a lot of hot air linked up with the steel industry.

"Old Reliable," George Allen, was right on hand at "the tap of the gong." He misses very few meetings. George put in another plug for increased membership and submitted a couple more applications. Since George never "makes any bones" about anything, so, you see he had no trouble whatever at the fish-fry.

C. F. Norris, who designed the Hammond meeting announcement, drew a good hand when introductions were in order. He modestly tried to dodge the issue but the other architects would have none of that.

Among those to whom the visitors are indebted for a glorious day is W. S. Hutton, son of J. T. Hutton, Hammond architect. The former was on the job every moment of the time in the absence of his father, who was out of the city, and aided much in the seeing of the Calumet District by escorting many of the visitors about in his car.

ORGANIZATION AND CURRENT NEWS

Calumet District

HOLDS FORTH LITTLE HOPE FOR REDUCTION IN BUILDING COSTS

Figures Labor Wage a Controlling Element to Hold Steady to Strong

There is so much speculation going on relative to the future trend of construction costs that a recent talk along that line by W. J. Moore, President of the American Bond and Mortgage Co., is doubly interesting at this time, particularly since he stresses upon a feature that has practically the greatest control on that phase of building.

He asserted that labor controls building construction costs and in backing up his assertion advanced the following argument:

"It is my belief that the brisk building demand contingent upon a still existing housing shortage, together with the high cost of building labor, precludes any immediate possibility of a substantial decrease in building construction costs. The wage element comprises fully 75 per cent of building costs. Reduction in wages of building labor will be the last to be effected, because of the scarcity of skilled labor.

"If there should be any slackening in building operations, with a subsequent decrease in the demand for labor, the result would be beneficial to the building industry in that it would lead to greater efficiency on the part of labor. As in all lines of the industry, where the demand for labor has for any length of time been greater than the supply, the inefficient workers have found it possible to get work and the efficient have not found it necessary to put forth their best efforts.

"Owing to the increased average wage of the workers in the building trades at the present time it is doubtful if building labor will ever get back to pre-war efficiency. If labor did increase its efficiency, we believe that a very large number of building projects which have been held in abeyance would be started, with the result that labor would not have to consider any decrease in per hour wage scale.

"It is apparent that builders can not look for reduced building costs from a lower wage scale within the immediate future, in other words, the only hope of effecting a reduction in building costs will be through cheaper materials and increased labor efficiency.

"The approximate stabilization of building wage levels is due to the limited and decreasing supply of skilled building mechanics and laborers, the advancing age and the retirement of large numbers of these mechanics without a corresponding replacement of young apprentices, a continuation of the building deficit and therefore of a strong competitive demand for building labor. A survey made by the Associated General Contractors of America within the year indicates that there is a shortage of skilled building mechanics averaging about 50 per cent in the case of lathers, plasterers, masons and sheet metal workers.

"To reduce building wages materially either the supply of labor will need to be increased 30 to 50 per cent or the volume of building will need to be decreased 30 to 50 per cent. Neither can happen except gradually over a period of years, and with building wages remaining firm and preventing a substantial decrease in building costs, rental levels are not likely to decline materially in the near future."

HAMMOND'S "MAIN STREET" MADE TO MEET TRAFFIC REQUIREMENTS

Big Undertaking Nears Completion

The widening of Hohman street in Hammond, which at its inception looked to be of such magnitude, has almost been accomplished. It is the city's principal thoroughfare through the heart of the business district but when originally laid out, the present-day traffic demand was a thing unthought of, naturally, the street for the past few years has failed to meet requirements and something had to be done. There was but one remedy and that was to move back the structures. A start was made after tedious preliminary steps and only three buildings remain yet to be removed or set back. Since the owners have made no move to carry through the improvement the city officials have given them a limited time in which to act and unless they do the city will take a hand in the matter.

CALUMET BUILDERS PLEASED

Expressions of Appreciation of Effort Made September 18, Continue to be Heard

It has been gratifying to learn from various sources that many of those who attended the architects and contractors' joint meeting at Hammond, September 18, considered the affair a success.

The builders of the Calumet District sought hard to please and hope that another such meeting will be held up here in the not far distant future.

A logical place for the next gathering would be at Gary since Mayor Johnson made such a fine effort to be present, extended such a hearty welcome to the visitors and made the fine talk he did.

CALUMET BUILDING PROGRESS

Milda & Hansen were the successful bidders on the new administration building at Calumet City. They were second low but, being residents, were given the preference. The price was $45,955.

Buckley & Skidmore, architects, Hammond, are drawing plans for a one-story and basement brick store building for Stanley Kolanko, on Morton avenue, East Hammond. The dimensions will be 47x122 feet.

E. W. Nissen was the successful bidder on the eight-room grade school building at Schiller, Ill. Berry, Wainwright & Co., Hammond, Ind., were the architects.

J. T. Hutton & Son, Hammond, architects, are drawing plans for a two-story and basement brick residence, for Walter Nowak, Berger, Ill., just west of Calumet City. Plans will be ready for contractors to figure about October 6.

The latter firm of architects is also preparing plans for a residence for Matthew Peicz, Berger, Ill. It will be brick veneer, 2 story and basement, 26x32. Bids to be asked October 6. They have plans for a third story addition to the Barker Furniture Co., Indiana Harbor. Bids after October 10.

EVANSVILLE

SEPTEMBER PROVED A GOOD BUILDING PERIOD

Best Under New City Code Regulations

Local building activity as reflected in building permits issued at the office of Commissioner of Building Kerth, showed a decided advance during the month of September. Last month's totals in permits exceeded those of any month since the new building code went into effect, May, 1923.

With a total of 245 permits issued involving building construction costs approximating $325,000, September total showed a gain of 25 per cent over the corresponding period of last year. Last month's total also showed about $5,000 increase in building construction estimate over August.

Remodeling and repairs claimed the greatest number of permits for the

month of September, the cost of this class of work approximating $100,000. New dwellings accounted for another $100,000, with the remainder distributed for varied classes of industrial and church construction.

INDIANAPOLIS

MASON CONTRACTORS HAD A GREAT TIME

Knock Off to Enjoy Picnic

When they work they work, and when they play they play, consequently, since Saturday afternoon, September 27th was a half holiday, and working hours were over, the members of the Indianapolis Brick Mason Contractors Association, turned their thoughts to pleasure and played with a vim.

The day set aside for the association's annual picnic and fried chicken dinner had arrived and the brick mason contractors had for days planned to make the most of it. Thus it was that quite a motor caravan of them, together with their wives and families, set forth from the city shortly after noon for a spot some miles east of the city for their annual frolic.

At Page's Place, along the National Road the crowd stopped, parked their cars, and disembarked to enjoy the fun fest "Ernie" Pierson had planned.

There were all sorts of stunts and games but the one that proved the big feature was the "barn-yard golf" contest between several teams. There was a tournament arrangement that by the process of elimination whittled the entries to a semi-final contest. The teams that came through the stretch for the "championship" final were the two captained by Jas. Hodgson, Jr., and J. C. Keely. It was a "battle of the century" clear down to the last fling and was of such duration that dark came down before the finish and the auto headlights were turned on in a great flood of brilliance that the all-important pegs might be seen.

Point by point the two teams moved along to the final throw when Captain Keely slipped a horseshoe the merest fraction of an inch, the nearest to the peg. The margin was so close it took considerable time to figure out just who the winner was. Then with ceremonies Captain Keely was presented with the prize. a document entitling him to attend the annual convention of the International Brick Mason Contractors' Association at Springfield, Ill., in February. The only provision of limitation attached was that he agree to foot his own expenses.

Sometime before the finish of the above contest the aroma that only a fried chicken dinner in the course of preparation can give off came percolating through the trees from the direction of the kitchen to cause a most apparent restlessness amongst the spectators and some of them even lost interest in the game and moved in closer to the house so as to be nearer the dining room when the mess call sounded. It was not long in coming nor was the crowd long in responding.

Mrs. "Ernie" Pierson and Mrs. Jas. Hodgson, Sr., who had charge of the decorations had a pleasant surprise in store for the picnickers who found the big dining room all gotten up in Hallowe'en style, pumpkin jack-o-lanterns, autumn leaf sprays, and other appropriate trimmings.

The dinner was fit for a king and what the poor, thread-bare, overworked, down-trodden, much maligned mason contractors did to the menu was a shame when they got their trowels (forks) to working. However, before the repast was begun, and in the absence of a divine .'Jimmie" Hodgson, Sr., took the floor to offer up the following, a product of his favorite, "Bobbie" Burns:

"Some would, but ca'not eat,
Others could, but wi' not eat.
We ha' chicken meat, so let's all eat,
And let the Good Lord be thank-ed."

After the dinner there were musical selections by some of those present after which came dancing that finished the day's festivities.

Among those present were: Mr. and Mrs. M. M. Boniwitz, Mr. and Mrs. F. Gray, son and daughter; C. Hattendorf and son, Mr. and Mrs. James Hodson, Jr., Mr. and Mrs. James Hodgson, Sr., Mr. and Mrs. W. H. Hodgson, Mr. and Mrs. Leon Joyce and daughter; Mr. and Mrs. J. C. Keely and son; Mr. and Mrs. T. J. O'Hara and daughter; Mrs. C. C. Pierson, daughter, and mother Mrs. O. A. Griffith; Mr. and Mrs. E. H. Pierson, Mr. and Mrs. Arthur Reed, Mr. and Mrs. William Rubush and daughters; Mr. and Mrs. James Rybolt and guests Mr. and Mrs. A. G. Allen; Mr. and Mrs. O. Wise and daughter; Mr. and Mrs. Walter Wise.

BUILDING VOLUME CONTINUES TO PILE UP MATERIALLY

September Operations Good, Aided Greatly by Active Residential Construction Movement

Two hundred and fifty permits for dwellings and apartments for an estimated valuation of $1,144,014, issued by the Indianapolis building inspection department during the month of September accounted for 43.86% of all the new construction business handled by the department last month. This was one of the greatest monthly records for new housing projects ever recorded in the city's history and went a long way to put September on the books as one of the best building months of the year.

Twenty-one business structure permits, totaling over half a million dollars, was the second best building volume posted, also aiding in boosting the September figures.

There was a great rush of repair and alteration work, 1,052 such permits being granted, adding $369,272 to the month's totals.

Another unusual feature had to do with sheds and garages, applications approved amounting to 284 for an estimated expenditure of $109,776.

All of these projects, together with other work, ran the permits issued up to 1,759 for a total estimated valuation of $2,607,980 on new work.

Though this was 18.9% in arrears of the August valuations, it was almost equal to the July figures and made September one of the best building months of 1924. Further, the past month's estimated investment in new building construction represented a gain of 57.3% over that of the corresponding period a year ago.

As for the 1,759 permits issued in September, that was the greatest total recorded for any one month this season, was 209 more than issued in August, 1924, and 263 in excess of the number granted in September, 1923.

The analytical tabulation made by the department is as follows:

Classification	Per.	Est. Val.
Accessory Bldgs.	284	$ 109,776
Business Bldgs.	21	596,000
Industrial Bldgs.	2	5,000
Miscellaneous Work	141	72,318
Public Bldgs.	4	38,400
Repairs & Alts.	1052	369,272
Residences	250	1,144,014
Tenements & Flats	5	273,200
Total	1759	$2,607,980

LAFAYETTE

ASSOCIATION ACTIVITY REVIVED BY FALL MEETING

Lafayette Contractors Assemble to Discuss Building Conditions and Affairs

With fall at hand, harvest days over, and general preparation being made for the on-coming winter season, the members of the local Associated Building Contractors' organization, as many other men are doing, got together Wednesday night, to the number of twenty-five, at a dinner meeting at the Lahr hotel, to talk over things, take stock as it were. The gathering was the first of the A. B. C.'s for months, no meetings having been held during the summer, and from the enthusiastic spirit displayed, the members seemed pleased to assemble once more by showing a deep interest in the deliberations.

Conditions both locally and over the state were reviewed and even the probable future development was gone into. It was the concensus of opinion that everything considered the building industry this year has fared well since no really unsatisfactory impedements had arisen to dampen the ardor of prospective builders. It is true wages had continued strong with slight increases but the labor supply was plentiful a fact that tended to promote greater production and efficiency amongst the craftsmen, an end much desired for several years. It was greater production on a high wage base that contractors and the public has fought for rather than a mere antagonism to the advanced wage levels. Locally workmen have assumed a more intent interest in their work than was prevalent a few short years back.

As for state organization activities and conditions Field Representative J. H. Owens of the A. B. C. of Indiana, made a report covering that subject, touched upon the recent Hammond District Conference and told of what the Administrative Building Council of Indiana had done of late and what was in mind for future activities.

Owner, Samuel Lewis Shank (mayor of Indianapolis.) City Hall. General contract let to John R. Curry, Curry Constr. Co., 319 Empire Life Bldg., for $130,958.00. Brick work let to Walter W. Wise, Indiana Trust Bldg. Brick reinf. concrete. Start work in a few days.

***Residence and 2-Car Garage:** $30,000.00, 52d St. south of Highland Golf Club Course. Archt., Harrison and Turnock, 500 Board of Trade Bldg. Owner, Dr. William Campbell Hall, 903 Fletcher Trust Bldg. Stucco over hollow tile. General contract let to Bremerman and Son, American Central Life Bldg. Heating and plumbing let to B. C. Torrelle Co. Electric work let to Home Electric Co. Plumbing fixtures let to August Buschman & Son. Heating specialties and boiler let to C. A. Dunham Co.

College Building: $250,000.00, Evanston, Ill., Chicago. Archt., D. A. Bohlen & Son, Majestic Bldg, Indpls. Owner, Sisters of Providence, Mary Wood Academy, Evanston, Ill. General contract let (without competition) to Berry-Byrne and Ryan Construction Co., Chicago, Ill. Brick.

Residence: $9,450.00, 35 E. 54th. Owner, J. L. Holmes, 5137 Park. Owner builds. Brick veneer.

***Hosiery Dye House:** $75,000.00, 1 & 2 sty., 55x110. Archt. & Eng., Lockwood-Green & Co., 38 S. Dearborn St., Chicago, Ill. Owner, Real Silk Hosiery Mills, 624 N. Noble St. Archt. receiving bids. Brick, concrete and steel.

Residence: $16,400.00, 28 E. 46th. Owner, Taylor C. Power, Wild Bank Bldg. Owner builds and awards separate contracts. Brick veneer, slate roof.

Residence (double): $9,000.00, 4050-52 N. Capitol. Owner, Freda Weddle, 769 King Ave. Contract let to T. P. Weddle, 769 King. Brick and hollow tile.

Residence: (double) $9,550.00, 341-43 Layman. Owner, Ira Ward, care contractor. General contract let to Ed Whitaker, 415 North Gladstone.

***Warehouse** (1st unit): 1 sty., 17,000 square feet floor space, 700 W. McCarty St. Owner, W. J. Holliday & Co. (iron and steel). Owner builds by day labor. Steel.

***Apartment Building:** (36 apts.): $200,000.00, 3600 block on Meridian St. Private plans. Owner, Meridian and Salem Realty Co., Thos. A. Moynahan, pres., Ambassador Apartments, Pennsylvania and Pratt Sts. General contractor, Thos. A. Moynahan Construction Co., Ambassador Apts., Pennsylvania and Pratt Sts. Excavating. Brick, terra cotta, 3 sty. & bas.

Apartment Building (24 apts.) and Garage (24 cars): $175,000.00, 2 sty. and bas., 160x140, 2744 N. Pennsylvania. Private plans. Owner, Arthur Baynham (contractor), 508 State Savings and Trust Bldg. General contract let to Leslie Colvin, 214 Board of Trade Bldg.

***Office Building:** $250,000.00, 5 sty., Pennsylvania and Michigan. Archt., Rubush and Hunter. Owner, Reserve Loan Life Insurance Co. General contractor, William P. Jungclaus Co. Pouring third floor. Marble let to Georgia Marble Co., Nelson, Ga. Granite let to Rockport Granite Co., Rockport, Mass.

***Club House and Dormitories:** $1,250,000.00, 12 sty. & bas. Archt., Rubush and Hunter. Owner, the Columbia Club, N. Meridian St. General contractor, Wm. P. Jungclaus Co. Pouring 8th floor. Tile and marble to Gates Marble and Tile Co.

***Retail Dry Goods Store:** $300,000.00, 7 sty., 36x120. Archt., Vonnegut, Bohn & Miller. Owner, Selig Dry Goods Co. General contractor, R. W. Bauman, 1319 Bates St. Wrecking. Start excavating next week. Brick work let to Leon Joyce, Peoples Bank Bldg. Steel let to Insley Mnfg. Co. Roofing to Smithers Roofing Co. Plastering let to W. H. Vehling, 1019 N. Dearborn. Mill work let to Maas-Neimeyer Co. Painting let to Wm. Waugh, 338 N. Delaware. Marble and tile let to Wege-Stanford Co. Terre cotta, Indianapolis Terra Cotta Co. Archt. will take bids on heating plumbing and wiring.

Residence: $13,000.00, 5734 Pleasant Run Blvd. Private plans. Owner, Henry Schlosser, care Schlosser Bros., 705 East Market St. General contract let to H. L. Simons, 5151 North Meridian St. Brick veneer.

Residence: $17,400.00, 5560 Washington Blvd. Archt. and contractor, H. L. Simons, 5151 N. Meridian St. Owner, J C. Consodine, 1413 Merchants Bank Bldg Brick veneer and frame.

***Factory** (add.): 1 sty., 27x69. Archt., Charles Byfield, 923 Peoples Bank Bldg. Owner, King Koffee Ko., Lucion King, Pres., 1201 Cornell Ave. General contract let to Service Construction Co. Castle Hall Bldg. Heating and plumbing let to C. B. Haines & Co. Wiring to Robbins Electric Co.

***Church:** $70,000.00, near Shelbyville, Indiana. Archt., John Hagel, 2632 East 10th St., Indpls. Owner, St. Vincents Roman Catholic Parish, Rev. Father F. W. Wolf, pastor, Shelbyville. Masonry and carpentry, Patterson Bros., Shelbyville; heating and plumbing, Worland & Swindeman, Greensburg, Ind.; roofing let to Jos. Pearson, Shelbyville. Owner taking bids on wiring. Will be ready for bids soon on complete church furnishings.

***Factory** (add.): $15,000.00, 1 sty., 65x65, 16th and Sherman. Private plans. Owner, Marietta Glass Works, 16th and Sherman. Brick work, James Hodgson and Son, Holliday Bldg. Foundation in.

***Apartments (14) Stores and Post Office Sub Station:** $35,000.00, 32nd and Illinois. Archt., Bass, Knowlton & Co., 312 N. Meridian. Owner, R. D. Brown., Parcel Post Building, Illinois and South Sts. General contractor, Ostrom Realty Co., Peoples Bank Bldg. Foundation in. Brick.

INDIANAPOLIS BUILDING PERMITS ISSUED

(Week of Sept. 25th to Oct. 2nd)

Printing Plant: $24,300.00. Owner, The Bramwood Press, Virginia Ave. and Maryland St. Contractor, A. V. Stackhouse, Fletcher Trust Bldg. Work started. Brick.

Residence (double): $8,450. 4615-17 College. Owner and builder, F. M. Bartholomew and Son, 5114 College Ave. Owner builds. Excavating.

Apartment (6 apts.) Garage (6 cars): $8,200.00, 14th and Ashland. Owner, The Columbia Realty Co., 806 State Life Bldg. Excavating. Owner builds. Frame.

Residence: $7,225.00, 339 Poplar Road. Owner, Nellie Tull, at site. Day work. Brick veneer and frame.

Residence: $7,000.00, 4615 Washington Blvd. Owner, Henry G. Dollman, Merchants Bank Bldg. Owner builds. Frame.

Residence (double): $7,900.00, 2158-60 Pleasant Run Blvd. Owner, John Michael, care contractor. Contract let to Geo. Adrian, 4912 East New York.

Residence (double): $6,100.00, 2158-60 Wheeler St. Owner, Ella Buckley, 2158 Wheeler St. Contract let to Kegg and Heck, at site.

Residence (double): $6,100.00, 1930-32 N. Parker. Owner and builder, Creighton Realty Co., Kahn Bldg. Frame.

Residence: $5,700.00, 2022 Mansfield. Owner, James Wechler, at site. Contractor, C. H. Harlan, at site. Frame.

Store: $5,000.00, Sharon nad Speedway. Owner, W. S. Cox, at site.

Residence: $4,500.00, 3630 W. Michigan. Owner, Mattie Turk, at site. Contract let to William Morris, 601 Livingston.

Residence (double): $3,750.00, 1514-16 N. Dearborn. Owner, E. G. Bauer, 650 Parker Ave.

Residence: $3,800.00, 1545 Villa. Owner, Fred C. Parrish, 1549 Villa. Contract let to W. A. Grady, 1520 Villa St.

Residence: $4,300.00, 5155 Guilford. Owner, J. B. Waddy, at site.

Residence: $4,000.00, 410 S. Rural. Owner, Edgar McCollum, at site.

Residence: $4,500.00, 1327 College. Owner, A. E. Glidden, 2439 N. Talbott.

Residence: $3,500.00, 933-35 W. 33rd. Owner, Sarah M. Hadley, care contractor. Contract let to Whitney Spiegel, 27th and Canal.

Residence (double): $7,340.00, 1425-27 E. Michigan. Owner, Everett Jeanes, at site. Contractor, Bridgeford and Moore, at site.

Residence: $3,800.00, 1625-27 Villa. Owner, M. F. Jones, at site.

Residence: $3,750.00, 2153 Union St. Owner, Emma E. Maag, 17 E. Regent St. Contract let to Michaelis Bros., 826 Parker Ave.

Residences (4 at $2,800 each): 3900 block on Fletcher Ave. Owner, S. D. Sample, 806 Fletcher Ave.

Residence: $6,000.00, 5221 E. 10th. Owner, Marion Cordill, 350 South Ritter Ave. Owner builds.

Residence: $3,200.00, 2125 N. Wallace St. Owner Virgil Mobley, 1850 Arrow Ave. Contract let to Griffin McMath, at site.

Hotel (general alterations): $10,000.00, Barton hotel. Owner, the Barton Hotel, L. B. Millikan, mgr., 507 N. Delaware. Contract let to Lynn B Millikan. 501 N. Delaware.

Residence: $4,400.00, 814 E. 50th. Owner, Chas. McArthur, 922 E 49th. Contract let to Bert Wilson at site.

Residence: $5,750.00, 250 Berkley Road Owner, Geo. T. Earhart, 2938 Broadway. Frame.

Residence: $5,900.00, 44 East 55th. Owner, R. E. McCready, 3563 Carrollton. Contract let to Frank Wilson, 4169 Central.

Residence: $5,200.00, 3430 W. 16th. Owner, Wm. Voris, care contractor. General contract

WANTED

Draughtsman—At once. Young man of several years experience with general ability to carry through plans and details. Indianapolis architect with growing practice. Address: Architect, c/o Indiana Construction Recorder, 312 E. Market St., Indianapolis, Ind.

STATEMENT OF THE OWNERSHIP, MANAGEMENT, CIRCULATION, ETC., REQUIRED BY THE ACT OF CONGRESS OF AUGUST 24, 1912.

Of Indiana Construction Recorder, published weekly at Indianapolis, Indiana, for April 1, 1924, State of Indiana, County of Marion, ss:

Before me, a notary in and for the state and county aforesaid, personally appeared Donald Campbell, who, having been duly sworn according to law, deposes and says that he is the publisher of the Indiana Construction Recorder, and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management (and if a daily paper, the circulation), etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in Section 443, Postal Laws and Regulations, printed on the reverse of this form, to-wit:

1. That the name and address of the publisher, editor, managing editor and business manager are:

Publisher, Donald Campbell, 312 E. Market St., Indianapolis, Indiana; editor, Donald Campbell, 312 E. Market St., Indianapolis, Ind.; managing editor, none; business manager, Donald Campbell, 312 E. Market St., Indianapolis, Indiana.

2. That the owner is (give names and addresses of individual owners, or, if a corporation, give its name and the names and addresses of stockholders owning or holding 1 per cent. or more of the total amount of stock.) Donald Campbell, 312 E. Market St., Indianapolis, Ind.

3. That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent. or more of total amount of bonds, mortgages, or other securities, are: (If there are none, so state.) None.

4. That the two paragraphs next above, giving the names of the owners, stockholders, and security holders, if any, contain not only the list of stockholders and security holders as they appear upon the books of the company, but also, in cases where the stockholder or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting, is given; also that the said two paragraphs contain statements embracing affiant's full knowledge and belief as to the circumstances or conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner; and this affiant has no reason to believe that any other person, association, or corporation has any interest direct or indirect in the said stock, bonds, or other securities than as so stated by him.

5. That the average number of copies of each issue of this publication sold or distributed, through the mails or otherwise, to paid subscribers during the six months preceding the date shown above is ————. (This information is required from daily publications only.)

Sealed Proposals

HIGH SCHOOL BUILDING

NOTICE TO CONTRACTORS

Notice is hereby given that North Vernon School City, Jennings County, Indiana, by the Board of School Trustees thereof, will receive sealed bids at the City Hall in the City of North Vernon, Jennings County, Indiana, until 11 o'clock A. M. Wednesday, October 22nd, 1924 for the construction of a new high school building, and for the installation of heating, ventilating, plumbing and sewerage systems therefor.

All bids shall include all labor, material and supplies for complete construction and installation of that part of the work bid on, and all strictly in accordance with the plans and specifications there for, which have been properly accepted, approved and are on file, at the office of the Board of School Trustees. Said building to be located on real estate now owned by said School City in said City of North Vernon.

Bidders will submit their bids as follows:

1. For the construction of the school building, general contract.
2. For the installation, complete, of heating and ventilating systems.
3. For the installation, complete, of plumbing and sewerage system.
4. For the installation, complete, of electric light system.
5. For the construction as a whole, or any combination or combinations of the different units.

And bids will be received on 15 alternates as shown on plans.

The estimates on the cost of the construction of said building and the several units are as follows:

General contract	$58,500.00
Heating and ventilating	10,000.000
Plumbing and Sewerage	5,000.00
Electric Lighting System	5,444.00

All bids and proposals must be on Form No. 26, prescribed by the State Board of Accounts, to be had from the architect, and be accompanied by certified check or checks of the bidder or bidders as follows:—

General contract, check for	$1,000.00
Heating and Ventilating	250.00
Plumbing and Sewerage	200.00
Electric Lighting System	1,500.00

All checks shall be payable to Alice C. Davenport, Treasurer, and conditioned that the successful bidder will enter into a contract with sufficient surety for the performance thereof. When the contract or contracts are let, checks of the unsuccessful bidders will be returned to them.

The successful bidder will be required to enter into a written contract and execute a bond with sufficient surety to be approved by the Board of Trustees, in an amount equal to the amount of the contract for the faithful performance thereof.

Plans and specifications may be had for the individual use of bidders from the architect, H. M. Griffin, Connersville, Indiana, by making a deposit of $20.00 for the General Plan and of $15.00 for other plans which will be returned upon the return of the plans, in good condition, on or before the day of letting. One complete set of plans and specifications is on file with the Board of Trustees.

The right is reserved to reject any and all bids. All bids are received subject to the sale of the bonds of said school city for the payment of said contract or contracts.

A. F. REYNOLDS,
ALICE C. DAVENPORT,
WILLIAM H. STEMM,
Board of School Trustees of the City of North Vernon, Jennings County, Indiana.

John Clerkin, Atty.,
North Vernon, Indiana.
October 4th, 1924.

SCHOOL HOUSE
NOTICE TO CONTRACTORS

Notice is hereby given that sealed proposals will be received by the Trustee of Jackson School Township, Clinton County, Ind., until ten (10) o'clock A. M. on the 11th day of October, 1924, at the home of John K. Wright, Trustee of said Township, for the erection and completion of a Joint Grade and High School Building located one-half mile south of Antioch on the Jackson Highway in said Township, County and State, according to the plans and specifications prepared by Rodney W. Leonard, Architect, 309 Peoples Life Bldg., Frankfort, Ind.

Plans and specifications for the same are now legally on file in the office of the trustee of said Township and also on file in the office of said Rodney W. Leonard, Architect.

Any prospective bidder desiring to take copies of said plans and specifications from either of said offices must make a deposit of Twenty-five (25) Dollars for their safe return.

The approximate total cost of said building and equipment is estimated at $70,000.00.

Bidders shall submit their bids in the following manner:

1. On all work complete as contemplated in the General Specifications, exclusive of Plumbing, Heating and Electrical work.
2. On all work complete as contemplated in the Heating and Ventilating Specifications.
3. On all work complete as contemplated in

the Plumbing and Sewering Specifications.

4. On all work complete as contemplated in the Electrical Wiring, Signal System, and Electrical Fixture Specifications.

5. On a Combined Bid including all work complete as contemplated in Heating, Ventilating, Plumbing and Sewering Specifications.

All bids must be in writing, sealed and with the envelope endorsed, giving the name of the bidder and all bids will be opened at the time and place fixed in this notice.

All bids must be made out on form No. 96 as prescribed by State Board of Accounts.

Each bidder will be required to accompany his bid with a certified check for a sum equal to five per cent of his bid, payable to said Trustee. The check of the successful bidder will be returned when he has executed proper contract and bond, and in the event that such successful bidder fails to execute proper contract satisfactory to said Trustee, and give the required bond within ten days then such check of the bidder, so in default, shall be forfeited to said Trustee as liquidated damages for such failure.

The contract will be let, in compliance with the law to the lowest and best bidder, and said contract shall cover all legal requirements of the school law in force.

The Trustee and Advisory Board reserve the right to reject any and all bids.

Dated this 17th day of September. 1924.

NOTICE TO CONTRACTORS

SIDEWALKS AND DRIVEWAY

Notice is hereby given by Edward J. Hecker, Trustee of Warren Township, Marion County, Indiana, that until one o'clock P. M., Thursday, October 16, 1924, at his office at No. 5241 East Washington Street, Indianapolis Indiana, said trustee and his Advisory Board will receive sealed proposals for cement sidewalk and cinder driveway, and alternate bid for gravel driveway in place of the cinder driveway, at the Warren Township Central High School Premises, located on the east side of the Post Road, between East Michigan and East Tenth Streets, in Warren Township, Marion County, Indiana, in accordance with specifications prepared by Harrison and Turnock, Architects and Engineers, 500 Board of Trade building, Indianapolis, Indiana, and on file with said trustee, the State Board of Accounts, and in the office of the Architects and Engineers.

All bids must be made out on the Standard Form, No. 96, of the State Board of Accounts, and shall be accompanied by a certified check for Fifty Dollars ($50.00) guaranteeing that if the bidder is awarded the contract he will accept the same and give bond for the faithful performance of said contract.

The contractor's proposal shall be the price per square foot surface area for furnishing labor and materials for: (a) Cement walks, estimated cost $790.00; (b) Cinder driveway, estimated cost, $2,100.00; (c) Gravel driveway, estimated cost, $2,400.00; any, or all, as above specified.

Owner reserves the right to reject any or all bids.

Dated this 25th day of September, 1924.

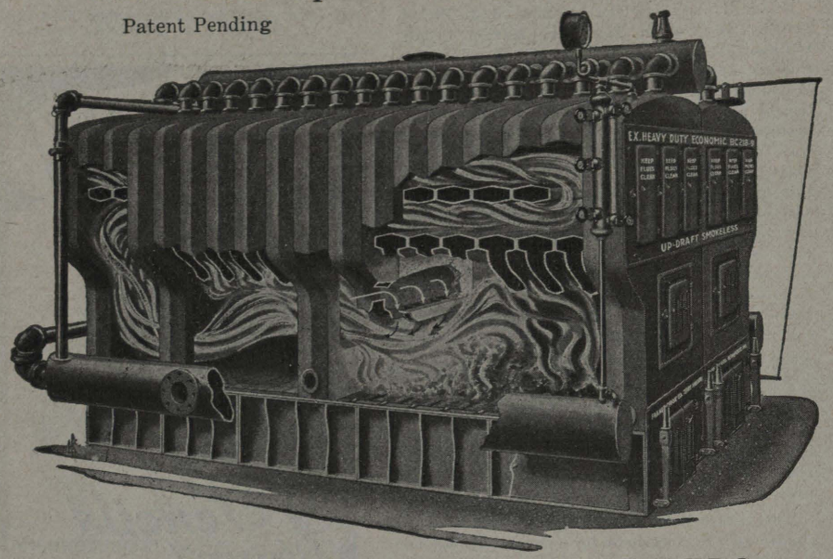
"BC" Series Up-Draft Smokeless Boiler

Patent Pending



Prox Boilers are equipped with a top header, which is a positive steam separator, assures dry steam carrying maximum number of B. T. U.'s Water boiling up will not go into main and cause water knock, no matter how hot a fire may be in any part of boiler. A side connection to this header with natural drain to rear of boiler discharges all water and condensation to side headers. This is only one of the many superior features of Prox Boilers.

PROX UP-DRAFT SMOKELESS BOILERS

Burns all grades of fuel, such as bituminous coal, lignite, coke, oil, gas, wood.

Capacities - 1750 sq. ft. to 22,800 sq. ft. steam

WOULD STANDARDIZE AND SIMPLIFY SIZES OF CONCRETE BLOCKS AND HOLLOW TILE

Meeting For That Purpose Soon to Be Held At Chicago Soon

Concrete producing organizations, manufacturers of machinery for making concrete bricks, hollow building tile and blocks, and associations whose members are engaged in construction work involving the use of these products have been invited by the Division of Simplified Practice, Department of Commerce to attend a conference in the Hotel Sherman, Chicago, on Otcober 16, to act on recommendations that these products be standardized.

The recommendations have been prepared after a survey of the industry which indicates that there is a considerable variety of concrete blocks, building tile, and brick manufactured in sizes and dimensions which differ but slightly and yet which impose a burden on architect and contractor and indirectly upon the user. The committee which made the survey, comprising H. A. Davis of New York City, of the American Concrete Institute, Newton D. Benson of Providence, R. I.; J. A. Ferguson of Philadelphia; W. M. Plumb of Malone, N. Y., and J. W. Oehmann, assistant inspector of buildings of Washington, D. C., began its work some months ago.

The sizes which will be recommended as standard are as follows: Concrete blocks—height, 7⅝ inches; length, 15⅝ inches; and widths of 6, 8, 10 or 12 inches. Concrete Building Tile—height, 5 inches; length, 12 inches, and widths of 3¾, 8 and 12 inches. Concrete Brick—height, 2¼ inches and length of 8 inches for both smooth and rough; width for smooth, 3⅞ inches; width for rough, 3¾ inches.

Invitations have been sent to the following:

American Concrete Institute; Concrete Products Asosciation; Concrete Block Machinery Association; Portland Cement Association; American Institute of Architects; U. S. Bureau of Standards; National Cinder Products Association, and some forty-six state and local city associations interested in concrete products.

U. S. SECRETARY OF LABOR DAVIS IS RIGHT

Most Disputes Between Employer and Employe Are But Local

In a Labor Day message to the country, Secretary of Labor Davis, urged employers and workers to settle disputes by getting around a conference table rather than resorting to strikes and lockouts. In commenting on the labor situation, Secretary Davis said: "There are no great contests between employers and workers. There is hardly a trade dispute of more than local significance before the department of labor's conciliation service for adustment. True, we always have and no doubt always will have trade controversies, but there is not a general strike or lockout in any large industry in this country today. The policy of the department of labor is to use its good offices to prevent industrial disturbances, but if this is not possible to speedily adjust them."

OPENING OF FALL SEASON BRINGS CHECK TO INDIANA'S BUILDING PACE

Latest Figures Fail to Compare Favorably With Either Those of August This Year or September a Year Ago

Not so good, is the way one might express himself after looking over the September building returns from the principal cities of Indiana and having compared them with the past August's and also September, 1923, figures. There seems to have been quite a break in the volume of new building business during September, this year, which makes itself most apparent when a final summing up is made. The greatest checks came at South Bend and Ft. Wayne, the former showing a loss of $1,819,010 when compared with her September, 1923, figures, and the latter a dropping off of $979,640 from her total for the corresponding period a year ago.

Indianapolis, Evansville and Hammond recorded strong to fair gains, Terre Haute just did hold her own, while Elkhart joined the losing column by a slight margin.

The loss recorded by September is attributable principally to a let-down in the starting of large structures. There were 308 more permits issued in September, 1924, than in September, 1923, but these and the rest accounted for a great volume of the smaller types of work such as residences, additions, repairs and alterations.

In the order of their ranking in comparison with this and last September's volumes of building work the cities line up in this order: Hammond, 69.5% gain; Indianapolis, 57.3% gain; Evansville, 38.2% gain; Terre Haute, practically an even break with a $74.00 gain for September, 1924; Elkhart, 33% loss; Ft. Wayne, 55.1% loss; South Bend, 82.3% loss.

The official figures of the various city building inspectors for September are:

Cities	1924 Per.	1924 Est. Val.	1923 Per.	1923 Est. Val.
Elkhart	14	$ 37,100	23	$ 55,400
Evansville	288	402,725	214	291,320
Ft. Wayne	308	795,290	175	1,774,930
Hammond	116	263,575	94	155,450
Indianapolis	1795	2,607,980	1496	1,656,949
South Bend	359	389,678	500	2,208,688
Terre Haute	235	212,255	269	212,181
Total	3079	$4,708,603	2771	$6,354,918

Residence: $6,200.00, 3614 Winthrop. Owner, Julia A. Brown, care contractor, general contract let to J. H. Dreyer, 1030 Eugene St. Frame.

Residence: $6,160.00. Owner, G. W. Anamalt, care contractor. Contract let to Homer Olvey, 815 Riviera Drive. Frame.

Residence: (double): $5,250.00, 1006-08 Palmer St. Owner, Frank R. Childers, 1556 Barth Ave. Contract let to R. L. Durflinger, at site. Frame.

Residence: (double): $5,880.00. 4339-41 Graceland. Owner, C. F. Monaghan, 19 N. Euclid. Contract let to T. F. Monaghan, 19 N. Euclid. Frame.

Residence: $4,400.00, 5419 Guilford. Owner, C. C. Finnefrock, 33 Maple Court.

Residence: $4,175.00, 5015 Park. Owner, B. W. Bibb, 4836 Park Ave.

Residence: $5,200.00, 921 N. Chester. Owner, R. H. Shelhorn, 4836 College.

Residences (2 doubles): $5,000.00, 1238-40 Edgemont, 2328-30 Schurman. $5,000.00. Owner, Lot Development Co.

Residence: $4,700.00, 1234 Newman. Owner, William C. Kuhlman, 1224 Newman. Contract let to H. H .Fulk, 2223 Brookside.

Residence (double): $4,000.00, 1117-1119 West 35th. Owner. Ida Pike, 3323 Boulevard Place.

Residence: $9,350.00, 4468 N. Delaware. Owner, Katherin B. Mott, 522 Powell Place. Owner builds and awards separate contracts. Frame and stucco.

Residence: (double): $7,530.00, 1107-09 N. Temple. Owner, Frank Brinkman, 245 Dickson St., contract let to J. P. Hollenbeck, 1115 N. Temple.

Residence: $4,160.00, 1121 Comar. Owner, Dorthea Kraft, care contractor. Contract let to J. L. O'Mara, 1034 Albany. Frame.

Residence (double): $5,000.00, 810-12 N. Denny. Owner, E. B. Palmer, at site.

Residence: $4,000.00, 939 N. Denny. Owner, H. J. Southern, 4123 E. 10th. Owner builds.

Residence (double): $4,800.00, 834-36 Emerson. Owner, C. Paschall, 325 Jefferson.

Residence: $4,700, 5544 Guilford. Owner, J. G. Pratt, 5542 Guilford. Day work.

Residence: $5,180.00, 618-20 N. Denny. Owner, Wilber Washburn, 3031 Blvd. Place. Contract let to Wakefield and Patton Construction Co., at site.

FRENCH PREMIER IMPRESSED BY FREEDOM OF AMERICAN ARCHITECTURAL PROFESSION

Praises Evident Desire to Perfect Art In Building

The United States owes much of the happiness and welfare of its people to modern, sanitary, comfortable housing which is enjoyed in this country to a far greater extent by all classes, than in any other country in the world.

This is the opinion of Edouard Herriot, the new Socialist premier of France, expressed as the result of a visit which he made to America some months ago before he became the head of the government of his country. The impressions of Premier Herriot regarding the United States and its people have attracted considerable attention both in this country and in France, and have been given wide publicity. A translation of these impressions was recently published in the New York Times. One of the most significant portions of the article which he wrote about the United States after his visit, is his reference to living and housing conditions. It remained for this Socialist and radical of world-wide reputation to pay a generous tribute to the accomplishments of private industry and initiative in building homes for the people in a nation where political socialism has not, as yet at least, gained great headway as a cure-all for economic and social evils.

Admits Big Part Builders Have Played in American Development

As mayor of the French city of Lyons for many years Herriot had a peculiar opportunity to know intimately just what are the housing circumstances of the European peoples. While mayor of Lyons he sought to secure relief for the citizens of his own city, particularly the working classes, from their wretchedly inadequate, miserable and unhealthy homes. Herriot applied all the well-known methods and theories of socialism and government-aid, at the expense of the tax-payers, with very indifferent success. Perhaps he learned a lesson from the achievements of the builders of America, whom he admits have played a most important part in the development of the nation, through business methods which seem ordinary in this country but which wither and die under the blight of socialism.

"What keeps the country really healthy in its internal well-being is the comfort of housing and living accommodations," declares the great Socialist, Herriot, referring to the United States, which has been so frequently sneered at and assailed by European Socialists.

"In order to understand thoroughly the role played by housing conditions in the everyday life of any country one must for a certain length of time have administered the affairs of some considerable group of persons. Hovels and shanties are what fill our hospitals, make childhood hideous, degrade the race. And when in France municipalities try to fight the peril, they too often come up against the ill-will of bureaucracy lacking both in intelligence and heart.

Commends Our Handling of the Housing Problem

"Ah, if only those obstructionists could see how the United States meets the question of housing for its laboring class! Then they might begin to understand just how ashamed we ought to be of ourselves. As a first step, they ought to glance through Jacques Greber's volume on American architecture. Thanks to standardized materials and standardized methods of construction, America has been able to effect quantity production of workmen's houses.

"An example of this is the garden city built on Long Island by the Sage Foundation, with its flowers and rambler roses. The houses are built quickly and cheaply by the use of re-iforced concrete—or else the architect uses a hollow tile having grooved sides, with a consequent saving of mortar. As a result, the wall springs up with a rapidity unknown on our side of the Atlantic. In order to reduce the plastering to a minimum the inside partitions are made of very thick cardboard nailed to panels. These are held together by concrete joists made in such a way that nail each be driven into them. Down to the very smallest detail one notes the desire to perfect the art of building. Curiously enough, most of the architects are of French origin or training. But it is at once evident that they are not bound by stupid regulations, fixed traditions or the habit of contractors."

INDIANAPOLIS ARCHITECTS ASSOCIATION TO RESUME REGULAR ACTIVITIES

Fall Opening Meeting Next Wednesday Night

Now that the great American play season, summer, is over and the plutocratic architects have returned from their vacations in the mountains, the northern wilds, the fashionable summer resorts of the sea-shore colonies and other such recreational places, things in architectural professional circles, especially in Indianapolis, are getting back to normal. That being the case the Indianapolis Architects Association is swinging back, too, to its regular monthly meeting schedule and has issued the first call for the opening of the season, announcing a meeting for Wednesday evening, October 15.

The affair will be held at the Hoosier Athletic Club, opening with the customary 6:30 P. M. dinner. A special program has been arranged with building codes as the main topic. Francis F. Hamilton, building commissioner of Indianapolis, has been invited to attend and speak on the effort that is being exerted to frame a new or revised code for the city. J. H. Owens, Secretary Advisory Committee of the Administrative Building Council of Indiana, has also been asked in to comment upon that which the Council has done and is doing in the matter of codifying existing state building laws, and compiling standardized building regulations and requirements to govern building operations throughout the state.

ORGANIZATION AND CURRENT NEWS

WOULD SURELY BE A WINNER

Suggested Association Membership That Ought to Cut a Niche in the Hall of Fame

E. E. COLE, Secretary-Manager
Calumet Bldg. Trades Employers Assn.

Now that World Series days are here, football and basketball seasons are not far away, and the journalistic dopesters will be crowding "All Star" teams into their various columns we, too, are going to hand you an "All Star" association combination or team. This is our pick:

The member who always pays his dues promptly.

The member who is always willing to do his part in building up his association.

The member who attends meetings with regularity, and is always on the job.

The member who never forgets that he not only belongs to the organization but is also a part of it.

The member who never shirks committee work.

The member who is not too busy to accept office and assume responsibility.

The member who believes that association work is a vital part of his business.

The member who is willing to bow to the judgmet of the majority.

The member, who by his own acts, encourages others to foster the great work of organization.

The member who does his talking IN and not OUTSIDE the association rooms.

The member who follows the Golden Rule of doing unto others as he would be done by.

The member who refuses to be a Knocker, instead rejoices in being a Booster.

The member who is willing to give credit to whom it is due when conscientious effort brings results.

The member who, under all circumstances, loyally supports his Association in any action the majority sees fit to take.

It must be admitted that this is but a mythical selection and it would be a hard task to line up a complete personnel as suggested above, but, experience has shown that there are such men as described above, the only thing is that they are few and far between. This, though, would be our "All Star" Association team which will hardly ever have a chance to play together, but, who ever heard of any of the other "All Star" teams stacking up on a baseball, football or basket-ball field?

Calumet District

CALUMET DISTRICT NOW CAUSING CHICAGO TO SIT UP AND TAKE NOTICE

Big City Not Unaware of What Indiana Steel Industrial Section Means to Her Future

(Harry M. Beardeley in Chicago Daily News)

Step-children have been known to turn out better than one's own offspring and to render greater affection. So it might not be amiss for old Father Dearborn to pay a bit more attention to his Indiana step-children. Despite their Hoosier origin, the youngsters have done well, and if the old gent displays a little paternal affection for them occasionally he may find it reciprocated. In his old age it may be that such stepsons as Hammond and Gary will contribute as much to his support as some of the members of his own brood.

Get Pa Dearborn to talking about his children and he will brag about how cultured Evanston is, how much money Oak Park has made and how good looking Riverside is. Hammond, Gary, Whiting, East Chicago and the rest of the progeny of the Indiana branch are apt to be dismissed without much praise just because they happen not to bear the Illinois patronymic.

Don't Brag About Pa Dearborn

Old Father Dearborn doesn't realize, apparently, that Evanston never boasts about its parentage, that Oak Park, Riverside and many of the other children think he is a plebian old foggy in need of a hair cut, a new suit of clothes and some modern ideas. Whenever he thinks of Hammond and the rest of the Indiana step-children Pa Dearborn recalls that when they were youngsters nobody ever thought they would amount to much, that as they grew up they cluttered up his back yard and were always out behind the woodshed filling the air with smoke—smoke reeking of crude oil, acids and strange gases.

But now Hammond is throwing something into the air besides soot and fumes—tall buildings.

Hammond is growing about twice as fast as Chicago, and looks forward to the day, not far off, when it will be the largest and most prosperous city in the Chicago suburban zone. Hammond has a population of more than 50,000. Its manufactured products were valued at $59.000,000 in 1920, when the last federal census was taken. Its bank clearings last year were $196,000,000. Lake county, Indiana, of which it is the county seat, has 358 big industrial plants, with an average annual payroll of $73,000,000.

Benefits by "Pittsburgh Plus"

That the recent order of the federal trade commission abolishing the "Pittsburgh Plus" basis of pricing steel will make the Calumet district the steel center of America and of the entire world, is the expectation of almost everybody familiar with the Calumet and with the steel industry. Hammond is expected to be the first locality to benefit locally by this decision; as most of the site for the huge Jones and Laughlin steel plant is within the city limits.

Grows at Dizzy Pace

Hammond, of all the others, is growing so fast that it is dizzy from the pace. Its traffic problems are as complicated as those of Chicago. Its streets are too narrow; railroad tracks wander about, and in and out of the center of the city on a level with the vehicular and street car traffic; and one long, slow freight train will hold up communication on half a dozen principal streets.

Hammond's attempts to widen the streets and open new ones have for the most part been fruhstrated by the property owners. But the city has been able to work out a creditable park system, including a fine lake-front park of about 40 acres, with half a mile of beach. Most of this acreage was acquired last year. Construction of piers and jetttys will cause Lake Michigan to add about thirty-five acres of sand beach within a comparatively short time, it is said.

Three big building projects for the business district are now under way. The First National Bank and First Trust and Savings Bank of Hammond is building an eight-story bank and office building, and construction will start within a few weeks on a new $1,350,000 theater and ballroom for the S. J. Gregory Theatrical company, and the $500,000 seven-story Lloyd building.

Good Auto Road Needed

What Chicago and the Calumet cities need is at least one good automobile route connecting the south park boulevards with the state roads of Lake county. At present automobile traffic between the cities is made unpleasant and hazardous by the poor roads and the congestion. Pa Dearborn, according to everybody in the Calumet, can well afford to spend a few dollars to make it possible for his Indiana step-children to visit him once in a while.

GAIN SHOWN FOR SEPTEMBER BUILDING AT HAMMOND OVER SAME MONTH IN 1923

Volume, However, Was In Arears of That of August

The official record compiled by Building Inspector Henry Vis, Hammond, for the month of September shows that

there were 116 permits granted for an estimated investment of $263,375 in new buildings. This was 22 more permits than were issued during the corresponding period a year ago, while the financial involvment represented a gain of 69.5%. All of which helped to carry the city on to a better total building year to date than over the like period in 1923.

However, the September figures showed quite a preceptible decline in the monthly volume from that recorded for August this season.

CALUMET BUILDING PROGRESS

The Larson-Danielson Construction Co. has started work on the fourth and last story of the addition to St. Margaret's Hospital.

Work on the foundations of the new bank building is going steadily on; the past week of good weather has helped the contractors greatly.

J. Wesley Reed has the third story of the Carmelite Sisters' Home for Boys about completed and ready for the roof.

The friends of Chas. S. Rhoads, who is in Florida, will regret to learn that while he was hunting alligators his gun exploded, injuring his arm quite seriously. (He got the alligator though.)

Home building is slowing up considerably, but the local architects report they have several good projects on the boards that will soon be ready for figures.

E. E. COLE.

FT. WAYNE

GOING BIG IN BUILDING EFFORT

FT. WAYNE RIDES OUT IN FRONT OF OTHER CITIES OF HER CLASS IN INDIANA

No other city in Indiana, Indianapolis excepted, has done more to keep up the State's 1924 building volume than Ft. Wayne, who after an unprecedented season of building construction activity in 1923 has continued right on through 1924 at almost tht same pace while other cities showed a decided tendency to slow down in their building efforts.

To gain some idea of the creditable performance put on by Ft. Wayne all one has to do is to refer to the figures her new building effort has piled up over the first nine months period of 1924. The total estimated valuation of the city's new building volume from January 1st to October 1st, this season, is $9,417,019. That is a greater sum than Evansville, South Bend and Terre Haute combined can show. The individual figures of these three cities over the given period are: Evansville, $2,448,925; South Bend, 4,329,450; Terre Haute, $2,230,298, a combined total of $9,008,673 against $9,417,019 for Ft. Wayne. In other words the latter did 4.53% more building than all the other three together.

In comparison with building done in Evansville, Indiana's third largest city, Fort Wayne is a winner by a score far better than 3 to 1. She did over twice as much building as South Bend, and four times as much as Terre Haute. Throughout the year the city has been the nearest competitor to Indianapolis in the erection of new buildings. This city's average monthly building for the period has exceeded $1,000,000 in value with nearly half a million to spare and those who keep a close ear on such matters predict that the entire twelve months will hold the million-dollar-a-month average.

After the unprecedented building boon of 1923, skeptical contractors and builders predicted that there was a slack year ahead, because of high cost of materials and high wages. As soon as wages and other costs decreased to near prewar prices, then the city would continue with its building operations, they said. The facts today show such prophets were in error. Despite high costs, the political year and other obstacles the building permit book at the city hall tells its daily story of new churches, expensive and moderate-priced new homes, warehouses, offices and store buildings and divers other structures.

INDIANAPOLIS

GRAND JURY TAKES A HAND IN BUILDING LABOR FLARE-UP AT INDIANAPOLIS

Indictments Returned Against Secretary of Iron Workers' Union

Another chapter was written into the building labor "war" that has been going on in Indianapolis sporadically recently with the new $1,000,000 Elks Building as the sector of activity when the Marion County grand jury returned four separate indictments charging blackmail against John J. McNamara, business agent and secretary of the local bridge and structural iron workers' union, who served time in California after the Los Angeles Times building and another were dynamited in 1910.

The four indictments follow weeks of intensive investigation of the local labor "war" in which the Elks Building was the objective of vandalism August 17, when the metal doors and metal interior trim were wrecked by being hacked with sharp-edged instruments.

Chief among the four indictments was one charging the leader of the iron workers with unlawfully, feloniously and verbally threatening Fred W. Jungclaus, secretary of the William P. Jungclaus Company, contractors on the Elks building in an attempt to force the contractor to use iron workers to install metal window frames, "against his will."

This is blackmail, under the statutes, according to Prosecutor William H. Remy. The threats occurred about five weeks before $10,000 damage was done to metal doors, door and window frames at the Elks Club, after being put in by the Carpenters' Union, it is charged.

Boilers Involved

The second indictment charges McNamara threatened Ben Staggenborg, employe of the Niman Transfer Company, employed to install boilers at the Elks Building, to compel Staggenborg against his will to cease his employment. McNamara claimed the work for the ironworkers, appearing at the incompleted building accompanied by about forty men, Staggenborg says.

The third indictment charges the defendant with unlawfully threatening W. S. Frye of the W. S. Frye Transfer Company, who ran his business on the open shop plan, to coerce Frye into employing union iron workers. The last indictment charges McNamara interfered with erection of the smokestack of the new American Legion headquarters building by threatening William Kellermeyer, an employe of P. W. Kennedy & Son. McNamara claimed that work for his union, it was said.

Prosecutor Remy and Investigator Worley have worked for more than a month interviewing witnesses and assembling evidence to lay before the grand jury. Scores of witnesses have been interviewed, though not all of them were introduced to the jurors.

More Evidence Sought

The indictments are but the start of the investigation, and more witneses will be summoned, it was said. Reluctance of witnesses to tell what they knew concerning alleged threats of labor troubles have hampered the officials.

The trouble centers about claims of the ironworkers' union to the right to perform labor of installing metal windows boilers and other similar work on various construction in Indianapolis, which has led to continual strife between their union and other unions and non-union companies.

The Practical Things that Bring Protection Against Heat and Cold

To make a material that in a laboratory test will stop heat—that is easy.

But to make a material that **in the building,** as installed by ordinary workmen, will stop heat and cold, that will stand the knocks and abuses of practical construction, that cannot puncture, tear or break, that is easily applied; a material guaranteed by a responsible maker to stay in place as long as your house stands, that can never sag, tear loose or disintegrate within the walls—that is the job of men experienced in heat insulation, men who have tried every known material, form and thickness.

The makers of Flax-li-num are pioneers in the manufacture of insulation. Flax-li-num has behind it twenty years of trial and experience.

It is made of the correct material—purified flax fibre; tough, heat resisting, everlasting, made in the correct form—a semi-rigid board.

Flax-li-num is so tough hammer blows won't damage it. Easy to handle; no danger of tearing. And time is saved in installing it. Stays in place. Guaranteed to outlast the building. The only pure flax fibre heat insulation in semi-board form.

Flax-li-num is made in ½" thickness for walls, 1" for roofs.

All laboratory tests are made on the above thicknesses, yet many materials **as actually delivered to your job,** are only a fraction as thick.

For true insulation, use and recommend Flax-li-num. Write for sample and prices.

Sealed Proposals

HIGH SCHOOL BUILDING

NOTICE TO CONTRACTORS

Notice is hereby given that North Vernon School City, Jennings County, Indiana, by the Board of School Trustees thereof, will receive sealed bids at the City Hall in the City of North Vernon, Jennings County, Indiana, until 11 o'clock A. M. Wednesday, October 22nd, 1924 for the construction of a new high school building, and for the installation of heating, ventilating, plumbing and sewerage systems therefor.

All bids shall include all labor, material and supplies for complete construction and installation of that part of the work bid on, and all strictly in accordance with the plans and specifications there for, which have been properly accepted, approved and are on file, at the office of the Board of School Trustees. Said building to be located on real estate now owned by said School City in said City of North Vernon.

Bidders will submit their bids as follows:

1. For the construction of the school building, general contract.
2. For the installation, complete, of heating and ventilating systems.
3. For the installation, complete, of plumbing and sewerage system.
4. For the installation, complete, of electric light system.
5. For the construction as a whole, or any combination or combinations of the different units.

And bids will be received on 15 alternates as shown on plans.

The estimates on the cost of the construction of said building and the several units are as follows:

General contract	$58,500.00
Heating and ventilating	10,000.00
Plumbing and Sewerage	5,000.00
Electric Lighting System	1,500.00

All bids and proposals must be on Form No. 26,

HOOSIER GIANT BRIX

GIVE BETTER BUILDINGS AT LOWER COST

The chief object in any building project today is to secure better buildings at lower cost. The public demands economy without the sacrifice of quality. Architects and contractors are meeting this demand with HOOSIER GIANT BRIX, the ideal material for high grade, economical construction.

Homes of HOOSIER GIANT BRIX

In residence construction, whether for outside veneer or solid walls, HOOSIER GIANT BRIX offer all the advantages of brick construction and yet save 25% over the cost of brick. HOOSIER GIANT BRIX can be laid up in a small fraction of the time required for other construction, thus making big savings in labor cost. In beauty they match fine quality tapestry brick. They equal brick in strength and load-bearing capacity. HOOSIER GIANT BRIX are five-walled, vitrified, mat-face fire-clay units, and are adaptable for any construction where brick can be used.

For INDUSTRIAL BUILDING

HOOSIER GIANT BRIX and HOOSIER Building Tile are adaptable for every type of industrial buildings, such as schools, gymnasiums, churches, factories, garages, stores and other fireproof structures. This material insures big savings on construction cost and makes a building unsurpassed for beauty and serviceability.

Architects and contractors are invited to send for samples and illustrated literature describing HOOSIER GIANT BRIX and Building Tile. Let us submit estimates on your specifications.

Plumbing and Sewerage	200.00
Electric Lighting System	75.00

All checks shall be payable to Alice C. Davenport, Treasurer, and conditioned that the successful bidder will enter into a contract with sufficient surety for the performance thereof. When the contract or contracts are let, checks of the unsuccessful bidders will be returned to them.

The successful bidder will be required to enter into a written contract and execute a bond with sufficient surety to be approved by the Board of Trustees, in an amount equal to the amount of the contract for the faithful performance thereof.

Plans and specifications may be had for the individual use of bidders from the architect, H. M. Griffin, Connersville, Indiana, by making a deposit of $20.00 for the General Plan and of $15.00 for other plans which will be returned upon the return of the plans, in good condition, on or before the day of letting. One complete set of plans and specifications is on file with the Board of Trustees.

The right is reserved to reject any and all bids. All bids are received subject to the sale of the bonds of said school city for the payment of said contract or contracts.

A. F. REYNOLDS,
ALICE C. DAVENPORT,
WILLIAM H. STEMM,
Board of School Trustees of the City of North Vernon, Jennings County, Indiana.

John Clerkin, Atty.,
North Vernon, Indiana.

STATEMENT OF THE OWNERSHIP, MANAGEMENT, CIRCULATION, ETC., REQUIRED BY THE ACT OF CONGRESS OF AUGUST 24, 1912.

Of Indiana Construction Recorder, published weekly at Indianapolis, Indiana, for October 1, 1924, State of Indiana, County of Marion, ss:

Before me, a notary in and for the state and county aforesaid, personally appeared Donald Campbell, who, having been duly sworn according to law, deposes and says that he is the publisher of the Indiana Construction Recorder, and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management (and if a daily paper, the circulation), etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in Section 443, Postal Laws and Regulations, printed on the reverse of this form, to-wit:

1. That the name and address of the publisher, editor, managing editor and business manager are:

Publisher, Donald Campbell, 312 E. Market St., Indianapolis, Indiana; editor, Donald Campbell, 312 E. Market St., Indianapolis, Ind.; managing editor, none; business manager, Donald Campbell, 312 E. Market St., Indianapolis, Indiana.

2. That the owner is (give names and addresses of individual owners, or, if a corporation, give its name and the names and addresses of stockholders owning or holding 1 per cent. or more of the total amount of stock.) Donald Campbell, 312 E. Market St., Indianapolis, Ind.

3. That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent. or more of total amount of bonds, mortgages, or other securities, are: (If there are none, so state.) None.

4. That the two paragraphs next above, giving the names of the owners, stockholders, and security holders, if any, contain not only the list of stockholders and security holders as they appear upon the books of the company, but also, in cases where the stockholder or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting, is given; also that the said two paragraphs contain statements embracing affiant's full knowledge and belief as to the circumstances or conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner; and this affiant has no reason to believe that any other person, association, or corporation has any interest direct or indirect in the said stock, bonds, or other securities than as so stated by him.

5. That the average number of copies of each issue of this publication sold or distributed, through the mails or otherwise, to paid subscribers during the six months preceding the date shown above is ————. (This information is required from daily publications only.)

DONALD CAMPBELL, Owner.

Sworn to and subscribed before me this first day of October, 1924.

(Seal) JUNE STEELE MYERS,
Notary Public.
(My commission expires December 22, 1924).

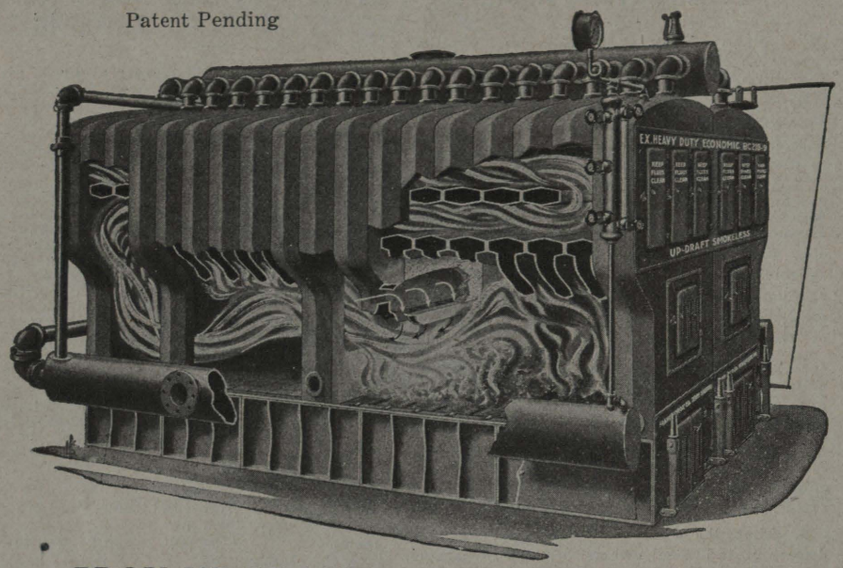
"BC" Series Up-Draft Smokeless Boiler

Patent Pending



PROX BOILERS are designed with large even sized flues which affords better draft, cleaner flues and results in maximum heating surface of the boiler being utilized.

PROX BOILERS have large combustion chamber and long fire travel, which are important fuel saving features.

PROX UP-DRAFT SMOKELESS BOILERS

Burns all grades of fuel, such as bituminous coal, lignite, coke, oil, gas, wood.

Capacities - 1750 sq. ft. to 22,800 sq. ft. steam

You can't beat Celotex

FOR satisfaction to the men on a job you can't beat Celotex. It works easily, rapidly and without waste. It is easier to handle than wood sheathing and paper. It makes a stronger wall.

As plaster base it is ideal—forms a strong bond and makes no stains, rust spots, nor lath marks.

For roof insulation, Celotex is unequaled for convenience to the builder, for effectiveness to the owner.

When a prospective home owner talks with you remember the selling points of Celotex. Insulation that will cut usual fuel bills a fourth to a third. Smooth stainless plaster. Stronger walls. Inexpensive because Celotex generally costs less when in place than the materials it replaces.

Celotex is a strong, rugged, weather-proof durable building lumber made from the long, tough fibres of cane. It is better than wood sheathing—equals cork for insulation.

Celotex is used for sheathing instead of wood; for plaster base, roof insulation, sound deadener and exterior finish.

Stock sizes: Thickness 1/16 in.; width 4 ft.; lengths 8 ft. to 12 ft. Weight about 60 lbs. per 100 sq. ft.

Write for complete information to Dept. V-10, The Celotex Company, 645 No. Michigan Ave., Chicago, Ill. The Celotex Company, Indianapolis Division, Venner E. Brace, Mgr., 205 East Ohio St., Phone, Main 7089.

SIX PER CENT GAIN SHOWN BY BUILDING FIGURES FOR FIRST NINE MONTHS OF 1924

Indianapolis Gets Into September Honorable Mention Class

The first nine months of 1924 show a gain of 6 per cent over the corresponding period of 1923 according to a national survey prepared by S. W. Straus and company, covering building permits issued and plans filed in 305 leadings cities and towns of the country. The gain over September, 1923, was 9 per cent.

The Eastern and Southern sections showed considerable gains, while the Central and Far Western states revealed slight losses.

Among the large cities, New York made an outstanding record during the three quarters of the year. Detroit, Philadelphia, Boston, San Francisco, Milwaukee, Baltimore, Dallas, Denver, Providence, Louisville, and Rochester made gains worthy of notice. Every section of the country displayed increased activity in September as compared with the same month of 1923, although the gain in New York was nominal while Chicago displayed a $5,000,000 decline. The twenty-five leading cities gained about $12,000,000 over the same month last year, and slightly more than $5,000,000 over September, 1922.

Outstanding gains for the month were recorded in Detroit, Cleveland, Boston, San Francisco, Washington, Milwaukee, Indianapolis, Denver, Cincinnati and Providence.

FATIGUE TESTS SHOW LIMESTONE BEAMS TO SAG UNDER CONTINUED STRESS

Such is Found to be the Case by Bureau of Standards

Progressive sagging during long continued application of load has occurred in most of the eighteen limestone beams undergoing fatigue tests at the Bureau of Standards. None of these beams have broken yet. The greatest amount of bending in addition to that produced by the initial application of the load is .005 inches, while the average is .002 inches.

These beams are 28 inches long between supports with a section 4 inches wide by 1½ inches thick. They are supported at their ends and carry at the middle a load equal to two-thirds of the load required to break them. In this condition they have remained now for about 16 months and will remain for a long time to come. The load is to be increased, however.

Many cases of fracture in stone buildings have occurred, the bureau states, in which the load was not excessive and in which failure appears to have resulted from long continued application of the load. Marble and granite slabs have been known to assume a permanent bend or warp under a very slight load, and incidents of this warping in the case of marble can generally be found in old graveyards. Such warping is less common in granite, but a case has come to the bureau's attention in which some granite steps were warped to such an extent that they had to be redressed, as a result of being left on the ground for some time before use.

WORTH WHILE PAPERS ON FIREPROOF CONSTRUCTION NOW AVAILABLE

Valuable for Reference

The Portland Cement Association has just had reprinted in pamphlet form two intensely interesting papers presented in the July, 1924, Journal of the Western Society of Engineers.

The reprint consists of a paper on "Comparison of Types of Fireproof Construction," by Chester L. Post, of the engineering firm of Condron & Post, of Chicago, and a paper entitled "Analysis of Cost of Types of Fireproof Construction," by Arthur F. Klein, Vice-President and Chief Estimator of the R .C. Wieboldt Co., a large construction company of Chicago.

These papers set forth their subject-matter in a most thorough and authoritative manner. The authors present to the engineering and architectural profession good practice in 1924, not the practice of ten or twenty years ago so often found in the reference library textbooks on fireproof construction.

They have been the subject of much favorable comment from both architects and engineers. To those who have not read these papers it may be interesting to learn that copies in the above referred to pamphlet form may be obtained through the cement association.

OIL SMOKE, SOOT HELD INJURIOUS TO SLATE ROOFING

Crystalization of Salts Causes Disintegration

Salts contained in the soot from an oil burner were found by the Bureau of Standards of the Department of Commerce to be the cause of extensive decay in the slate roof of the building in which the burner was housed. These salts, being soluble in water, were leached into the slate by the rains and were recrystalized in dry weather. The formation of the crystals tends to pry the particles of slate apart and produces an effect similar to frost action only much more severe.

The disintegration of the slate was first noticed about six years ago and in some parts of the roof it has progressed to the danger point. It manifests itself only on the interior and is invisible from the outside. The process begins at the edge of the shingles and progresses alnog the direction of the cleavage, reducing the slate to powder.

Give us the opportunity of demonstrating our various lines of building materials before placing your orders.

SECOND ANNUAL CONFERENCE OF INDIANA BUILDERS

Event Scheduled for Indianapolis Next Week

A meeting of interest to Indiana architects will be held at Indianapolis, October 30 and the officers of the Indiana Society of Architects are entertaining the hope that the profession will be well represented at that affair. All the architects of the state are invited to attend, in fact, are urged to be present.

The event referred to has been styled the Second Annual Conference for Indiana Builders and will be conducted along the lines of a similar conference held at Purdue University, Lafayette, a year ago, which was largely attended and proved most interesting.

The purpose of this conference is to bring together architects, contractors, engineers and representatives of the building trades of Indiana, for a one-day meeting in which subjects pertinent to the building industry will be presented and discussed.

A program has been prepared to include many speakers prominent in the building field in Indiana who will talk on the various phases of building construction in the state as they affect the architect, contractor, engineer and building trades mechanic.

The conference will be held at the Hoosier Athletic Club with both afternoon and evening sessions.

SOCIETY MEMBER ISSUES PAMPHLET ADVISING THE WISDOM OF EMPLOYMENT OF ARCHI TECTURAL SERVICES

Contents Inclined to Cause the Prospective Builder to Weigh the Matter

An attractive monthly bulletin is being issued by Architect Alfred E. Neucks, Evansville, purporting to be for those interested in building economically and well.

The cover, a pretentious architectural sketch, done in two colors, sepia and black, is quite artistic, the inside pages are filled with matter of interest to the prospective builder. "The cost of Ugliness," "Details Make the Picture," "The Architect and the Factory," and "Building Conditions." On the back cover is the argument for the employment of an architect in undertaking a building operation which says in part:

"Any man who contemplates the erection of a new building will gain the maximum results from his investment through intelligent reliance upon the services of a competent architect.

As many men fail to realize, the architect possesses a thorough understanding of every type of building problem and is able through professional guidance to insure investment results for his clients that are possible through no other medium."

THE COST OF UGLINESS

Editorial in Chicago Tribune Brought Out Value of Beauty in Architecture

Every man responds to the appeal of true beauty. He may not understand the principles of design. He may find it difficult to explain why he considers a thing beautiful. But it is a fact that beauty is revered the world over and the reverence thus awakened instead of being temporary actually grows stronger through the years. Consider this in connection with architecture.

Buildings that lack beauty are tiresome. They awaken no sentiment. Neither the owner or the community feels a sense of pride in such a building.

A persistent fact noticeable in Chicago is that ugly buildings are the first to be torn down. Their depreciation is rapid. People tire of an overornate mediocrity and sigh in relief at its destruction. What the architect puts in as desirable material is made ephemereal by his artistic failure. Its utility declines because it has gained no popular affection. It is unwelcome to the eye.

Faults a beautiful building may have, but when it catches the affection of the public there is a tendency to spare it. Attached to that fact is a money value. It means low depreciation.

A beautiful structure appreciates in value with its age. In thirty years the Fine Arts Building in Chicago has become invaluable. The magic of a line, the poise of a colonnade holds its value fixed beyond decaying lath and plaster.

Beauty is lasting and it is but sound economy, in considering a new building, to strive toward having true beauty embodied in it. (From Bulletin issued by Architect A. E. Neucks , Evansville, Ind.)

BUILDING CODES, BOTH CITY AND STATE, DISCUSSED AT INDIANAPOLIS ARCHITECTS' MEETING

City Architects' Association Resumes Activities

After an all summer lay-off the Architects' Association of Indianapolis has resumed its monthly meeting schedule and from now on will hold its regular sessions on the second Wednesday of each month.

The opening meeting of the fall and winter season was held Wednesday evening, October 15, at the Hoosier Athletic Club being ushered in by a 6:30 P. M. dinner.

There was no routine business to be transacted and the entire evening was given over to the two speakers of the evening, City Building Commissioner F. F. Hamilton, of Indianapolis, and J. H. Owens, Secretary of the Advisory Committee of the Administrative Building Council of Indiana. Both spoke on building codes, Mr. Hamilton on the making of a new code for the city, and Mr. Owens on the efforts that are being exerted by the Administrative Council to perfect standardized building regulations and requirements to be applicable to all building endeavor throughout the state.

Mr. Hamilton set forth the scheme that his department has been working on to devise an elastic code that will have for its main purpose the guaranteeing of the factor of safety and at the same time reduce requirements so that building costs may be reduced. He said three years of work had been put in on the new code which would probably be ready for passage about the first of the year.

Mr. Owens then took up what the committee, composed of architects, engineers, contractors and representatives of labor, are seeking to accomplish for the advancement of building through the function of the Administrative Building Council of Indiana.

ORGANIZATION AND CURRENT NEWS

Calumet District

A GOOD MOVE THOUGH TO OUR WAY OF THINKING POORLY DIRECTED

South Bend Builders Make a Publicity Play

The South Bend Builders Exchange has made a bid for publicity that we commend and wish to congratulate them upon the progressive spirit shown. That organization has a full page of builders news and advertising in The Mirror, published in that city, that makes an attractive appearance and carries an appeal. For publicity purposes it should get results.

It is a move other contractors' organizations could follow to advantage, for advertising and publicity effort is one of the things associations sadly neglect and thus fail to get before the public in the right and appealing way.

However, after pursuing The Mirror we can't say much for the publication of which the South Bend Exchange Page is a part.

RUMOR CONCERNING BUILDING OF ANOTHER STEEL MILL STARTS NEW ACTIVITY IN HAMMOND REALTY MARKET

Jones-Laughlin Co. Said to Be About to Erect New Plant

The word being broadcasted around Hammond to the effect that the Jones-Laughlin Co., Pittsburgh, will start work soon on its new steel mill to be located on the new site recently purchased has caused a reawakened activity in real estate circles. Many land deals are taking place and quite a few new sub-divisions are being platted and put on the market.

LOOKS AS IF BUILDING MAY BE GETTING AWAY FROM THE SEASONABLE OCCUPATION CLASS

Much Work Started this Fall—More in Prospect for the Winter

It would seem from appearances and general indications that the customary slump in building affairs that sets in with the approach of winter is not going to be so great this season. There is a fair amount of new work being started this fall with a promising volume of contemplated work in prospect protending considerable winter building.

Architects and contractors have been converted to the idea that building operations, with a few added precautions and a little more effort, can be carried on profitably and expediently through the winter months and in many instances seem to be convincing prospective builders that such is the case. One big advantage to winter building is that it lessens the spring rush and cuts down the jam of new projects that formerly all popped at once when the weather opened up. Another advantage is that during the dull months prices are not so strong, while another favorable feature has to do with the more prompt deliveries that are possible when the demand is not so great.

If the old seasonable draw back that has hampered the building industry can be cast off to some extent it will be a great thing for mills can then be kept in steady operation, more employment will be available for factory hands and building trades mechanics and the heavy spring rushes that cause a shortage of labor, delays in material supply shipments and other hindrances can be obviated and the industry can be kept going the year around.

Every architect, contractor, and all others dependent upon building for a livelihood should boost winter building for the facts and advantages to be gained by continued activity will back up any argument put forth.

OUGHT TO HAVE A GOOD TIME

Stage Is Set For Such, Anyway

If nothing unforseen crops out to intrude itself into the scheme of things as mapped out the B. T. E. A. of Hammond is going to be minus a secretary for a week or more after October 18. The long deferred vacation period has arrived and he has a motor trip down through Indiana all doped out. It is a little late for roasting ears and watermellons, but the frost is on the pumpkin, the plump little shoats are rounding too, and the chickens are in just the right size for the frying pan. Then, too, the trees are clothed in their gorgeous robes for their dress rehearsal for the autumn farewell performance, and the fish are biting well, so 'tis said. Not a bad time for a vacation at that, though it may seem late to those who went away last summer and have figured they are just so many months nearer to next year's play time.

CALUMET BUILDING PROGRESS

Architects Berry, Wainwright & Co., Hammond, are receiving bids for the construction of an addition, 2 sty. and bas., 58x112, for the Technical High School. They are also ready for estimates on a store building, 1 story and basement, 50x80, for John Jarnowski at Calumet City, Ill., and for the remodeling of A. H. Tapper's residence.

The contract for the brick barn and wagon house for the Hammond Dairy Co. was given to Rufus Danner & Co.

Roscoe Woods awarded a contract to Charles N. Scott for the erection of a two-story store and office building on Fayette Street. It is estimated to cost $55,000.

Architect Mac Turner, Hammond, has completed plans for an addition, 60x135, and a warehouse, 2 sty., 90x100, for the Central Lumber & Mill Co. He will also be ready for bids November 1st on a 2 sty., 73x200, warehouse for a Whiting, Ind. firm.

EVANSVILLE

ENFORCES CITY BUILDING CODE

Evansville Building Commissioner Causes Arrest of Contractor

What's the use of a city building code if the provisions of it are not observed upheld and enforced is the plaint of City Building Commissioner Edward Kerth, Evansville. Thus it is that his department is seeking to make builders and property owners live up to the new city code.

Last week Commissioner Kerth caused the arrest of William Slow, building contractor, on charges of violating the code and also resisting an officer.

Kerth alleges that Slow failed to comply with certain instructions in accordance with the code and when he, Kerth, went to investigate the matter the contractor threatened the commissioner and his deputy, Henry Koenemann, with a hammer. The arrest followed.

Mr. Kerth has sought to run his department along the lines for which it was created and while not unreasonable, has insisted that the city and state building laws be lived up to. One of the things he has made obligatory is that all plans calling for engineering services must bear the seal of a registered engineer as provided for in the state law which created the Engineer's Registration Board.

FT. WAYNE

ONE HUNDRED YEARS AGO

Lots At $25 Went Begging In What Is Now Ft. Wayne's Commercial District

In view of the fact that Ft. Wayne for the second successive year has run up a really remarkable building construction total in dollars and cents invested in new structures, and her downtown business district has been the scene of the erection of some fine business structures in the last few years on ground the value of which is enormous, it is interesting to note that just a century ago, October, 1824, choice lots in this same locality could have been bought for $25.00 apiece.

Writing in the Ft. Wayne Journal-Gazette, Bert J. Griswold, well known and prominent citizen, reviews realty conditions as they ruled one hundred years ago, marking the initial real estate development of the now prosperous city of Ft. Wayne.

He says:

"How would you like to have your choice of Fort Wayne downtown lots —anywhere within the area bounded by Superior, Barr, Washington and Harrison streets—for $25?

"If you had been on hand just one hundred years ago this month—in October, 1824—you could have picked up an even better bargain than that. Lots in the neighborhood of Wayne and Calhoun streets (in fact, anything on Wayne or Washington streets between Harrison and Barr streets) were to be had for an average of $16 apiece. And even at that, quite a number of them remained unsold, and those who bought failed, in some instances to keep up their payments.

"It was Fort Wayne's first real estate venture. It wasn't really an addition because it wasn't added to anything. It was the original and only town of Fort Wayne.

When General Harrison Objected

"Previous to this time, some effort had been made to induce the United States government, which owned the six-mile tract surrounding the old fort, to open it up for sale to the citizens of the United States who seemed to want to settle here permanently.

"But, in those days, the phrase "wild and wholly" was strongly applicable to this center of activity in the wilderness. One far-seeing man, William Henry Harrison, governor of Indiana territory, heard, as early as 1805, that the group of people living about the fort, wanted to gain posesssion of the ground for themselves. He immediately took his quill in hand and wrote the following letter.

"I have understood that it was intended to sell immediately the United States land around Fort Wayne. I am very certain however, that the money that would be put into the treasury by the sale of it would not counterbalance the inconvenience that would arise from having it settled with the description of people who will naturally buy it. It is too far removed from other settlements to entice American farmers to go there, but the few sections that are sold will be purchased by the Indian traders, and we shall thus have, in the heart of the Indian country, a number of unprincipled people who will be entirely out of reach of the laws of the United States regulating trade and intercourse with the Indian tribes. If the immediate settlement of it is an object, I think it would be better to sell it by contract, upon the condition that there should be, within a given time, a certain number of American farmers on it.'

"He was wise. The war of 1812 came on seven years later, and 12 more years rolled around before Uncle Sam decided to sell his property to individuals.

"It is almost impossible to picture the conditions at Ft. Wayne 100 years ago. The nearest white settlement of any consequence was at Piqua, O. The spot occupied by the center of the present downtown district, with the exception of the tract about the old fort, was seldom free from standing water in the warmer months, and this contributed to the prevalence of fever and ague and the consumption of vast quantities of quinine and its liquid ally. For many years after the town was started, you will find the proceedings of the town board filled with actions concerning the draining of swamps and making the ground usable in the present downtown district. The late Louis Peltier related the story of a man who shot a deer and wounded it so it became mired in a swamp which occupied a tract just north of the present postoffice and Majestic theatre—the Standard (old Lincoln Life) building site was in the center of it. He waded out to the distressed animal which attacked and killed him before the eyes of many horrified spectators.

The First Lot Buyers

But to get back to the lot sale. John Tipton, county agent, had charge of the sale as the representative of Uncle Sam. The term, 'county agent,' had an entirely different meaning than the same title today.

Courthouse Corner $6 a Year

"For a good many years after the platting of the town, the courthouse square was overgrown with trees and wild shrubbery, and it is interesting, in looking over the proceedings of the county board as late as 1831 to discover Francis Comparet, the county agent, instructed to 'cause the cutting off of all of the brush and stumps from the public square.' by letting the contract to the lowest bidder at public sale.

"In this same year, the commissioners leased to James Wilcox for four years, 'a remote piece of the courthouse square,' 30 by 40 feet, at the southeast corner of Main and Calhoun streets, for $10 a year. And this is at the transfer corner of today! A like piece at the corner of Main and Court streets rented for $8 a year, while a piece at the corner of Berry and Court streets rented for $6 a year. In 1834, 90 years ago, David H. Colerick leased one of the corners for a period of years for $10 a year. There's nothing remarkable about all this. These men paid all the land was worth either for purchase or lease—at that time—but how times have changed."

INDIANAPOLIS

LATE BUILDING RETURNS FROM GARY AND RICHMOND BOOST INDIANA'S VOLUME CONSIDERABLY

Figures Almost up to August's This Year and But 14 Per Cent Behind Those of September, 1923

Late arriving building figures from two other Indiana cities, not mentioned last week in our item regarding September building construction operations in the state, add over a million dollars to last month's totals and carried the volume of new work up close to the six millions of dollars level, thus giving to September a creditable showing and one that was only slightly behind that of August, this year. However, last month's building volume, $5,799,465 compared with that of the corresponding period a year ago shows a deficiency of $1,010,786 or 14.4 per cent.

In September both Gary and Richmond showed gains over the like period in 1923, the former running up a $1,006,580 volume for a 161.5 per cent gain while the latter turned in an estimated valuation of $84,282 as against $38,800 in September, 1923, a gain of 117.22 per cent.

MUST BE DONE

Conditions in Building Field Call for Complete Organization of Contracting Forces

One of the most important things now receiving the serious and thoughtful consideration by contractors interested in organization work is that of how to accomplish a complete line up of all classes of contractors engaged in building construction work.

There are so many problems confronting the industry, all of which are of vital importance, that it must seem almost imperative that in order to preserve conditions and to stabilize the industry, that it is essential that all should be united and working together in one organizatiion. The unorganized and organized contractor, those working union men exclusively and those working in the so-called outlawed trades have interests which are common and interests which must be taken care of and which can not be satisfactorily considered and determined excepting through organized effort. Wages and agreements, policies and principles could certainly be best handled through an organization having for its object the advancement of the interests of all engaged in the industry and the making and keeping of sane, safe and satisfactory building conditions for all.—(Monthly Bulletin of Building Construction Employers' Association, Chicago.)

RESIDENTIAL OPERATIONS CONTINUED IN GOOD VOLUME THIS YEAR

That Class of Work Went Far To Hold Up Indianapolis' 1924 Building Record

An analytical review of building permits issued in Indianapolis during 1924 up to and including August 31st, according to Building Commissioner Francis F. Hamilton, indicates that the home building operations showed little or no diminution from the great effort put forth along that line for the past few years. The agitation and movement for "Own Your Own Home" seems to have taken firm hold from the results that have followed. Last year the construction of residences assumed large proportions and then again this year such building has been carried on on an extensive and far-reaching scale.

During 1923 there were quite a few large downtown business structures that went to swell the valuation total but this season such types of buildings in the heart of the city have been lacking, yet the valuation recorded on new building work has held fairly close to the 1923 figures, being just a little short of them.

There has been great activity in addition and remodeling work this season, 5,646 permits out of a total of 11,411 having been issued for that class of work. Residence construction in the matter of volume took second place. Seven school building projects were started early this year adding over $1,000,000 to the total estimated valuation on new work.

NOTICE TO CONTRACTORS

ELEVATOR AND DUMB WAITER

Cass County Hospital, Logansport, Indiana

Notice is hereby given that the Hospital Board of Cass County, Indiana, will receive sealed bids at the office of George A. Raub, at the Farmers and Merchants State Bank, Logansport, Indiana, until ten o'clock A. M., Saturday, November 8th, 1924, at which time and place same will be opened, read and considered for an elevator and dumb waiter system for said building and all by and according to plans and specifications as provided therefor. Estimated cost of elevator, $4,000.00, of dumb waiter $1,000.00.

The plans and specifications are on file for the inspection of bidders at the office of said George A. Raub, and at the office of Rodney W. Leonard, Suite 309 Peoples Life Building, Frankfort, Indiana, Architect for the building.

Bidders in submission of bids will submit same as follows:

1. For installation complete of elevator.
2. For installation complete of dumb waiter.

All bids shall be accompanied by and approved bond of the bidder in the sum equal to full amount of his gross bid, conditioned upon his entering into a written contract with said Board of Trustees if he is the successful bidder, according to proposal.

All bids and proposals shall be upon the forms prescribed by the State Board of Accounts. Unless bids are accompanied by a bond as above no attention will be given same.

The successful bidders will be required to enter into a written contract with said Board of Trustees. Contract as usually conditioned. The successful bidder will be required by the terms of his contract to enter into the active prosecution of his work immediately and complete said work within ninety (90) days of date of contract.

The Board of Trustees for Cass County reserve the right to reject any and all bids without giving any reason thereof.

Board of Trustees Cass County Hospital:
JEHN T. ELLIOTT, President.
GEORGE A. RAUB, Secretary.
WILLARD WINN, Trustee.
EMMERSON B. KITCHEL, Trustee.

VOL. VI INDIANAPOLIS, INDIANA, OCTOBER 25, 1924 No. 30

LARGE CROWD INDICATED FOR BUILDERS CONFERENCE

Event to be Held at Indianapolis, October 30

So much interest was aroused, so much enthusiasm was shown, so much constructive thought was brought out, and so great was the success that attended the holding of the Conference for Indiana Builders at Purdue University, Lafayette, in October, 1923, that those who conceived and fostered the idea for such a meeting decided it would be to the interest of the Indiana Building Industry to seek to hold the gathering regularly once a year. Not much was said about it at the time but the scheme was kept in mind and quietly developed.

The officers of the four organizations interested in the original conference favored a continuance of the conference idea with the result that the Second Annual Conference is to be held at the Hoosier Athletic Club, Indianapolis, Thursday, October 30th, two sessions, one in the afternoon and the other in the evening, with a 6:30 informal dinner in between, to make up the day's program.

Those sponsoring the conference are the Associated Building Contractors of Indiana, the Indiana Society of Architects, the Indiana Engineering Society and representatives from the Building Trades Council of Indiana. During the afternoon men from each of these organizations will talk on subjects vital to the advancement of the building construction industry of the state. In the evening several state officials and one connected with the United States Department of Commerce will deliver addresses on subjects allied with building and building progress.

The program as now planned is as follows:

Joint Conference

2:00 P. M.—**Presiding**—Fermor S. Cannon, Chairman of Advisory Committee, State Building Council.

2:20 P. M.—**Progress Report of Advisory Committee**—J. H. Owens, Secretary of Advisory Committee, State Building Council.

2:40 P. M.—**Specifications in Relation to Standard Building Rules and Regulations**—Merritt Harrison, Secretary Indiana Society of Architects.

3:00 P. M.—**Construction Materials—National Standards—Effect on Standard Rules and Regulations—State and City**—E. W. McCullough, President Indiana Engineering Society.

3:20 P. M.—**Standard Rules and Regulations as They Affect the Craftsmen**—Chas. W. Kern, President Indiana State Building Trades Council.

3:40 P. M.—**Winter Construction—With Proper Rules and Regulations**—A. E. Kemmer, 1st Vice-President, Associated Building Contractors of Indiana.

4:00 P. M.—**Zoning Laws and Future Building**—Fermor S. Cannon, Chairman of Advisory Committee, State Building Council.

4:20 P. M. to 6:00 P. M.—General Discussion.

Evening—6:30 P. M.

Informal Dinner—Hoosier Athletic Club
Presiding—Dr. Wm. F. King, M. D., Chairman Administrative Building Council of Indiana, and Secretary State Board of Health.

Fire Prevention—Mr. Newman T. Miller, Secretary Administrative Building Council of Indiana, and State Fire Marshal.

Workmen's Compensation Law—Mr. Dixon H. Bynum, member Administrative Building Council of Indiana and Chairman State Industrial Board.

National Standards—To be Effective as Approved Recommendations and Not as National Laws—Dr. W. K. Hatt, Member Building Code Committee, Department of Commerce; Head School of Civil Engineering, Purdue University.

Music by Miss Lillian May Heuslein, contralto; Miss Hazel Dell Silvey, soprano; Miss Beulah Oliver, pianist.

Last year there were some two hundred or more building men from all over the state who attended the conference at Lafayette and from the way the reservation cards are beginning to come in to headquarters the indications are that the crowd this year will be even greater than that at Lafayette in 1923.

A CENTURY OLD MATERIAL

Developed in 1824, Now Almost An Essential in Every Building Operation

The chronicles of history have little to say about a certain stone mason in the English town of Leeds. The name of Joseph Aspdin is scarcely mentioned in the histories of the past century. There is not a picture of this man who died 69 years ago, leaving behind him an invention that has done so much for human progress. Yet a delegation of American manufacturers has journeyed across the Atlantic to honor the memory of this humble craftsman of the early nineteenth century. For it is to Joseph Aspdin that credit is given for the invention of portland cement.

Today it is hardly possible to conceive a building project in which portland cement in some form is not used. Of the 545,000,000 bags of this material used in the United States last year, ten per cent was employed in building American homes and dwellings.

Late in the month of October, exactly a hundred years ago, according to old records in the British patent office, King George the Fifth granted Joseph Aspdin a patent on an artificial stone—a material he designated as "portland cement." This, so Aspdin said, was because it resembled the famous building stone quarried on the Isle of Portland. That same name today signifies a material manufactured in almost every country in the world, and in twenty-eight states of the United States.

In looking back through the history of the concrete home, we again find the name of Aspdin. Soon after Joseph Aspdin was granted his patent, he started a small factory at Wakefield, England. He took his two sons, William and James, into business with him. The business grew, slowly at first, increasing as the advantages of portland cement were recognized. In the late fifties, William convinced of the superiority of his product as a building material, began the construction of an elaborate home on Windmill Hill at Gravesend, which he called "Portland Hall." Surrounding the property there is standing today a substantial concrete fence built by William Aspdin—a monument to this early pioneer.

INDIANA ARCHITECTS ENTITLED TO A PARDONABLE PRIDE IN STATE BUILDERS' CONFERENCES NOW IN VOGUE

I. S. A. Back Across the Years Urged Co-operation Amongst State Building Forces

The Second Annual Conference for Indiana Builders to be held at the Hoosier Athletic Club, Indianapolis, Thursday, October 30th, is doubly interesting to members of the Indiana Society of Architects in that it will bring together architects, contractors, engineers and labor representatives from all over the state, and also is a result of the effort proposed and instituted five years ago by the I. S. A., to effect a spirit of co-operation between the big interests in the building industry that better understandings might be effected and a greater harmonious working relationship reached through which conditions could be improved.

It has taken much effort and constant thought to develop conditions to the point where the architect, contractor, engineer and labor can meet in friendly conference to discuss conditions, thresh out the undesirable elements that were inimical to building progress, and institute constructive thought that has made for achievement.

The contracting, engineering and laboring forces proved receptive to the co-operation idea and each has done its part in bringing about a situation where all can meet in collective assemblage for conference purposes. So far as we can learn there is no other state in the Union where such conferences are held or where such a thorough understanding has been reached for the promotion of harmony that the industry may be advanced. Therefore, the Indiana Society of Architects, its members, can be excused for the great pride it can feel over the part it has played in conceiving the idea and putting it into effect. This is an actual accomplishment to be traced to the Society, it is the big achievement through which other things have been done, important things and yet the effecting of co-operation stands out to the forefront, otherwise that which has come later would have been impossible.

A fine program has been arranged for the approaching conference and it is hoped that there will be a good attendance of Indiana architects on hand to give the architectural profession a strong representation.

ARCHITECTURAL DRAFTSMAN PUTS SPIRIT OF BUILDERS CONFERENCE INTO PEN AND INK SKETCH

He and Material Supply Man Open up Publicity Avenue

Once again C. F. Norris, draftsman for K. D. Norris, architect, East Chicago, came to the bat in a pinch and delivered a hit that scored. Twice now in the last few months he has jumped into the game and came across in fine style with two rousing hits, sketches, that had to do with builders' meetings and offered good publicity.

The first had to do with the meeting held recently at Hammond and was quite a clever drawing, both in conception and execution. His latest contribution deals with the Builders' Conference to be held next week at Indianapolis and decorates the back page of this issue of the Recorder.

Voluntarily he sent the sketch in to us early in the week to do with as we saw fit. It was too good to be crowded into a small space, we were loaded with news and the front cover was unavailable. Thus it was when J. Ralph Fenstermaker, secretary-manager of Hugh J. Baker & Company, saw the sketch he offered his advertising space for the reproduction of Mr. Norris' effort.

Hence, our back page this week.

LUMBER STANDARDIZATION DATA FOR I. S. A. MEMBERS

Soon to Be Distributed

For quite sometime the lumber manufacturers of the country and Secretary Hoover for the government have been working out lumber standardization sizes both for convenience and economy. It has been a great task and has taken much time in the way of conferences and surveys until at last a definite result has been attained.

The United States Department of Commerce has just issued a bulletin entitled: Simplified Practice Recommendation, No. 16 of the Central Committee on Lumber Standards.

It has been decided to secure copies of this bulletin for distribution amongst the members of the I. S. A., as it will prove valuable for reference files.

RANDOM NOTES

Another new member has been admitted to the Indiana Society of Architects in the person of C. L. Troutman, Evansville. He is one of the hustling architects of southern Indiana and has for a number of years been associated with architectural circles in Evansville having been connected with various architects' offices before setting up for himself for individual practice four or five years ago.

Architect Rodney Leonard, Frankfort, was in Indianapolis the past week indulging in a well known indoor sport that has become quite the thing with Indiana architects, that is, wrestling with the State Tax Board in an endeavor to prove a public building project is essential to the proper progressive development of a certain rural community.

Architect Gilbert Karges and wife, Evansville, were in Indianapolis this week while motoring through Indiana and to Chicago on a fall vacation jaunt.

Build with the Builders

"The builders . . . . . are insuring their liability in their own company, a trade mutual---a company that has enviably succeeded in every factor involved in carrying out principles of compensation insurance. This company is the

Builders & Manufacturers Mutual Casualty Company
of CHICAGO

It is a company operating solely in the building industry, insuring only the compensation and public liability of its members, and furnishes such insurance at a remarkably low cost."

Calumet District

EFFECT OF ABANDONMENT OF PITTSBURGH PLUS PLAN SEEN IN NEW BUILDING PROPOSITION

Indiana Harbor Plant Plans Extensive Improvements

An expenditure of several hundred thousand dollars will be made by the Youngstown Sheet and Tube company in new extensions at its Indiana Harbor plant, according to an official announcement. This proposed plan of enlargements to the local mills is due to the abandonment of Pittsburgh Plus.

By additional developments at the Harbor plant of the Youngstown Sheet and Tube company it will be able to maintain its competitive territory practically unchanged.

Plan Several Mills

In a dispatch from J. A. Campbell, president of the company, it is said that surveys are being made to build a rod mill of about 10,000 tons per month capacity. Wire and nail making machines will be installed. A sheet and tin plate mill department will be built. The finishing mills will necessitate the building of three open hearth furnaces, and improving the blooming mill to take care of the increased steel output.

Building of a new blast furnace at the Indiana Harbor plant was the first step in this expansion.

Construction work on the new extensions at the local plant of the Y. S. & T. Co., will begin as soon as authorization has been given by the Board of Directors to the proposed expenditure.

NEW CITY JUST ACROSS ILLINOIS LINE BRISTLING WITH BUILDING ACTIVITY

Quite a Program Underway

Calumet City construction is proceeding with unexpected rapidity.

A program involving $640,000 is under way by Milda & Hansen. Sixty-four two apartment structures, costing from $8,000 to $16,000 are being erected at Burnham avenue and 154th street.

The Schiappe Bus Company is building a garage covering half a block on Wentworth between 154th and 155th streets for its 40 new busses, running from Harvey to Hammond at twenty-minute intervals, and also is constructing a large machine shop. All this construction is in addition to the new city hall and bank. The final girders for the Torrence avenue bridge are being put in place and the opening of the road is near.

A syndicate of Harvey bankers is reported to have purchased the 80 acre Harvey golf course for subdivision. The only golf course in the Calumet City section will be opened in the Forest Preserve, south of 154th and west of Torrence.

CALUMET BUILDING PROGRESS

The opening of Torrence avenue, will give a direct route from Hammond to the new Ford plant, a much needed traffic artery.

George P. Pearson and Son, were awarded the contract for the erection of a $6,000 brick filling station for the Marland Oil Co., at Summer Blvd. and Columbia Avenue, Hammond.

E. E. COLE.

EVANSVILLE

HOLDING UP TO THE GENERAL AVERAGE

October Building at Evansville to Date is Good

Continued building activity in Evansville is shown by the figures for October on the books at the city building inspection department and the prospects for future work this fall are good as the local architects are fairly busy on plans and sketches.

The estimated valuation placed on the new work for which permits were granted from October 1st to 18th, amounted to $215,000 which is close to the normal trend that has been prevailing locally this season. There was one large project, an office and demonstration building for Igleheart Bros., millers, that contributed $120,000 to the above amount thus boosting the monthly figures. Another feature of the October permit business had to do with the issuance of fifteen permits for new residences. The balance of the volume of business was made up of remodeling and repair work of which there has been much this season.

CONTRACTOR "COMES THRU"

Building Code Case Dropped When Builder Complies With Commissioner's Orders

Charges of violating the building code against William Slow, 47, 525 Taylor avenue, a contractor, were dismissed in city court when the case came up for hearing. Slow was arrested on the complaint of City Building Inspector Ed Kerth, who charged that the contractor persisted in violating the building code after repeated warnings. Kerth declared in court, however, that Slow had agreed to comply with the code in every particular and the contractor was discharged.

CHIPS AND SHAVINGS

Two additions will be built to the plant of the Steel Scaffolding company, Governor and Missouri streets, according to plans in preparation at the office of Frank J. Schlotter, architect.

The addition at the rear of the present plant will be of frame and stucco, 30 feet by 50 feet. An addition, 25 feet by 30 feet, will be built to adjoin the office department.

The M. J. Hoffman Construction company was awarded the general contract for the construction of the new Igleheart Brothers' office and demonstration building, First avenue and the Belt railroad.

The new plant of the Central Glass company which will replace the building destroyed by fire at Fulton avenue and the Belt railroad will be a brick structure of one story 200x150 feet.

Work is progressing rapidly on the

HOOSIER GIANT BRIX

GIVE BETTER BUILDINGS AT LOWER COST

The chief object in any building project today is to secure better buildings at lower cost. The public demands economy without the sacrifice of quality. Architects and contractors are meeting this demand with HOOSIER GIANT BRIX, the ideal material for high grade, economical construction.

Homes of HOOSIER GIANT BRIX

In residence construction, whether for outside veneer or solid walls, HOOSIER GIANT BRIX offer all the advantages of brick construction and yet save 25% over the cost of brick. HOOSIER GIANT BRIX can be laid up in a small fraction of the time required for other construction, thus making big savings in labor cost. In beauty they match fine quality tapestry brick. They equal brick in strength and load-bearing capacity. HOOSIER GIANT BRIX are five-walled, vitrified, mat-face fire-clay units, and are adaptable for any construction where brick can be used.

For INDUSTRIAL BUILDING

HOOSIER GIANT BRIX and HOOSIER Building Tile are adaptable for every type of industrial buildings, such as schools, gymnasiums, churches, factories, garages, stores and other fireproof structures. This material insures big savings on construction cost and makes a building unsurpassed for beauty and serviceability.

Architects and contractors are invited to send for samples and illustrated literature describing HOOSIER GIANT BRIX and Building Tile. Let us submit estimates on your specifications.

FT. WAYNE

REFUSED TO BE SCARED

Fort Wayne Failed to Heed the Cry of the Pessimist

Many visitors to Fort Wayne and others are amazed at the great building activity that started several years ago, has gripped the city and kept right on showing little abatement from the record volume carried on last year. And no wonder, especially when one considers all the building construction that was done in 1923. There were any number of people that prophesied that in view of last season's activities this year would see considerable of a building slump. Some cities did show a check, but not Fort Wayne, that is to any appreciable extent for so far in 1924 the building figures are holding close to those of 1923.

There are several reasons for the city's building prosperity, chief of which has been the refusal of the citizens to be frightened by and carried away by pessimistic mutterings and false alarms of self-styled prophets.

Strange, as it may seem, a great many people are prone to believe all adverse and bad reports without stopping to reason them out or investigate them as to their reliability, and one need go no further than some of Fort Wayne's neighboring cities to note the effect of these same pessimistic rumors. There is no question but what it takes courage and good hard business sense to go ahead and put up an office building, warehouse or build a new home when at almost every turn one meets calamity howlers, but if one will only remember that, "BUSINESS IS WHAT YOU MAKE IT TO A VERY GREAT EXTENT," and that by going ahead and using good judgment and common sense he not only invariably succeeds, but his example tends to lend courage to the other fellow and so helps to keep business going.

Do you realize what would happen if all folks got scared and stopped buying? There would be one of the grandest panics this country ever knew. Well, these small personal panics are going on all around most of the time, but thanks to the courage and common sense of the people of Fort Wayne it is kept pretty well in hand. These panicy people are justly called pessimists and should not be taken seriously.

Another reason why Fort Wayne's building activity has been going along so smoothly is because prices for building supplies, lumber, paints and all the other things that go to build a modern building have been fairly well stabilized.

Also local architects, contractors, material supply men and building trades mechanics have done their best to encourage building; the architect has planned wisely and economically and reasonably estimated the prospective investment for the client, the contractors have done good and speedy work, the material dealers have held prices to a reasonable basis and the mechanics have produced. All this has had its effect in tending to encourage building resulting in Fort Wayne being able to stand out as one of the cities of the country who has failed to cease a great building construction expansion once it started, and this in the face of predictions to the contrary.

TOWERING COMMERCIAL STRUCTURES CAUSE CHANGE IN FT. WAYNE'S SKYLINE

Recent Construction Effort Bespeaks Local Business Expansion

The rapid expansion of Fort Wayne's business district, while it impresses the people of Fort Wayne as an evidence of a strange new activity in the city's development, reveals to the visitor the truth that Fort Wayne has become a real city. Returning to Fort Wayne now, after an absence of several months is to feel like a stranger in a strange land. The skyline has changed. Many familiar buildings are gone. New and impressive structures loom here and there. An air of strangeness pervades the place.

To the westward of the courthouse square rises the new First National Bank building of thirteen stories, while at a considerable distance to the westward is the Wayne Pharmacal building, a full square beyond the Medical Arts building, which a year or two ago seemed far away from the center of things. Certainly, West Berry street has had its great share of business activity.

To the northward, the new plant of the Fort Wayne Box company, at Calhoun and Superior streets, dominates that neighborhood.

To the eastward, the outstanding business structure is the automatic telephone exchange building of the Home Telephone and Telegraph company, while the Hilgeman and Schaaf building, Wayne and Clinton streets will add much to the commercial appearance of that neighborhood.

To the southward, the 13-story Hotel Keenan and the magnificent new home of the Lincoln National Life Insurance company stand as monuments of a rapidly expanding downtown section.

The experience of the past year causes the citizen of Fort Wayne to ask: "What will the next ten years do to the physical appearance of the downtown district? Will the expansion continue in the same directions? Will the tendency be toward the north and south streets, Harrison and Clinton, or to the east and west street, and if the latter, which one, and in which direcion?"

INDIANAPOLIS

LATE SUMMER AND FALL BUILDING CONSTRUCTION "COME BACK" AT INDIANAPOLIS ROLLS UP A FINE BUILDING VOLUME

City Now Not Far Behind Record Figures of 1923

After a good start in the early spring Indianapolis building operations receded in May and in June ebbed to the second lowest monthly figures for the year. Then came a turn for the better and the "come back" since June has been a strong one resulting in a nine months' building estimated valuation of $20,583,875 on new work for which permits have been granted since the first of the year, a figure that gives an average monthly building volume of $2,287,096.

The official figures on the books at the office of the city building inspection department set forth some interestinp data. For instance, residential building, for which 1937 permits were issued led all other types of construction in the amount of money involved, showing a grand total of $8,057,081. Next came business structures with a total of $3,484,725, one hundred and eighty such permits having been granted during the first nine months. There was a great volume of repair and alteration work done; 6,605 such projects having been approved which rolled up an estimated valuation of $2,293,920. Forty-two permits for public buildings accounted for $1,927,204 of the entire nine months total.

An interesting item seldom stressed upon has to do with the income of the building inspection department derived from fees collected shows that these fees for the nine months amounted to $35,021.16 or $3,791.26 per month.

The official classification of the permits granted and the estimated valuation of the various types of structures and other building work is as follows:

Kind	Per.	Est. Val.
Accessory Buildings	2,119	$ 666,076
Business Buildings	182	3,484,725
Industrial	23	830,176
Miscellaneous Work	2,270	1,542,493
Public Buildings	42	1,927,204
Repairs and Alts.	6,605	2,293,920
Residences	1,937	8,057,081
Tenements and Flats	28	1,782,200
Total	13,206	$20,583,875

VOL. VI — INDIANAPOLIS, INDIANA, NOVEMBER 1, 1924 — No. 31

VOTE

Vote November 4, Vote As You Please But Vote

Twenty-seven million people stayed away from the polls in 1920.

Twenty-six million people—a minority of all the voters—elected a President in 1920.

Were you one of the twenty-seven million who failed to perform their full duty as citizens; or one of the twenty-six million who properly fulfilled their obligations?

Whatever the answer, register a promise now that you will go to the polls on Election Day and swell the ranks of the twenty-six million so they will cast a vote truly representative of the will of all the eligible voters of the country.

Vote as you please—but—VOTE!

The Fathers of our Constitution, by Divine inspiration, gave you equality before all men; made you a participating stockholder in the greatest corporation in the world—the United States of America—and gave you the privilege of personal representation in the conduct of its affairs.

More than this: to insure your full patriotic performance in behalf of your fellow-citizens, they placed upon you an obligation to serve, to take an active part in governing this great organization.

That obligation is the obligation to vote.

Within the last decade there has been a retrogression of civic consciousness; a failure on the part of a large number of otherwise good citizens to perform their duty to their country; to fulfill their obligation to vote.

Give serious thought to the following figures:

In 1896, 80 per cent of the eligible voters of the country went to the polls and voted.

In 1900, 73 per cent cast their ballots.

In 1908, 66 per cent.

In 1912, 62 per cent.

In 1920, less than 50 per cent of those eligible to vote, went to the polls!

ALLEGE THAT REFUSAL TO OPERATE QUARRIES ON CLOSED SHOP BASIS DRAWS UNION IRE

Indiana Limestone Men Seek Protection From the Court Through Injunction Suit

A suit to enjoin the members of the Journeymen Stone Cutters' Association from interfering with their business and seeking to recover damages because of injury to their business due to the alleged threatening of purchasers of their product, was filed recently by twenty-four cut stone and quarry companies of the Bloomington-Bedford district, Indiana, in the federal district court. The suit alleged that because the companies refused to operate on a closed shop basis the union men have entered into a conspiracy and combination to prevent the pursuit of the trade by stone cutters not members of the union, and that they have threatened contractors using stone produced in non-union quarries.

WANT MUNICIPAL INSPECTION FOR ALL ELECTRIC WIRING

Suggest Model Ordinance for General Adoption

The Association of Electragists International, meeting recently at West Baden, Indiana, went on record as favoring a uniform ordinance in all cities providing for municipal inspection of all electric wiring. Such an ordinance would, it was stated, provide for certification of all electrical installations according to the requirements of the national electrical code as laid down by the American Engineering Standards of the Electrical Manufacturers' Council for the purpose of drawing up a model ordinance.

Give us the opportunity of demonstrating our various lines of building materials before placing your orders.

ASSERTS A. I. A. IS FOR SANE PROGRAM OF STANDARDIZATION OF BUILDING COMMODITIES

Point Made by Architect Relative to Lumber Standards

Architects will be interested in the report of the Central Committee on Lumber Standards, Washington, D. C., issued October 2, 1924, containing excerpts from an address by Mr. E. S. Hall, the official representative of the American Institute of Architects on lumber standards, delivered on September 10 last, in which Mr. Hall attempted to interpret the sentiments of the American Institute of Architects as to the matter of standardization (with particular reference to lumber and mouldings).

Mr. Hall stated in part:

The American Institute of Architects stands committed to a sane program for the standardization of lumber as well as all other purely structural commodities entering into the make-up of building.

It assumes this position:

First

Because it has established a policy (in so far as practicable) of the conservation of the natural resources of our country. Timber is one of the most important of these and one which probably, more than any other, has been uselessly wasted.

Second

Because architectural practice is interstate and inter-district. Varying district standards lead to much confusion and annoyance in architects' offices, followed with many disappointments and misunderstandings in the completion of work to be executed at remote distances.

Third

Lack of nationally established standards has opened the way to all sorts of frauds and chicanery. It has made it possible for unscrupulous retailers to order material cut down from district standard sizes in order to save freight, also; to regrade lumber from a lower to a higher grade, in each case setting up the claim that this is the standard of local practice. Weak(varying local standards have been known to form the means for the occasional characterless architect or structural engineer in connivance with the equally unscrupulous builder to specify one grade and accept a lower grade from the favored contractor. The American Institute of Architects is unalterably opposed to any condition that tends towards fraud or unfair competition. When a specification is put out for bids there should be but one possible construction of its meaning. National standardization of lumber sizes and grading rules is one big step in the direction of definite specification.

Fourth

The Institute observes that there is a limitation beyond which standardization should not be pushed. In other words, standardization should not be established to such extent as to rob people of the right to emotional expression in building. Expression in building is accomplished by the form of mass, by color and texture of materials and by moulded forms.—Life without emotional expression is half death.

Fifth

While it is observed that elementary mouldings are the language of expression, it is also observed that mouldings are made up of a series of elementary curves which are always used in some combination for expression thru form. These curves are the alphabet of form.—Give the individual this alphabet and his expression will be according to his spirit, enhanced or handicapped by his degree of culture.

Sixth

If the wood working mills are willing to do a piece of real constructive work, i. e., reproduce the alphabet of form in moulding of wood, then, will they render to the public a real and lasting service. The ignorant man with these beautiful curves can work out his own crude ideas while at the same time the cultured man may use these same elements at very much less expense to produce the beautiful.—The vision of the poetic soul of the Israelitish shepherd lad is revealed in the 100 Psalm with the same alphabet and the same words as are used by the visionless sheep driver of the stock yards to curse his flock.—So far as medium is concerned.

To dignify and perpetuate the crude compass drawn combinations of arcs of circles which are presented in the present so-called "Universal Moulding Book," by calling any of the standards is to give credence to crime. The American Institute of Architects can never—even in the interests of standardization which it has and expects to continue to support—be inveigled into even seeming to endorse such a procedure. It is outspoke and unequivocally opposed to any semblance of endorsement of the existing "Universal Moulding Book."

Seventh

The analysis and graphic production of the elements of moulding adopted to various scales of expression is no easy task. It requires the extended services of the best scholarship obtainable. It is an individual task, not the possible work of a committee, although the work should be supervised by a competent committee of architects and practical millmen.

Eighth

The results should be published in the form of a universal text book on the elements of wood mouldings. In this should be presented with practical identification numbers, full size details of all of the practical sizes essential to the ordinary practical use in wood of each of the several moulding elements. These details should be followed by text and copious illustration, couched in such simple language that the commonest mechanic may readily understand, explaining the purpose and application of mouldings; illustrating how different combinations of elements may be made to produce different emotional effect; explaining how much that is called architectural style is merely a peculiar system of combining moulding elements to produce certain emotional effects, and emphasizing the necessity of selecting sizes with due consideration to scale. If the industries of America are to live, draftsmen must be intelligent on the part of the art of their craft. Dull drudges turn to anarchy as a relief from the hideous monotony of their task. Long hours of otherwise racking physical labor seem not long nor wearying when the operator understands and believes in his work.—Love of one's craft never called a strike. —(From Monthly Bulletin, Illinois Society of Architects.)

ORGANIZATION AND CURRENT NEWS

KANSAS BUILDERS FOR STATE CONFERENCE IDEA, TOO

Contractors, Architects and Engineers Out There Meet in Joint Session

The second annual meeting of the Kansas Building Forum, held in Wichita, October 16, 17 and 18, attended by representatives of the Master Builders Association of Kansas, the Kansas Society of Architects and the Midwest Structural Society was a success in every respect according to those who attended the various sessions. The purpose of the forum is to provide a means whereby delegates from the various associations may get together for a discussion of mutual problems.

The Master Builders Association of Kansas took a number of important steps. The association, among other things, decided to put into operation a Quantity Survey Bureau. The most important action taken by the Kansas Society of Architects was the adoption of a resolution to go before the state legislature with a bill to make it necessary for an architect to secure a license before being allowed to practice in Kansas.

Calumet District

ONCE MORE

Man in Position to Know Points to Need for Drastic Action Regarding Apprentices

The constant decrease in the ranks of the skilled building trades mechanics due to the fact that death, old age and deflections to other fields of endeavor exact an annual heavy toll that far offsets the number of new mechanics taken in makes the encouragement of apprentices all the more important, raises it to the status where it shoud be given most serious consideration. And yet, notwithstanding the decreasing supply of skilled mechanics, contractors and contractors associations seem content to muddle along trusting to luck to get by. The builders and their associations somehow refuse to awake to the serious situation and are making little or no concerted effort to devise any methodical system for the creation of a greater supply of skilled labor upon which their future business activity depends.

Referring to the above, H. L. Dennis, State Director of Vocational Education for Pennsylvania, in an article in the A. G. C. Constructor said in part:

"A building trades apprenticeship plan does not exist. The topic reminds me of the story of the old gentleman from the country who, for the first time in his long career, was on a visit in one of the large cities of this country. As a part of his entertainment he was taken by his city relatives to visit the zoo. In one of the large buildings housing animals of various descriptions, he came upon the rhinoceros. For a time he stood still in his tracks, conflicting emotions depicted on his face. He shifted his wad of tobacco from one cheek to the other and then back again; finally he turned to his good wife, with an expression of disgust on his face saying, "Come on Mirandy, let's get out of here; they ain't going to fool me, I know there ain't no such animal."

"Does not Exist! In dealing with this subject I appreciate fully that I shall be considerably handicapped in attempting to discuss something which is not in existence, and yet which is staring us in the face. It is coming to be a well recognized fact that the apprenticeship system for most of the skilled trades in this country has practically disappeared, this is particularly true of the building industry.

"We are informed by those who are in a position to know that while there was only one apprentice for every 136 journeymen in carpentry in 1910, there is now only one apprentice to 185 journeymen. In 1910 there were 47,682 journeymen plasterers. This number was reduced to 38,225 by 1920, a net decrease of nearly 10,000, or over 20 per cent.

"It is estimated that the number of apprentice plasterers is practically nil. We are further informed that in 1920 there were practically 25,000 fewer painters, glaziers, and varnishers than in the previous year of 1910. Here and there some sporadic attempts at apprenticeship training are being worked out with varying degrees of success. In the manufacturing industries a little better start has been made.

"An acute shortage among the skilled mechanics in all phases of the building industry is getting too well known to need further comment here. It is essential that we recognize at the very outset that there is in this country practically no such thing as an apprenticeship system especially in connection with the building trades. Our first and chief concern is to help bring about a public consciousness of the fact that the situation is serious and that something must be done, and that right soon."

CALUMET BUILDING PROGRESS

The new bank building footings are in and the work of placing the forms for the reinforced concrete basement walls is moving ahead rapidly.

Ten more days of good weather will allow for the completion of the concrete and brick work on the St. Margaret's Hospital addition.

The excavating for the Northern Indiana Gas & Electric building was let to the Public Construction Co., Hammond.

The Nilsson Development Co., has the plans ready for a one and one-half story frame bungalow, 33x42, for H. A. Ford, corner Standard Ave. and Jefferson St.

Architect Karl D. Norris, East Chicago, has plans out and bids will be opened November 3, for a public comfort station in the basement of the county court house at Crown Point. Estimated cost, $9,000.

Jimmy Johnston was awarded the contract for the erection of a two-story brick garage building, 50x125, Broadway, Indiana Harbor, for the National Garage Co. The contract price was $15,000.

Milda & Hansen, were awarded the contract for the pumping station power house for the Calumet City, Ill., water plant at a price of $18,000.

STOCKS UP THE LARDER

Association Secretary Makes Forage Trip With Good Results

Before we get far into this story allow us to say the secretary of the B. T. E. A. did not write it, our tip came from another source and it is to let the building crowd who know "King" Cole why he is so "fat and saucy."

It seems that down in Indiana he has a cache somewhere where is stored a wonderful and diversified supply of edibes. Several times a year he makes a pilgrimage to that "Land of Plenty" and returns laden down with a food supply fit for epicures.

Last week he slipped away and came back to Hammond, his auto looking like a huckster wagon ready for market. There were chickens, eggs, honey, pumpkins, popcorn, hickory nuts and all kinds of fruit. There are those who saw his entry into the city who opine that E. E. should be able to get thru the winter in pretty fair shape.

EVANSVILLE

NOW PREDICTS BIG BUILDING YEAR FOR EVANSVILLE

City Building Commissioner Buoyed up by Recent Developments

The volume of work that has gone before and that in prospect has caused City Building Commissioner Edward Kerth to grow quite optimistic regarding Evansville's building record for 1924. He is enthusiastic over this year's building business and freely predicts that when 1924 wil have run its course the new building construction work will approximate $5,000,000 or more for the twelve months.

There has been a tremendous amount of small work done so far this season with a few larger projects scattered here and there. Of late, however, new projects of greater scope have begun to develop with a promising prospect of going ahead, a situation that is inspiring hope for an active close to the season.

Among the larger contracts under way are the new Igleheart Brothers office building at First avenue and the Belt railroad, the Crane company building at Eighth and Walnut streets; Central M. E. church, Howell M. E. church.

Work on the new Y. W. C. A. building, the new United Brethren church and the Evansville Supply company building will be started soon.

CHIPS AND SHAVINGS

Remodeling work on the building at Third and Locust streets to be operated by the Newman-Johnson Plumbing company as a modern apartment house is well under way. The walls have been reinforced and an addition built to the third story. The exterior walls will be stuccoed and set off by ornamental cornice.

Final plans for the new Y. W. C. A. building to be erected at Second and Vine streets, have been accepted by the association committee, and bids will be opened at a meeting at the old Y. W. C. A. building, Monday morning, November 10 at 10 o'clock.

Workmen for the M. J. Hoffman Construction Company have started work clearing the ground at Eighth and Walnut streets, for the erection of the new Crane company building.

Plans for a series of buildings for the Vanderburgh county tuberculosis sanitarium at Boehne camp are being prepared. Bids will be opened at a meeting in the county commissioners' office, November 20.

FT. WAYNE

NEW OFFICE BUILDINGS AT FORT WAYNE DEVELOP NEW ORDER OVER THE OLD

Scientific Methods of Building and Care in Management Establish Their Value

The construction of so many large modern business structures in Fort Wayne during the past year, including the First National bank building, the Keenan hotel, the Lincoln Life building, the Wayne Pharmacal building, the Home Telephone building and others, brings forcibly to mind a fact not generally recognized because of the rapid development of scientific building methods as applied to structures of this kind, and the scientific care necessary to preserve the value of these buildings down through the coming years.

In the days gone by, the peak value of a building, like that of a suit of clothes or a pair of shoes was at the time it was finished—before the wear and tear had commenced. At the time the contractor turned the building over to the owners, it started downward on its way to decay and destruction, usually, within a period of ten or twelve years.

Of course, today, as in the past, there is a continual fight against the destructive agents which mold, corrupt, rot and wear, and this has brought into being not only the most scientific buildings methods which discourage these agencies from operating and encourage tenants to become increasingly proud of their leased business homes and give them the best of care.

Require Scientific Care

A run-down office building soon becomes a liability—a white elephant—just as soon as its tenants begin to desert it because something better comes along to appeal to them. And so there has come into being, the type of building which at once gives prestige to the tenant, a prestige grows with the passage of the years. To the end that this may be so, the owners of modern office buildings are given constant attention to keeping their structures in splendid condition as regards the heating, lighting and other service features, but they are careful to see that the critical eye of tenant and visitor alike sees no finger-marked hallway walls, no neglected, dingy corners—nothing that tells more plainly than words that the owners are negligent and have lost pride in their building.

Just as the prim housewife seeks to have her home neat and clean and tasty, because she knows a neglected environment has its demoralizing influence upon the members of the family and gives an undesirable impression upon her friends who call, so, the owner of the modern commercial building must not only build splendidly but must start with the finished building to keep its value constantly before its tenants and its visitors by looking after the simple details of cleanliness and brightness.

True Estimate of Value

After all, the value of a thing depends upon what people think it is worth, and sometimes it takes but a little thought in the selection of custodians and janitors and helpers in general to preserve an immense investment, and a bit of carelessness, allowed to grow may throw even a splendid structure into the discard long before its rightful day of doom.

The owners of Fort Wayne's new structures realize this and we may be assured that the treasured office buildings of today will hold their place for a long stretch of years because of the science which has gone into their design and construction and the science which will constantly go into their care and preservation from the destructive elements of nature and the hand of man.

store front, rearranging elevator and general interior alterations.

Contracts Awarded

***Residence and Garage:** $25,000, 2 sty. & bas. Archt., Bass, Knowlton & Co., 312 N. Meridian St. Owner, Lucius French, Sec. Western Oil & Refining Co., 310 N. Meridian St. General contract let to Emmet H. Pierson, 2934 Kenwood Ave. Brick.

***Undertaking Establishment** (addition and alt.), $9,000. Archt., Bass, Knowlton and Co., 312 N. Meridian. Owner, Hisey and Titus (funeral directors), 951 N. Delaware St. General contract let to Hall Construction Co., Board of Trade Bldg.

Post Office Sub Station: 1 sty., 75x22, Haughville. Archt. and builder, The Ostrom Realty Co., Peoples Bank Bldg. Owner, Wallace O. Lee and Neal Wynne, both care of Indianapolis Light and Heat Co., Monument Circle. Plans in progress.

***Bungalow (5 rooms) and 2-car garage:** $8,500.00, 5100 Kenwood. Owner, Henry Ketcham, care Kingan & Co. Archt., Elliott B. Hadley, State Life Bldg. General contract let to J. M. Brown, 866 N. Gladstone Ave. Stucco over frame.

Bakery (add.): 2 sty., 28x40. Owner, The Century Biscuit Co. General contract let to H. L. Burns, 1307 W. 34th St. Brick.

Residence: $14,000.00, 4532 N. Pennsylvania. Archt Edw. Pierre, Hume Mansur Building. Owner, Taylor C. Power, Wild Bank Bldg. Owner builds and awards separate contracts. Excavating.

INDIANAPOLIS BUILDING PERMITS

Issued October 23d to October 29th

Residence: $12,800.00, 3627 Winthrop. Owner, Fred Kemper, % contractor, general contract let to H. L. Simons, 5151 N. Meridian St.

Residence: $10,500.00, 2 sty., 40x52, 3707 N. Delaware. Owner, E. J. Baker, 617 East Maple Road. Contract let to Theo. Sander, 401 Orange St. Frame and brick veneer. Excavating.

Residence (double): $8,500.00, 3123-25 Ruckle. Owner, Anna Stewart, care contractor. General contract let to Chas. Snyder, 2251 E. Garfield. Frame. Excavating.

Residence: $6,900.00, 6518 East Washington. Owner, Edward J. Kappler, 338 Indiana Ave. Contract let to H. B. Hoffert, at site. Excavating.

Residence: $5,300.00, 757 Carlisle Pl. Owner, Fred Mertz, care contractor. General contract let to Southern Building Co., Guaranty Bldg.

Residence (double): $5,500.00, 814-16 DeQuincy. Owner, Dan Newhart, 1202 N. Kealing. Owner builds. Excavating.

Residence: $5,300.00, 1522 N. Tuxedo. Owner, Iva Allen, care contractor. Contract let to B. & C. Planing Mill Co., Christian and Moore Aves. Frame.

Residence (double): $4,500.00, 2130-32 New St. Owner, L. W. Kirtley, care contractor. Contract let to B. & Co. Planing Mill Co., Christian and Moore Aves. Frame. Also double at 2142-44 New St. Same owner and contractor.

Residence: $4,800.00, 330 Kenyon. Owner, Ralph E. Klare, 261 Hendricks Place. Contract let to C. Paschall, 325 Jefferson. Frame.

Residence (double): $4,125.00, 1204-06 N. Ewing. Owner, J. E. Lambert, at site.

Residence: $4,500.00, 5411 Guilford. Owner, C. C. Finnefrock, 33 Maple Court. Owner builds.

Residence (double): $3,500.00, 421-23 W. 28th. Owner, C. W. Eaton, 1102 W. 32nd St. Frame. Day work.

Residence (double): $3,800.00, 3870-72 Byram Ave. Owner, Loccie B. Smith, 529 East 15th. Contract let to Richard Cordell, 2050 Catherine.

Residence: $4,500.00, (double), 3905-07 East 10th. Owner, James S. Taylor, 821 N. Tuxedo. Contract let to O. H. Guype, 610 Linwood.

Residence (double): $3,500.00, 2345-47 N. Arsenal. Owner, A. Koopman, 2755 Martindale Ave. Contract let to A. B. Kirkpatrick, 1850 East 38th. Frame.

Residence: $7,750.00, 4611 Broadway. Owner, Chas. W. Roller, 1529 S. East St. Owner builds.

Residence (double): $5,800.00, 3706-08 Kenwood. Owner, Nettie M. Dunn, care contractor. Contract let to Bridges & Graves, N. Delaware St. Frame.

Residence: $4,160.00, 5429 Winthrop. Owner, William A. Quillan, 806 E. 46th. Owner builds.

Residence (double): $5,000.00, 2750-52 Shelby. Owner, W. N. Westbrook, care contractor. Contract let to M. M. Miller, Fletcher Trust Bldg.

Residence: $4,160.00, 862 N. Drexel. Owner, Edward Holtzman, 933 N. Temple.

Residence: $4,175.00, 1058 W. 35th. Owner, Southern Lumber Co., Indiana Pythian Bldg.

Residence (double): $3,300.00, 1626-28 S. Randolph. Owner, A. P. Shalley, 3867 Central Ave.

Residence: $3,300.00, 814 N. Bosart. Owner, H. V. Taylor, at site.

Residence (double): $3,500.00, 438-40 Parker. Owner, E. L. Price, at site.

Residence: $3,500.00, 3322 Elmyra. Owner, J. W. Dodson, 1301 W. 34th St.

Residence (double): $3,000.00, 234-36 S. Addison. Owner, J. W. Mount, 218 N. Belle View Place.

Stores: $3,500.00, 1 sty., 40x42, 931 E. 42nd. Owner, Florence A. Bridges, care Bridges and Graves (real estate) North Delaware St.

Residence: $3,550.00, 3211 E. 10th. Owner, L. G. Hughes, 1728 Cross Drive, Woodruff Place. Contract let to J. P. Hollenbeck, 1115 N. Temple.

Chapel: 1 sty., 16x20, Bluff Road and Kelly St. Owner, Ezras Achem Congregation, Bluff Road and Kelly St. Contract let to L. J. Seaman, 2501 Central Ave. Frame and stucco.

Residence: $4,000.00, 2538 Brookside. Owner, Universal Constr. Co., at site.

Residence (double): $4,800.00, 829-31

FOR SUPPLYMAN CONTRACTOR

VOL. VI INDIANAPOLIS, INDIANA, NOVEMBER 8, 1924 No. 32

STATE BUILDERS TURN OUT IN FORCE TO ATTEND SECOND ANNUAL CONFERENCE

Session Proves Both Instructive and Constructive

The Second Annual Conference for Indiana Builders held at the Hoosier Athletic Club, Indianapolis, Thursday, October 31, served to bring out approximately two hundred state builders from various sections of Indiana. Architects, contractors, engineers and labor representatives responded to the opportunity to gather in joint session to familiarize themselves with that which the Administrative Building Council of Indiana is seeking to accomplish and also to discuss sundry subjects pertinent to the improvement of relationships between the various building interests and for the ultimate advancement of the Building Industry.

The conference was sponsored by the Advisory Committee of the State Building Council and endorsed by the Associated Building Contractors of Indiana, the Indiana Society of Architects, the Indiana Engineering Society and the State Building Trades Council.

Architect Fermor S. Cannon, Indianapolis, chairman of the advisory committee, presided, called the conference to order at 2 P. M., the meeting room being filled to capacity, and explained that the conference was called as a part of the program looking toward better building conditions in Indiana. He stressed upon the point that with building forging ahead under an insistent demand more uniform state wide regulations and requirements were needed to assure better buildings and a greater factor of safety to the public both from the point of structural merit and sanitation, and also with the view of eliminating waste thus reducing construction costs. He then introduced J. H. Owens, Executive Secretary of the advisory committee, who set forth the purposes of the Council and reviewed the work necessary to the establishment of that body and what had been done since the Council had become operative.

Points to Evidence of Alertness of Indiana Builders

Merritt Harrison, secretary of the Indiana Society of Architects, came next on the program and went into the history of the professional architect, the development of specifications and their relation to standard building rules and regulations. He spoke of building progress and its place in civilization and how the architects, contractors, engineers and labor had come to a realization that they by co-operating in the direction of the highest ideals of building practice could contribute their mite toward civilization's advancement. As direct evidence of such effort he called attention to the present conference.

Referring to plans and specifications he said:

"Let us think of plans and specifications not as things of themselves but only as instruments of service, a sort of visual understanding between certain parts of this great building industry. Remember, what affects a part of the whole industry affects to some extent the entire industry, and therefore we should not forget that any relationship between plans and specifications and building rules, affects the entire building industry and through it our whole civilization and future growth.

"Thus in the advance of civilization, and with it the building industry, we can expect to be subjected more and more to regulatory rules. But they should be elastic so as not to temporarily hold back this march of progress. As far as practicable, they should be in the form of principles, leaving the administration of them to be set up in the rules that can easily be changed by the proper authorities to suit the ever changing processes of new materials and inventions and new methods in the building industry."

Stress Upon Importance and Need for Standardization of Materials

Next, since specifications suggest materials and materials suggest cost, E. W. McCullough, President of the Indiana Engineering Society, took up the matter of the government's effort toward a standardization of materials as regards size thus eliminating the great conglomeration of sizes that add nothing to structural quality but do make for waste and advanced cost. He explained the standardization move very ably in the following: "Industrial standardization and simplification consists in singling out specific products and materials, in settling upon their properties and dimensions and in concentrating upon them both in production and use, all to the end of bringing about the greatest industrial efficiency." He said the important part which the above move plays in industrial evolution and its economic potentialities are only beginning to be understood, and by means of charts, that were most interesting and enlightening, showed the great progress that has so far been accomplished by the Hoover Commission toward the elimination of waste in production, an elimination that has already reached into the building field.

Labor Interested

While the proposed new building order for the state will affect the architect, contractor and engineer at the same time it will also affect the craftsmen and C. W. Kern, president of the Indiana State Building Trades Council, explained labor's interest in the building council's work. He said in effect that labor has turned its attention to building rules and regulations in order to eliminate unskilled, cheap, shoddy workmanship.

Mr. Kern explained that the idea of the Building Trades Council was not to obtain a monopoly on the building trades for union organizations. Labor but desires such rules, and laws to be established that only a good workman, whether he is a member of an organized labor union or not, can take part in building construction.

"Proper regulations must be put into effect for the safety of the public," he said. "The most important feature of the new building code must be regulations which will safeguard lives and insure the purchaser of a home or commercial building a good piece of workmanship in which he can feel confidence."

Urges Winter Building

As a means of creating a greater stability in the building field A. E. Kemmer, general contractor, of Lafayette, Ind., made a direct and impassioned appeal for the encouragement of winter building that construction activity might be extended over the whole year rather than be confined to just a few months as has been the usual custom. To back up his arguments Mr. Kemmer set forth various methods he had used to keep his work going the year around.

Discuss Apprentice Problem

There followed a general discussion on building conditions out of which arose the apprentice problem and the great need for some encouragement of boys and young men to enter the building trades crafts that skilled mechanics may be developed to meet the future demand. Each organization present was instructed to appoint a committee to meet in joint conference in an effort to solve the apprentice question.

Indianapolis, Ind.

A NOTABLE BUILDING

Sometimes the Architect Must Dare and Even Invite Criticism in Order to Triumph

In America there appears to be produced about one notable example of commercial architecture in each generation of buildings, if an architectural generation be defined as a period of about six years; that being about the progression from the notable Woolworth Building designed by Cass Gilbert, to the Bush Terminal designed by Harvey W. Corbett.

Architects may not agree as to what building designed and erected during the present architectural generation will be classified on a parity with either the Bush Terminal or the Woolworth Building, but it is probable that the choice will lie betwen the Hotel Shelton recently constructed in New York and the American Radiator Building, designed by Raymond M. Hood, with the probabilities that architects generally will place the Hotel Shelton first and the American Radiator Building second.

The Hotel Shelton is without doubt one of the most outstanding structures in this generaion of buildings. It was designed by A. L. Harmon, a former Chicago man who secured his academic training at the Armour Institute of Technology and was for some time in the office of Howard Shaw of Chicago.

The American Radiator Building is without doubt a most wonderful edifice and the story is that Mr. Woolley, President of the American Radiator Company, gave the subject of the selection of the architect for the building very serious consideration. He wished the building to be black in color and trimmed with gold. Knowing the attitude of architects generally towards departing from precedent in such a radical manner as this, he made considerable investigation before he selected the architect.

The matter was brought to the attention of Mr. Raymond M. Hood, who had nerve enough to tackle the proposition, and it is probable that 99 per cent of the leading architects of New York would have refused to have undertaken the work under the limitations imposed by the owner as to the color scheme.

Artisans are just finishing putting the gold leaf on this building and when one studies it day after day under all conditions, its striking beauty becomes more apparent. It has been, is yet and will probably be for years violently criticised by many architects as a work which should never have been permitted, but more especially by those who are unable to see anything which originated after the birth of Christ.

The Hotel Shelton will probably be voted the more popular design due to the fact that precedent has not been so radically departed from, but both buildings deserve the careful study of every architect.

Who will design the most notable structure of the next building generation? Will the new Tribune Building, Chicago, when completed, be voted in this class? Time will tell.—(From Bulletin of Illinois Society of Architects.)

PRESIDENT FOX OF ILLINOIS SOCIETY ARCHITECTS REPORTS OFFICIALLY ON INDIANA ARCHITECTS' MEETING AT HAMMOND

Favorably Impressed by Big Gathering in the Calumet District

Recently at a regional meeting at Hammond the Indiana Society of Architects was honored by having as its guest President Charles E. Fox of the Illinois Society of Architects. He was the official delegate from the sister organization in the neighboring state and at the time, in a brief talk, commended the Indiana Society for its encouragement of regional meetings for architects, and also the joint meetings with contractors.

Upon his return to Chicago he made the following official report to the Illinois Society of Architects:

"The meeting was held at luncheon at the Indiana Hotel—19 persons in attendance.

"The remainder of the afternoon was occupied with a tour of inspection through the plant of the Mark Manufacturing Company—following the manufacture of steel pipe from the landing of the ore on the dock to the production of the finished product in the stock rooms—through the various stages of smelting, through the ingot, and the skelp; the drawing of the pipe, straightening, cutting, galvanizing, threading and the finished handling for shipment.

"It was a very interesting tour. The party, made up of the Architects and the Contractors of Hammond and adjoining territory, to the number of some 75.

"The Hammond district showed great interest in the visit of the architects, and a fleet of 30 cars, bearing placards of welcome to the Indiana Society of architects, conveyed the visitors to and from the plant.

"I was unable to attend the fish dinner in the evening, which was held at Hammond Beach. This dinner was a combination affair of the Contractors, Material Men and the Architects, and the committee in charge expressed the anticipation that there would be 200 present at the dinner.

"The meeting expressed its appreciation of the representation of the Illinois Society, and by resolution tendered their appreciaion and good wishes to the Illinois Society of Architects and expressed the hope that they would endeavor to be present at the Indiana Society meetings as and when they occurred so that mutual benefit would accrue through the exchange of ideas.

"CHARLES E. FOX,
"Chairman."

Build with the Builders

"The builders . . . . . are insuring their liability in their own company, a trade mutual---a company that has enviably succeeded in every factor involved in carrying out principles of compensation insurance. This company is the

Builders & Manufacturers Mutual Casualty Company
of CHICAGO

It is a company operating solely in the building industry, insuring only the compensation and public liability of its members, and furnishes such insurance at a remarkably low cost."

ORGANIZATION AND CURRENT NEWS

STATE BUILDERS TURN OUT

(Continued from Page 5)

Cannon discussed zoning laws and future building. He declared that Indianapolis and other Indiana cities are very unlikely to become cities of skyscrappers, such as New York and some of the other cities of the east. "That is because Indiana builders are beginning to get away from the 'Main St.' idea, and are extending the business areas," he said.

Banquet Brings Conference to a Close

The conference was brought to a close with a banquet in the evening at which a great crowd gathered, completely filling the banquet hall. Dr. W. F. King, secretary of the State Board of Health and chairman of the Administrative Building Council of Indiana, was toastmaster and introduced the following speakers: Newman T. Miller, State Fire Marshall; Dixon H. Bynum, chairman State Industrial Board; Prof. A. A. Potter, Dean of Engineering, Purdue University; E. W. McCullough, Indianapolis, Pres., Ind. Engineering Society; Max Irmscher, Ft. Wayne, Pres. A. B. C. of Indiana; Walter Scholer, Lafayette, Prest. Indiana Society of Architects; C. W. Kern, Prest. State Building Trades Council; Attorney Harry Fenton, Indianapolis, General Counsel A. B. C. of Indiana.

Calumet District

IMPRESSED BY CONFERENCE

Feels Good Has Been Accomplished and Will be by Greater Effort in That Direction

After having attended the Conference for Builders at the Hoosier Athletic Club, Indianapolis, Thursday, October 30th, it is the confirmed opinion of one of those present that those of the Indiana Building Industry who were able to lay aside their business cares of the day and be among those present were indeed fortunate, and further, the effort put forth to be among those present was well spent. It was surely an enjoyable and instructive meeting.

The affair surely carried with it an impressive inspiration for truly better times have dawned for the industry when the architects, contractors, engineers and Labor representatives can gather together for a mutual discussion of the problems of the industry that are common to all, problems that may of their nature be individual and yet far reaching in the influence they exert on the entire building field. There was a time when the architect and engineer apparently had little in common with the contractor and Labor and vica versa. Each of the four above working elements of the building industry were incined to stay over on his side of the fence and let the other fellows get along as best they could, failing to recognize the fact that that which was a detriment to the one was a detriment to all in the general operation of building.

Being of the contracting forces it is not for us to say what the architect, engineer or Labor may get out of these conferences, but speaking for the progressive contractor we fear not to advance the opinion that any contractor who attends is well recompensed for his effort, and for constructive thought there is no better investment that he can make than what it costs him to journey to these open forums where he secures the viewpoint and ideas of the other fellows, colleagues, though known under other professional craft names.

The only thing about these big meetings that is past understanding is why more contractors, who depend on the building industry for a livelihood, do not show more interest in such moves and join up with the progressiveness that is seeking to inject itself into their business. Every contractor, for his own good, should avail himself of the opportunity to attend the joint meetings, conferences, and conventions of builders, and others allied with the building business, and give of their best efforts to bring about conditions that will make the business more profitable.

The object of these gatherings is to eliminate as far as possible, or at least minimize, the hazards, impediments, and inimical influences that have proved detrimental to the well being and progress of the building business. The only way to succeed in such ventures is by concerted action on the part of all the building interests, particularly contracting, the architectural and engineering professions, and Labor. When these four great and fundamental operating elements do get to working hand in hand for the good of the buidling industry they will afford to it a greater recognized standing, almost professional in scope, and an honorary field of which those therein engaged will be justly proud.

As for the recent Indianapolis meeting, there was a fine representative attendance, a general manifestation of an inclination to extend the co-operative effort that has taken hold, an advancement of information that was far reaching and of much interest, and a universal acknowledgement that after all the problems of the one element are of mutual concern to the other elements.

The speakers were well chosen, men of recognized ability in their own field, and proved by their discourses to be well posted on the subjects assigned to them. Especially interesting was the general discussion that brought the business session of the conference to a close; it had to do with the apprentice problem and brought to light much instructive information as architect, contractor, engineer and Labor took up various points regarding apprenticeship and its encouragement.

As a grand finale there was a banquet in the evening at which a large crowd gathered. There were a number of short talks, all good, by various state officials, architects, contractors, and labor representatives. As diversion a number of delightful pleasing vocal musical selections were rendered by Hazel Silvey and Lillian Huselein, Indianapolis.

RATHER PERSONAL

But "The Boys" Were Only Solicitous for the Dean of Muncie's Comfort

When we returned from the Indianapolis conference last week quite a few of "the boys" were anxious to know if any of the fellows stole Charley Morrow's "hair tonic" as they did several years ago. If they did we didn't hear about it, in fact we didn't know he had "hair tonic" with him.

Community Building, Flora, Ind.
(Drawn from actual photograph)

This structure, 80x140 feet, was built throughout of HOOSIER GIANT BRIX, including foundation and interior finish. Auditorium seats 2,000.

HOOSIER GIANT BRIX

GIVE BETTER BUILDINGS AT LOWER COST

The chief object in any building project today is to secure better buildings at lower cost. The public demands economy without the sacrifice of quality. Architects and contractors are meeting this demand with HOOSIER GIANT BRIX, the ideal material for high grade, economical construction.

Homes of HOOSIER GIANT BRIX

In residence construction, whether for outside veneer or solid walls, HOOSIER GIANT BRIX offer all the advantages of brick construction and yet save 25% over the cost of brick. HOOSIER GIANT BRIX can be laid up in a small fraction of the time required for other construction, thus making big savings in labor cost. In beauty they match fine quality tapestry brick. They equal brick in strength and load-bearing capacity. HOOSIER GIANT BRIX are five-walled, vitrified, mat-face fire-clay units, and are adaptable for any construction where brick can be used.

For INDUSTRIAL BUILDING

HOOSIER GIANT BRIX and HOOSIER Building Tile are adaptable for every type of industrial buildings, such as schools, gymnasiums, churches, factories, garages, stores and other fireproof structures. This material insures big savings on construction cost and makes a building unsurpassed for beauty and serviceability.

Architects and contractors are invited to send for samples and illustrated literature describing HOOSIER GIANT BRIX and Building Tile. Let us submit estimates on your specifications.

ANOTHER SPURT

Hammond's Building Business Picked up in October

New building work proposed for Hammond during October, according to the statistics of City Building Inspector Henry Vis, showed a decided increase over that of September. Not only that but it was considerably ahead of the October, 1923 volume also.

During the month recently completed there were 145 permits issued for an estimated valuation of $514,824; this was 29 more permits than were granted in September while the money involved amounted to $251,449, a gain of 95.5%. As compared to October, 1923, the building volume showed an increase of 23 permits and a gain of 52.2% on the estimated valuation.

SHOO THE JITNEYS OFF THE STREETS

Bus Franchise Causes Them to Scatter to Cover

A new order of transportation has gone into effect at Hammond. On November 1, the erstwhile popular and plentiful "jitney" gave way to regular scheduled bus service controlled by franchise. The jitneys came when the car service failed to meet requirements and developed like flies to flit here, there and everywhere. Then came the bus company with a request for a franchise which was finally granted after considerable study. It is to be hoped that the new regulated bus facilities will solve satisfactorily Hammond's much muddled transportation problem.

CALUMET BUILDING PROGRESS

Every builder in The District is seeking to take advantage of the good weather conditions to rush his work thru or to enclosure.

Strandberg Bros., Chicago, who have the contract for the erection of the Washington School auditorium at Indiana Harbor, were the successful bidders on the new building for the Northern Indiana Gas and Electric Co. Their bid was $134,500, not including heating, plumbing and wiring.

The Rimbach Estate awarded a contract to Chas. N. Scott, for the construction of a new apartment building.

They are gradually bringing S. Hohman street around. First, the thoroughfare was widened, then paved, and now the new sidewalks are being laid.

E. E. COLE.

EVANSVILLE

GETTING BETTER

Building Activity at Evansville on the Increase

According to City Building Commissioner Edward Kerth's figures Evansville is making a determined effort to roll up a creditable construction volume for 1924. For the past few months building operations have shown an encouraging activity with a decided trend upward each succeeding month. September turned in a good record and then along came October with a volume of new building work that put the previous month's business in the shade, in fact the figures recorded during the month recently ended were the best yet posted for any one month since the new city building code became operative May 1.

During October there were 329 permits issued in Evansville for a total estimated valuation of $428,686, this as against 245 permits involving approximately $325,000 in September, a gain of 84 permits for an increase of 31.9% in valuation.

Then, too, October, 1924, made a much better building record in Evansville than October, 1923, when but 228 permits, totaling $284,360, were issued. This put October of this year to the fore by an excess of 101 permits granted for a valuation gain of 50.8%.

A tabulation of the October building according to scope of the work for which permits were granted is as follows: Repair work, 113; new work, 216; electrical and plumbing, 138; permits for factory buildings totalled $147,950; for charitable and public buildings, $85,000.

FT. WAYNE

SLIGHTLY OFF

Local Building for October Not up to That of September

Though Fort Wayne's new building construction volume for October this year showed a slight decline from that of both September, 1924 and October, 1923, the falling off was hardly noticeable being but 1.7 per cent in arrears of the previous months' record, and 7.89 per cent behind the corresponding figures a year ago.

The October total this season was sufficient to carry the ten months' total estimated valuations up to $10,271,917 or an average monthly building volume of over $1,000,000 per month since January 1, 1924.

To date the Fort Wayne building performance for this year compares favorably with that of the record figures posted over the 1923 period.

INDIANAPOLIS

DEAN OF INDIANAPOLIS CONTRACTORS CALLED

Wm. P. Jungclaus Prominent Builder Dies After a Short Illness

There passed from the Indianapolis and Indiana building field last week one of the best known building contractors in the middle west and one who for fifty-three years was directly connected with the structural upbuilding of the Hoosier Capital City. Reference is made to Wm. P. Jungclaus, dean of Indianapolis building contractors who, after two weeks illness, answered the final summons at the Methodist Hospital following an operation.

Mr. Jungclaus was born near Hamburg, Germany, February 22, 1849, and during his early life was a sailor, his father having been a sea captain. In 1870 he gave up being a mariner and later located in Indianapolis. He was married in New York City in 1872 and returned to Indianapolis with his bride. Beginning as a carpenter Mr. Jungclaus worked along for three years then in 1875 formed a partnership with John A. Schumacher as a general contracting firm. The Jungclaus & Schumacher Co., operated until 1895 when the partnership was dissolved and Mr. Jungclaus organized the W. P. Jungclaus Co., of which he was president at the time of his death. Associated with him in business were his two sons Henry P., and Fred W., the latter being a past president of the Associated Building Contractors of Indiana. This firm has built and is at present building many of Indianapolis' largest and finest buildings.

Funeral services were held from his late home, 4061 N. Meridian St., Monday afternoon, November 3, interment following at Crown Hill cemetery.

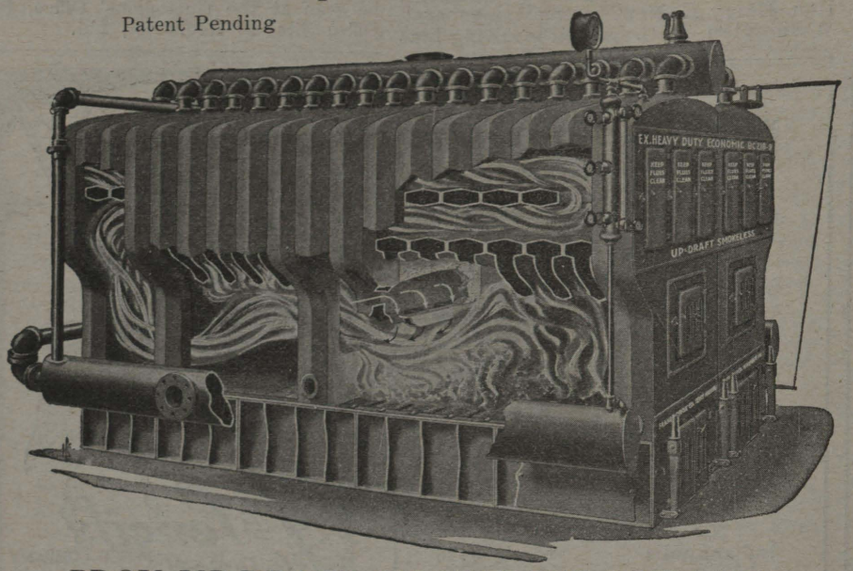
"BC" Series Up-Draft Smokeless Boiler

Patent Pending



Prox Boilers are equipped with a top header, which is a positive steam separator, assures dry steam carrying maximum number of B. T. U.'s Water boiling up will not go into main and cause water knock, no matter how hot a fire may be in any part of boiler. A side connection to this header with natural drain to rear of boiler discharges all water and condensation to side headers. This is only one of the many superior features of Prox Boilers.

PROX UP-DRAFT SMOKELESS BOILERS

Burns all grades of fuel, such as bituminous coal, lignite, coke, oil, gas, wood.

Capacities - 1750 sq. ft. to 22,800 sq. ft. steam

VOL. VI INDIANAPOLIS, INDIANA, NOVEMBER 15, 1924 No. 33

AIM OF STANDARDIZATION OF MATERIALS AND ACCOMPLISHMENTS EFFECTED TO DATE SET FORTH

Indiana Builders Presented With Some Interesting Facts by President of the Indiana Engineering Society

So much has been written and said about the effort of the government to effect an elimination of waste in industry through the means of simplification and standardization, and yet, such a mass of data has been issued that unless it has been followed studiously the subject leaves one wondering where he is, what it is all about, and what really has been done. Therefore, the talk recently made on the subject at the Builders' Conference at Indianapolis by E. W. McCullough, President of the Indiana Engineering Society, was most timely and particularly interesting, when he said:

"Industrial standardization and simplification consists in singling out specific products and materials, in settling upon their properties and dimensions and in concentrating upon them both in production and use, all to the end of bringing about the greatest possible industrial efficiency.

The points considered in simplification and standardization are:

1. Nonenclosure. Definition of terms used in specification, contract and other technical work. Abbreviations. Symbols for quantities used in equations and formulas. Graphical symbols.
2. Uniformity in dimensions necessary to secure interchangability of parts and supplies and the interworking of apparatus.
3. Specifications for material and equipment.
4. Methods of test. (Highly important).
5. Rating of machinery, tools and apparatus.
6. Provisions for safety.
7. Rules for operation of machinery and apparatus in industrial establishments.
8. Concentration upon optimum number of types, sizes, and grades of manufactured products.

The important part which simplification and standardization plays in industrial evolution and its economic potentialities are only beginning to be understood generally.

What It Really Does

It simplifies manufacturing processes.

It stabilizes production and employment since it makes it safe for the manufacturer to accumulate stock during periods of slack orders.

It lowers the cost to the public by making mass production possible.

It enables the buyer and the seller to speak in the same language and makes it possible to compel competitive sellers to do likewise.

It reduces selling cost.

It stimulates research and makes for the elimination of antiquated methods and products.

It bases competition squarely upon efficiency in production, distribution and upon intrinsic merit of product.

Not only does the work extend into more and more branches of industry, but the number of co-operating bodies necessarily increases with the number of projects.

The co-operative relations of the industrial and technical associations, the City, State and Federal Governments and Foreign Standardizing bodies continue to become closer and more important.

It is interesting to note that 235 National bodies are co-operating. One hundred and fifty-two projects are under way or have been approved. The projects are divided as follows:

31 relate to civil engineering and the building trades.
25 relate to Mechanical engineering.
15 relate to Electrical engineering.
4 relate to Automotive engineering.
11 relate to Transport engineering.
1 relates to Marine engineering.
14 relate to Metallurgical engineering.
12 relate to Chemical engineering.
2 relate to Textile engineering.
5 relate to Mining engineering.
5 relate to Wood industry.
1 relates to Paper and pulp.
11 relate to Miscellaneous and general character.

When simplification of manufactured products was mentioned several years ago few realized that the present status of progress would ever be reached.

For years past the Engineer has had little if any, ground to stand upon when designing and erecting work.

Specifications for many articles meant little and it was only through the common honesty of those interested in the project and the use of general specification causes that made an acceptable job possible.

As Regards Clay Building Materials

This point is clearly illustrated in the matter of brick. Specification for brick meant anything from 7½ to 8½ inches in length with corresponding and proportionate variations in width and thickness as the case might be according to the locality in which the material was being furnished. The result was tremendous waste in clipping, cutting and endless other adjustments. This does not consider the actual material waste and waste from other sources due entirely to lack of standardization. The quality varied between even wider limits than the sizes. The fault for this appaling waste was not with the Engineer, the Contractor, the building trades or the material men. It lay entirely in the fact that there were no standards and a building designed in one state or city to be erected in another in all probability would not conform to the building codes and the result was a real money waste.

Standardization and simplification will eliminate this condition throughout because as simplification progresses the CODES are progressing and Engineers will be able to design better structures and these better structures will cost the owner less money.

Apartments (5) and Stores (7): 2 sty. & bas., 41x131 at E. Washington and Oxford St. Archt., Chas. T. Freijs, 325 Baldwin Bldg., 157 East Market St. Owner, Abe F. Maloof, (grocery) 1102 East Georgia St. Plans in progress. Brick and hollow tile, comp. roof, steam heating system, maple floors, In-a-Door beds, ranges, refrigerators.

Residence and Garage: $50,000.00, 2 sty. & bas., "Woodstock," Indianapolis. Archt., Osler & Burns, Penway Bldg. Owner, Dr. Frank A. Hamilton (dentist) 1005 Hume Mansur Bldg. Plans in progress.

Residence and Garage: $30,000.00, 2 sty. & bas., 42nd and N. Illinois Sts. Archt., Osler & Burns, Penway Building. Owner, Guy A. Wainwright, V.-P., of the Diamond Chain and Manufacturing Co., 502 Kentucky Ave. Plans in progress.

Residence and Garage: $15,000.00, 2 sty. & bas., 45th and Washington Boulevard. Archt., Osler & Burns, Penway Building. Owner, Henry Dollman, Sr., 1003 Merchants Bank Bldg. Plans in progress.

Residence and Garage: $15,000.00, 2 sty. & bas., Morristown, Ind. Archt., Osler and Burns, Penway Bldg., Indpls. Owner, Dr. V. C. Patten, Morristown, Ind. Plans in progress.

***Residence and Garage:** $15,000.00, Sutherland Ave., north of 30th. Archt., Myers & Coffin, Penway Building. Owner, Dr. D. A. Anderson, 242 Bankers Trust Bldg. Archt. receiving new bids. Brick veneer & hollow tile, tile roof, furnace, tile and hardwood floors.

***Bank, Stores and Offices:** $150,000.00. (Work will consist of a new fireproof addition, 2 sty. & bas., 87x52½ and the restoration of a 3 sty. building, 45x50 that was destroyed by fire), Bloomington, Ind. at 5th and College. Archt., McGuire & Shook, 320 Indiana Pythian Building, Indianapolis. Owner, The Citizens Loan & Trust Co., J. D. Showers, Pres.; Roy O. Pike, Cashier, Bloomington, Ind. Work on the old portion of the building is being done by day labor, the owner desiring bids from local Bloomington firms on heating, plumbing and wiring. Plans for the new addition will be ready for figures about December 10th. (Note corrections—it was previously reported as contract awarded.)

Childrens' Home: (Several buildings): Lebanon, Ind. Archt., McGuire and Shook, 320 Indiana Pythian Bldg., Indianapolis. Owner, Board of Trustees, Indiana Methodist Childrens' Home, Greencastle, Ind. Architect selected. Details undecided. Brick.

--Residence: $15,000.00, Rushville, Ind. Archt., McGuire and Shook, 320 Indiana Pythian Bldg., Indpls. Owner, Lee Andres, Rushville, Ind. Plans in progress. Brick construction.

***Church Auditorium:** $350,000.00, (1st unit of a $1,000,000.00 church): 38th and Meridian. Archt., H. C. Hopsam, Atlanta, Ga. Owner, North Methodist Episcopal Church, Rev. Jesse Bogue, pastor, 3726 N. Capitol. A. M. Glossbrenner, chmn. bldg. com., care the Levy Printing Co., Ohio and Senate Ave., Indpls. Owner receiving bids. Expect to award contracts in 10 days.

***Sorority House:** $45,000, 3 sty., 40x76, Greencastle, Ind. Archt., Fermor S. Cannon, 21 Virginia Ave., Indianapolis. Owner, Alpha Chi Omega Sorority, Greencastle, Mrs. G. L. Clark, Chmn. Bldg. Com., 2007 N. Talbott Ave., Indianapolis. Bids in under advisement; expect to award in a few days. Brick veneer, frame, stucco.

Bungalow: $7,000.00, Beech Grove, Indianapolis. Archt., John Hagel, 2632 E. Tenth St., Indpls. Owner, Charles Russ, 634 South New Jersey St., Indpls. Plans in progress. Bids soon. Frame construction.

***Residence and Garage:** $10,000.00, Pleasant Run Driveway, between New York and Michigan Sts. Archt., John Hagel, 2632 E. Tenth St. Owner, Frank Meyer, care architect. Bids in under advisement. Brick veneer, asphalt shingle roof, furnace, tile and hardwood floors.

***Residence and (2) Car Garage:** 49th and Pennsylvania. Archt., Roger N. Williams, 4025 Kenwood Ave. Owner, C. Fred Schmidt, 2007 Broadway. Ready for bids next week. Face brick veneer and stucco, English type design, slate roofing, furnace heating, private water system, hardwood and tile floors.

***Pie Bakery:** $25,000.00, 1 sty., 71x154, Madison Ave. Archt., Russell N. Edwards Co., 46 Union Trust Bldg. Owner, The Butter Crust Pie Co., Russel S. Tate, Pres., Earl A. Miller, Secy., 2146 Madison Ave. Ready for bids after Nov. 17. Brick, hollow tile, skeleton construction.

***Church:** $75,000.00, 1223 Corbett St., Cincinnati, Ohio. Archt., W. R. Garns, 818 Fletcher Trust Bldg., Indpls. Owner, Mount Lookout Methodist Protestant Church, Rev. T. LeRoy Hooper, pastor, 1223 Corbett street, Cincinnati, O. Owner ready for bids next wek. Brick. Stone trim.

Sales and Service Building: $12,000: Illinois near 11th. Archt., Frank B. Hunter, 912 State Life Bldg. Owner, Seth Klein, 820 North Meridian St. Archt. receiving bids. Brick, concrete and hollow tile, steel sash, comp. roof, steam heat.

Dpeartment Store: $500,000.00. 5 sty. & bas., 138-52 W. Washington. Archt., not selected. Owner, Golstein Bros., Abram H., Albert S., Harry E., and Samuel J. Goldstein, 138-52 E. Washington St. Contemplated. Probably mature 1925. Brick, fireproof construction.

Department Store: $800,000.00. 7 or 8 sty. & bas., 6-18 E. Washington Street. Archt. not selected. Owner, H. P. Wasson & Co., Gustave A. Efroymson, Prest.; Frank R. Wolf, V. P., 6-18 E. Wash. St. Contemplated. Probably mature 1925. Brick, fireproof construction.

City Hospital Equipment: Owner, Board of Public Health and Charities, Purchasing Department, Room 106, City Hall, Indpls. Receiving bids to close November 17th at 10:00 a. m. on the following: (a) One (1) steam driven air compressor, capacity ninety to one hundred forty cubic feet per minute; (b) One (1) concrete reservoir, capacity 75,000 gallons; (c) One (1) steam-driven service pump, 250 gallons per minute; (d) One (1) electric centrifugal service pump, 250 gallons per minute; (e) One (1) steam boiler feed-water pump, 110 gallons per minute; (f) Coal and ash handling equipment, approximate total storage 100 tons; (g) Steel breechings and connections for two 250-horse power boilers; (h) Steam turbine generator, with switchboard and auxiliary equipment; (i) One (1) cold water Zeolite softener; (j) Steam piping and connections to boilers.

***Garage:** (capacity 225 cars, for storage of City automobiles): $100,000. 2 sty., 200x105x50, New York and Alabama. Archt., Frank B. Hunter, 912 State Life Bldg. Owner, Board of Public Works, City Hall. Owner taking bids to close Nov. 19, at 2:00 p. m. Brick, reinforced concrete construction, steel truss and concrete roof, stone trim, steel sash, pressed steel stairs, hollow tile walls, fire doors and shutters, metal lockers, wood block floors, tile work, tile roof, gasoline tanks and pumps; will contain machine shop, office, provision for future elevator, locker room, shop, storage, concrete ramp, mezzanine floor for parts.

LUMBER PROPERTIES EXPLAINED TO ARCHITECTS WITH PLEA ALSO FOR INTELLIGENT SPECIFICATION WRITING

West Coast Lumber Man Addresses Indianapolis Architects

Each month the Indianapolis Architects' Association has gotten into the habit of producing a good program feature talk for its members who attend the regular meeting, and the November session, Wednesday night, at the Hoosier Athletic Club, was no exception. There was a good representative attendance of the city's architectural profession present to hear H. S. Stronack, New York City, manager industrial department of the West Coast Forest Products Bureau, who threw some interesting side-lights on the lumber industry, the supply, proper usage and the need for conservation and the elimination of waste.

He said in part: "The architect in writing his specifications should bear in mind that his is a two-fold responsibility as regards lumber; first, he must assure to his client a good lasting structure; second, by specifying intelligently he can accomplish the first and also aid in conserving the lumber supply.

"Three-fifths of the original lumber stand in the country has been used up and at present the demand for lumber is consuming it at a rate of four times faster than it is being grown. In this matter there is a great problem for the architect, for by the right specification of lumber, its usage and adaptability to the function required, conservation may be achieved.

"Fifteen per cent. of the yearly production of lumber for the building industry is required for replacements, to take the place of lumber in buildings that has deteriorated because it was not best suited to the requirement demanded of it. The various species of lumber, like metals, have different physical and mechanical properties which, if studied and understood, then that knowledge applied properly, would go a long way to cut down the percentage of replacements thus eliminating that waste. This is where the architect can do a great good if he will.

"The lumber production industry has been migratory. First starting in New England it next moved on to New York and western Pennsylvania, then into Michigan and Wisconsin, from thence to the Southern States and now is switching to the Pacific Coast. This condition has caused a situation where, because the former kinds of lumber have been reduced by cutting out, substitutions have been made. Frequently when a new species, because of its adaptability, was introduced, craftsmen hesitated to use it because it was harder to work, and arbitrarily used a softer wood.

"However, with the other sources of supply greatly depleted, in fact exhausted in many of the original timber sections, west coast lumber is going to take its place in the eastern markets, and a thorough knowledge of its physical and mechanical properties, and its proper application, will prove of great benefit to the architect who by right specifying will aid the client, the building industry and prove himself a real factor in lumber conservation."

There was a dinner preceding the meeting, then a short routine business session before Mr. Stronack spoke. At the conclusion of his remarks the speaker answered many questions that were put up to him regarding various phases of the lumber industry, standardization and other vital points as related to lumber and building.

RADIO NOW A FACTOR FOR THE CONSIDERATION OF THE ARCHITECT

Installation Provisions Enter Into Plan Preparations These Days

The development and rapidly growing popularity of radio broadcasting is compelling architects to provide adequate and proper receiving facilities in connection with building design. This problem is quite a complicated one in the case of multiple apartment buildings.

Quite recently, the Association of Co-operative Apartment Building Organizations of Chicago printed rules and regulations for radio installations for co-operative apartment buildings, which but goes to show how the radio has wormed itself into the construction and architectural field.

It might be of interest to architects to learn that favorable radio receiving conditions are maintained to be an asset in a court case now on trial in one of the Wisconsin courts, where an owner is attempting to prevent the installation of high tension power lines within such proximity to his radio receiving set that he maintains would interfere with receiving conditions. So far as known, this is the first case of this kind to be tried in any American court.

One of the prominent Chicago broadcasting stations found some months ago that the erection of the new Temple Building was interfering with its output and upon careful observations being made, it was discovered that this particular building with its high steel tower has the same natural period as the meter wave of this particular broadcasting station and for that reason acts as an absorbing agency.

We may also remark that the Chicago loop itself has a natural period of approximately 345 meters which made it necessary for KYW, who at one time was broadcasting at this wave length, to go to a higher wave.

If the courts in the Wisconsin case should rule that the owner of property may recover damages due to the construction of power lines that interfere with his radio receiving conditions, is it not possible that by the same theory of law the owner of the Chicago broadcasting station above referred to, might have a claim for damages against the owners of the new office building which it was determined after the building was constructed, has the same natural period as the broadcasting station itself, and if architects will be expected to calculate the natural period of the buildings designed by them so as to prevent the possibility of claims for damages by broadcasting stations. Architects must have a working knowledge of all of the arts and all of the sciences. (Bulletin of Illinois Society of Architects.)

Build with the Builders

"The builders . . . . . are insuring their liability in their own company, a trade mutual---a company that has enviably succeeded in every factor involved in carrying out principles of compensation insurance. This company is the

Builders & Manufacturers Mutual Casualty Company
of CHICAGO

It is a company operating solely in the building industry, insuring only the compensation and public liability of its members, and furnishes such insurance at a remarkably low cost."

ORGANIZATION AND CURRENT NEWS

AIM OF STANDARDIZATION

(Continued from Page 5)

On examination it was found that 167 brick factories made 39 sizes of brick ranging from 7¾ to 8⅝ inches long, 2⅛ to 2¾ thick and 3 3/16 to 4½ inches wide. 141 factories made face brick in 36 varieties.

Under the recent standardization and simplification recommendation No. 7, 73 of the brick sizes have been eliminated and only one each of common, rough face and smooth face are retained. All brick will be 8 inches long, all 2¼ inches thick, the common and the rough face will be 3¾ inches wide, while the smooth face will be 3⅞ inches wide.

The tremendous savings to everyone, the lessening of construction difficulties and the increasing of the possibilities of masonry design are immediately apparent to those who work in brick.

Hollow building tile was made in almost infinite variety of size, weight and design. A survey showed prevailing waste in production and use. Today, under simplified practice recommendation No. 12 standard load bearing wall tile is made in 5 varieties for end construction, and 6 varieties for side construction. Standard partition tile is made in 6 varieties, and one variety for such standard split furring and standard back tile. Each variety in each class has a definite number of cells and a definite weight.

Big Reduction Made in Metal Lath Varieties

Metal lath was marketed in at least 125 distinct varieties. It was found that this item could be simplified 80.8% or 101 of the 125 varieties eliminated. Simplified practice recommendation No. 3 covering metal lath not only simplifies the variety, but provides for specification and sale by weight per square yard.

Lumber Standardization a Perplexing Problem

Perhaps the most perplexing problem of all was considered and practically solved by the lumber report. For years it has been recognized that the variation in sizing, grading and naming reacted to the disadvantage of every user, retailer, wholesaler, manufacturer and all groups interested in lumber.

Simplification Report No. 16 is the most complete, definite and far reaching piece of simplification work that has been accomplished.

Perhaps this is due to the fact that some of our prominent HOOSIERS had a very definite hand in its framing.

The report sets a precedent for other basic industries.

It defines lumber. It eliminates wasteful and unnecessary sizes. Lumber is divided into yard lumber, structural timber, shop or factory lumber and each class is defined and graded.

Finished yard sizes are reduced 50%.

Definite basic grades are established.

Purchasers are assured of standard lumber.

The report as adopted May 1st, 1924, effective July 1, 1924, records a still greater advance. It provides for a universally uniform grading and publication of the grades.

It recommends conferences on odd lengths (2x4x9-13 etc.)

It approves grade marking of lumber and marking each piece above a certain grade.

It defines blemishes and defects.

In the short time available for discussing this subject only a few items can be mentioned.

A Few Other Examples

Pipe fittings are reduced from 17,000 varieties to 610, chain from 2044 to 820, Laboratory apparatus from 2800 to 1400, besides similar reductions in nearly all lines.

As a suggestion, reinforcing steel should be reclassified, marked and grad ed so that each bar would tell its own story. This would protect every man working in steel and at the same time if sized according to a standard of a given square inch area endless time would be saved the Engineer and designer and practically all unfair competition would be eliminated because of size substitution.

Another suggestion deals with the standardization of beams, columns and slabs in concrete construction with national standards for loading. (One of the most important projects in simplification is uniform tests-discuss.)

This whole movement is vastly important and should have the support of every engineer, architect, contractor, material man, the building trades and everyone interested in the welfare of this country and in his own welfare. It is vastly important that this matter be given nation-wide publicity through our newspapers as it vitally concerns every citizen.

Mr. McCullough further enhanced the interest in his talk by means of charts to illustrate and make more specific the points he sought to drive home.

Calumet District

WHY NOT GET BUSY NOW?

A Good Time for Contractors to Mend Their Fences

Now that the election is over, the country has been rescued from the bow-wows, and four more years of business stability and prosperity are assured the contractors and builders should be in a position to give a little more strict attention to the problems that will continue to crop out in the building industry field. There will be plenty to engage the thoughts of the builders during the coming year for there will be need for more apprentices and some timely thought should be directed in a serious manner to a way to get more apprentices into the working field. Then, too, there will be wage matters up for adjustment in the spring, and possibly there will be the ever threatening jurisdictional dispute here and there that will bob up to cause delay and trouble.

These things are but a few of the matters for contractors to reckon with, there are others too numerous to mention. Contractors should realize what they are up against and determine to work together in harmony and unity to combat the issues as they arise. There will be an added feature to demand serious thought this winter, it will be the meeting of the State Legislature. Every contractor is interested in that body for it does have to do with the building industry as there are laws pro-

sociations and their members get busy now to effect a good legislative working organization that will be at the disposal of the State A. B. C. to back up the defensive tactics the State Association may determine upon. The A. B. C. of Indiana in the past has faithfully guarded the interests of the contractors and the building industry when the legislature has been in session, and has done it successfully almost single-handed at times.

At the coming session of the legislature there undoubtedly will be introduced laws for passage that will affect the building business in one way or another and it will more than pay the contractors of the state to prepare to investigate any laws that are proposed to see whether they are favorable or inimical to the building industry.

In this matter of legislative procedure the whole of the building contracting forces must work together, and each local association should begin now to organize a legislative committee that can co-operate with the State A. B. C. when the time for action arrives.

CONTRACTORS MOSTLY ARE "SITTING PRETTY"

Open Weather Has Certainly Favored Them

At that the cold weather has found the building industry in the Calumet District pretty well prepared for it. The open fall has enabled the contractors to speed up on their work with the result that they have gotten the big bulk of their work enclosed and are all set to carry most of their projects right on to completion without interruption. The lack of rain may have been hard on the farmer but it surely has been a boon to the builders who have lost little time this season.

BUSINESS IN SOME LINES PICKING UP

Weather Somehow, No Matter What, Pleases Somebody

The cold snap that descended recently may not have fit in very well with the fellows who have outside building work to do, but it did please the merchants who had been waiting for it. The overcoat and mitten business has picked up considerably, but it is still a little bit early to take a chance on the "heavies."

BUSY BUSSES BRISKLY BLUSTER BY

Hammond Takes to New Transportation Means

The new busses that took to the streets of Hammond recently under the new franchise are quite spiffy. There are twenty-five of these vehicles that are scurrying about. They are carrying good crowds and seem to have met with popular favor. To all intents and purposes they are getting away to a good business start.

ELECTION TELLS

At Least the Indications Are That It Has Had An Effect

Business at the building inspector's office fell away considerably just previous to the election but soon after the returns were in and the results made certain Henry Vis says things began to take quite a spurt. Here's hoping the volume continues to increase.

CALUMET BUILDING PROGRESS

Roy C. Clark has a contract for the construction of a store and living apartments for Mr. Zyekowski, 38th street and Parrish Ave., Indiana Harbor. This same contractor is building a two story flat building on Drummond Ave., Indiana Harbor.

Architects Buckley and Skidmore, Hammond, have plans out for figures for a new filling station for the Marlin Oil Co., Hohman and Williams streets.

General Contractor Rufus Danner, Hammond, has purchased the Ovie Gnatt property, a large one-story building at Detroit street and the Monon railway, which he intends to remodel into a modern planing mill.

Strandberg Bros., Chicago contractors, who have the Washington school auditorium, Indiana Harbor, have run afoul of the Labor Unions because they have employed Landis Award contractors and plasterers on the job.

EVANSVILLE

NEED OF HOME DISTRICTS ABLY CARED FOR IN CITY'S NEW PLANNING SCHEME

Neighborhood Stores Provided For

Provision for neighborhood stores, as needed in every home district, has been given careful consideration by the city plan commission of Evansville in preparing its proposed zone ordinance, according to R. W. Blanchard, secretary for the commission. "It is common knowledge," said Blanchard, "that the majority of people want to live within walking distance of a grocery, a meat shop, a drug store, and other shops dealing in the common necessities. Consequently, the commercial districts as proposed under the ordinance are so spaced as to be within an average walking distance of one-quarter of a mile of the homes."

Everybody is more or less familiar with the disadvantages of having to live adjacent to a store or especially to a group of stores, Blanchard pointed out further. Commonly, the store is so built as to cover the full width of the lot, thereby shutting out sunlight and air from the house on the adjoining lot. In addition, the usual practice is to build the store clear out to the front property line, thereby further shutting off sunlight and fresh air and intruding an ugly wall into the immediate view from the front porch of the house. If we add to these disadvantages the fact that the quiet of a home neighborhood is often disturbed, so far as those homes closest to the stores is concerned by the noise connected with the business, it is little wonder that realtors have been putting into their subdivision plats for some time in Evansville and many other cities, restrictions against the building of stores in the residential districts they have been offering to the public.

Private restrictions against locating stores, factories, etc., in residential districts have often had a beneficial influence on these districts. Such restrictions, on the other hand, sometimes stand in the way of necessary public improvements, and are sometimes overruled by the courts for that reason. They are made to benefit individual tracts of land, rather than the city as a whole, as is the case with zoning.

FT. WAYNE

VARIOUS BUILDING CYCLES ARE TRACED IN FT. WAYNE'S RECENT CONSTRUCTION EFFORT

City Favored by Failure to Over-Build During Post-War Period

Is Fort Wayne in the midst of a cycle of factory building?

The question comes, naturally, from reports which indicate that many cities appear to be just entering upon a build-

posed there that if they go through have a heavy bearing on the industry.

It is high time that the various asing cycle which seems to stress industrial and warehouse construction.

The study of building cycles in the development of the various cities of the country reveals conditions very much the same as they exist in Fort Wayne. There is one great point of exception, however, while many other cities, in order to meet war emergencies, built large factories and enlarged their existing industrial establishments, Fort Wayne was not called upon to make great temporary expansions of its factories. In many cities, manufacturers were compelled to abandon the making of their regular products and start in anew to manufacture purely war supplies. Fort Wayne was spared all this unnatural activity and its consequent disastrous reaction. Whie a great amount of war material was produced here, it was largely along the regular lines of manufacture.

Demand for Amusement

Immediately after the signing of the armistice came the unprecedented demand for places of amusement theatres, dance halls and parks. In Fort Wayne, West Swinney park, which combines several of these general features, became a popular resort for countless thousands. Riverview park was later opened, and it seemed as if the people had gone dance-mad. But this seems to have been the natural consequence of the strain of war which brought a mass demand for recreation. The dropping off of patronage of some places of amusement which necessitated their closing or a receivership, indicated the tapering off of the recreational cycle, and consequently the cessation of the establishment of new amusement places which a few months earlier seemed to be in permanent demand.

Churches and Schools

Those who claim to have studied the situation, declare there has been a natural turning from the pleasure-seeking mood to the religious and educational, and they also claim to be able to prove their contention by pointing out the greater demand for church buildings and schools. Perhaps this has "just happened" in Fort Wayne, but certain it is that in all the building history of the city, never have so many fine churches been erected, never have so many public and parochial school buildings been erected and old ones enlarged, as since the period which seems now to be drawing to a close.

Office Buildings and Factories

Observers of conditions throughout the country noted, also, that the period of the establishment of new churches and schools was accompanied by the erection of office buildings and commercial structures. Fort Wayne certainly got into this special building cycle without delay. Hundreds of commercial and industrial buildings, providing Fort Wayne with a new skyline and broadening her occupied area to a great extent have been under construction the past few years betokening an increased commercial and industrial expansion of the city.

Homes and Apartments

It is pointed out that home building does not come in cycles, but it would appear that in Fort Wayne something has struck the people not only to build homes as fast as men and material can be brought together, but also to enter upon a period of the erection of apartment houses of the highest type.

It will be interesting to watch the trend of affairs and determine whether or not the city is just entering upon a greater cycle of factory building or has reached the climax of the building demand. Many are of the opinion that because the city did not overbuild during the war, she has not been overburdened with unused factory space and must expand if it is to keep up with the demand for Fort Wayne-made products which go to all parts of the world.—Ft. Wayne Journal-Gazette.

INDIANAPOLIS

AGAIN RESIDENTIAL CONSTRUCTION WORK FAR EXCEEDS ALL OTHER

Estimated Valuation On Such Type Goes Over a Million Dollars in October

The outstanding feature of the building construction effort at Indianapolis, as the months roll by, continues to center on home building, and if continued in fair proportion during the next two months will mark 1924 as the greatest residential erection period in the city's history. September saw the starting of several hundred new homes, 250 to be exact, and then October came right back to add 259 more to the year's total. The estimated valuation placed on the new residences for last month amounted to over a million dollars according to the books at the city building inspection department. This accounted for 54.9% of all the new building work for which permits were granted during the month. Further, the 259 residences and 4 apartment buildings to be started in October will furnish accommodations for three hundred and five families when completed.

The estimated valuations on the other individual and sundry classes of structural work was just for ordinary amounts ranging downward from $202,000 for apartments and tenements to but $3,985 for two small public buildings. In the matter of bulk, alteration and repair work, mostly of a small nature, led in the number of permits issued, 949, though the estimated amount of money involved was but $166,793.

A statistical digest of the building construction work approved for active erection operations in October is as follows:

Classification	No.	Est. Val.
Accessory Bldgs.	258	$ 101,606
Business Bldgs.	30	139,550
Industrial Bldgs.	5	78,000
Miscellaneous Work	324	196,398
Public Bldgs.	2	3,985
Repairs and Alts.	949	166,793
Residences	259	1,142,875
Tenements & Flats	4	249,500
Total	1831	$2,078,707

MUNCIE

BEGINNING TO THINK ABOUT NEXT YEAR'S CHANCES

Carpenters and Contractors Talk Things Over At a Smoker

With the big bulk of the 1924 building volume at Muncie well taken care of and practically in, and slight prospect of any more large work developing this season, some attention is being directed in a preliminary way toward 1925.

The first indication of such a trend was evidenced Friday night, November 14, when the local Carpenter's Union held a smoker at its headquarters and invited the Muncie general contractors in. General conditions were talked over, the outlook sized up, and means were discussed as to how best to create a stability in the local building field that would offer encouragement to the prospective builder, assure work for employe and employer alike and generally promote prosperity in the Muncie territory.

Sts., Hammond. Archt., The Elmer E. Dunlap Co., 1050 N. Delaware St., Indpls. Owner, Dr. A. W. Lloyd, Hammond Building, Hammond, Ind. General contractor, Leslie Colvin, Board of Trade Building, Indpls. Plans in progress. Start work about Feb. 20th. Brick, reinforced concrete, stone and terra cotta, passenger elevators (2), terrazzo floors, steam heat, comp. roof, concrete and steel slabs, marble work.

***Factory** (addition): 1 sty., 80x200, Fletcher Ave. and St. Paul St. Archt., J. Edwin Kopf and Woolling, 402 Indiana Trust Bldg. Owner, Thomas Madden Son & Co., Fletcher Ave. and Big Four R. R. General contract awarded to Curry Construction Co., Empire Life Bldg. Structural steel let to Insley Manufacturing Co. Brick and steel.

Theater (Motion Picture): $13,000.00, 1 sty., 42x116, 2703 W. 10th St. Owner, Frank Donas, 2635 W. Walnut St. General contract awarded to Christ Prader, 330 Sanders St.

***Business Building**: (3 stores): $15,000.00, 1 sty., 80x80, Naomi and Shelby Sts. Archt., George Bedell, Aetna Trust Bldg. Owner, Benjamin Jacobson (department store) Naomi and Shelby Sts. General contract let to the Southern Building and Realty Co., Guaranty Bldg. (Includes heating, plumbing and wiring). Brick, stone trim, steam heat, copper set store fronts, steel columns, tar and gravel roof, plumbing, wiring, wood floors.

Church: 1 sty. & bas., 48x58, at 2005-2011 Pleasant Run Parkway. Owner, Trustees of the Churchman Ave. Baptist Church, Pearl E. Oliphant, 1806 Cottage Ave. Owner will build foundation. Bids on superstructure later. Brick.

Residence and Garage: (double): $10,000.00, 4505 N. Delaware. Owner, Katherine B. Mott, 522 Powell Place. Owner builds. Frame.

***Clothing Store** (general alterations). Archt., Bass, Knowlton & Co., 312 N. Meridian St. Owner, Richman Bros. (clothing), 1600 E. 55th St., Cleveland, O. General contract let to Jos. Sertell, American Central Life Bldg., Indianapolis. Steel let to Insley Mnfg. Co., Indpls.

Foundry (addition): $11,000.00, 1 sty., 30x123, and 1 sty. 40x70, 1853 Ludlow. Owner, Peerless Foundry Co., 1853 Ludlow. Contract let to W. A. Sides, 121 Garfield. Brick and concrete block.

Residence: $11,000.00, 5826 Guilford. Owner, Vincent V. Smith, Asst. Treas., Citizens Gas Co., Majestic Bldg. Contract let to S. P. Goss, 805 E. 64th St. Frame and stucco.

Residence and Garage: $20,000.00, 2 sty. & bas., 4300 Washington Boulevard. Private plans. Owner, Thomas H. Nelson (lumber) 827 Peoples Bank Bldg. Excavating. Owner builds.

(Continued on Page 21)

SCHOOL HOUSE

NOTICE TO CONTRACTORS AND BIDDERS

Notice is hereby given that the Township Trustee and Advisory Board of Adams Township, Cass County, Indiana, will receive bids at the Twelve Mile State Bank in the Town of Twelve Mile in Adams Township, Cass County, Indiana, until eleven o'clock A. M. on Friday, the 12th day of December, 1924, for the furnishing of all material and all labor required in the alteration and repair of and in the construction of an addition to the present consolidated school building, in School District Number Four in the Town of Twelve Mile in said Township, all of which material furnished and labor performed must be according to the plans, specifications, profile and detailed drawings thereof now on file under the supervision and direction of said Trustee and said Advisory Board at the Twelve Mile State Bank in the Town of Twelve Mile, Adams Township, Cass County, Indiana.

Separate sealed bids upon the work will be received and separate contracts therefor will be let as follows:

(a) Sealed bids will be received and contract let separately upon the general work.

(b) Sealed bids will be received and contract let separately upon the plumbing.

(c) Sealed bids will be received and contract let separately upon the heating and ventilating system.

(d) Sealed bids will be received and contract let separately upon the electrical work.

Each bidder will be required to deposit with his bid submitted, either upon the general contract, or the plumbing, or the heating and ventilating system, or the electrical work, his certified check in an amount equal to five (5) per cent of the amount of his bid, which check must be drawn and certified against a responsible banking house in the State of Indiana, and said, certified check must be made payable to William W. Hoover, Trustee Adams School Township in Cass County, Indiana.

The estimated cost of the entire work aggregates $40,000.00.

Each successful bidder executing his contract for the construction of whatever work is awarded to him, must also execute and deliver to said Trustee his bond with surety to the approval of said Trustee and said Advisory Board in a sum of money equal to fifty (50) per cent higher than the amount of his bid on the contract awarded to him, and such bond shall recite that it is executed for the purpose of insuring the faithful performance of the contract in every particular, and also secure the payment of all labor and material used in the construction of said work, and for all damages, if any, sustained by any default of the contractor in the performance of his contract.

Plans, specifications and detailed drawings are on file under the direction and supervision of said Trustee and Advisory Board at the Twelve Mile State Bank in the Town of Twelve Mile, Adams Township, Cass County, Indiana. Plans will not be permitted to be taken off file by any prospective or other bidder, or removed from the said Twelve Mile State Bank, where the same are now on file. Additional copies of plans, specifications and detailed drawings are in the possession of Allen & Garriott, Architects, Room Five, Masonic Temple Building, Logansport, Indiana, they being the official architects of said work, but all bidders, if any, using these copies in the office of said Allen & Garriott must be responsible for all errors, if any, made in the preparation of their bid from these copies, because the plans, specifications and detailed drawings on file as aforesaid at said Twelve Mile State Bank shall be used as the sole guide in the construction of the entire work, upon which bids are invited herein.

Each bidder must hold himself in readiness upon demand made by said Trustee and Advisory Board to satisfactorily show that such bidder is competent and fully equipped to do the work upon which he bids, and is in a position to do the work at the time and the place, and within the time, and according to the plans, specifications and detailed drawings governing said work in a good and thorough workmanlike manner.

Time of performance of any contract awarded under this notice is essential to the essence of the contract and each successful bidder will be required to enter into a contract stipulating that time is essential to the essence of the contract, and such successful bidder must answer in damages for any failure to comply with the contract in a sum of money equal to the damages, which are sustained are reasonably worth.

All bidders, for their own protection, should make careful personal inspection of the premises and of the old building to be altered and repaired, and addition thereto to be constructed, because absences of such inspection must be at the risk of the bidder.

All bidders will be required to file with their respective bids the usual statutory affidavits and verified statements required by the statutes of Indiana in such cases made and provided, and also required by the State Board of Accounts, and all bids submitted must be according to the form used and approved by the State Board of Accounts.

All bids submitted must be made subject to the approval of said Trustee and Advisory Board, and said Trustee and said Advisory Board reserves the right to reject any or all bids submitted.

IN WITNESS WHEREOF, we have hereunto set our hands this 3rd day of November, 1924.

WILLIAM W. HOOVER,
Trustee Adams School Township.
W. L. EASTER,
L. C. MILLER,
O. D. PICKERING,
O. R. PICKERING, Secy.

MORE THAN TALK NEEDED

Intent and Action Only Will Solve Apprentice Questions, If Not By Builders Then by Some Other Powerful Agency

In view of the discussion on the apprentice question that was held at the recent conference for Indiana Builders at Indianapolis, and in which architects, contractors, engineers and representatives of labor participated, the following taken from the Bulletin of the Illinois Society of Architects appears timely and presents another angle for thought.

Many suggestions have been made as to how to provide the skilled mechanics needed in the building industry. Many large building operations have been either delayed or abandoned due to the present scarcity of mechanics.

The unions claim that it is not their fault; contractors maintain that they are not to blame and neither interest is apparently interested in arranging for a proper apprentice system, to supply the men which must be provided to take care of future building needs. It is therefore obvious that some other interest must undertake this big problem.

We have suggested that our public school system might be called upon to provide the needed training schools and in this way provide a portion of the men that must be recruited to fill the ranks of the building trades.

It is regrettable that contractors' associations and the labor unions find themselves unable to meet the situation, but facts are stubborn things and if those particularly interested cannot solve the problem, other interests must step in just as the Citizens' Comittee was called into existence when the contractors' association of Chicago admitted their inability to cope with the situation confronting the building industry after Judge Landis had made his notable award. Some agency must be found big enough and strong enough to take hold of the aprentice question and properly train the mechanics which are so needed not only to fill the depleted ranks of the skilled trades, but to increase their ranks sufficiently to take care of the needed construction and thus do away with the present opportunity to demand and receive bonuses and the unjustifiable high wages.

It might be added that at the conference Indiana building men proved they were awake to the situation, and following the discussion which was enlightening a motion was made, seconded and adopted in which it was proposed that the Indiana Society of Architects, Indiana Engineering Society, Associated Building Contractors of Indiana, and the State Building Trades Council, each appoint a special commitee to study the apprentice matter and co-operate to work out a ways and means to encourage apprentices and train them so that the constant decrease in the supply of skilled mechanics may be stopped or at least curtailed to a great extent.

NO, IT WAS ALL RIGHT FOR THE HOGS

What Some Folks Know About Sanitation

A very good story was told by Dr. W. F. King, chairman of the State Board of Health, at the Builders' Conference banquet at Indianapolis, since sanitation is one of the important features in modern construction and life today.

It so happened some agricultural college extension workers were motoring through a rural district when they came upon a farm where the hog pens were located beneath the house and the animals were peacefully sleeping there, sheltered from the hot sun. They saw the farmer and approaching him remonstrated over such a condition.

"Don't you know it is very unsanitary, unhealthy, to keep your hogs under the house?"

"Oh, I don't know," he replied, "I've had them there nigh onto ten years now and I haven't had a hog die yet."

HEAT TRANSMISSION RESEARCH

Effort Will Lead to Valuable Information For Architect and Engineer

Investigation in connection with the transmission of heat through exterior walls has brought to light considerable research by different institutions and organizations. In some instances this has been published in bulletin form with drawings and photographs of apparatus.

From this material may be developed a program for more authentic tests to bring out information of positive value to architects and engineers. In this connection the tests conducted at Trondhjem, Norway, are of interest to lumber manufacturers, as they give scientific proof of the superior heat-retention and insulation of lumber construction as practiced in Norway. These tests were conducted on twenty-seven different types of construction exposed to actual weather conditions for one and one-half winters. The work was carried on by the Norwegian Technical University and the information developed will be of value in conducting tests of a similar nature in this country.

At a meeting of the Manufacturers Committee on Heat Transmission, held in New York in October, Mr. D. F. Holtman of the National Lumber Manufacturers Association was appointed to represent the manufacturers' committee on the Heat Transmission Committee of the National Research Council.—(National Lumber Bulletin.)

Build with the Builders

"The builders . . . . . are insuring their liability in their own company, a trade mutual---a company that has enviably succeeded in every factor involved in carrying out principles of compensation insurance. This company is the

Builders & Manufacturers Mutual Casualty Company
of CHICAGO

It is a company operating solely in the building industry, insuring only the compensation and public liability of its members, and furnishes such insurance at a remarkably low cost."

ORGANIZATION AND CURRENT NEWS

IDLE AND SOLVENT—BUSY AND BANKRUPT

Peculiar Twist Not Infrequent in the Building Field

Considered by themselves the statistics of the construction industry for the past five years present the picture of a remarkable growth. From time to time reports appear in the daily press concerning the volume of building permits issued in some certain city or territory. The superficial observer will give one casual glance and presume that all is well.

An interview or two with individual builders soon reveals the fact that they do not believe that all is well. Many of them are asking themselves the question, "What's wrong with the building business?"

A question easy to ask, but difficult to answer. Answer it correctly and we shall be well on the way to that Utopia where all owners get a good job in record time at a reasonable cost; where all architects see their visions turned to tangible realities under the magical skill of genuine mechanics; where all contractors wage their battle against time and the warring elements with the full cooperation of all concerned, so that the final acceptance carries with it a good taste for everyone, as well as a profit to the contractor, commensurate with the skill, experience, capital and equipment employed, and in proportion also to the risk assumed.

This is a very pretty picture, but it offers a very severe contrast with the actual facts of the case, that ninety per cent of the contractors who engage in the construction industry sooner or later go to the wall. This is certainly an appalling mortality record. More than that, it represents an equally appalling economic loss.

Several of the contractors interviewed on this subject insisted that one of the most prominent features of the business contributing to the establishing of this huge loss, is the present method of merchandising buildings, or rather the method of auctioning off contracts to erect buildings. When a builder lands a job he virtually bets the architect and owner that he can successfully wage his battle with labor, materials, transportation and the elements for a stipulated price.

This price has been arrived at through the medium of competitive bidding, the apparent theory thereof being to assure the reluctant and timorous owner that by so doing the bidding contractors will hammer down the price among themselves to absolute rock bottom, or in some instances a little less.

The architect is protected, he has his formal contract, his ironclad specifications and plans. The surety company stands ready to bond and protect the owner and the material man, who in addition lurks behind an ever ready lien law.

The contractor alone is taking the risk and gambling his all in some cases that he is right. This risk is in turn greatly enhanced by the presence of the inexperienced and irresponsible bid.

There is reason to believe that in some instances bids have been encouraged from individuals and firms styling themselves contractors whom the architects and owners knew in advance were not capable of building the job in question, and whose bids would not have received real consideration if they had been low by reason of the fact that they were not deemed competent.

The presence of the inexperienced and irresponsible bid is encouraged for several purposes. It would seem that the principle of these is an effort to create uneasiness in the mind of the reputable contractor, to warp his judgment so that he will shrink his bid below the level of sound reason, in order to meet this competition. Occasionally this system of attack is successful, and some reputable and reliable contractor does submit a bid on the job at a price level below that of his irresponsible competition. His experience generally results in his conversion as well as the conversion of his observing competitors to whole-hearted belief in the principle of bidding what the job is actually worth rather than the idea of bidding the list of bidders named by the architect.

Contractors are beginning to recognize this ruse for what it really is and are not falling for it as hard or as often as they formerly did. It all goes back to the old slogan that has been emphasized in these columns many times before. "It is much better to be idle and solvent, than busy and bankrupt." (From the Iowa Builder, Bulletin of Master Builders' Assn., Des Moines.)

Calumet District

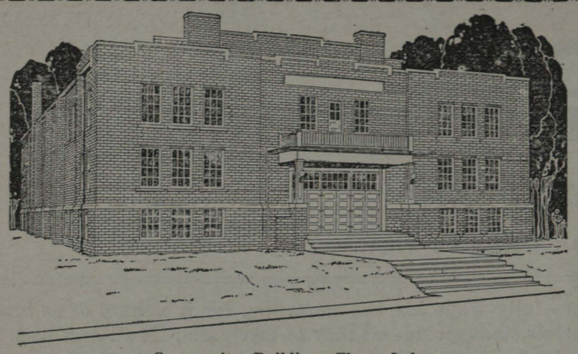
LOOKING FORWARD WITH GREAT HOPE

Calumet Region Inhabitants See Record Building Year Ahead

The way prospects are developing and the substantial tone back of them tends to indicate that next year should be the greatest building construction period the Calumet District has ever experienced. This is particularly true as regards the better classes of structures. There are a number of large building projects in contemplation and already the preliminary steps are being started, having as their aim active building construction operations in 1925. There is, however, the proverbial if attached to the future. If there are no radical changes in the prices of both labor and materials all will be well. As matters now stand there is an assuring degree of stabilization in the local building field and no untoward indications that this condition will be disturbed. Now, if such conditions continue, backed up by the confidence in business circles that sees a great future in the development of the Calumet Region, building operations are sure to surpass next season, any previous like activity.

The optimism that is prevailing regarding the building outlook is based upon the facts that quite a few industrial enterprises are considering new locations in the Calumet District, the present mills are figuring on extensive improvements and many commercial buildings are under contemplation, all of which indicates a real building program if it or a good part of it is carried thru.

That there is some ground for the hope that is springing up for a good building season in 1925 can be found in the fact



Community Building, Flora, Ind.
(Drawn from actual photograph)

This structure, 80x140 feet, was built throughout of HOOSIER GIANT BRIX, including foundation and interior finish. Auditorium seats 2,000.

HOOSIER GIANT BRIX

GIVE BETTER BUILDINGS AT LOWER COST

The chief object in any building project today is to secure better buildings at lower cost. The public demands economy without the sacrifice of quality. Architects and contractors are meeting this demand with HOOSIER GIANT BRIX, the ideal material for high grade, economical construction.

Homes of HOOSIER GIANT BRIX

In residence construction, whether for outside veneer or solid walls, HOOSIER GIANT BRIX offer all the advantages of brick construction and yet save 25% over the cost of brick. HOOSIER GIANT BRIX can be laid up in a small fraction of the time required for other construction, thus making big savings in labor cost. In beauty they match fine quality tapestry brick. They equal brick in strength and load-bearing capacity. HOOSIER GIANT BRIX are five-walled, vitrified, mat-face fire-clay units, and are adaptable for any construction where brick can be used.

For INDUSTRIAL BUILDING

HOOSIER GIANT BRIX and HOOSIER Building Tile are adaptable for every type of industrial buildings, such as schools, gymnasiums, churches, factories, garages, stores and other fireproof structures. This material insures big savings on construction cost and makes a building unsurpassed for beauty and serviceability.

Architects and contractors are invited to send for samples and illustrated literature describing HOOSIER GIANT BRIX and Building Tile. Let us submit estimates on your specifications.

that the realtors are unusually busy clearing up and staking out new sub-divisions. Already practically all the available territory within a radius of four miles of Hammond, and that contiguous to other Calumet cities, has been platted, sewers, streets and sidewalks have been put in and everything is ready for a big home building campaign to add to that of the larger work.

HONESTLY APPEARS AS IF LABOR SHORTAGE IS MORE THAN A MYTH

Developments Incline Further to Make Need for Attention Essential

It is estimated that it requires approximately 35,000 new mechanics each year to replace those in the building trades annually who die or retire. On account of the new immigration law which became operative July 1st, this year, it is likely that there will be a great falling off in the number of immigrants admitted during the fiscal year ending June 30, 1925.

Immigration of building tradesmen entering the country in 1923 and 24:

	1923	1924
Carpenters	12,305	16,420
Bricklayers	3,276	5,452
Painters and Gl.	2,550	3,937
Plasterers	503	769
Plumbers	1,197	2,980
	20,754	28,658

With the new law to reduce the available supply of craftsmen and with so few of our young men entering the building trades crafts it really appears as if something drastic should be done to avert the ever growing menace of an acute labor shortage within the next few years.

This is a real problem that the building industry must face and the sooner the seriousness of the situation sinks in, is realized, and a solution sought, the better it will be for all concerned. To put it off from week to week, month to month, year to year, but intensifies the threat that hovers over us.

CALUMET BUILDING PROGRESS

Rufus Danner & Co., was awarded the general contract for the erection of the Dr. Melton apartment building on Webb street, facing Harrison Park. It will be three stories high, of English design and will contain 34 apartments, with stone trim. Completed, it is estimated to cost $135,000.

Bayliss & Million received the contract for the Ford bungalow at Standard avenue and Madison street, to cost $7,600.

Geo. P. Pearson & Son were awarded the contract for the gasoline filling station and drain pits for the Marlin Oil Co., corner Hohman and Williams streets, at $5,000.

E. E. COLE.

EVANSVILLE

NOW ENTERING UPON A PROMISING BUILDING ERA

Such is General Conviction of Local Building Men

With material foundation at hand for their forecasts, leading architects, building contractors and material supply men of Evansville, are practically all optimistic regarding the building future of the city next year.

The general trend of opinion is that public works and commercial building will predominate, though residential building will be well represented both in volume and in class.

Reason for Optimism

The uncertainty of the pre-election period being over, big demand for shipping facilities on building material, heavy movements of material, recent awards of contracts for buildings of extraordinary type and volume, with immediate prospects of further awards that will surpass construction under way, was the basis for forecasts of a most gratifying nature on the Evansville field of 1925.

A tour of the city at the present time will convince one of the logical reasons for such an optimistic forecast. Public building is usually considered as a bright harbinger of material construction expansion in many lines.

There are now public, industrial and commercial buildings under way throughout the city, including churches, plant buildings, public service buildings, commercial houses, along with remodeling programs that puts Evansville's present day building program on a plane of more than $800,000 in construction costs.

All the structures under way represent planning and material features along the up-to-date lines to meet individual specifications.

Among the more notable buildings on which construction work is progressing are the new Y. W. C. A. building, $200,000; Crane Company building, $40,000; Graham Brothers' plant addition, $100,000; Central Methodist church and community departments, $100,000; Howell Methodist church, $40,000; Igleheart Brothers' office and departmental building, $80,000; Guardians' Home addition and improvements, $60,000; new Central library, $20,000; Maybelle apartments, $30,000; Central Glass company plant, $30,000; white and colored orphanages improvements, $10,000; Evansville Planing Mill power plant, $10,000; Standard Oil company office building, $15,000; Sterling Products building, $40,000; Simpson Methodist church addition, $15,000; Newman-Johnson apartment building, remodeling, $30,000; East Side Baptist church, $20,000.

Many Immediate Prospects

To this investment in building construction representing many hundred thousands of dollars, the immediate future is bright with a huge program of public building in sight that will involve the expenditure of more than $900,000. For the greater portion of his prospective construction work, plans have been devised, and preliminary arrangements have been completed for getting actual work under way.

In the class of prospective structures may be mentioned the new Evansville Supply company building, $150,000; Trinity Methodist church activities building, $150,000; Bethel Evangelical church and Sunday school addition, $150,000; Church of the United Brethren, $40,000; Protestant Old Folks' Home, $150,000; Indiana Trade School for colored boys and girls, $75,000; Holt and Brandon Ice company, plant improvements, $100,000; Ohio Valley Roofing company, new building, $50,000; new Liggett store, remodeling, $20,000; Hartmetz building, cost of prospective improvements not as yet estimated.

A canvass among the leading architects, building contractors, building supply men and city building inspectors of the city elicited expressions of a most prosperous period of building activity on through the year of 1925.

In addition to the work under way and in immediate prospect throughout the city, many of the men interviewed, base their forecasts further on preliminary plans for work that has not, as yet been formally announced.

At the office of Building Commissioner Ed Kerth, it was announced that building permits for the month of November are expected to reach more than $300,000.

Best in Many Months

Things at present are better than they have been for several months and it appears as if Evansville is due for a period of great building activity that will effect every class of construction, and materially add to the general welfare of the city. The prospects are very encouraging.

There is plenty of money in sight. Banks are ready to loan money on new building. A lot of special building that was put off owing to the uncertainty of the election has been resumed. Every indication points to a lot of building right on through 1925.

INDIANAPOLIS BUILDING PERMITS ISSUED

***Department Store:** $200,000.00, 20 W. Washington St., 7 sty. Owner, Seligs Dry Goods Co. General contractor, R. W. Bauman Construction Co. Brick, excavating.

VOL. VI INDIANAPOLIS, INDIANA, NOVEMBER 29, 1924 No. 35

NATIONAL BOARD OF JURISDICTIONAL AWARDS TO MEET NEXT MONTH

Important Meeting to be Started December 8, at St. Louis

A great gathering of contractors and labor men is expected at the next meeting of the National Board of Jurisdictional Awards which is scheduled to meet in St. Louis, Mo., on December 8th, next. The most interesting and important question coming up for consideration of the Board is the reinforcing rod question.

When the case was heard in 1920 the work was awarded to the Structural Iron Workers, who with the lathers, were the contestants. The laborers it was thought then, were after it, but for some reason they withdrew their claim just before the hearing took place in Washington.

At the last meeting of the Board held in Washington in August a number of general contractors appeared and argued in favor of the re-opening of the case, they claiming that since the decision was made they have lived up to it and found from experience that the cost of placing rods was too high, not only on account of the high rate of wages the iron workers were getting, but also because of the fact that on many jobs there were not any iron workers constantly employed and they were compelled to delay work many times waiting for men to come.

The Board in executive session decided that inasmuch as none of the labor unions involved were at the hearing when the contractors made their plea, that they would defer action and write all who were interested to appear before the Board at the St. Louis meeting.

Several other disputes, action upon which have been deferred from time to time, will also be taken up at this meeting of the Board, notice having been given to all contestants that they must appear at this time. Among these are disputes involving the right to handle derricks, foreman on concrete work, pre cast reinforced cement slate, conduo base, artificial stone and the handling of reinforcing material.

The members of the Board were unanimous in their selection of St. Louis for the December meeting, principally because it would give them an opportunity to show to the contractors and those interested in the industry, how the Board worked and how it had progressed under the able leadership of Architect E. J. Russell of that city who was the first Chairman and through whose efforts it was organized and became an established institution for the betterment of the building industry of the United States.

OVER FIVE MILLION DOLLARS BUILDING BUSINESS REGISTERED BY ELEVEN INDIANA CITIES IN OCTOBER

Though Slightly in Arrears of That of September, Also October a Year Ago, It Is Ahead of the Totals of Several Other Months This Season

The building activity in Indiana cities during this fall has continued fairly active and though the bulk of the work has run to the smaller structures, homes, and alterations, and additions, with few large projects developing, nevertheless, the volume of business for October, according to the advices received from the city building inspectors, compares favorably with that of September, this year, and also with that of October, 1923.

Though the past month showed a loss both from the business recorded in September, and also the corresponding October period a year ago, neither was of great consequence. The decline resulting in October was but 4.55 per cent from the September volume of business, and was only 10.3 per cent in arrears of the figures for the corresponding period in 1923.

Of the eleven Indiana cities, from which building returns for October were received, four showed substantial gains over the business of a year ago, and seven registered varying degrees of loss ranging from 1.7 per cent to 83.4 per cent.

Even though last month did fall behind a little, a $5,471,534 total of new construction work was launched which is a good volume after all and exceeds that of several of the other months of the year. This together with the amount returned by seven cities in September gives a volume of $9,965,552 for the two fall months, a creditable showing.

In the matter of gains and losses, compared with October a year ago, the cities rank as follows: Gains—Richmond, 127 per cent; Gary, 90 per cent; Hammond, 52.2 per cent; Evansville, 50 per cent. Losses—Fort Wayne, 1.7 per cent; Terre Haute, 5.8 per cent; Indianapolis, 17.28 per cent; Elkhart, 20 per cent; South Bend, 37.5 per cent; Kokomo, 68 per cent; Muncie, 83.4 per cent.

The October figures from the building inspectors are:

	1924		1925	
	Per.	Est. Val.	Per.	Est. Val.
Elkhart	15	$ 56,200	24	$ 70,850
Evansville	329	428,360	214	284,360
Fort Wayne	---	732,468	----	745,600
Gary	210	707,946	161	372,825
Hammond	145	514,824	122	338,200
Indianapolis	1831	2,078,707	1751	2,513,026
Kokomo	67	71,005	98	227,760
Muncie	108	94,498	163	569,583
Richmond	64	104,067	68	45,871
South Bend	---	382,620	----	613,042
Terre Haute	342	300,839	232	319,630
Total	3111	$5,471,534	2833	$6,100,747

I. S. A. REGIONAL MEETING AT FT. WAYNE, DECEMBER 6

Architects of State Return to Point From Which First Regional Meeting Was Successfully Launched

Pursuing the regional meeting policy the Indiana Society of Architects will once again turn to Fort Wayne and there the members will gather Saturday, December 6th, for such a meeting. It was really at Fort Wayne some two years ago that the regional meeting scheme was first successfully launched From that gathering sprung the inspiration that has since made possible consequent similar meetings from time to time in practically all the larger Indiana cities and some of the lesser ones too. These meetings have carried the Society to all sections of the state and brought the members into intimate contact with the functioning of the organization. They have attracted architects who never before had attended the I. S. A. affairs, and out of them has grown the joint conferences with contractors, engineers and labor which have proved interesting and constructive.

Thus the approaching Fort Wayne meeting should be a signal one, an occasion for jollification over things accomplished with an incentive for even greater future activity. Fort Wayne is justified in pointing with pride to the first meeting and who can tell to what great ends that original effort will reach?

All members of the Society are urgently and earnestly invited to attend the meeting next Saturday, December 6th.

The following tentative program has been arranged:

12:30 P. M.—Luncheon at Shrine Club.

2:30 P. M.—Meeting of the Board of Directors at Shrine Club.

3:30 P. M.—Motor trip and inspection of recently constructed Ft. Wayne buildings.

6:30 P. M.—Dinner Meeting at Shrine Club. Informal talk by O. H. Murray of the firm of Bertram G. Goodhue's Associates. Subject: "Goodhue, the Architect and the Man."

Short talks and discussions on timely subjects, by members present.

Headquarters, registration: Hotel Keenan.

ATTENTION DIRECTED TO HEAVY TIMBER MILL CONSTRUCTION

Lumber Association Points Out the Advantages of Same

"Fire-Safe Industrial Buildings," a bulletin for the industrial executive who must decide the character of building to be erected to accommodate his business, has just been issued by the National Lumber Manufacturers Association. This survey directs attention to modern heavy timber mill construction and will be followed by another bulletin illustrating standard practice in the detailing of heavy timber mill construction.

"Fire-Safe Industrial Buildings" emphasizes the fact that reasonable economy, structural efficiency and fire safety are of paramount importance when a new industrial building is necessary or when an old one is remodelled or enlarged.

Modern heavy timber mill construction completely meets the demands of the executive who thinks of safety, flexibility and low fixed overhead charges. No other type of construction so promptly eliminates vexatious construction delay. No floors will have greater resiliency in reducing impacts and vibrations from rapid machinery motions. With no other material can the demands of business expansion be so readily met. Machine locations can be shifted at will and convenient surfaces be found for adjustments of machinery, shafts and pulleys. Whenever necessary new construction may proceed or repairs be made without interruption to business. And with all these advantages the lowest possible fixed overhead charge is incurred from insurance, taxes, depreciation and interest on capital invested.

The bulletin will be sent to a selected number of industrial executives throughout the country and to prominent architects and engineers.

AS TO PRICES

Stabilization Effected With no Great Declines as Some Looked For

One of the outstanding features of post-war economic history has been the comparative stability of prices of building materials.

There have been fluctuations, of course, but as a rule building costs have not varied so greatly as other prices. Those who have been waiting for bargain prices in building have continued to wait. There is no reason to expect any violent changes in the future.

* * *

Part of this stability is the result of the peculiar nature of the building material industry. Because of the structure of that business it has always more or less followed the policy that other business has adopted in such large measure in recent years. It has always practiced its variety of "hand to mouth" buying and production.

Build with the Builders

"The builders . . . . . are insuring their liability in their own company, a trade mutual---a company that has enviably succeeded in every factor involved in carrying out principles of compensation insurance. This company is the

Builders & Manufacturers Mutual Casualty Company
of CHICAGO

It is a company operating solely in the building industry, insuring only the compensation and public liability of its members, and furnishes such insurance at a remarkably low cost."

ORGANIZATION AND CURRENT NEWS

SOMETHING TO TAKE INTO ACCOUNT

A Little Such Practice Would Not Only Weld But Would Build Up the State Association of Contractors

How many of the State A. B. C. general contractors when estimating a big job that calls for sub-bids, stop to consider that they can get all the competitive bids needed in practically every line, without asking a single concern or individual outside the association to submit figures?

It probably has never occurred to many of them that such a thing is possible, but it literally is and what a splendid thing it would be for the organization if it was generally taken into account.

It could not, in any sense, be considered a boycott of those outside the Association. It would simply be carrying out the spirit of co-operation. Something we should all be wiling and proud to do.

If any have friends outside with whom they wish to do busines, how simple a matter it would be to casually intimate that the pleasure of dealing with them would be greatly enhanced if they were to join the state organization.

We do not advocate coercion, for coercion is unnecessary. All that is needed is an invitation to join, extended from one to the other at the psychological moment and reasonable loyalty and interest in our organization should supply the impulse for such an invitation. Try it and see how easy it is and the wonders it will accomplish for the upbuilding of the Associated Building Contractors of Indiana.

ESTIMATING AND "HUNCHING"

Distinction Made Between Real Bidding and Refined Guessing

A man stood on the corner waiting for a street car. A newsboy with a voice all out of proportion to his size was telling the world he wished to sell a "Star and Times." He was possessed of but one copy of each paper.

Having sold these he raced across the street to get another copy of each paper from another newsie and began his yelling once more.

This transaction was not altogether clear to the spectator, so he asked the boy "Is the boy across the street there a wholesaler?"

"Nope," replied the newsie, "he charges me just what I sell 'em for."

"Then you are making nothing. Why do you do it?"

"Oh, I just love to holler," replied the boy, resuming his yelling.

It sometimes seems that a number of businesses in this world are conducted along the lines of which this is the logical illustration.

Not the least among these is that of building contracting. How many contractors take the time to plot out the real goal for which they are or should be striving? How many contractors make a real estimate of the cost of a proposed building and not a sort of refined guess? How many contractors know how to figure a real profit, and having figured it, how many know when they get it? How many contractors know how to make up a proper estimate, but do not do it because they are dismayed by competition? No doubt there are many contractors who do make up a real estimate, but that should mean everyone engaged in the business. If a job is worth figuring, it is worth figuring right.

Much has been said and written concerning the question of having quantities listed by an expert taker-off (usually off some say) for so much a take-off, from which list the bidders might secure figures whereby to get check on the estimates they had made up themselves. There is no doubt much merit in such a proposition, due to the fact that one certain building will require only a certain definite quantity of material, no more and no less. Regardless of the fact that Contractor A might figure more and Contractor B figure less, there will be a certain amount of material required to make up the finished structure regardless of what amount might have been estimated. Estimates may vary and fluctuate, but buildings do not, once the design is settled upon.

Should not the difference in bids of various contractors be in reality based upon their varying efficiency in placing this definite amount of material? Should Contractor B be awarded the job merely because he guessed the building would contain twenty per cent less brick than Contractor A?

This brings us again to the time-worn joke in the contracting fraternity about the successful bidder, or perhaps we should say the low bidder, worrying about what he has left out of his estimate.

This fact was brought home to the writer recently by a remark made by a prominent and successful building contractor in a given territory that eighty-five per cent of the work awarded his company during the past few years was on account of a low figure which had been arrived at through error, not always a substantial error, but an error nevertheless.

However, there is in operation occasionally a system which promises to render the quantity survey idea obsolete in short order. This system is known as the "hunch" system and operates as follows: The contractor proceeds to make up his bid in the regular fashion, puts it in the envelope, seals it and addresses it. He then takes the bid in one hand, gets up and strolls around the room, meanwhile scratching his head vigorously with the other, while waiting for the "hunch." As soon as he has tuned in with the "hunch,' he opens the envelope, adds to or reduces the bid already made in accordance with the hunch just received and stands pat on the revision.

This system is distantly related to the "poundage" system, which, however, requires additional equipment in the way of a postal scales on which the plans and specifications are weighed. Close adherence to either of these last systems has been known to produce fearful and wonderful results.

But in all seriousness, if you estimate, estimate, don't guess.—Iowa Builder.

Calumet District

PRACTICAL HINTS ON SEASONAL SIDE OF BUILDING INDUSTRY

Interesting Points Brought Out in Government Pamphlet

One of the most pertinent and interesting documents on seasonable operations in the Construction Idustry has recently been issued in pamphlet form by the United States Department of Commerce and is obtainable from the Superintendent of Documents, Government Printing Office, Washington, D. C., upon the remittance of five cents. It is well worth the price to any building contractor and the time required to peruse it.

The contents contain many valuable points on seasonable construction. Organizations and individuals interested in overcoming the prevalent waste in the industry are urged to communicate with the Chief of the Division of Building and Housing, Department of Commerce at Washington.

The document just issued says in part:

"Custom, not climate, is mainly responsible for seasonal idleness in the construction industries. Contrary to popular belief, bad weather is not the principal cause of variations in employment from month to month. Recent surveys show that seasonal id'eness is not confined to regions where climate is severe. Cities in the south and on the Pacific coast are affected much like those on the Canadian border.

"It is the general rule that the building trades are occupied wholly for only about five months of the year, and practically all the cities where conditions were studied show a large percentage of idleness in these trades not only from December to March, but in other months as well.

"Many of the seasonal ups and downs are undoubtedly preventable. During the past winter of 1923-24 there has been a greater activity than ever before in what normally was the dull season, and this activity has had a salutary effect on the building material producers, the transportation companies and their employes. The construction industry is grappling with the problem; they now need and should have the support of the public.

"The burden of idleness falls most heavily not on the producers and distributors, but on the employes and the public. Construction costs are high in part because of the seasonal hazard which effects each step of the construction process from the fe'ling of the timber, quarrying rock, manufacturing brick, cement, tile and a hundred other commodities, transporting these materials by rail, water and highway, distributing them thru retail supply dealers, clearing the site and excavating, to the completion and furnishing of the finished building. Idle time represents waste and direct loss to the construction industries, the workers and the general public."

WHEN THE WORD SPREAD

Down Came the Auto Men Like an Avalanche

B. T. E. A. headquarters has been a busy place the past few days, at least the comings and goings there and the accumulated crowds would so indicate. Things go so brisk and there was so much activity on the second floor of the Citizens National Bank Building that folks began to wonder what the contractors were up to. However, it wasn't the contractors at all, nor the association. Instead, it was the resultant running down of an auto purchaser prospect.

It was this way. The auto salesmen got wind of the fact that new confidence had seized upon the B. T. E. A. secretary, as an outgrowth of the national election result and that the new car bee was buzzing in his bonnet. Followed action fast and furious. Every automotive salesman in the city appointed himself a gentleman in waiting and sought to court the attention of the secretary. Never was he without a committee on reception and what he hasn't heard on motor car ability, the various makes, and achievement, just isn't, that's all. He really didn't know there were so many best cars on the market. He has been instructed carefully and intimately on every property of every car from a Packard to a Flivver. At the present writing the latter is rattling along in first place though the race isn't concluded. One of these days there will be a decision and headquarters will settle back into its routine humdrum and the contractors will be able to get back to their favorite chairs.

HERE AGAIN

Cold North Winds and Snow Indicate Winter Is Near

As a reminder of what may be expected any time from now on for the next three or four months a snow squall came down over the Calumet District to surprise the building contractors. It awakened them to the fact that winter is at the threshold and that they had better hurry if they wish to get their outside work cleaned up before the weather gets too bad.

NICE TIME TO TAKE THE JOY OUT OF LIFE

Hunters Come Back and With Their Tales Create a Cloud of Envy

Isn't it "the berries" when work pins you down to the desk, and continues to pile up until you wonder how you are ever going to be able to dig your way out, and then, along about Thanksgiving time when you begin to see daylight, are thankful for a job and at peace with the world, in pops some fellow from a wonderful hunting trip to tell you all about the great time he has had while you were working? About that time one begins to wonder what there was or is for which to be thankful.

That is the secretary's position. Some of our Calumet nimrods are returning from the north woods with deer and great tales of their adventures and have made B. T. E. A. headquarters ring with the echoes of their experiences. It all sounds quite thrilling and makes the secretary wonder where the thrill fit in last summer when he thought he was having the time of his life when doing his spells of Indiana fishing.

CALUMET BUILDING PROGRESS

Charles N. Scott was awarded the contract, at $32,000, for the erection of the W. D. Paxton store and office building, 62x90, on East State St.

The Nilsson Development Co. has the plans ready for a three-story brick and stone trim 34-apartment building, 60x90 with court, at Whiting. J. H. Stack is the owner.

Berry, Wainwright & Co., architects, awarded the contract for the brick pump house in Calumet Memorial Park, Calumet City, to M. V. Grim for $5,000.

The Union Metals Co., who purchased the Keith Railway Equipment Co. plant, will start operations January 1st. Metal ends for freight cars and other equipment will be manufactured. The plant has been idle nearly a year.

The concrete basement walls for the new bank and office building, Hammond, are in and the forms for the first floor are ready for the pouring of concrete.

The forms for the concrete for basement walls of the Northern Indiana Gas & Electric building have been completed and the pouring of concrete has begun

FT. WAYNE

BIG RIVER IMPROVEMENT EXPECTED TO INCREASE PROPERTY VALUES

Former Unsightly Banks To Blossom Forth Into Parks and Boulevards

It seems very probable that the completion of the Maumee river dam will have a greater influence upon property values in Fort Wayne than a casual thought would indicate.

Immediately upon the lowering of the great rollers which will close up the gaps between the piers, the water will begin to rise in the Maumee, and quickly the waters of both the St. Marys and St. Joseph will attain to a new and permanent depth. At once, the rivers will become the center of a new attention. which may be considered mere curiosity at first, but which will develop into plans not only for making the fullest use of the water for sports and bathing, but for the improvement of the stream banks.

Five years from the present time the regions bordering the river will present an entirely different appearance than they have been allowed to maintain during recent years. Driveways will be created, parks and playgrounds will be established. In many places dumping grounds will give way to pleasure spots.

All this will have its influence upon property values throughout the city, because it will reveal Fort Wayne as an entirely new type of city to many who have regarded its rivers as little more than open sewers. Great things should come as a result of this outstanding improvement.

JUST ONE INSTANCE OF THE HOME CONSTRUCTION DEVELOPMENT IN FORT WAYNE SUBURBAN TERRITORY

New Residences Represent Quite An Investment

An evidence that the north side is doing its share in providing homes for the people, is the revelation that since April 1 a total of 37 homes has been erected in Brookview or contracts for their construction have been let. The total value of these homes is estimated at $203,500.

INDIANAPOLIS

MASON CONTRACTORS LOOKING FORWARD WITH INTEREST TO THE BIG INTERNATIONAL CONVENTION AT SPRINGFIELD, ILL.

Entire Membership of Indianapolis Association to Attend

There is a great goings on amongst the Indianapolis mason contractors, you never saw such activity, it's a wonder the traffic cops haven't slated the whole crowd of masons. One would think the building season was at its height rather than on the wane. Curiosity got the best of us this week and upon investigation we learned the cause of the high powered activity.

December 9, 10 and 11, like Christmas, are not very distantly removed from the present date and during the first mentioned period the Mason Contractors' Association of the United States and Canada will hold its Fifteenth Annual Convention at Springfield, Ill., and it is toward that event that the Indianapolis mason contractors are pointed.

Preparations have been made for the entire membership of the local mason association to attend the convention. Also a notice has been sent out to all the members of the Indiana Mason Contractors' Association, inviting them to join the Indianapolis delegation and proceed to Springfield, thus affording Indiana a large representation at the annual gathering. This is most desirous as Indiana has the only state mason contractors' organization in the country.

The M. C. A. of the U. S. and Canada has some big constructive ideas to put across which, consumated, will mean much not only to the contractors but to the building industry as well. With such a program for activity the approaching convention holds more than just ordinary interest.

With the lumber supply steadily on the decline and no definite reforestation policy established the question arises as to what will take lumber's place in the constant building construction scheme. Brick and clay products have been turned to in the emergency, and the mason contractors appreciating the opportunity that looms ahead of them have been quick to realize that if the most is to be made of this opportunity they must do all in their power to encourage apprentices that a sufficient supply of skilled mechanics may be assured to take care of the increased demand for brick work. Unless the masons are successful in this endeavor they appreciate the fact that brick as a building material must pass from the picture and other material which can be more readily handled will be substituted. The apprentice question is the mason's big problem and to that especial attention will be given at Springfield.

President R. M. Gillespie, St. Louis, in referring to this matter with regard to the need for help from every mason contractor in the country said: "The B. M. & P. I. U., had 11,151 registered aprentices on August 31st, 1924. A constant supply of 20,000 apprentices for the next five years would be none too many to care for the increasing demand for masonry construction. The craft has made fine progress in training apprentices during the past year. However, the start has only just begun. If mason contractors are to cash on their opportunities they must keep everlastingly at it."

Indianapolis masons are deeply interested in the international association efforts and have done their best to further its aims and purposes. Thus it is that quite a delegation from this city are preparing for the journey to Springfield. Those who are going are: M. M. Boniwitz, Harry Fenton, F. Gray, C. Hattendorf, James Hodgson, Sr., James Hodgson, Jr., Will Hodgson, Leon Joyce, J. C. Keely, T. J. O'Hara, C. C. Pierson, E. H. Pierson, Arthur Reed, Wm. Rubush, James Rybolt, O. Wise, Walter W. Wise and their wives.

dianapolis. Owner receiving bids to close December 12th at 10:00 A. M. Brick.

Country Residence: $8,500.00, 1 mile east of Plainfield, Ind. Archt., Clarence E. Hughes, 914 E. 44th. Owner, Harry Thomas, 3108 College Ave., Indpls. Archt. and owner receiving bids. Brick veneer or frame, furnace heat, comp. roof.

GET ACQUAINTED WITH YOUR COMPETITOR—YOU MIGHT LIKE HIM

That Head Caught Our Fancy

While browsing around for copy the past week wondering what in the world would bob up to save the Architects' Page for us we happened upon the above from the American Artizan and Hardware Record and settled down to read what was to be said on the subject.

This is what we found, and since there was some fine logic in it that was not foreign to the arguments we have heard put forth by I. S. A. members from time to time we have pounced upon it for reproduction. It starts out with reference to a hardware merchant, but he could just as well have been an architect, the same situation confronts the latter.

"Tom Witten, the Missouri hardware merchant, some years ago coined the expression, 'Get acquainted with your neighbor—you might like him.'

"We have paraphrased it to read, 'Get acquainted with your competitor—you might like him.'

"One of the reasons why so many business men's organizations die a-borning is that the average prospective member is disinclined to meet and learn to know his competitor. He is afraid that the competitor may derive some advantage from the meeting that will overbalance the benefits he, himself, might reap from such a getting-together.

"The writer has attended many a session of organizations where prospectives for membership were discussed, and remarks like these have been passed, 'No, we don't want that fellow in, he is a price cutter.' 'Keep away from him, he is a bad egg.' 'Don't take him in, he doesn't amount to anything, anyway.' 'I wouldn't care to have him become a member, he is always looking for a chance to get the best of you,' etc.

"As a matter of fact, what purpose should an organization of business men serve if it should not endeavor to bring about better conditions in the field in which these men are engaged? And how can conditions be materially improved unless those about whom these objections—and many others—are made, are brought into the organization?

"Did you ever hear of any great success being made by an evangelist who failed to interest people enough to induce them to attend his meetings?

"Or did you ever hear of any fellow making a success of a courtship without calling upon and getting acquainted with the lady of his choice?

"Did you, as a matter of fact, ever really learn to know a man without first getting acquainted with him?

"You may think that any one or all of these things are possible—

"But you are dead wrong if you do!

"And remember this—

"You cannot cure a price cutter of his habit until you prove to him that he is losing money by his tactics—and you cannot do that without getting acquainted with him and then inducing him to attend your meetings, with the same rights and duties as you are subject to.

"And you cannot watch a man as well as when you are right next to him, such as in a meeting or as members of the same organization.

"And you cannot afford to keep 'the little fellow' out, because he may, by his ignorance of costs and other important points, rob you of legitimate profits. He has a very definite influence upon your business.

"If a man starts in business in the same line as yours, make a courtesy call on him. Show him that you are broad enough to recognize his right to do so, even if you may possibly question his judgment. Extend an offer of help in the matter of tools or material. Be friendly. If he indicates a tendency to cut your prices, show him in a courteous and friendy way where his figures are wrong if you feel they are. In most instances he will respond to your attitude in the same way, and both of you will find that there is plenty of business, because he is almost certain to unearth some where you never thought of looking.

"Get acquainted with your competitor—you may like him!

"At least, there is fairly even chance that you will and that your relations will be pleasant."

Now, don't the whole thing ring true?

Many is the time we have heard members of the I. S. A. testify to the truth of this thing. It was the big problem the society, in its early days, had to face and solve, to bring the architects closer together, to acquaint them personally with each other, and then let them judge for themselves, individually, the worth of each other. That is really the big thing the society has done. If you doubt it just consider how impossible it would have been, not so many years back, to have held such meetings as those that are now the custom with the I. S. A., where the members of the architectural profession from all over the state gather in friendly conference. The big thing was in getting acquainted and that is what the Indiana architect has done, the one with the other.

ARCHITECTS ASSOCIATION OF INDIANAPOLIS TO HOLD ANNUAL ELECTION

Event Scheduled for Hoosier Athletic Club Next Wednesday Evening

The December meeting of the Architects Association of Indianapolis will be held at the Hoosier Athletic Club, next Wednesday night, December 10th. Particular interest attaches to that event as at that time the annual election of officers will take place. With that in view all members are urged to plan to be present.

The meeting will be inaugurated with the usual 6:30 p. m. dinner, after which the business session will be held. These annual election meetings have always proved to be jolly affairs, so, if you wish to have a good time it will pay you to attend.

Then, too, there will be the annual reports of the officers and various committees, besides general discussions on current building matters.

Don't overlook the date! Come early!

Build with the Builders

"The builders . . . . . are insuring their liability in their own company, a trade mutual---a company that has enviably succeeded in every factor involved in carrying out principles of compensation insurance. This company is the

Builders & Manufacturers Mutual Casualty Company
of CHICAGO

It is a company operating solely in the building industry, insuring only the compensation and public liability of its members, and furnishes such insurance at a remarkably low cost."

ORGANIZATION AND CURRENT NEWS

Calumet District

CENTRAL COUNCIL OF GENERAL CONTRACTORS ELECTS OFFICERS

Rather Unusual Body Has Had a Successful Year in the Calumet District

There is in the Calumet District an auxiliary association of the various city contractors' associations that is unusual and the only one of its kind in Indiana, or any other of the neighboring states. Reference is made to the Central Council of General Contractors, the personnel of which is made up of the general contractors from Hammond, Gary, Indiana Harbor, Whiting, and East Chicago—The Calumet District. This body launched a year ago considers building conditions, seeks to smooth out difficulties and has for its purpose the stabilizing of building matters so that favorable conditions may be assured to the building industry.

At a recent meeting it was decided to establish central headquarters at the B. T. E. A. rooms, Hammond, rather than to hold meetings first in one city then another.

The annual election, held last week, resulted as follows:

President—John Anderson, Gary.

Vice-President—J. Wesley Reed, Hammond.

Secretary-Treasurer—H. B. Olney, Indiana Harbor.

Assistant Secretary—E. E. Cole, Hammond.

THE CONTRACTOR

Few Realize The Almost Innumerable Qualifications He Must Possess

The term contractor is a very common one, is mentioned frequently by many, many people, but how often do those people ever stop to actually consider what the term, as applied to a thoroughly qualified builder, implied?

John W. Cowper, Buffalo, N. Y., in a timely article in the bulletin of the Associated General Contractors of America sets forth some of the most needed qualifications of a real constructor or general contractor.

He said, in part:

"There is no class of work that takes in the varying qualities, or so many qualities, as contracting. It appeals to men who are optimistic and to those who have in them the longing for doing things.

"The constructor must be a man with that most uncommon thing common sense, and he must have physical sense, the sense that tells a man without calculating where lies the center of gravity, the sense that tells a man values without estimating, the sense that tells a man quantities without measuring. He must have magnetism in order to gather his men about him; he must have a reputation for justice in order to hold them; he must be forceful in order to inspire energy in others; he must be a lawyer and a buyer; he must have the engenuity of an inventor and the grasp of a field marshall, he must be a diplomat; he must be a politician; he must also know when not to be a politician; he must be a financier, and, I regret to say, in these days an advertiser; he must be a prophet."

Outside of that there isn't much left, so, you see a contractor who is a contractor in the strictest sense of the word, one with whom success can ride, one who can build so the owner may get value for every dollar expended, is after all a man of attainment. His is a great responsibility and to shoulder it he must be qualified. He builds for the ages and thru his efforts the story of our life, our modes and customs, will be told to those who are to follow in the years to come. His is a big part though he modestly plays his role and few stop to consider or applaud him as he goes his way.

CALUMET BUILDING PROGRESS

The General Motors Corporation has closed the deal for a large tract of land just across the Calumet River north of the new Ford plant. It is reported that they will erect a large plant for the manufacture of Chevrolet motor cars.

The Calumet Heating & Plumbing Co., Whiting, was awarded the contract for the heating and plumbing on the Northern Indiana Gas & Electric building.

M. A. Dickover has the new addition to the Technical High School building ready for the second story joists.

The contractors on the hospital have the brick work about completed on the fourth and last story, also the concrete roof has been poured.

It is reported that one foxy real estate man sold three 25 foot lots for $8,000 out in the bushes near the Jones-McLaughlin site. That surely was getting the drop on things.

E. E. COLE.

EVANSVILLE

BETTER THAN LAST YEAR

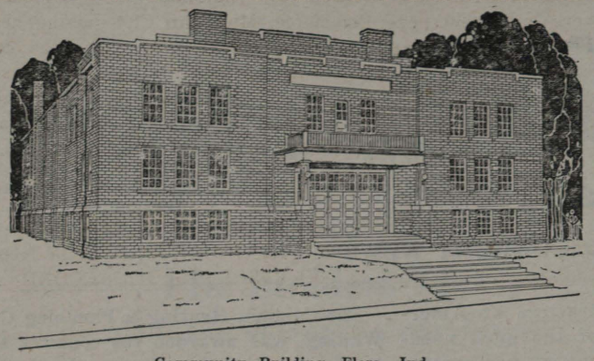
Building at Evansville Shows Improvement Over November, 1923, But Not So Good As That Put Across in October

Evansville has experienced worse monthly building periods this year than occurred in November, in fact, considering that it was the late fall season the figures were not bad. However, there was a 26.33 per cent slump from the October volume of business, while the issuance of permits for the same periods showed October again to be out in front by the wide margin of 155.

The cheering part of the November building performance develops when comparison is made with that of the corresponding period last year—revealing the past November figures to be 39.9 per cent in excess of the total estimation valuation of new work licensed in November, 1923.

The building figures sent in by Building Commissioner Edward Kerth are:

Period	Per.	Est. Val.
Nov., 1924	174	$316,559
Nov., 1923	---	226,116
Oct., 1924	329	428,360



Community Building, Flora, Ind.
(Drawn from actual photograph)

This structure, 80x140 feet, was built throughout of HOOSIER GIANT BRIX, including foundation and interior finish. Auditorium seats 2,000.

HOOSIER GIANT BRIX

GIVE BETTER BUILDINGS AT LOWER COST

The chief object in any building project today is to secure better buildings at lower cost. The public demands economy without the sacrifice of quality. Architects and contractors are meeting this demand with HOOSIER GIANT BRIX, the ideal material for high grade, economical construction.

Homes of HOOSIER GIANT BRIX

In residence construction, whether for outside veneer or solid walls, HOOSIER GIANT BRIX offer all the advantages of brick construction and yet save 25% over the cost of brick. HOOSIER GIANT BRIX can be laid up in a small fraction of the time required for other construction, thus making big savings in labor cost. In beauty they match fine quality tapestry brick. They equal brick in strength and load-bearing capacity. HOOSIER GIANT BRIX are five-walled, vitrified, mat-face fire-clay units, and are adaptable for any construction where brick can be used.

For INDUSTRIAL BUILDING

HOOSIER GIANT BRIX and HOOSIER Building Tile are adaptable for every type of industrial buildings, such as schools, gymnasiums, churches, factories, garages, stores and other fireproof structures. This material insures big savings on construction cost and makes a building unsurpassed for beauty and serviceability.

Architects and contractors are invited to send for samples and illustrated literature describing HOOSIER GIANT BRIX and Building Tile. Let us submit estimates on your specifications.

FT. WAYNE

MORE EVIDENCE THAT WINTER SEASON IS AT HAND

Building Permit Report Reflects That Fact

The gradual slowing up in building operations in Ft. Wayne which has been shown by the returns at the city building inspector's office the past few months was further in evidence when the November activity was completely recorded. This, however, was looked for by the local building fraternity and has caused not undue uneasiness, in fact, when the total estimated valuation of the new work for which permits were issued climbed to $690,330 considerable satisfaction was expressed as these figures will serve to hold up the city's yearly volume.

Tho the November valuation was $108,438 or 13.57% behind that posted in October, it was $99,614 or 16.86% ahead of the same item listed for November a year ago. As for the permits themselves, there were 191 taken out last month as against 288 granted in October this year and 193 issued in November, 1923.

NOT FAR BEHIND LAST YEAR'S GREAT RECORD

Ft. Wayne Piles Up a Fine Building Volume During First Eleven Months of 1924

Coming right back after the great record building year of 1923 Ft. Wayne kept right on and though operations were not quite as extensive as during the previous year, nevertheless, the city's volume of building business for the first eleven months of 1924 is only slightly in arrears of that for the corresponding period in 1923, just 10.98% to be exact. This is really a fine showing and perhaps better than the other Indiana cities, in fact, it will stack up well with most of the cities of the country, most of which have suffered decided building slumps this year.

During the first six months of 1924 there were 1,567 permits issued as against 1,465 granted during the corresponding period a year ago. The last five months' record, however, is not so good as only 1,322 permits were granted while over the corresponding period in 1923 there were 1,465 permits issued. Taken as a whole though, during the first eleven months this year there were 2,889 permits issued, while over the same time in 1923 there were but 2,660 permits taken out. This gives 1924 an edge of 229 permits.

The valuations recorded monthly during the two years is:

	1924	1923
January	$ 239,450	$ 390,885
February	733,450	425,550
March	1,683,495	1,450,000
April	1,609,612	1,939,275
May	1,850,020	2,166,085
June	720,101	1,017,319
July	769,272	1,141,265
August	1,096,469	698,203
September	795,290	1,774,930
October	798,768	745,600
November	690,330	590,716
Total	$10,986,257	$12,339,828

INDIANAPOLIS

MASON CONTRACTORS OF INDIANAPOLIS READY FOR ANNUAL PILGRIMAGE

Will Seek To Bring International Masons' Convention To Indiana In 1925

Some tall hustling by the members of the Mason Contractors Association of Indianapolis has put their business in shipshape so they can enjoy what might be termed their annual three days' winter season holiday, the occasion being the convention of the Mason Contractors Association of the United States and Canada. This is an event that is looked forward to with eagerness by the masons of the country and those of Indianapolis are no exception to the rule, in fact the Hoosier Capital City crowd is among the most enthusiastic delegations who always attend these conventions.

For several weeks they have been anticipating a big time at Springfield, Ill., where the affair is to be held this year, Dec. 9, 10 and 11. Practically the entire membership of the Indianapolis masons association will make the trip and preparations have been completed for the delegation to leave on a special car next Monday night. It is expected that a number of the mason contractors from out over Indiana, members of the state association, will join the local delegation and leave with it from Indianapolis.

The Hoosier crowd is not going to Springfield empty handed either, for it hopes to land the 1925 international convention for Indiana. The Chamber of Commerce, Michigan City, having heard of the Sprinfield convention, has communicated with the Indianapolis masons who are prepared to present an invitation to the international organization to hold its convention in the northern Indiana city next year.

SLOWING DOWN OF BUILDING AT INDIANAPOLIS SHOWN BY NOVEMBER PERMIT RECORD

Late Fall Inactivity Sets In

Possibly it was the age-old seasonal influence that crept into the Indianapolis building field in November, maybe it was something else, whatever it was the prospective builders evidently drew a tight rein or "pulled in their horns," as the saying goes, for building operations last month failed to measure up to previous standards.

Every type of structural work showed quite a recession from the activity exerted in October, resulting in a big decline in the issuance of permits and in the volume of business as represented by the total estimated valuation. For instance, in October the permits granted were 1,831 and in November there were but 1,179, a decrease of 652. As for valuations, those for October amounted to $2,078,707, while in November the total recorded was $1,619,137, a deficit of $459,570 or 22.15%.

However, turning back to the record of a year ago comparisons cast a brighter light on the situation for there were 52 more permits issued in November, 1924, than in November, 1923, and last month's valuations were but 11.9% in arrears of those for the corresponding period a year ago.

Though there were 99 less permits issued in November for residences than in October, nevertheless, the $607,812 estimated valuations for new homes was the highest posted for any one class of work. Miscellaneous work at $462,651 took second place, while business buildings totaling $341,915 were third. Strange to relate there wasn't a single permit issued last month for an apartment or tenement building.

The official figures issued by the city building inspection department are:

	No.	Est. Val.
Accessory buildings	157	$ 41,021
Business buildings	16	341,915
Industrial buildings	1	6,000
Miscellaneous work	289	462,651
Public buildings	1	1,000
Repairs, alterations	555	158,738
Residences	160	607,812
Tenements and flats	---	------
Total	1,179	$1,619,137

***Theatre (Motion Picture), Seating 600, and (2) Shops:** 1 sty., Roosevelt Ave. and Sheldon St. Archt., George V. Bedell, 17 Aetna Bldg. Start this afternoon and run out in any direction, to the outskirts of town and notice the many new homes going up and you will be surprised by their beauty and the many modern conveniences that are now considered indispensible to the modern home-owner. Places that were newly marked out subdivisions only two years ago are completely built up today. Try and buy one of these places and you will find that they have increased in value from twenty to fifty per cent, and they were built only a couple of years ago.

INDIANA CONSTRUCTION RECORDER

FOR ARCHITECT ENGINEER

Devoted to the Interests of the Indiana Construction and Engineering Industry

FOR SUPPLYMAN CONTRACTOR

VOL. VI INDIANAPOLIS, INDIANA, DECEMBER 13, 1924 No. 37

THE CRAFTSMAN

Boston Engineer Discusses Him, and Need For More Extensive Apprenticeship System

The owner of a job is essential, the architect is an important factor, as is the engineer, also the contractor, and yet there is another essential, the workmen without whom building would be at a standstill. Commenting upon the latter, Charles T. Main, Boston, engineer, has this to say.

"Much of the success of a job depends upon the skill, industry, and the pride in their work that the men on the project exert. It is probably true that in the past a greater proportion of the craftsmen in the building industry had more pride in their efforts than they cherish today. If such a condition does exist it is most unfortunate for a lack of such pride detracts from the quality and the amount of work accomplished, further, it takes from the men that happiness that accrues from a task well done.

The lack of pride in their work by many of the craftsmen today is probably due to the fact that many of them have not been given proper and intensive training whereby they could acquire skill and learn the pleasure that comes with being able to do a thing well.

Speaking in broad terms, the building industry has been for yeare without a really worth while operative apprentice system. As a result many of the present day building craftsmen have come into the field without the opportunity to acquire a thorough training and skill that would tend to make the work at hand a pleasure rather than something to be rushed through regardless or particular details avoided whenever possible, an attitude that seems to be entertained by some of the workmen.

A good system of apprentice training, in actual operation and producing skilled workmen throughout the country, is one of the big necessities needed today. The details of method, or uniformity of methods in various parts of the country are not so important as it is that the training shall be thorough, shall produce skilled workmen who will entertain pride in the quality and quantity of work which he does and his ability to do it.

A part of the responsibility for the lack of a properly operating apprentice system must be placed on organized labor, but a greater responsibility must be placed on the contractors. The architects, engineers and owners must also assume their share of responsibility for contributing to this great deficiency. There has been too much disregard of this important problem. It is time for all the working agencies in the building industry to awake, to get together and meet this crying need.

The important things which labor can contribute to the benefit of the industry are the abolition of the restrictive apprentice regulations, the restrictions that prohibit a workman from doing something outside of the arbitrary limits now fixed, the unwritten understandings that limit the output of the individual, assistance in the establishment of a real apprentice system, and the encouragement of that, which because of its frequent repetition has become commonplace, "an honest day's work for a good day's pay."

BUILDING IN INDIANA CITIES DURING NOVEMBER MADE A SUBSTANTIAL SHOWING

Slight Decline From October Developed But Good Gain Was Registered Over November a Year Ago

Twelve Indiana cities reporting in on the building activity for the month of November indicate that it was a good one for the building business. There were 2,397 permits issued for a total estimated valuation of $4,962,417. For the same period a year ago there were 2180 permits granted representing an investment of $3,924,187. This is a gain of 26.46 per cent for November, 1924 over November, 1923.

The volume for the past month while, of fair proportions showed a slight decline, however, from that of October, 9.3 per cent to be exact, when a $5,471,534 total was registered.

Comparisons of the figures of the various cities indicate that eight cities showed varying degrees of gain over the building business posted for the corresponding period in 1923, Kokomo leading with 163 per cent to be followed in this order: Gary, 129.6 per cent; Richmond, 64 per cent; South Bend, 60.4 per cent; Terre Haute, 56.5 per cent; Evansville, 39.9 per cent; Hammond, 38.8 per cent; Fort Wayne, 16.8 per cent. The cities registering losses were: Muncie, 10.9 per cent; Indianapolis, 11.9 per cent; Elkhart, 69.9 per cent. No figures from East Chicago for November, last year, were submitted.

The November building records from the various cities are:

	1924		1923	
Cities	Per.	Est. Val.	Per.	Est. Val.
East Chicago	---	$ 194,903	---	---
Elkhart	7	15,800	14	$ 52,600
Evansville	174	316,559	---	226,116
Fort Wayne	191	690,330	193	590,716

INDIANA SOCIETY OF ARCHITECTS MEMBERS ASSEMBLE IN FORT WAYNE FOR REGIONAL MEETING

Local Architects Prove to be Fine Hosts

Fort Wayne, after a lapse of two years during which time regional meetings have been held in all the various large cities of the state, once again entertained the regional gathering of the Indiana Society of Architects, Saturday, December 6. The local architects did all in their power to make the affair a success and succeeded. The meeting was held at the handsome new Shrine club, noon luncheon, the business session and evening dinner all occurring there and proving delightful affairs.

President Walter Scholer, Lafayette, presided and called the meeting to order at 2 p. m., at the conclusion of the luncheon. There was quite a good deal of busines to be attended to and at the conclusion of the reading of the minutes the architects pitched in.

The proposition made by the Associated Building Contracts, suggesting that the Society hold its semi-annual meeting, January 27 and 28 at Indianapolis at the same time the contractors hold their annual convention and join the latter at a joint dinner-entertainment on the evening of January 27, was considered, but owing to the fact that it will be impossible to secure space at the John Herron Art Institute for the Annual Architectural Exhibit which is always held in connection with the semi-annual meeting the architects were forced to forego the suggestion. Instead, the Indiana Society of Architects will meet in semi-annual session February 6 and 7, in Indianapolis.

It was moved and seconded and carried that the Exhibits and Pageants Committee start immediately preparations for the annual exhibit. Further, the architects voted that $50 be placed at the disposal of the committee to be awarded as a prize to the architectural firm whose exhibit is adjudged the most meritorious from an architectural standpoint.

In response to a communication from Z. M. Ssith, state director of Vocational Education, President Scholer was instructed to appoint a cormittee of three to co-operate with Mr. Smith in the preparation of a pamphlet on school house matters for the use of public school authorities.

The architects empowered the secretary to buy copies of the pamphlet, issued by the U. S. Department of Commerce, on the "Elimination of Waste—Simplified Standards," dealing with lumber. A copy of this pamphlet is to be mailed to each member of the Society.

A communication from the Advisory Committee of the Administrative Building Council of Indiana proportioned the expense of $246.00 incurred amongst the four building interests represented on the committee and set forth the Society's share at $61.50. Considerable discussion followed, nobody present knowing of such an agreement. Finally it was decided to instruct the secretary to pay this if it was found to be a bona fide obligation of the Society.

Two telegrams were received from members George W. Allen, Laporte, and Rodney W. Leonard, Frankfort, who are ill and expressed regrets at being unable to attend.

After the business meeting the visiting architects were taken on an auto tour of the city to inspect the Fort Wayne's most modern and recently constructed buildings, these included schools, apartments, churches and the new Shrine building.

This latter brought the architects back to the point from whence they started and there the evening dinner was served. At the conclusion of the meal Thomas A. O'Shanghuessy, Chicago, representing the Terra Cotta Mfgrs.' Assn., delivered an instructive and entertaining talk on the use of color in terra cotta.

The place for holding the next regional meeting will be decided later.

INDIANAPOLIS ARCHITECTS' ASSOCIATION ELECTS NEW OFFICERS

Kurt Vonnegut Named President

An enjoyable session marked the annual meeting of the Architects Association of Indianapolis at the Hoosier Athletic Club Wednesday evening, December 10. Though the attendance was not up to expectations those present made the most of the opportunity for a good time.

There was the customary 6:30 P. M. dinner after which the meeting was called to order by President Foltz. In view of the fact that election matters were to be up for consideration no special speaker was on the program, routine matters being gone into, then balloting, to be followed by a general discussion and a social period.

Secretary Batchelder read the minutes of the last meeting and then reviewed the activity of the Association for the past year. He also made a financial report which showed the organization to be on a sound financial basis with a substantial balance in the bank.

Vice-President W. K. Eldridge extended an invitation from the Indianapolis Chapter, American Association of Engineers, to all A. A. I., members to attend a special meeting of the engineers to be held January 6th at which time a speaker from the Portland Cement Association will give an illustrated talk on cement. Another invitation from the Vonnegut Machinery Co., was read by the Secretary inviting the architects to attend an exhibition of shop equipment to be held at the company's show rooms beginning December 15th.

An informal discussion of the lighting of the Soldiers and Sailors Monument, an agitation that is going the rounds of Indianapolis was gone into but no official action was taken. Some of those present favored a removal of the candalabra, others not. The idea of flood lighting of the monument was frowned upon as too theatrical. One architect wanted to know why the monument should be subjected to forced lighting and said he thought the monument was prettiest under the moonlight the mass at the base standing out harmoniously while the shaft tapered away hazily skyward. This same architect suggested that possibly the monument should be lighted to prevent reckless, speeding, autoists from crashing into it, a sally that drew a good laugh.

Then came the election of officers with this result:

President—Kurt Vonnegut.

Vice-President, K. W. Eldridge.

Directors—Aug. C. Bohlen and Robert F. Daggett.

Secretary-Treasurer, Clarence Myers.

Build with the Builders

"The builders . . . . . are insuring their liability in their own company, a trade mutual---a company that has enviably succeeded in every factor involved in carrying out principles of compensation insurance. This company is the

Builders & Manufacturers Mutual Casualty Company

ORGANIZATION AND CURRENT NEWS

CONVINCED CONTRACTORS OUGHT TO BE ON THE ALERT WHEN IT COMES TO LEGISLATIVE ACTION

It Is There That Association Effort Should Be Strongly Exerted

"The greatest service any citizen or group of citizens can perform is the active participation in all national and state legislative matters, with but one purpose in mind, 'serving the general public to secure and preserve for it, those constitutional and fundamental rights and privileges guaranteeing security of life, property and the pursuit of happiness, in the fullness and abundance contemplated by our forefathers,'" is the way J. C. Wuellner, chairman of the Legislative committee of the Associated Building Contractors of Illinois, emphasized the necessity for contractors to interest themselves through organization in legislative affairs concerning their business, in an address delivered before the association at its last district convention.

Regarding the responsibility of those in the industry to the work of organization, Mr. Wuellner had the following to say, "a building contractor who refuses to subscribe to and participate in the association's program slacks his plain duty toward citizenship, his position in the industry, his colleagues, and lastly himself. Like a man without a country, he is to be pitied because he lacks either the mentality to arrive at a conviction or the moral courage to support his conviction."

END NEARING

Labor Official Senses Lower Wages and Lessening of Building Boom

High wages and high prices in the building industry are doomed. At least that is the opinion of John Donlin, retiring president of the Building Trades Department of the American Federation of Labor. He in an address before the recent convention of the A. F. of L., at El Paso, Texas, warned the building crafts that they must prepare for wage readjustments.

The end of the great building boom that has prevailed for the last few years is indicated, according to Mr. Donlin's way of thinking, and he frankly asserted that when the building industry returned to a normal basis the law of supply and demand will bring about lower construction costs, both in material prices and wages.

BACK TO THE ANNUAL POW-WOW

Carpenters and Contractors Start Wage Negotiations

The committee from the General Contractors' Council of the Calumet District and also one from the Carpenters' District Council met at Hammond early this week to begin preliminary negotiations on wage and working agreements for next season. Nothing has been given out as yet as to what the demands of the carpenters for 1925 will be. However, it was recommended at their national convention that a five days week be sought for the coming season.

SECOND BEST BUILDING FIGURES POSTED IN LAST FOUR MONTHS

Hammond Building Holds Up Well In November

Activity in the Hammond building field in November continued good despite the lateness of the season and in the end showed a better record than either that of August or September though not quite up to the figures registered in October.

City Building Inspector Vis reported 107 permits issued as against 92 for the corresponding period in 1923. As for the volume of business it amounted to $454,078, a gain of $127,128 over the business for November, a year ago. Also the November building this year was $86,663 ahead of that of August, and $190,503 in excess of that for September. The decline from October's volume was $60,746.

CALUMET BUILDING PROGRESS

Architects Berry, Wainwright & Co. announce that they will be ready for bids December 15 on a warehouse and garage on Oakley avenue, Hammond, for E. C. Minas. The structure will be 1 sty., 67x100. The same firm will soon receive bids for the construction of a store and flat building in Calumet City for John Jasnowski. It will be 2 stys., 62x84 and will contain three store rooms and four apartments.

General Contractors Rhoads & Graves are putting in the foundation for another pretty bungalow on Vine street.

While in Chicago last week the B. T. E. A. secretary paid visits to the two contractors' associations there and also dropped in to the Builders and Manufacturers Mutual Casualty Co. offices. Nothing really important on hand, just sizing up the Chicago building and labor situations.

The mean, cold rains of recent date caused a general secession of building up in this section of the state.

The Associated Building Contractors of Indiana have set January 27th and 28th, 1925, as the time for their SEVENTH ANNUAL STATE CONTRACTORS CONVENTION, to be held at Indianapolis, Indiana, and are shaping plans to that end. As has been the custom in past years, a combination souvenir convention program and classified directory of the general contractors, sub-contractors and architects of Indiana will be gotten out for the annual three days meeting. The directory feature will be listed alphabetically according to trades and cities, a most handy reference proposition for all those engaged in the building industry.

Three thousand of these programs are to be issued and in addition to being used at the convention, individual copies will be sent to all contractors and architects throughout the State.

The advertising pages will be divided four ways as follows, at these rates:

ONE-EIGHTH PAGE	2½"x2"	$10.00
ONE-QUARTER PAGE	2½"x4"	17.50
ONE-QUARTER PAGE	5" x2"	17.50
FULL PAGE	5" x8"	50.00
ONE-HALF PAGE	5" x4"	30.00

Advertising forms will close January 3, 1925

Indianapolis, January 27 - 28, 1925

October	305,800
November	194,903
Totals	$5,793,386

East Chicago's new construction program for 1924 will top $6,000,000, the greatest building period in the history of the city. These figures were furnished by Building Commissioner Henry Bainbridge.

This year's building has been unusually varied. Besides the large amount of industrial expansions there has been a diversified building of new apartments, homes, business blocks and public structures.

FT. WAYNE

NEW PLUMBING CODE PROPOSED FOR THE CITY

Special Council and Plumbers' Committees at Work On the New Measure

No definite decisions relative to the proposed new plumbing code have been reached by the special council committee and the master and journeymen plumbers who are fostering the new regulations.

It may be necessary to hold several other meetings, both public and executive, before the committee will be able to make its recommendations to the council.

As explained by Eugene Hattersley, of the master plumbers, the principal object of the new ordinance is to raise the standard of plumbing in Fort Wayne and to prevent the installation of plumbing that would create unsanitary conditions.

The new code as at present drafted provides for the appointment of a plumbing inspector with police powers at a salary of $2,400 a year. It will be his duty to inspect all plumbing fixtures installed in new houses or other buildings. He must, himself, be a plumber of long experience.

The principal points now at issue hinge around the clauses that fix qualifications and fees of those who may receive licenses to engage in the plumbing business in the city.

As worded at present the applicant must go before a board of examiners composed of master plumbers, journeymen plumbers and city officials and present sworn statements that he has had the experience he claims.

The master plumbers appeared to favor insertion of a clause to provide that two inspections of plumbing jobs shall be made, one while the job is in process and the other when completed, with charges to be made, according to the amount of work to be inspected, instead of an equal amount for the issuance of each permit under the present system.

Both the old plumbing code and the proposed new one puts the plumbing inspector under the jurisdiction of the board of health. The question as to whether this jurisdiction should not be given to the board of works is being considered seriously. At present Herman Krote is both building and plumbing inspector.

GARY

NEW NOVEMBER BUILDING RECORD SET UP AT GARY

City Experiences Unusually Active Late Fall Building Period

Buildings started in Gary during the month of November doubled those of any November in the city's history and brought the year's construction figures for eleven months to a point nearly double of any previous 12-month period, according to an interesting monthly report just compiled.

With the total cost for the first 11 months of the year reaching nearly eight and one-half million dollars, it is predicted that the total at the close of this month will probably reach the nine million dollar mark.

BIG SNOW STORM CUTS IN ON CONSTRUCTION WORK

Gary Buried Under a Blanket of Snow

Gary's first snowfall of the season which covered the city with a blanket nearly eight inches deep last week practically halted all outside building activity.

Construction gangs for the city who have been working on sewers and street paving were forced to take to cover. The concrete gang on the new highway extending from Gleason Road No. 1 and connecting up with Fourth avenue has been forced to discontinue work.

Building contractors over the city report that most of the building has been tied up. Excavation work on Broadway's new million dollar theater at Eighth avenue and Broadway, has been kept going through special precautionary methods.

INDIANAPOLIS

IN FAR OFF ENGLAND

Indianapolis Contractor Hopes To Eat Christmas Dinner

Memories of a Christmas in England away back across the years, with an appeal too strong to brook resistance, gripped that well-known mason contractor James Hodgson, Sr., Indianapolis, and as a result he is now out on the bounding main with Mrs. Hodgson on his way to "the tight little isle." He sailed today, Saturday, December 13, from New York on the steamship Aquitania for a visit back at Easington, Durham county, England, his boyhood home which he left in 1877.

The little English hamlet is some 250 miles north from London on the North Sea coast just a few miles removed from the Scotland border. It was there "Jimmie" as a boy helped the local mason contractor and learned his trade. And then, as he would sit with others above the village green, gazing out over the sea he wondered what laid beyond that sea till a determination came to him to find out. In those days railways were few and "Jimmie" in the dead of night set out walking to see the world. It was a long, long tramp that finally ended at London where he found employment and worked till near the Christmas season when the longing for home seized upon him and he started the long trek back to Easington. The snow fell till it was several feet but Jim trudged on, though at times so exhausted he had trouble getting to his feet when he would slip or stumble, and as he says, he thought his time had come. Finally just at noon on Christmas Day he reached the old home place. We have heard many Christmas dinners described but never so eloquently as "Jimmie" describes that one with its big meat pie, the trimmings, and the mother who welcomed him back. You should hear about it direct from him.

And so this year, forty-seven years later, after he has seen considerable of the old world that lies beyond the North Sea, "Jimmie" Hodgson has left Indianapolis with the hope of eating dinner Christmas Day with his brother back in Merrie England.

Nor will his friends in Indiana forget to hope that it will be a Merry Christmas for the little mason contractor.

(grocery). General contract let to Geo. Freijs, care architect. Brick.

Slaughter House: $20,000.00, 2 sty., 52x72 at Gardner Lane and White River. Private plans. Owner, the Indiana Provision Co., 662 Kentucky Ave. Owner will build by day labor. Brick. Ordinary construction.

Start this afternoon and run out in any direction, to the outskirts of town and notice the many new homes going up and you will be surprised by their beauty and the many modern conveniences that are now considered indispensible to the modern home-owner. Places that were newly marked out subdivisions only two years ago are completely built up today. Try and buy one of these places and you will find that they have increased in value from twenty to fifty per cent, and they were built only a couple of years ago.

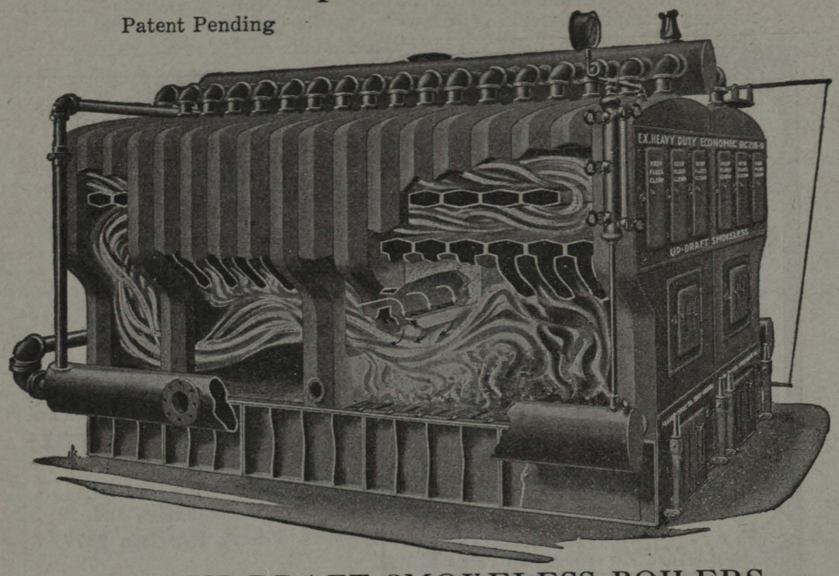
"BC" Series Up-Draft Smokeless Boiler

Patent Pending



Prox Boilers are equipped with a top header, which is a positive steam separator, assures dry steam carrying maximum number of B. T. U.'s Water boiling up will not go into main and cause water knock, no matter how hot a fire may be in any part of boiler. A side connection to this header with natural drain to rear of boiler discharges all water and condensation to side headers. This is only one of the many superior features of Prox Boilers.

PROX UP-DRAFT SMOKELESS BOILERS

Burns all grades of fuel, such as bituminous coal, lignite, coke, oil, gas, wood.

Capacities - 1750 sq. ft. to 22,800 sq. ft. steam

A book to help you build—and sell

WHENEVER you have a prospect for whom you must be both architect and contractor you will use this book. Its 25 plans are the finest ever brought into one book on small houses.

No other one book contains so much valuable information for the small house builder.

You will use it to help you sell better materials and better construction. You know the value of insulation. This book will sell the idea to your customers. See that they read it.

No other book tells how to get insulation at no extra cost for labor and additional material.

It brings to the home builder a realization of the lasting economy of insulating his home with Celotex. A thousand copies were sold to home builders before the book was off the press. The coupon will bring you a copy—free.

Celotex is a strong, rugged, weather-proof durable building lumber made from the long, tough fibres of cane. It is better than wood sheathing—equals cork for insulation.

Celotex is used for sheathing instead of wood; for plaster base, roof insulation, sound deadener and exterior finish.

Stock sizes: Thickness 1/16 in.; width 4 ft.; lengths 8 ft. to 12 ft. Weight about 60 lbs. per 100 sq. ft.

This 50 cent book free to you

Homebuilders pay 50 cents for this book that shows the way to build homes of better plan and design, of greater comfort in both winter and summer, of final economy.

Your request on letterhead or coupon will bring you the book free.

Insulation has been handled by our Service Division and the 25 plans are by the Architect's Small House Service Bureau of the United States.

The book is the most important recent addition to small house literature. Send the coupon today for your copy, free.

THE ANSWER

State Architect's Society Is Simply Meeting a Professional Obligation That Individuals Will Not

"For the good of the profession," is the appeal that has been sounded by the membership committee, of which Geo. W. Allen is chairman, in approaching state architects who are not members of the Indiana Society of Architects.

The membership committee is right on the job again this year and is anxious to make a good record in 1925.

Non-members frequently say "Why should I join the I. S. of A.?" Men in other walks of life put the same question, the architect is no exception. There is one pertinent answer for such an interrogation, "Because you don't know what your fellow professional men, or business associates are doing." If these outsiders would but show the proper interest in their profession or business, as the case might be, to "sit in" at a few meetings of their individual organizations they could not but feel the spirit of constructiveness that such gatherings inspire.

Rome was not built in a day, nor was achievement attained by any organization without great effort over a considerable period. The I. S. of A. is working for you and your profession. Are you the outsider, doing as much for your profession? As regretable as the fact may be it is none the less true that certain men expect their profession to give to them, but they in turn give nothing back to that profession as far as effort to advance the profession goes. This situation is aptly illustrated synonomously by the following from a popular play of a year or so back. There was a family of New England farmers, tillers of the soil for several centuries, who held their heads aloft and felt they were better than others. The family and the poor old over-worked farm were being discussed. "The farm is almost worked out, these folks have taken and taken from the ground always demanding and expecting returns."

"And don't they ever put anything back into the ground?" came the question.

"Only themselves, when they are dead."

However, the architect and business man who gives nothing of effort to the advancement of his profession or business, but takes, and takes, and takes, can't do as much as those New England farmers, when he is dead he can't put himself "back into the ground."

The fruits of the Society's endeavor are enjoyed by all the architects in the state, a condition that should constitute an obligation on each one to make his contribution of service also, for a common good.

I. S. A., BY ITS INITIATIVE, HAS PROVED IT IS DESERVING OF WHOLE-HEARTED RECOGNITION

Is Awakened to the Opportunities As They Arise

Again evidence is at hand that the Indiana architects were on the right track who, five years ago, started agitation for a closer contact between the architectural profession and the contractural interests as a means for reaching a better understanding of building conditions and as a joint agency through which such conditions could be ameliorated to a great extent.

The agitation gradually took form to resolve itself into joint meetings between the Indiana Society of Architects and the Associated Building Constractors of Indiana which have not only proved interesting but constructive.

Several other states have followed in Indiana's wake and even nationally the movement has taken hold. Just recently a joint meeting, attended by the executive board of the Associated General Contractors of America and the board of directors of the American Institute of Architects was held in Detroit. The purpose of that conference as outlined by R. C. Marshall, Manager of the Associated General Contractors, in his opening remarks, was to undertake a study of the various economic, construction and ethical problems with a view to minimizing waste and dissention in the building industry. The outcome of the joint conference will be the formation of a contact committee of a permanent nature, representing both organizations.

It was just such effort that the I. S. A. conceived several years back and put into operation, and now that others in various parts of the country are awakening to the advantage of joint cooperation, Indiana architects should feel a keen sense of pride in their Society which has proven itself a trail blazer rather than a follower.

YOUNG AMERICA

You Can't Loose Him These Days

They were at breakfast with the little son busily engaged with eating. Anton Scherrer was telling his wife he wouldn't be home for dinner as he was going to the Indianapolis Architects' Association meeting as the annual election was to be held that evening.

"Who is president now?" asked Mrs. Scherrer.

"Herbert Foltz," came the answer.

Quick as a flash the little fellow inquired: "What happened to Coolidge?"

Build with the Builders

"The builders . . . . . are insuring their liability in their own company, a trade mutual---a company that has enviably succeeded in every factor involved in carrying out principles of compensation insurance. This company is the

ORGANIZATION AND CURRENT NEWS

PROSPERITY PREDICTED FOR 1925

Statistician of National Repute Asserts There Must Be a Readustment of Wages

In a recent address delivered at Cleveland, Roger W. Babson, business statistician and practicing economist, predicted that business conditions would be more favorable in 1925 than they were in 1924. With regard to commodity prices, he stated that the general movement during the next few years would be downward, but the immediate movement in 1925 would be upward. In the opinion of Mr. Babson, this condition will also prevail in the money market.

"There must be a readjustment of wages" said Mr. Babson. "This is rapidly coming about in the textile industry of New England. The employers are demanding a 15 per cent reduction in wages and in many instances a 10 per cent decrease has been put into operation." He predicted that the wage earner will do more work for the dollar next year than he has been doing and that as a result of the recent election labor will be slower in making demands for higher wages.

With regard to the building industry, Mr. Babson stated that only two lines of business showed an excess in 1924 over 1923—namely, construction and exporting. The total volume of construction business so far this year for the entire country exceeds that of the same period last year by 6 per cent. Most cities are overbuilt as far as office space and high grade apartment buildings are concerned, but there will be a big increase in the demand for single family dwellings and moderately priced apartments in 1925, according to Mr. Babson.

SAMUEL GOMPERS

His Passing Removes a Great Man From Labor's Councils, a Loss That Will Be Felt

A turbulent career has ended with the death of Samuel Gompers, and a big man has gone. A poor, unlettered boy, he made his own way and became one of the powerful figures of his time. He virtually created the American Federation of Labor and guided its destinies for more than 40 years.

His service was not alone to labor. Indirectly he served capital many a time, though in spite of itself and without intention. Rated usually as a "radical," Gompers has always been regarded by labor as a conservative. His essential soberness and responsibility appear in his frequent battles with extreme radicals in the ranks of American labor, and in comparison with the labor leaders of European countries in recent decades.

During the war and afterward, he held organized labor firmly against Bolshevism, I. W. W.ism and kindred heresies. When the success of the war hinged on American industry, he exerted his influence steadily for efficient labor and uninterrupted production.

It is largely due to Gompers that American labor today is imbued with the American rather than European ideals, opposing socialism and seeking progress for itself by peaceful, constitutional methods rather than revolution. He barked sometimes as loudly as any critic of the existing order, but he was cautious about biting. His efforts, on the whole, were constructive, for the classes he represented and for the nation as a whole. His restraining judgment will be missed in labor councils, and captains of industry who regarded him as an enemy may well mourn his passing.

MEANS SUGGESTED TO CIRCUMVENT THE SEASONAL UNEMPLOYMENT PROBLEM

Would Allocate Repair and Small Work to Periods When Demand For Labor Is Not So Heavy

The New Jersey Building Congress has just completed an intensive study of the seasonal unemployment question and finds that the average building mechanic is idle about one-fourth of his time. One reason for this condition, according to the report, is the reluctance of property owners to make necessary repairs, or to make them at an auspicious time—that is, when there is no great demand for skilled and unskilled labor in new construction.

As a means to ease up the seasonal unemployment problem it is suggested that certain kinds of repair work be taken up during the following periods of the year: Interior painting from November to April; plumbing alterations from December to March; roofing, conductor and gutter repairs during June, July and August; heating plants should be overhauled and repaired when shut down in the spring; major repairs and replacements or alterations in heating systems should be planned during the winter and contracts let so that work could be started in April; electric wiring, September to January; miscellaneous interior remodelling involving the employment of masons, carpenters, plasterers and lathers should be done from September 1st to April 1st.

Calumet District

THE WORST OF IT IS THAT SUCH INSTANCES ARE GOING ON ALL THE TIME

Reputable Contractors Frequently Discounted By the "Fly-by-Night" Interloper

Much as the prune, and the poor relation, the irresponsible bidder is always with us and it seems impossible to throw him off. To ignore him gets one nowhere for he insists in butting in. Especially is this all true in this day and age, for when real contractors go down to bed rock prices the man with his office and equipment under his hat steps in on the scene and carries off a nice fat contract now and then. Public officials imbued with the sole idea of saving a dollar here and there too often eagerly consider only the bidding prices in awarding the contract for a construction project. Frequently the advice of the architect or the engineer on the job goes unheeded when touching on the award feature; the precau-

HOOSIER GIANT BRIX

GIVE BETTER BUILDINGS AT LOWER COST

The chief object in any building project today is to secure better buildings at lower cost. The public demands economy without the sacrifice of quality. Architects and contractors are meeting this demand with HOOSIER GIANT BRIX, the ideal material for high grade, economical construction.

Homes of HOOSIER GIANT BRIX

In residence construction, whether for outside veneer or solid walls, HOOSIER GIANT BRIX offer all the advantages of brick construction and yet save 25% over the cost of brick. HOOSIER GIANT BRIX can be laid up in a small fraction of the time required for other construction, thus making big savings in labor cost. In beauty they match fine quality tapestry brick. They equal brick in strength and load-bearing capacity. HOOSIER GIANT BRIX are five-walled, vitrified, mat-face fire-clay units, and are adaptable for any construction where brick can be used.

For INDUSTRIAL BUILDING

HOOSIER GIANT BRIX and HOOSIER Building Tile are adaptable for every type of industrial buildings, such as schools, gymnasiums, churches, factories, garages, stores and other fireproof structures. This material insures big savings on construction cost and makes a building unsurpassed for beauty and serviceability.

Architects and contractors are invited to send for samples and illustrated literature describing HOOSIER GIANT BRIX and Building Tile. Let us submit estimates on your specifications.

tions of even an ordinary business transaction are seldom taken. The public official and even the private owner, too frequently, see only the figures without giving a thought of what is back of them. If a bid is several hundred or several thousand dollars lower than the bids of other estimators entire attention is focused on that low feature, almost no consideration is directed toward the qualifications, equipment and financial standing of the man submitting the bid. Many get assurance out of the fact that the contractor has put up a bond, but, that bond don't mean that trouble has been eliminated if the contractor goes bad. That has been one of the great troubles, too many contractors have been able to secure bonds from companies who are willing to take a long chance, and when that long chance fails there is a lot of negotiating between the bonding company and the owners before the job can get under way again, thus much valuable time is lost to say nothing of the annoyance that is caused all because the lowness of the bid appealed and no great precautions were taken to fortify with investigations that would have obviated the consequent "blowing up" of the contractor, the job.

A short time ago a western city decided to build a waterworks, advertised for bids, and a meeting was held to consider same. Some exceedingly low figures were received from responsible contractors. However, the mayor, conceived the idea that he could save money on the job by scaling down the prices, so, he readvertised the work. At the second opening of bids a proposal was received that was far below the estimated cost, it was so low in fact as to cause considerable comment. This had no effect on the mayor and the other city officials, they were delighted and properly awarded the contract for the proposed work to the unknown contractor who had obligingly submitted the bid, also a certified check. At the expiration of the time which was allowed for the signing of the contract the successful contractor was nowhere to be found. The city officials consoled themselves with the fact that they held a certified check that would protect them, but their joy was short lived, as the check came back from the bank marked "no funds." The certification had been forged.

Anent such conditions the "Texas General Contractor" says, "Contractors are the best people on earth—it's the competitive system of bidding that causes the trouble.

NO AGREEMENT REACHED

General Contractors and Carpenters' Representatives Fail to Get Far In Discussion

The scheduled meeting between official committees from the General Contractors' Council of the Calumet Contrict and the Carpenters' District Council was held at Hammond, December 8th, but no definite action resulted therefrom. Both sides entered into a general discussion of building conditions and the prospects, but that was as far as it went. When it came to the point of talking over prospective agreements for the coming year none of the members present had a 1924 agreement with him and action along that line was postponed till a later date. As matters stand now there will be another meeting of these two committees on Monday evening, January 5th.

BAD ENOUGH NOW AS IT IS

No Telling What Will Happen If This Comes to Pass

The latest building affairs information from Chicago has for its nucleus the Calumet District. The word is out that the Chicago Building Trades Council looking for new worlds to conquer has cast longing eyes toward that section of northwestern Indiana known as the Calumet District and is seriously considering the proposition of bringing that territory under its jurisdiction. This was tried once before but the effort failed.

There is this much to say about the new move. If the building trades craftsmen of the various cities in the territory to be annexed are wise they will do everything in their power to keep out of the clutches of the Chicago Council. It seems the Calumet tradesmen are perfectly capable of running their own affairs. They have done it before, they can from now on.

GO TO IT, THE SOONER THE BETTER

Chicago Builders' Organizations Debating Advisability of Consolidating

To our way of thinking, and viewing the situation from thus afar, Hammond, the move that has been launched in Chicago to consolidate the two contractors' organizations into one appears to be a wise one. Two organizations with the same purpose in mind means duplication of effort, holds the contracting fraternity somewhat apart, and really is poor business. With the memberships consolidated into one big organization much added power will be given to the contracting fraternity, will make a worthwhile solidarity and, in the end, should work to the advantage of all.

GONE BUT NOT FORGOTTEN

Contractor Minus His Car After Pleasant Evening

Just when everything was bowling along quietly, when nothing exciting had happened for several days, and it seemed that the spirit of "Peace on Earth, Goodwill toward Men" had descended upon our locality we were brought up suddenly with a decided jolt. It all happened in this manner. Contractor Bernard Graves dropped into B. T. E. A. headquarters the other evening, having driven down town. He left the little flivver down the street apiece because there was not parking space nearer. All went well until Bernard went back to get his auto when, lo and behold, there was nothing but an empty parking space. Some sneaking cuss had purloined the little car and our guest had to get home the best he could. Some of us were quite worked up but Graves says that a little thing like a stolen car will not prevent his starting for Florida next week to visit his partner who is mingling with the idle rich down there. Bernard says a missing car will get you nowhere, neither will worry.

CALUMET BUILDING PROGRESS

Architect Ellis, St. Louis, Mo., who made the plans for the new bank building at Whiting, was in Hammond Tuesday, getting in touch with contractors for bids on the job.

Architects Berry, Wainwright & Co., Hammond, will have the plans for a two-story and basement addition to the E. C. Minas building on State street, ready for bids after December 20.

Architect Mac Turner, Hammond, will have the plans for a two story and basement brick store building, 75x140, for the Modern Bakery Co., on West State street., ready for contractors to figure after December 26. The structure is estimated to cost $60,000.

The addition to the rear of one of the Minas buildings on State street was let to Joe. A. Scott, for $7,000.

Start this afternoon and run out in any direction, to the outskirts of town and notice the many new homes going up and you will be surprised by their beauty and the many modern conveniences that are now considered indispensible to the modern home-owner. Places that were newly marked out subdivisions only two years ago are completely built up today. Try and buy one of these places and you will find that they have increased in value from twenty to fifty per cent, and they were built only a couple of years ago.

SCHOOL BUILDING

NOTICE TO CONTRACTORS

State of Indiana, County of Tipton, ss:

Notice is hereby given that the Township Trustee of Cicero Township, Tipton County, Indiana, and the Board of Trustees of the School City of Tipton, Indiana, will at the office of said Township Trustee in Tipton, Indiana, receive sealed proposals for the construction of a brick and tile addition to the joint high school building in Tipton, Indiana, as set out in the specifications, plans and profile now on file in his office by and under the laws of the State of Indiana. Said sealed proposals will be opened and the contract awarded for said improvement on the 9th day of January, 1925.

Bids or proposals will be received up to 11 o'clock a. m. on said date.

The estimated cost is $52,000.00.

Bids will be for the completion of the said improvement in accordance with the plans, profile and specifications in the office of the Trustee of said Township, and shall include all labor and material for said work. In no case will extra compensation be allowed for any additional work alleged to have been done by the contractor or contractors to whom is awarded the contract.

Each bid shall be accompanied by a personal or surety bond in a sum equal to double the amount of the bid filed for the work bid on, to be approved by the Trustee of said Township and the Board of Trustees of the School City of Tipton, Indiana. Said bond shall be conditioned for the faithful performance of the work; the sureties, if personal, shall be resident freeholders of the State of Indiana, one of whom shall be a resident of Tipton County.

Said bond shall be for the benefit of any person, persons or corporation who shall suffer any loss or damage by reason of any such bidder failing or neglecting to enter into a contract to perform such work awarded to the said trustee, or to carry out the same in any particular or to pay for any labor or material which may have been furnished to any such contractor or contractors or to any sub-contractor, agent or superintendent under him, in the construction of said work, or the furnishing of said materials.

Said contract will be let as a whole or in parts to the lowest responsible bidder upon affidavit of non-collusion, which must be submitted with the bid, and upon failure to submit such affidavit such proposal or bid will be rejected by the Trustee; and the Trustee reserves the right to reject any and all bids. Time for the completion of said work will be agreed upon after the letting of said contract by said Trustee and successful bidder.

NOTICE OF BOND SALE

Notice is hereby given that on the 9th day of January, 1925, at 10 o'clock a. m., the Board of Trustees of the School City of Tipton, Indiana, will offer for sale at the office of F. M. Recobs, trustee, in Tipton, Indiana, an issue of Six Thousand ($6,000.00) Dollars of Bonds of the School City of Tipton, Indiana.

Said bonds will be ten (10) in number, dated December 16, 1924, and will bear interest at the rate of Five (5%) per cent per annum, payable semi-annually on the 16th day of June, and on the 16th day of December each year thereafter as evidenced by and upon the surrender of the coupons annexed thereto as they severally become due.

Said bonds will mature and become payable severally as follows:

One on the 16th day of June, 1926, and one on the 16th day of June in each succeeding year thereafter until paid. Said bonds to be in the denomination of $600.00 each.

Said bonds have been issued in strict compliance with the laws of the State of Indiana, and pursuant to an order or resolution of the Board of Trustees of the School City of Tipton, Ind., on the 22d day of September, 1924, authorizing said bonds to be issued for the purpose of providing funds for the erection of one half of an addition to the high school building owned jointly by said School City and Cicero Township, Tipton County, Indiana, the issuance of said bonds having been authorized by the Common Council of the City of Tipton, Indiana.

Said bonds will be sold according to law to the highest and best bidder for not less than their par or face value.

FOR ARCHITECT ENGINEER

Devoted to the Interests of the Indiana Construction and Engineering Industry

FOR SUPPLYMAN CONTRACTOR

VOL. VI INDIANAPOLIS, INDIANA, DECEMBER 27, 1924 No. 39

UTILIZING LIFETIME

Address Delivered Before National Vocational Educational Society at Indianapolis

GERHARDT F. MEYNE

Chicago Contractor

The problem before the Builder and Industrialist is "How can vocations and education be most practically combined?" as the great majority of people must labor at something productive. Educated people without a desire for labor can be an insufferable evil.

I have no particular regard for educational theories, and have no new theories to propound. In educational matters, I am thoroughly old-fashioned, and believe in creating and arousing a desire to learn to be the "Big Thing." I believe acquiring learning is purely a matter of personal practice, interest, an inquisitive turn of mind and concentration.

Within the memory of most of us, the three R's were considered to be the ample system. Half of our citizens have been educated within them. The three R's of today represent a whole lot more in study and education than formerly. There are but few in the United States who cannot read and write fluently. Many in their more mature years have acquired the love for the literary arts, understand the plays and the classics, but the growth of our educational system has all been in the same direction. There is practically no difference in the instruction given to those who are ambitious to become lawyers, doctors, engineers, architects and other professional men, and the instruction given those who are neither leaning, inclined, nor ambitious towards the professions, but are content to earn an honorable living at a trade or vocation.

Yet most of the education, after the seventh grade, is directed towards the professions. Ninety-two per cent of our youths do not get to college, approximately five per cent graduate. Let us look at the somewhat archaic and chaotic system of preparing the ninety-two per cent's lifetime in a practical manner.

Let me answer in the terms of my own industry:

In most of our States, our youths are not permitted to go to work at the building trades until they are sixteen years of age. What are we doing for these youngsters, and how are we utilizing their lifetime for the benefit of themselves, the public and the future employer? It should not be necessary for the young man who desires to become a building tradesman to be required to burden himself with many of the subjects now taught, and in which he has no interest whatsoever. He should not be required to study the same general subjects as the youth who has a leaning or ambition for the professions.

Some Inclined To Look Down Upon Skilled Craftsmen

The general tendency in the High Schools, as I know them, is to encourage students to become members of the professions,—the average high school instructor, Academician, encourages them unduly towards the professions. For some unaccountable reason, the Academician and the American parent seem to think that the professional class and semi-professional class, such as clerks, salesmen, draftsmen, etc., are considered to possess greater gentility, and they are looked upon by the present and past generation as something superior to the mechanic. Could these good people but see the numerous opportunities that are constantly presented to the vocationally trained man who knows his trade fundamentals, and could they but know of his yearly income, they would view him in appreciation instead of depreciation.

Probably nothing indicates the justification for the present demand of vocational education more than the fact that numerous college men graduating from the literary arts and science courses are turning towards the vocations as a means for a livelihood. It is not infrequent that one finds men of several years' college training endeavoring to get into the industries. When one stops to think of it, one feels that they have not utilized their lifetime to the fullest, have probably acquired considerable needless information. Of course, time spent in any education is not time lost, but many subjects that do not interest the student are taught in our present high schools and the boy who does not go to college must wrestle with them, when his time should be turned to greater practical advantage.

As a Practical Builder Views Apprentice Education

There are whole libraries written on vocational and apprenticeship education and training, but there is no need of giving historical back-ground to this subject. I would like to give you the viewpoint of a builder, one who has served apprenticeships in a trade and has worked through the various steps and is proprietor of his business. He is tremendously interested in vocational education. He is training numerous boys under various systems. Personally, I believe the old "Indenture System" has outlived its usefullness. It is no longer necessary for the master to provide shelter, food and clothing for the boy.

I hope to see that the public schools of today will be the vehicle of training the industrial arts as were the medieval monasteries of the eighth and ninth centuries. We know that it was usually a willing exchange of manual labor for protection, teaching and subsistence, either within the monasteries or to those who lived near them. Those who would gain knowledge were obliged to give their labor free in exchange for learning, protection and living, creating practically a condition of servitude. This condition no longer exists.

The thinking Builder and Industrialist is no longer vying for the Freedom of Labor, but for the Dignity of Labor, and general industrial freedom, and I believe that the time is here where the public school is taking the place of the old monastery, the time of servitude is past, the time of the old practice of indenture is slowly passing. Especially is this true in the building industry.

Builders Now Forced To Compete With Others To Secure Boys for the Industry

The builder is confronted by a peculiar situation in obtaining and teaching boys. The builder is in competition with other employers for the services of the boys. The semi-skilled trades are able to offer to the young man much greater pay, the boy can, in a comparatively short time, acquire the knowledge of running machinery and become a producer. He can earn big money by driving motor trucks and, in his limited course of reasoning, he does not see the opportunities and advantages of becoming a highly skilled artisan. It takes considerable of his time and, by reason of the cost of his training, his pay must naturally be less than that in the semi-skilled trades. Thus builders are in competition for these boys, and unless the boys' parents are able and willing to help sustain them for the first few years, it is difficult for us to give the boys all the opportunities they should have to acquire building knowledge. Hence, let us use the public school for this fitting and service.

Let us utilize the lifetime at our disposal of the young between the ages of 13 and 20, and those who are not particularly inclined towards the professions, teach them something that will be of advantage to them and advance our industries, and hope that later in their lifetime they will become interested in

1924 AN ACTIVE ONE FOR THE INDIANA SOCIETY OF ARCHITECTS

Many Successful Meetings Held, New Members Taken In and Progressive Moves Made

Another successful year has marked the progress of the Indiana Society of Architects, in fact 1924 was the best and most propitious one in the organization's history. Many successful meetings were held, active interest was shown in both professional and public matters and several new members were added to the roster.

The regional meeting scheme, inaugurated a couple of years ago, was carried forward in 1924 with even greater spirit and has resolved itself into a real institution that is attracting greater attention to the society. The attendances at the meetings are increasing, attracting architects who had never attended I. S. A. gatherings before. During the past year such meetings were held at Vincennes, Hammond, Evansville, Lafayette, Indianapolis and Fort Wayne, and in addition there were the semi-annual and annual gatherings at Indianapolis.

Probably the most noteworthy of all the meetings was the one at Lafayette which was a joint meeting with the Associated Building Contractors of Indiana, the Indiana Engineering Society and representatives of labor. This meeting was held at Purdue University at the invitation of the Engineering Extension Department. It was the first affair of its kind ever held in Indiana and was a decided success.

Another joint meeting though not of the scope of the Lafayette one was held at Hammond that proved a delightful one. The big feature of the day was a trip through one of the big steel mills at Indiana Harbor arranged for by the local architects and contractors.

Then, too, the Society, through its special appointed delegates on the Advisory Committee, has taken an active part in workings of the Administrative Building Council of Indiana, a body made up of architects, engineers, contractors, labor and state officials, which is working to codify the building laws of the State and institute standard building regulations and requirements.

All in all the Society in 1924 has had a most successful year and has done much for the architectural profession of Indiana.

ARCHITECTS, BUILDERS AND OTHERS INVITED TO HEAR TALK BY AUTHORITY ON CONCRETE

Invitation Issued by Indianapolis Chapter American Association of Engineers

Since concrete has established itself so firmly in building construction these days, to the project a skyscraper, store building, factory or a residence, any pertinent information dealing with cement or concrete, its application or uses, is of value to the architect.

That being the case it occurred to the members of the Indianapolis Chapter of the American Association of Engineers that their meeting scheduled for January 6, 8 p. m., at the Chamber of Commerce would have an appeal for the architectural profession. At that time Col. Boyden of the staff of the Portland Cement Association will be on hand to deliver an address on "Field Control of Concrete." Such items as winter work, kinds of aggregate, amount of water to be used, preparation of mix for designed strengths, etc., will be taken up, explained, and thrown open for general discussion.

An invitation has been extended by the engineers to the architects and contractors, sand and gravel men, and highway construction men of Indianapolis and vicinity to be present at the approaching meeting.

IF LUMBER COSTS ARE HIGH NOW HOW ABOUT LATER ON?

High Time Some Definite Action Was Being Exerted Toward Lumber Conservation

— One of the big problems confronting the construction industry is the rapidity with which lumber is being consumed and the lack of interest in the matter of reforestation. In an address before the leading lumbermen of the United States and Canada, President Coolidge recently had the following to say: "The era of free wild timber is reaching its end, as the era of free wild food ended so long ago. No longer can you depend on moving from one primeval forest to another. The sound of the axe has penetrated already to the last of them. This nation has now left about 745,000,000,000 cubic feet of timber; the annual drain upon it is 25,000,000,000 cubic feet. Our forest problem is a land problem of the first magnitude." It has been estimated that approximately 60 per cent of the entire original supply of American timber has been exhausted to date. Every year America is consuming more than four times the amount of the annual new growth of available timber.

Build with the Builders

"The builders . . . . . are insuring their liability in their own company, a trade mutual---a company that has enviably succeeded in every factor involved in carrying out principles of compensation insurance. This company is the

Builders & Manufacturers Mutual Casualty Company
of CHICAGO

It is a company operating solely in the building industry, insuring only the compensation and public liability of its members, and furnishes such insurance at a remarkably low cost."

ORGANIZATION AND CURRENT NEWS

UTILIZING LIFETIME

(Continued from Page 5)

the fine arts and general cultural attainments.

I do not feel that the entire school periods of the boy between 13 and 20 should be engaged in teaching them vocations, but I do feel that, together with teaching them something practical, the seed and desire for learning can also be planted, and if he is endowed with an inquisitive turn of mind, he will learn, by applying himself, much of the culture that is now the requisite of gentility. Should he not be endowed with a desire to know more than the three R's, no amount of tutoring or cramming between the ages of 13 and 20 will give it to him.

Give Boys a Chance To Find Themselves

I have often been asked what my plan of education would be, so I will repeat it to you. Those boys who are not interested, or who, by reason of necessity, cannot go into the profession, or whose parents are unwilling or unable to provide the expense of this education, I would like to see started at an early age, put in a sort of cycle course where their vocational learnings can be discovered.

After a boy has found himself, or his vocational leaning has been discovered and has decided he would like to become a building mechanic, then the rudiments of these trades can and should be taught in the public schools. Brick-laying, carpentry, plumbing, steam-fitting, and the various other trades, can be taught advantageously in the public schools, but I want to go on record that you cannot make a Finished Artisan in the public school.

To become a finished artisan requires knowledge, and the only place it can be acquired is at the building.

Even though the builder feels that it is entirely possible to teach the rudiments of the trades in the public schools, utilizing such time as may be necessary for the seeding of cultural attainments, the elements in civic and community service, etc., yet when the boy appears for the periods set aside for his chosen trade, he should be in the hands of a practical teacher who has gained his experience on the building.

Preparing the Boy Physically Is Also Essential

As to the practical side of teaching a trade to the boy, you can teach the boy in the brick-laying trade, how to cut brick, how to lay out an arch, how to cut tile, how to lay up the various bonds, how to lay out his corners and lay out a building generally, so that when he comes to a building he is not ungainly, he knows something of what might be expected of him. A big thing to acquire in the building trades is also the moulding and shaping of the body and muscles. It is as necessary for the plasterer to have command of his feet as it is for him to acquire the wrist motion. It is as necessary for him to be able to balance the hook as it is for his eye to watch that part of the work to which he is applying his skill. It is necessary to train the eye, mind and muscle to act in unison, the eye to watch the reaction of the tool and not the hammer stroke. When the boys are young, this can be most advantageously accomplished. Why should we wait to train the body and muscles of a boy who expects to make his living in the building trades. These are all things that can be taught in the public schools. They are big things; they are interesting, and they enable the youths to command a fair wage, when you dismiss them at 16 years of age, with prospects of great future opportunities, only limited to the extent of willingness and application of endowments.

I want to call your attention again to the fact that the periods not required for educational training can be used by the Academician for teaching and seeding the cultural and gentile pursuits.

Would Lead To Real Craftsmen In the End

The practical teacher can develop in the boys a vocational and trade consciousness, trade pride and appreciation for fine workmanship. It can be pointed out to him that it is not sufficient to know enough of the trade to "just get by" ;that it is unfair to his brother craftsman to hold them down to a general level when the wage is based on the production and ability of the poorest workman. We know that a poor workman is a parasite on the good mechanics' ability. We can develop a trade consciousness in the building industries, and develop a set of craftsmen who not only have a Union, but also a Trade."

EXTENSIVE EFFORT BEING EXERTED TO BOOST WINTER CONSTRUCTION WORK

Employment Feature Appeals as it Influences Other Business Channels and the Public

The campaign for more building and repair work during the winter months, aimed at reducing unemployment and giving the public greater returns for the money it spends on construction, is finding much of its most energetic support from manufacturers and distributors of building materials, according to the Division of Building and Housing of the Department of Commerce. Many of the most prominent concerns in the country, as well as organizations doing a smaller business and retailers, have called attention in various ways to the advantages of winter building.

The usual let down in construction during the winter has in the past cut down retail sales, and consumption of practically all building materials, to a fraction of summer business. The uneven demand extends back to the raw products from which materials are made, and results in irregular employment and decrease in purchasing power on the part of a large section of the community. The seasonal fluctuations in railroad traffic are increased, and there is a generally upsetting influence on business and employment. The vigorous campaign for a more even building year is therefore being supported by manufacturers who are not only contributing to public education on the subject, but are working on the technical problems which concern builders in making winter work easy and economical.

The basic idea in the campaign is that all persons planning new construction or the employment of building trades workers for repairs or other purposes should take into account probable employment conditions in determining when to start the work. In this way the unemployment of building trades workers and of building material producing organizations during several months of the year is being reduced and the public is profiting.

HOLLOW TILE WALLS GIVEN FIRE TEST

Makes Good As Does Plaster As Aid To Fire Protection

Hollow building tile having double shells on the two exposed sides give very good results from the point of view of fire protection, the Bureau of Standards finds. The exposed shell serves as a protection for the rest of the tile, and in order to distribute the stresses

properly, the webs connecting this outer shell with the inner wall of the tile should be thinner or less in number than the webs back of the inner wall.

Gypsum and Portland cement plaster coatings over hollow tile will stay in place during ordinary fire exposure and will give about the same protection from fire as the addition of one wall and cell to the thickness of the tile.

The addition of a combustible filler, such as sawdust, to the clay in amounts from 5 to 15 per cent by volume, decreases the cracking of the burnt tile when exposed to fire, but has the disadvantage of producing a decrease in strength for the larger amounts of filler, thus lessening the ability of the tile to carry load under fire exposure.

More than 100 tests of small tile panels have been made, the panels forming one side of a special furnace. Eight tests have been made on walls 11 by 16 feet, and these are the first of a series of 50 fire tests to be conducted on hollow tile walls in the near future. Some of these walls will be tested restrained by the heavy panel frame as they would be if supported by cross walls during an actual fire. Others will be unrestrained, being supported only at the bottom. In some of the tests the walls will carry their normal working load.

Other points found to add to the quality of tile are sufficiently fine grinding of the raw material, the even burning of the clay to normal hardness for that particular clay, the provision of sufficiently heavy shells and webs, and the use of ample fillets where the webs join the shell.

Calumet District

TO YOU ALL

Hammond builders extend to the builders of Indiana the season's greetings, wish them happiness and prosperity thruout the coming new year.

ROOM FOR IMPROVEMENT IN RELATIONSHIP BETWEEN GENERAL CONTRACTORS, SUB-CONTRACTORS, AND MATERIAL MEN

Present Status Proves Annoying at Times

Another angle along the line of obstructionist influence that besets the building industry is set forth in The Constructor by J. C. Edwards, of Los Angeles, who has this to say:

"The relationship between the general contractor, sub-contractor, and the material man, or probably the lack of the same, is the cause of a great deal of trouble any annoyance in the conduct of your business and mine. It has been said that the sub-contractor and material man are a necessary evil on the building construction industry, and they retaliate with what is just as true a statement that the general contractor is an unnecessary evil. The differences that arise between these three groups probably began with the signing of the first general contract; each year thereafter these varied opinions have grown and multiplied until they have assumed the definite proportions of real problems in the building business.

"I fully realize the vast amount of criticism that has been directed toward the general contractor and it all simmers down to the one complaint, that time worn phrase of 'peddling bids.'

"We as general contractors complain bitterly when an owner sees fit to seek to save money by playing one contractor against the other. Then, why has not the sub-contractor and the material man the same right to complain when the general contractor resorts to the practice that he objects to, for he is prone to pit sub-contractors and material men against each other, though he may have been successful in securing a contract with the assistance of a price that anyone of these may have given him when estimating the job.

"Do not misunderstand me in the use of the term 'playing one against the other.' We should and must be played one against the other in a fair race in order that true competition be maintained. I employ the term only when it is used to excite or obtain the wrong kind of competition.

"There are several reason why our relations are not exactly what they should be and there have been numerous suggestions advanced as to how to improve those relations. However, in most of the suggestions for improvement I see the opportunity for the development of combinations that would trend toward price fixing and job allocating,—this I feel would be a serious backward step in our industry and would serve to undo, to no small extent, that which may have been accomplished by various associations of the industry during the past few years.

"The reason for our misunderstandings, one with the other, are legion and can probably all be laid at the door of selfishness—for this there is no other correction other than that that comes from within; no agreements, codes of ethics, or any other agency than ourselves individually can correct it.

"We can, however, enact agreements and establish ethics that will make it more difficult for us to practice that particular virtue that all of us possess to a more or less degree.

"The general contractor should deal honorably with the sub-bids and material prices he receives and uses in securing a contract, but, the sub-contractors and material men must quote him honorable prices and not ones that they anticipate he will seek to cut later. They must give the general contractor prices that he can rely on and that they will stand behind to the last ditch and absolutely refuse to lower no matter what happens."

GENERAL CONTRACTORS TURN ATTENTION TO WAGE SCALES

To Start Preliminaries Next Week

Now that the building rush is over, the Christmas shopping delirium has been cured, and a spell of quiet confronts the building industry, Hammond's alert general contractors have sought something more intense than cross word puzzles, so, they have decided to meet at the headquarters of the Building Trades Employers' Association, December 29th, to discuss building conditions, the future prospects, and new wage scales for the 1925 season. "Anything to keep busy," is their motto. Well, the program they have mapped out ought to meet the requirements.

THAT'S NICE

Motor Bus Transportation at Hammond Meets Rigors of Winter With Success

The new motor bus transportation system that has been installed in Hammond has proved its worth to date. That much can be said for it. During the recent blizzardy weather that gripped the Calumet District the new busses succeeded in maintaining their schedules, despite the fact that the streets were covered with ice, and managed to get the people back and forth to their work in better time than the street cars could do it.

GOOD RECORD BEHIND HIM

New President of A. F. of L. Enters New Post Well Qualified

While the passing of Samuel Gompers was a hard blow to Organized Labor, it would seem at this time that a wise choice was made by the American Federation of Labor in the selection of William Green to succeed to the head of that organization. He has a fine record in the Labor field.

SOMETHING TO THINK ABOUT

Chicago Again Facing the Uniform Scale Demand

Again the uniform scale "bogey" for all the building crafts in a given territory looms up.

Over in Chicago there is a movement on foot to demand for the 1925-26 season a uniform scale of $1.50 for all building craftsmen when the present agreements expire May 1, 1925. Wonder if Judge Landis will be called upon, or see fit, to seek again to straighten things out. It is a big job for somebody.

CALUMET BUILDING PROGRESS

The rain and sleet that ushered in the cold wave last week all combined to put the quietus on Calumet District building operations.

Local architects have little or nothing to announce on new building prospects these days.

Contractor Bernard Graves, whose car was appropriated by some unknown last week, got his "traps" together and sallied forth for a sojourn in Florida. He got away just in time to escape the big freeze that came blowing in from the lake.

A large amusement syndicate has leased from the park board of Hammond the strip of lake front purchased last spring. It is intimated that the lessees have a fine amusement resort under contemplation which it is hoped to have in readiness for business by May 15, 1925.

The Home Lumber Co. has opened its new yard at Hessville, Ill., thus eliminating the former long haul from Hammond.

E. E. COLE.

EVANSVILLE

ACTIVE BUILDING CONSTRUCTION MOVEMENT EXPECTED IN 1925

Evansville Building Men Entertain Much Hope for the New Year

The general opinion expressed amongst architects, builders and material men of Evansville is that prospects for building operations in 1925 are very good, in fact, it is openly asserted that there is every reason to expect a fine building year for the local and southern Indiana territory.

The past year was spotty as far as building was concerned, prospects loomed encouragingly and while a fair proportion developed, many of them failed to mature and faded away, leaving a season in which the building movement was below normal.

During 1924 the city built few projects of moment and it was smaller mercantile and industrial structures, together with much home building, that saved the day, such work serving to build up a fair volume of construction business.

However, the dawn of the new year is lightened up by promising prospects, some of which have developed to the stage that indicates maturity before long. A few contracts have been awarded recently, bids have been received to be taken under advisement, also plans are being prepared in some cases and there is some good prospective work in sight.

Thus it is that those familiar with local conditions are anticipating a good building season ahead for Evansville and the surrounding territory extending down into Kentucky and over into southern Illinois.

FT. WAYNE

HEAVY BUILDING VOLUME REFLECTED BY DEMAND PUT UPON EDUCATIONAL FACILITIES

School System Expansion Forced by Constant Flow of Building Operations

In keeping with the great volume of building construction that has swept Ft. Wayne in the past few years the local board of education has been right on the job all the time realizing that the city's expansion is going to put a heavy demand on the school facilities. As a result of that alertness to the challenge that has been sounded the board has contributed a large share of new school building work to the general construction volume.

A recent survey made by the Chamber of Commerce shows that there has been a rapid expansion of the Ft. Wayne school system which is a most creditable performance by the city and one that stands out in the front rank when compared with the records of other Indiana cities.

As matters now stand the valuation of the local school properties is placed at $11,500,000. This includes parochial schools as well as public schools. An analysis of the total buildings shows: 23 public grade school, two public high schools, one vocational school, 19 parochial grade schools, and three parochial high schools.

More than 23,000 pupils are enrolled, and 1,752 teachers are employed.

ONE BIG REASON FOR THE BUILDING OF SO MANY HOMES IN FORT WAYNE

Prospective Home Builder Not Without a Helping Hand

One of the big factors in Ft. Wayne's active home building operations during the past few years have been the local trust companies which thru loans have made possible twelve hundred and more new residences annually.

The trust companies have proved a blessing indeed to the home builder, the man who wants to create a saving account, and to the realtor who finds it necessary to procure a loan on transactions made by him.

The loans made by the Ft. Wayne trust companies run into the millions every year. It is this spirit on the part of these institutions that adds from 1,200 to 1,500 homes every year. There is no city in the middle west where realtors and builders depend upon its trust companies to a greater extent than in Ft. Wayne.

Under such circumstances it can readily be seen that these companies play a big part in the city's building effort.

Schwartz, Winnetka, Ill. Plans in progress. Brick.

Residence: $10,000 (6 rooms), Mt. Vernon, Ill. Archt., Harry E. Boyle & Co., Furniture Bldg., Evansville. Owner, W. H. Vasel, Mt. Vernon, Ill. Plans in progress. Bids in two or three weeks. Brick.

Start this afternoon and run out in any direction, to the outskirts of town and notice the many new homes going up and you will be surprised by their beauty and the many modern conveniences that are now considered indispensible to the modern home-owner. Places that were newly marked out subdivisions only two years ago are completely built up today. Try and buy one of these places and you will find that they have increased in value from twenty to fifty per cent, and they were built only a couple of years ago.

Lumber, Concrete Blocks, Cement, Roofing, Lime, Plaster
"Everything furnished to build anything"

Sealed Proposals

NOTICE OF BOND SALE

Notice is hereby given that on the 9th day of January, 1925, at 10 o'clock a. m., the Board of Trustees of the School City of Tipton, Indiana, will offer for sale at the office of F. M. Recobs, trustee, in Tipton, Indiana, an issue of Six Thousand ($6,000.00) Dollars of Bonds of the School City of Tipton, Indiana.

Said bonds will be ten (10) in number, dated December 16, 1924, and will bear interest at the rate of Five (5%) per cent per annum, payable semi-annually on the 16th day of June, and on the 16th day of December each year thereafter as evidenced by and upon the surrender of the coupons annexed thereto as they severally become due.

Said bonds will mature and become payable severally as follows:

One on the 16th day of June, 1926, and one on the 16th day of June in each succeeding year thereafter until paid. Said bonds to be in the denomination of $600.00 each.

Said bonds have been issued in strict compliance with the laws of the State of Indiana, and pursuant to an order or resolution of the Board of Trustees of the School City of Tipton, Ind., on the 22d day of September, 1924, authorizing said bonds to be issued for the purpose of providing funds for the erection of one half of an addition to the high school building owned jointly by said School City and Cicero Township, Tipton County, Indiana, the issuance of said bonds having been authorized by the Common Council of the City of Tipton, Indiana.

Said bonds will be sold according to law to the highest and best bidder for not less than their par or face value.

The right is reserved to reject any and all bids.

SCHOOL CITY OF TIPTON, INDIANA.
By I. H. WOODRUFF, President.
C. H. WARNE, Secretary.
JENNIE HURON, Treasurer.
F. M. RECOBS, Trustee,
Member Ex-Officio.

Dec. 20-27, Jan. 3.

NOTICE OF BOND SALE

Notice is hereby given that on the 9th day of January, 1925, at 10 o'clock a. m., the Township Trustee of Cicero Township, Tipton County, Indiana, will offer for sale at his office in Tipton, Indiana, an issue of $22,500.00 of bonds of Cicero Township, Tipton County, Indiana.

Said bonds will be twelve (12) in number, dated June 1, 1924, one (1) of $500.00 and eleven (11) of $2,000.00 each, bearing interest at the rate of five (5) per cent. payable semi-annually after date, on the 1st day of December, 1924, and on the 1st day of June, 1925, and on the first day of December and June of each succeeding year as evidenced by and upon the surrender of the annexed coupons as they severally become due and maturing serially as follows: $500.00 maturing June 1, 1926, and $2,000.00 on June 1st on each succeeding year thereafter until paid.

Said bonds have been issued in strict compliance with the laws of the State of Indiana and pursuant to an order of the Advisory Board of said Township, made and entered of record on the 26th day of April, 1924, authorizing said bonds to be issue for the purpose of providing funds for paying for one half of an addition to the high school building, owned jointly by said Township and the School City of Tipton, Indiana.

Said bonds will be sold according to law to the highest and best bidder for not less than their par value.

The right is reserved to reject any and all bids.

FRED M. RECOBS,
Trustee Cicero Township, Tipton County, Indiana.
Dec. 20-27, Jan. 3.

NOTICE OF BOND SALE

Notice is hereby given that on the 9th day of January, 1925, at 10 o'clock a. m., the Trustee of Cicero Township, Tipton County, Indiana, will offer for sale at his office in the City of Tipton, Indiana, an issue of Six Thousand ($6,000.00) Dollars of bonds of Cicero Township, Tipton County, Indiana. Said bonds will be Ten (10) in number and will be dated December 1, 1924, each of said bonds being for $600.00, and will bear interest at the rate of 5% per annum, payable semi-annually after date on the 1st day of June, 1925, and on the 1st day of December, 1925, and on said dates in each succeeding year thereafter. Said interest to be evidenced by coupons representing the amount of such interest. The first of said bonds shall mature on June 1, 1926, and one each year thereafter for the next succeeding nine (9) years.

Said bonds have been issued in strict compliance with the laws of the State of Indiana and pursuant to an order of the Advisory Board of said Township, made and entered on the 11th day of October, 1924, authorizing said bonds to be issued for the purpose of providing funds necessary to pay for one half of an addition to the High School building owned jointly by said Township and the School City of Tipton, Indiana.

Said bonds will be sold according to law to the highest and best bidder for not less than their full appraised value.

The right is reserved to reject any and all bids.

FRED M. RECOBS,
Trustee Cicero Township, Tipton County, Indiana.
Dec. 20-27, Jan. 3.

NOTICE OF BOND SALE

Notice is hereby given that on the 9th day of January, 1925, at 10 o'clock a. m., the Board of Trustees of the School City of Tipton, Indiana, will offer for sale at the office of F. M. Recobs, Trustee, in Tipton, an issue of $22,500.00 of bonds of the School City of Tipton, Indiana.

Said bonds will be ten (10) in number dated June 16, 1924, of $2,250.00 each bearing interest at the rate of 5 per cent per annum, payable semi-annually on the 16th day of June and on the 16th day of December each year as evidenced by and upon the surrender of the annexed coupons as they severally become due.

Said bonds will mature and become payable serially as follows: One on June 16, 1925, and one on the 16th day of June in each succeeding year thereafter until paid.

Said bonds have been issued in strict compliance with the laws of the State of Indiana and pursuant to an order or resolution of the Board of Trustees of the School City of Tipton, Indiana, duly entered of record on the 9th day of May, 1924, authorizing said bonds to be issued for the purpose of providing funds for the erection of one half of an addition to the high school building owned jointly by said School City and Cicero Township, Tipton County, Indiana.

Said bonds will be sold according to the law to the highest and best bidder for not less than par or face value.

The right is reserved to reject any and all bids.

W. H. Barrere, Jr., Pres.
Merchants Bank Building
Indianapolis

diana, and the Board of Trustees of the School City of Tipton, Indiana, will at the office of said Township Trustee in Tipton, Indiana, receive sealed proposals for the construction of a brick and tile addition to the joint high school building in Tipton, Indiana, as set out in the specifications, plans and profile now on file in his office by and under the laws of the State of Indiana. Said sealed proposals will be opened and the contract awarded for said improvement on the 9th day of January, 1925.

Bids or proposals will be received up to 11 o'clock a. m. on said date.

The estimated cost is $52,000.00.

Bids will be for the completion of the said improvement in accordance with the plans, profile and specifications in the office of the Trustee of said Township, and shall include all labor and material for said work. In no case will extra compensation be allowed for any additional work alleged to have been done by the contractor or contractors to whom is awarded the contract.

Each bid shall be accompanied by a personal or surety bond in a sum equal to double the amount of the bid filed for the work bid on, to be approved by the Trustee of said Township and the Board of Trustees of the School City of Tipton, Indiana. Said bond shall be conditioned for the faithful performance of the work; the sureties, if personal, shall be resident freeholders of the State of Indiana, one of whom shall be a resident of Tipton County.

Said bond shall be for the benefit of any person, persons or corporation who shall suffer any loss or damage by reason of any such bidder failing or neglecting to enter into a contract to perform such work awarded to the said trustee, or to carry out the same in any particular or to pay for any labor or material which may have been furnished to any such contractor or contractors or to any sub-contractor, agent or superintendent under him, in the construction of said work, or the furnishing of said materials.

Said contract will be let as a whole or in parts to the lowest responsible bidder upon affidavit of non-collusion, which must be submitted with the bid, and upon failure to submit such affidavit such proposal or bid will be rejected by the Trustee; and the Trustee reserves the right to reject any and all bids. Time for the completion of said work will be agreed upon after the letting of said contract by said Trustee and successful bidder.
